Messrs. Harry McDonald and John Hayes, who have the contract, are busy with putting a concrete flooring in the stables of the fire hall. A depression is left in the concrete at the point where the horses stand to be filled with wooden flooring. This will be a great improvement, permanent in its character with the advantage of being able to flush the stalls, keeping them perfectly fresh and clean.

Look them over carefully, you will find every kernel perfect.

"A Time for Work and a Time for Play"

There was a Grand Rally of Scholars at the September Opening of the schools in the different wards of the town. Hundreds of smiling youngsters, reinvigorated by weeks of superb holidays, formed in line, eager for a good term's work. The names were registered and the class appointments made, after which the list of School Books and Supplies were given to the scholars.

Then there was ANOTHER GRAND RALLY to the **PETERBOROUGH BOOKSTORE,** and the

"TRAMP! TRAMP! TRAMP!"

Of Boys and Girls in and out of our store was a sight to behold!

Every scholar who has not yet been supplied should come straight to STRATTON'S, because at this big store, the biggest and best of everything that is on their list, is to be got, and a Present thrown in with every purchase.

Every Price the Lowest in the Town.

SPECIAL PRIZES will be given away to all Purchases of School Supplies from September 1st to September 10th.

BARNARDO GIRLS' REUNION.

A Pleasant Gathering in Durham County

The Salem correspondent of the Bowmanville Statesman says:—On Thursday, Aug. 25, the girls from Dr. Barnardo's Home, who reside in the neighbourhood, met at the home of Mr. F. L. Squair for a social reunion, and put in a jolly time with games and singing, picnicking on the lawn, etc. A few other young friends had gathered to help entertain the girls, who numbered ten, namely:—Misses Maud Adams, Aggie Dodds, Jennie Kibble, Lena Kirk, Victoria Morgan, Mary Stubbs, Mabel Stringer, Mary Smith, Maggie Simpson and Martha White. The young ladies certainly reflect much credit on the work of their benefactor, Dr. Barnardo.

FRUITS AND FLOWERS IN BRIGHT ABUNDANCE.

ANNUAL EXHIBITION OF THE HORTICULTURAL SOCIETY.

The Largest and Best Display in its History—Big Excess of Entries and Keen Competition—Every Class Well Filled—Disappointing Attendance of the Public—The Prize List.

The annual meeting of the Peterborough and Ashburnham Horticultural Society, held yesterday afternoon and evening in the Market Hall, will go upon the records of the society as the best, up to the present time, in its history. The entry list was a quarter larger than the largest of previous exhibitions and the quality of exhibits was a matter of pride to the exhibitors and of pleasure to the spectators, who, by the way, were far too few for the merits of the exhibition and in view of the important, practical and æsthetic interests represented by the society.

The hall last night was a charming wilderness of varied floral beauty. Every available convenience for the display of fruits and flowers was made use of, in fact some of the exhibits were too crowded to be the most fully effective. In cut flowers the most brilliant possible display was made. Table after table was ranged along the east side of the hall, north of the entrance, each a veritable mosaic of gorgeous hues.

GIVING OUT DELIGHTFUL FRAGRANCE.

The competition in hand and table bouquets was very sharp, and the casual onlooker admiring the beauty of their arrangement and the harmonious blending of the numerous tints, found it difficult to decide upon a choice of the best. The amateur display was a splendid one, and the results were exceedingly complimentary to the industry and floricultural intelligence of the enterprising exhibitors. Flower culture seems to be a fitting occupation for ladies and the show last night demonstrated the success with which they applied themselves to the work. The popular progress that has been made in flower growing is proven by the fact that of the numerous exhibitors, everyone was represented in the prize list. While some enthusiasts got the lion's share of the prizes, there was an evenness of merit that distributed the honours amongst all.

Amongst the floral exhibitors, Jas. Head, head gardener of the Nicholls Hospital, was the largest exhibitor, with fifty distinct entries of flowers.

Mr. J. H. Cobb was on hand with about forty-five entries. Mr. Percy Hamilton was represented by a score of entries, and Miss Alice Mills by a similar number. Mrs. Cooney, of Ashburnham was also a large exhibitor, and also Mrs. Frank Wise. Among the other exhibitors were Mrs. (Hon.) R. Hamilton, Miss Mamie Hamilton, Miss Laura Davidson, Mr. Frank Wise, Mr. Jas. Long, Mr. H. Nesbitt and Mr. W. H. Foord.

The display in the fruit and vegetable department was very creditable.

MANY SPLENDID SPECIMENS

of both being shown. Among those competing in these classes were Mr. James Head, Mr. J. H. Cobb, Mrs. (Hon.) R. Hamilton, Mrs. B. Cooney, Mr. James Long, Mr. Percy Hamilton, Mr. W. H. Foord, Mr. Joseph Giles, Mrs. John Cox and Mr. E. B. Edwards. Altogether the exhibition was a marked success as an exhibition: all that was lacking was the attendance of an appreciative public, who are, however, the greatest losers. Those who were present were delighted with what they saw.

In the professional class, Messrs. Jordan Bros. had the field practically to themselves, Mr. Frank Wise making one or two exhibits in this class.

The exhibition was pronounced by Mr. E. Ernest Collins, of the Horticultural Gardens, Toronto, as better than the Toronto Exhibition, in the amateur department.

The following is the

SPECIAL PRIZES FOR LAWNS.

1st prize—Frank Wise.
2nd prize—W J Thompson.
3rd prize—J H Cobb.
4th prize—Richard Hall.

NOTES.

Mr. Collins' judgment was something unique. He performed the unprecedented task of giving universal satisfaction in his award of prizes, a circumstance that demonstrates alike his knowledge of his work and his judicial impartiality.

The Sons of England Band was present and furnished excellent music.

Mr. J. H. Cobb makes his last display this year as an amateur exhibitor, and next year will figure in the professional ranks. He has won his spurs as an amateur, having perhaps the largest list of first prizes to his credit of any past or present member of the society.

The Press has special reason for acknowledgement of favours received, not only from Mr. Brownscombe the obliging secretary, in facilitating their work, but from several exhibitors, but also at the hands of exhibitors. Mrs. B. Cooney, Mr. J. H. Cobb and Mr. H. Long are cordially thanked for liberal gifts of fruit and flowers. Their action shows the broadening and elevating influence of flower culture. They derive pleasure from the occupation and as much pleasure in sharing the results of their labour with others, thus exemplifying the sentiments of the Byronic couplet.

NAVIGATION NOTES.

Breezy Items From the River and Rice Lake Ports.

The steamer City of Peterborough brings up a large excursion from Bewdley to-morrow.

The steamer Eclipse and scow brought up a three hundred passengers from Rice Lake ports to-day.

The Millbrook baseball club and the West End club of Peterborough play a return match for a silver cup at the brewery picnic on Wednesday, Sept. 7th.

Scores of duck shooters were down the river yesterday and out on the lake, but very few birds were secured, as the weather is too warm for them to begin to flock to any extent yet.

A Numismatic Find.

The other day while making a water service connection on Aylmer street nearly opposite Dr. Greer's, Mr. Peter Thompson, plumber, found in the trench at the depth of eight feet a halfpenny of the reign of George II, 1748. There is nothing extraordinary in the coin itself, but its being found at the depth of eight feet is suggestive of the many mutations that have came to pass since the coin was lost, possibly fifty years, or more, ago. Mr. Thompson is anxious that the owner should recover his property. He thinks that some child lost it on his way to buy a stick of candy, and he says that if the late owner will call upon him he will be pleased to return him his ha'-penny.

Phelan House Improvements.

Mr. E. Phelan evidently has no fears of the coming plebiscite very speedily "banishing the bar." He has had extensive and marked improvements made to his bar room. The walls and ceilings have been repapered in bright gilt papers with appropriate borderings and friezes. The sitting room adjoining in the rear has been similarly treated, and the woodwork of both rooms has been handsomely grained, and now both are bright, clean and inviting. The veteran Watson is responsible for the excellent work done, for which the Peterborough Bookstore provided the material. The bar room has been provided with a beautiful British plate mirror 10 feet square, handsomely framed in oak by Mr. D. Belleghem. Altogether the improvement is marked and quite in line with the ambition of Mr. Phelan to have the most cleanly, comfortable and most home-like hotel in Peterborough, and his numerous patrons can bear testimony to the great extent to which his ambition is realized.

Can't Sleep.

The weary vigils of the night, anxious hours that drag like days. How often they come, and how unwelcome they are. A system robbed by sleeplessness of natural rest cannot be vigorous and strong. The nerves are at fault and must be built up. Dr. Ward's Blood and Nerve Pills are the remedy that cured

MISS EMMA TEMPLE.

HERE IS WHAT SHE SAYS:

At last, after eight months of physical weakness and nervous prostration, caused by over exertion and want of rest,—during which time I suffered greatly on account of the shattered condition of my nerves, and for which I was unable to find any relief. I have found a medicine (Dr. Ward's Blood and Nerve Pills) that in three months made my nerves strong, removed all nervous troubles, built up my physical system and made me strong and well. They removed despondency, and in consequence of taking your valuable Pills I look forward to the future hopefully. I have to thank your great cure for nervousness and bodily weakness for my present good health and strength.

Yours truly,

Signed, EMMA TEMPLE, Hastings, Ont.

Dr. Ward's Blood and Nerve Pills are sold at 50 cents per box, 5 boxes for $2 00, at druggists, or mailed on receipt of price by The Dr. Ward Co., 71 Victoria St., Toronto. Book of information free.

DISCIPLINE.

Its Perfection Shown In Time of Danger on Board a Man-of-war.

After lunch, writes Stephen Bonsal, in *McClure's*, as I *walked with an officer* upon the spar deck an orderly came up and said just as if he were announcing supper or eight bells, "I have to report a fire in a coal bunker." "All right," replied the officer; "will be down immediately." Then, with a parting whiff, he threw away his cigar, and we went down the companionway together.

There upon one of the lower decks a sentry, with the most quizzical expression of curiosity upon his face that I have ever seen, stood before a great dial like those in use in modern hotels, the indicator of which pointed steadfastly to the little face of the dial marked "B 21."

My companion, the officer, went down still further into the bowels of the ship, while I stood with astonishment at the indicator, with wonderment as great, if not as open mouthed, as the sentry's. "It's a wonderful thing, this here machine," he said. "It keeps me awake at night, it's so darn human. It rings up a fire in some spooky way, just as if you or I might touch a bell and order up a mint julep. Yes, it do, sir."

Where B 21 was neither he nor I knew, but we agreed in the hope that the burning bunker might be far from the magazines. There was some talk about playing that number and that letter in the next game of chance upon which we entered until gradually the consciousness dawned upon us that we were even at this moment engaged upon a game of most serious hazard and that the cards might go against us.

I smoked my cigar for an hour upon the signal tower, wondering all the while how the invisible flames were growing and whether they were gaining headway, and so, having given evidence of what I considered almost Spartan stoicism, I grabbed the officer as he came up from below, covered with coal dust and sweat, and said with as cheerful mien as I could muster, "And how about B 21?"

"Let's go up on the bridge; it's cooler there," was the only reply vouchsafed. So we climbed up to the fighting tops, I drawing a certain satisfaction from the thought that if we blew up we should still be on top, and never from that day to this have I heard a word of how the fire in coal bunker 21 was put out, and, for all I know, it may be burning to this day.

The doctor may be a good old man, but even so, medical examinations and the "local application" treatment are abhorrent to every modest woman. They are embarassing—often useless. They should not be submitted to until everything else has been tried. In nine cases out of ten there is no reason for them. In nine cases out of ten, the doctor in general practice isn't competent to treat female diseases. They make a branch of medicine by themselves. They are distinct from other ailments. They can be properly understood and treated only by one who has had years of actual practice and experience in this particular line. This is true of Dr. R. V. Pierce, chief consulting physician of the Invalids' Hotel and Surgical Institute, at Buffalo, N.Y. Dr. Pierce's Favorite Prescription, a remedy for all derangements of the reproductive organs of women, has been in actual use for more than thirty years. It cures every form of "female weakness."

The Trials of a Nurse.

A few old fashioned girls still live, despite the claim that the young woman of the present day is a business person who gives no thought to "the coming man." This fact was forcibly impressed on several people recently. A party of nurses were discussing cases and their own grievances.

"I learned to be a trained nurse," said one, "because I heard that a hospital was a regular matrimonial market. It is eight years since I graduated," she wailed, "and I am single yet. I am still nursing. If something does not happen soon, I will be an old maid."

And she arose wearily and left to take charge of her next case.—St. Louis Post-Dispatch.

All Nerves.

Many people say they are "all nerves," easily startled or upset, easily worried and irritated. Milburn's Heart and Nerve Pills are just the remedy which such people require. They restore perfect harmony of the nerve centres and give new nerve force to shattered nervous systems.

THE BISCUIT DIDN'T RISE.

How a Young Cook Thought to Remedy a Mistake.

They had been visiting and while away had been given such delicious homemade biscuit that the memory of them still lingered in the mind. Why shouldn't they have such things themselves? The mistress of the house decided that they should, if she had to make them herself. What good wife would not be willing to take a little trouble to please her husband? So in this virtuous frame of mind she repaired to the kitchen, and there she stirred up her biscuit in the most approved fashion, shaped them daintily and put them in the pan. But she was not accustomed to this work, and it was not strange that she should forget some of the ingredients. It was the baking powder, a small but somewhat important item in the construction of light biscuit. She did not once think of it until the biscuit had been in the oven a few moments. Then, as she stood gazing admiringly at the outside of the range, which contained this precious proof of her culinary skill, she suddenly exclaimed:

"There, I forgot all about the baking powder."

That would have been a heartbreaking thought to most housewives, but not to this one. She was a woman of expedients.

"Never mind," she said as she hurriedly thought over various ways of mending matters; "those biscuit have only been in a short time, and I will just sprinkle the baking powder over the top, and it can melt and soak in." And she did, but the baking powder did not. The housewife herself tells this story of her cooking now with great glee, while her husband, being a patient man, never says a word about his part of it in the eating.—New York Times.

THE SECRET OF BEAUTY.

One Can Never Be Pleasant to Look Upon Unless In Good Health.

"The most helpful and agreeable bath is that of tepid water," writes Ruth Ashmore in The Ladies' Home Journal. "Few people can stand absolutely cold baths, and, no matter how strong one may be, such a bath should not be indulged in unless a thorough rubbing be taken afterward. To speak plainly, it must be remembered that while a cold bath may be more or less invigorating it is not cleansing. I can easily understand the desire of every woman to have a clear, beautiful skin, but I confess to being provoked when I think of the amount of money spent on lotions, creams and powders to be applied externally and which have nothing like as good an effect upon the skin as a tepid bath with good soap taken at least once a week.

The condition of the skin depends almost entirely upon the care given to the general health. The girl who is up late at night, gives no care to her diet, indulges in various stimulants, bathes but seldom and exercises less is certain to have either a dull, muddy looking skin or one covered with disagreeable looking black and red spots. One should avoid many sweets and much pastry and not allow herself to become a slave either to tea or coffee any more than she would to some vicious drug or strong stimulant. She should also remember that unless she is in good condition internally she will be anything but a pleasant object to look upon externally."

Smokeless Powder.

It is a curious fact that with all of the improvements and modifications so notable in our navy we are still using the old fashioned smoky, smelly powder that envelops everything in a gray pall, obscures the view and confuses the gunners. Only one of our ships has been using cordite, the wonderful smokeless powder which the English navy has adopted. The results with this ship, the New Orleans, were truly amazing. The rapidity, accuracy and precision of her fire were the admiration of all observers. Smokeless powder has several advantages. There is no obscuring of the view, the explosion producing the merest haze, which lasts but an instant. It leaves but little residuum in the gun, has much more power and is every way more desirable. Higher muzzle velocity is obtained with a projectile, as the powder burns much more slowly than the ordinary sort, and, therefore, generates more gas as the ball travels up to the mouth of the gun. The demand for smokeless powder seems to be one of the imperatives of the immediate future.—New York Ledger.

HUMAN SACRIFICES

On the Altar of Diabetes, Saved by Dodd's Kidney Pills, Only.

Hardly a family in the country is free from Diabetes. Great thirst, failing sight, numbness in the thighs, bleeding gums, swollen ankles, emaciation, nervousness, pale or turbid urine, loss of sexual power, decaying teeth, pains in the loins or small of the back, are all positive signs that Diabetes is in the system.

Do you know how it ends? IN DEATH. A premature, horrible, agonized, pitiful death. The victim has no peace, no ease in life. His days are filled with tortures. His nights are waking dreams of agony. He longs to die, yet fears the terrors of his end. He dies, a bloated, fetid, repulsive mass of corruption. That is the only end of unchecked Diabetes. Dodd's Kidney Pills will cure it. They drive it out of the system thoroughly, create new, clean blood, rebuild the diseased kidneys, and restore robust health.

Pain Around the Heart,

AND ALL OTHER SYMPTOMS OF HEART DISEASE ARE TOO DANGEROUS TO NEGLECT.

An Ingersoll, Ont., Man tells how Milburn's Heart and Nerve Pills Restored his Heart to Healthy Action.

SOMETIMES a pain catches you in the region of the heart, now and then your heart skips beats, palpitates, throbs, or beats with such rapidity and violence you think it will burst. Once and a while you have a dizzy or faint spell, feel weak, nervous, irritable and depressed. There is no other remedy will do you so much good, restore your heart to a natural condition, build up your strength and give you back vigor and vitality as Milburn's Heart and Nerve Pills. Here's what Mr. Hugh Moore, Ingersoll, Ont., says about them: "Last year I was sick with Malaria. Since then I have had serious heart trouble, such as sharp pains beneath the heart, violent palpitation, shortness of breath, smothering spells on going to bed, etc. My rest was broken and disturbed, and I often woke up gasping for breath, while my heart beat so violently as to make me fear sudden death.

"I heard that Milburn's Heart and Nerve Pills were a good remedy for heart troubles and therefore got a box from Mr. G. A. Ionson's Drug Store, and to my surprise and delight obtained almost instant relief. My heart is now all right, the pain is gone, the heart beat is natural, the shortness of breath has vanished, and I have had no attack of smothering since beginning their use. I now get unbroken, restful sleep, so that I am feeling strong and well. Milburn's Heart and Nerve Pills have wrought this gratifying change, and I heartily recommend them to all sufferers."

Which Rides?

When a man is sick his work rides *him* instead of he riding his work. His daily task instead of being the means which supports and carries him on to comfort and prosperity becomes an overwhelming burden weighing him down. He has no strength, no ambition. He feels that there is nothing left but for him to stagger along until the awful pressure of disease and trouble at last crushes him to earth.

The prosperous man is the one who keeps the upper hand of his work, because he is strong, capable and energetic. Dr. Pierce's Golden Medical Discovery has brought the best kind of prosperity to thousands of weighed-down, over-burdened men and women by giving them the physical strength and stamina to carry on their work forcefully and easily.

"For the last three years," says Mr. J. C. Morgan, of Monongah, Marion Co., W. Va., in a letter to Dr. Pierce, "I have been a constant sufferer from indigestion complicated with complaints that generally accompany such cases. Always after eating there would be a formation of gas and a heavy load in my stomach. I would belch up my food after eating, bowels were very irregular; I would imagine I saw objects floating before my eyes. I had pain across my back. About December, 1896, I began feeling much worse than usual and was beginning to think I would have to suffer the remainder of my life. I was greatly discouraged. I described my case to Dr Pierce's staff of physicians and they directed me to begin at once taking the 'Golden Medical Discovery' according to directions. I did so, and am happy to state I experienced most gratifying results, as all the unpleasant feelings have entirely left me. I have now a very good appetite, relish my food, and am pleased to say I feel once more like my former self. I recently walked a distance of one hundred and ten miles in about four days."

No remedy relieves constipation so quickly and effectively as Dr. Pierce's Pleasant Pellets.

FERTILE PORTO RICO

THE ISLAND IS AS BEAUTIFUL AS IT IS PRODUCTIVE.

It Has Thirteen Hundred Streams, a Wealth of Vegetation, Highly Cultivable Soil and Vast Deposits of Minerals—Few Reptiles, but Many Insects.

Mr. Frederick A. Ober, late commissioner in Porto Rico of the Columbian exposition, contributes to The Century an article on "The Island of Porto Rico." Mr. Ober says:

In the extreme northeast rises the highest peak of the central cordillera in the Luquillo sierra, known as "El Yunque," or "The Anvil," variously estimated at from 3,600 to 4,500 feet in height. The hills are of lesser elevation toward the west and southwest, but the whole north central country is rugged and uneven. Between the spurs from the main range lie innumerable secluded valleys, where the soil is of great fertility. The impressive features of the landscape are the rounded summits of the multitudinous hills, which leave the coast in constantly rising billows that finally break against the cordillera vertebra; yet all are cultivable, and cultivated to their very crests, though the higher mountain peaks are forest clad.

More than 1,300 streams, it is said, of which number perhaps 40 or 50 attain to the dignity of rivers, rise in the hills and seek the coasts, most of them running northerly, though the best harbors are in the west and south. But notwithstanding the great river flow portions of the island in the southwest are afflicted with drought at times, owing to the precipitation of the northeast "trades" against the northern hills.

The higher hills are clothed in the exuberant and diversified vegetation of the tropical forest, where tree ferns flourish, and great gum trees and mountain palms tower aloft. At lower levels are the cedar and mahogany, walnut and laurel, with many others noted for their useful woods. Throughout the island are found those trees and shrubs valuable for their gums, as the mamey, guaiacum and copal, while the list of medicinal plants includes most of those, invaluable to our pharmacopœias, which tropical America has given to the world. These are the silvestres, nature's wild children, but of cultivated plants there is no species peculiar to the tropics that does not flourish here.

In the littoral levels, between the mountains and the sea, grows the sugar cane, which may be cultivated up to an altitude of 3,000 feet. It was introduced here from Santo Domingo, having been brought to America either from Spain or the Canaries. The annual yield of sugar is estimated at about 70,000 tons.

In these fertile lowlands also tobacco does exceedingly well, and the annual production is said to be quite 7,000,000 pounds. It may be cultivated on the hills, but the true mountain lover is the coffee, which does not do well below 600 feet and is at its best 1,000 feet above the sea. It was first brought here from Martinique in 1722, and now yields to the extent of 17,000 tons annually. Maize, the true Indian corn, is indigenous, as is the yucca, the aboriginal "staff of life," and both grew everywhere, as well as the pineapple, which is more reliable and more universal than the peach of our north temperate zone. Cotton and rice are found at nearly all elevations, the latter, which is the chief food of many laborers, being what is known as the mountain variety.

Bananas and plaintains are wonderfully prolific, bearing fruit in ten months from planting. The plants virtually last 60 years, being equally long lived with the cocoa palm, which produces nuts in six or seven years and thereafter during the space of an ordinary life, its yield being reckoned at 100 nuts a year. The annual product of bananas is given as 200,000,000 and of cocoanuts 3,000,000. The entire range of tropical fruits is represented here, such as the guava, lime, orange, aguacate, sapotilla and avocado pear, while all subtropic vegetables may be raised, including those of the south temperate zone, such, for instance, as are grown in Florida.

The mineral kingdom has not been so exhaustively exploited as the vegetable, but more than traces have been found of copper, coal and iron, as well as vast deposits of salt. The rivers at one time ran to the sea over beds of golden sand, and from the streams today (as in the neighboring island of Santo Domingo, where the first American gold was discovered) the natives wash out nuggets by the crude processes of that distant day when Agueynata went prospecting with his false friend, Ponce de Leon.

There are no native quadrupeds here larger than the agouti and the armadillo, but birds are relatively numerous, with a few of fine song and some of brilliant plumage. All domestic fowl do well here, and the great pastures of the northeast and southeast support vast herds of cattle and horses, which suffice not only for the needs of the island, but are exported to all parts of the West Indies, being held in high esteem.

There are no poisonous reptiles to be feared, but insects of questionable character are too numerous for comfort. This island indeed were a paradise without them; even with them the inhabitants seem to experience little trouble. The worst of these are the scorpions, centipeds, tarantulas, wasps, mosquitoes, some species of ants, ticks, chigoes and fleas. The heat of a tropical climate like that of Porto Rico, which, though rarely exceeding 90 degrees, is continuous, is conducive to the breeding of insect pests of all sorts.

"Dar isn't much comfort in de remahk dat contentment is better dan riches," said Uncle Ebon. "One is jes' about as hahd to git as de other."—Washington Star.

THE ONLY HOPE!

For Victims of Bright's Disease is Dodd's Kidney Pills.

Not a day passes on which the newspapers do not record the death of one or more persons from Bright's Disease. Already its victims number hundreds of thousands. Day by day the awful total grows larger. No class is safe from this destroyer.

War and intemperance, with all their miseries and fatalities, are not responsible for as many deaths as have been caused by Bright's Disease. Yet, there is a way of resisting it; of drawing its poisoned fangs, and making it as harmless as a summer breeze. That great medicine, Dodd's Kidney Pills, has cured thousands of the worst cases. It never fails to cure, hopeless as the case may seem.

Would you safely shield your loved ones from the fatal grip of this curse of mankind—Bright's Disease? Then use Dodd's Kidney Pills, the only cure on earth for this disease.

Dr. A. W. Chase's Ointment...

Endorsed by Dr. C. M. Harlan of the American Journal of Health

NOT A PATENT MEDICINE....

He says:—Among the proprietary medicines recognized is Dr. Chase's Ointment, compounded by Dr. A. W. Chase Medicine Co., Buffalo, N.Y., and Edmanson, Bates & Co., Toronto, as a remedy for Piles, Eruptions and Eczematic Skin Diseases, for which it has been used with marked success and has effected remarkable cures. It is not the practice of the Medical Profession indiscriminately to use proprietary medicines, but there are hundreds of physicians throughout this country who are using Dr. Chase's Ointment in their practice. We handed out during the last month 2,700 boxes of free samples of Dr. Chase's Ointment, and the thankful results have been something astonishing. Here is what one of the cures says:

MR. O. P. ST. JOHN, 216 Shaw St., Toronto, in his letter states: I suffered for some years from Itching Piles, at times being unable to sleep for the annoyance caused by them. After trying almost every remedy known, I was induced to try Dr. Chase's Ointment, and can say one box entirely cured me. I cannot speak too highly of it, and have recommended it to several of my friends, all whom have been cured by its use.

ACTING AFRAID OF DOGS.

It Is the Surest Way In the World to Provoke an Attack.

It is curious, to me wonderful, how well dogs understand people. They seem at a glance or very soon thereafter to decide in their minds whether or not it would be safe to assail one who enters their owner's premises, says Lippincott's Magazine. My own opinion is that every one of them, big or little, of high or low degree, would like to bite every stranger that he sees. Their love for their master makes them jealous or makes them pretend to be jealous of everybody who approaches them, and they debate momentarily whether or not a comer is afraid of them. If he is not, they either extend a friendly salute, which always is deceitful, or assume to be indifferent. If he is, they give him a bite, more or less deep, then slink away from possible consequences.

For years and years I have followed the rule, when visiting a person residing out of town, unless I know positively that he keeps no dog of any size, to halt at the gate, raise a halloo and await not only my host's invitation, but his approach and his accompaniment into his house. I could not tell the number of times wherein I have been barked at furiously from the inside by dogs whose owners declared that in all their lives they had never done such a thing before to a man of genteel appearance.

The counsels and admonitions bestowed upon me might have excited some gratitude if they had not been wholly useless. I have been asked so many times that it makes me almost sick to have the question repeated, "Why don't you just go along without noticing such things, not being or at least pretending not to be afraid? Not one dog in 10,000 will try to bite a gentleman unless he is provoked or sees that he is being avoided."

WEAKENING DIARRHŒA.

Promptly Checked and the Weakened System Strengthened by Dr. Fowler's Extract of Wild Strawberry.

Diarrhœa does not need to persist for any length of time until the whole system is weakened and debilitated. No other disease so quickly undermines the strength and brings about a condition of prostration and often collapse.

Dr. Fowler's Extract of Wild Strawberry is not only prompt and effectual in checking the diarrhœa, but at the same time it stimulates and strengthens the heart and braces up the system.

Mrs. Soshua Stevenson, Owen Sound, Ont., says that her little girl was weak and almost run to nothing through a severe attack of summer complaint. Nothing would check it till she gave her Dr. Fowler's Extract of Wild Strawberry which acted like a charm. She considers no household should be without this valuable remedy. Wise parents should take to heart this advice of Mrs. Stevenson's, as they do not know when they themselves or one of their children may be attacked by Diarrhœa, Dysentery, Cholera, Colic or Cramps.

Dr. Fowler's Extract of Wild Strawberry is not an expensive remedy—only 35c. a bottle, and the doses are so small that it goes a long way.

Don't accept a substitute or imitation. Many of them are dangerous compounds.

A NOVA SCOTIA CASE.

Significant Praise of Dodd's Kidney Pills by a Meteghan Citizen.

Meteghan, N. S., Aug. 22.—No man is better known to the travelling and commercial classes in this province than is Mr. William German, proprietor of the Bay View Hotel here.

An interesting statement is made bp Mr. German and reads thus:

"I take pleasure in testifying to the merits of Dodd's Kidney Pills. Two years ago I was suffering from severe pains in my back caused by Kidney Trouble.

"I got two boxes of Dodd's Kidney Pills and used them and my complaint was completely cured. I have not had the slightest pain since."

To all victims of Kidney Complaint there is one way of escape from their suffering. That is by using Dodd's Kidney Pills. They always cure.

Tit-tat-to.

In the Century Dictionary the derivation is given from tit, tat, to, "three meaningless words" used in counting.

However, the East Friesic name (see Koolman's "E. Fr. Dict.") is tik-tak-tuk, evidently a more original form. In this name the word tik has the same sense as E, tick, a mark, in allusion to the mark made by the player on the slate, while tak, tuk, are variants of the same theme, made on the principle of altering the vowel, as in Germanic verbs of the third strong conjugation, such as sing, sang, sung.

Hence the name is by no means "meaningless," but has an obvious reference to the ticks, or marks, made by the players, and the word is threefold instead of reduplicated, because the object of the game is to make three ticks in a row.—Notes and Queries.

Merely From Observation.

"Is Miss Blinkins at home?" asked Mr. Saunders of the Irish girl who answered his ring at the door.

"Yes, I b'lave she is, sir."

"Is she engaged?"

"An is it engaged you say? Faix, an I can't tell you, sir, but she kissed Mr. Vincent last evenin as if she had never seen the like uv him, an it's engaged I b'lave they are, sir."—Exchange.

Those Girls.

She—He kissed me when I was not dreaming of such a thing.

Her—I'll wager you were not. You always were wide awake when kissing was in sight.—Cincinnati Enquirer.

A Cheap Decoration.

A prominent German actor, relates Albert L. Vandam in The Illustrated London News, had fulfilled half of his "starring" engagement in the capital of a grand duchy, and as yet no recognition of his talents had been forthcoming in the shape of a decoration. Disgusted, the player announced his intention of departing the following morning. Early on that day the theater intendant acquainted his grand ducal master with what had happened. The conversation took place in the garden of the schloss, situated on the road to the station, and suddenly an open carriage with the actor in it hove in sight.

"Be quick!" said the prince. "Get me that box on my writing table. If go he must, we'll at any rate try to satisfy him in his ambition." The intendant ran, and returned just as the vehicle passed the gates. "One moment, Herr B——," shouted the prince. "Here is something to remember me by."

The actor bowed low, and went his way. In another moment, however, his conveyance reappeared at the gates. "There are two crosses, your highness," he exclaimed.

"Never mind," replied the prince. "Give the other to the coachman."

THE NEW PHYSICAL DIRECTOR.

He is Welcomed by the Members of the Young Men's Christian Association.

Mr. James M. McLeod, the new physical director of the Y.M.C.A., was informally, yet warmly, welcomed to the association by a large and representative gathering of the members at the building last night.

Mr. A. C. McCallum, chairman of the Physical Work Committee, acted as host, in introducing Mr. McLeod. Refreshments were served in the lecture room, which were much appreciated on account of the warm evening.

Following this short speeches were made—all by way of welcome—to which the guest of the evening feelingly responded.

Mr. McCallum spoke kindly and outlined some of the Physical Department plans for the season. Teaching the members, and especially the boys, how to swim would be a leading feature. He prophesied a successful future for the work, concluding his speech by a reference to other departments—the Mental and Spiritual.

Mr. D. H. Moore, a new member of the Physical Work Committee, followed.

Short speeches were also made by Messrs. H. Taylor, E Hall and A. Fronde, the latter representing the Boys' Department, the members of which he very nicely termed "the men of to morrow."

Mr. Williamson was called on and added briefly to the remarks already made. He said he and Mr. McLeod were the same age speaking from an Association standpoint. They had both been three years in active association work. He said he considered the outlook for the future exceedingly bright. He believed the membership would be much larger this year than last. While the members had been loyal there was room for improvement on all hands—from the secretary to the smallest member.

The meeting concluded with the singing of the doxology and prayer by Mr. Taylor.

Prior to Mr. McLeod's departure from Hamilton he was presented with a number of very handsome gifts by the members of the Association and the Junior Department of Christian Endeavour of the church of which he was a member, as marks of the appreciation in which he is held.

The Physical Work Committee meets tonight at eight o'clock.

NEWS NUGGETS.

Paragraphs Picked Up and Pencilled for Public Perusal.

—No Police Court session this morning.

—A meeting of the Street and Bridge Committee is called for this evening.

—Nothing has been done as yet to improve the condition of Crescent street.

—Miss Fairweather will resume her class in pianoforte and guitar on Sept. 1st.

—The Fire, Water and Light Committee is busy framing a new set of rules for the government of the fire hall.

—Adj. Manton, from Toronto, will conduct special meetings in the Salvation Army barracks first Sunday, and in Queen's Park on Monday.

—The dates and places for holding the usual public meetings in connection with the East Peterborough Farmers' Institute have been arranged as follows: Warsaw, Dec. 1; Westwood, Dec. 2; Norwood, Jan. 18; Keene, Jan. 19.

—Maskinonge and bass fishing is said to be very good at Crow Lake. Two sports visited this lake one day last week and caught several fine lunge in a few hours. Mr. Caskey, postmaster at Blairton, keeps boats for hire and has good accommodation for sportsmen.

—Partridge shooting will commence on the 15th, but with some, we are informed, it began a week ago. In many localities the birds are reported scarce, which may be due to the frequent rainfalls during the hatching season. Plover and snipe shooting should not be attempted until the 15th.

—Messrs. Thomas McMillan and John Elliott of Dummer, James Burgess of Belmont, and James Wigmore of Norwood, left on Tuesday for the Northwest. Mr. McMillan goes to Banff to test the powers of the famous mineral springs at that place. The others go to various parts of Manitoba and the Northwest Territory to view the country and visit friends.

—The Lindsay Post says:—"Dan Whetung's Indian excursion, due to arrive here to day, per steamer Crandella, has been postponed owing to the closing of the Bobcaygeon lock for repairs. The iron bottom of the lock chamber has been torn from its fastenings by the water escaping from a side flume, and it will take about eight days to pin it down again."

SPORTING PASTIMES.

Interesting Items of Local and General Interest.

LACROSSE.

The local team are not a whit disheartened by the reverse with which they met at Toronto, the defeat merely serving to imbue them with a fixed determination to retrieve their lost laurels on Friday, Sept. 9th, when they again meet the Orillias on the P. A. A. A. Grounds. The boys intend practising every evening from now until then and are taking the best of themselves in order to be in perfect condition for the match.

In refereoring to the Peterborough match in Orillia on August 25th, the Orillia Packet says:—For the Peterboroughs, Lynch; Brown, King, Jack McCabe, Phalen and Lipsett were the shining lights, and did some very fine playing, but it was Dobbin in the goal that did the great bulk of work, and did it well. He was the bright particular star of the 24, and everyone was sorry when he got struck in the stomach by the ball and had to go out of the flags.

THE TURF.

A Campbellford correspondent of the Canadian Sportsman says: "Bring present at Rochester, N. Y., races last week and noticing the success of our Canadian horses I cannot refrain writing you a few words in their favour. In the 2:15 pace, Nellie Sharper, driven by Alex Hunter, won the race from a field of eleven, reducing her record to 2.13. In the 2.16 trot, St. George, driven by Eddie James, won second money, and in the 2.18 pace Furioso, owned at Colborne, won second money in a field of nine starters; he won the first and second heats in 2:13¼, and 2.12½, reducing his record five seconds. He was driven by Charley Ray, of your city; it took seven heats to end the race, commencing on Thursday, the 11th, postponed till Friday owing to darkness, rained all day Friday and finished on Saturday. I am glad to note the success of our Canadian drivers; they seem well able to hold their own even in the fastest company.

ABSTRACTING BUTTER FAT.

At Fenelon Falls on Wednesday J. Henry Copeland, a patron of Cameron cheese factory, and Robt. Wilkinson and — Baker, patrons of North Verulam factory, were charged by Cheese Instructor Kerr with having supplied deteriorated milk to the factories mentioned. A large volume of evidence was submitted, and the lawyers interested criticized it from every point of view. Copeland was found guilty of having robbed milk of butter fat before taking it to the factory and was fined $15.50; in the event of non-payment he will spend a month in gaol at hard labour. Court sat till 12 p. m. and Messrs. Wilkinson and Barker will not know their fate for a few days. We understand Magistrate Deacon intends to confer with the Attorney General relative to loopholes at present existing in the law protecting cheese factories.—Lindsay Post.

MIRACLE WASHING COMPOUND

Adapted to Finest or Coarsest Fabrics. Your Washing Done While You REST.

A BOON TO WOMANHOOD

NO NEED OF SOAKING OVER NIGHT

Washday Robbed of all its Terrors.

NO STEAM! NO LABOUR! NO ODOR!

A Family Washing Done While Breakfast is Eaten.

GUARANTEED NOT INJURIOUS.

DIRECTIONS—Slice one cake of Miracle Compound and one cake of common washing soap into two quarts of water and boil until dissolved; pour half of it while hot into tub containing enough very hot water to cover your clothes. Soak white clothes, curtains and cotton fabrics a few minutes in cold water; wring out and place them in the hot suds stirring enough to enable the suds to reach every part, and let them stand for 25 or 30 minutes; then wring out, rinse in lukewarm water, blue and hang on line.

FOR COLOURED CLOTHES, same suds can be heated and balance of mixture added to it; let clothes stand as for white.

WHILE YOU REST.

BLANKETS, FLANNELS AND WOOLENS should not be put in cold water, but placed at once in hot suds made as directed for other goods, and allowed to stand 30 minutes; then rinse and hang in warm place. If directions are followed, you will be delighted to see how soft and fluffy they feel—nor will they shrink.

Reasons why Miracle Compound is a Boon to Womanhood.

1st—No boiling of clothes required.
2nd—No rubbing or scrubbing of clothes.
3rd—No soaking of clothes over night.
4th—You save time, as it requires only one or two hours to do a very large washing, and fuel, because there is no boiling.
5th—You purify, preserve and disinfect all clothes washed with Miracle Compound.
6th—Clothes made yellow from the use of washing powders and age are restored to their original whiteness, and become as new by the use of Miracle Compound.
7th—All clothes washed with Miracle Compound we positively guarantee to last three times as long, because all dirt is removed and they escape the friction and pulling of the washboard.
8th—Woolens washed with Miracle Compound will not shrink, but are made soft and new.
9th—Our experience teaches us that Miracle Compound has no equal in powders or soaps for washing clothes, and so carefully are the component parts of Miracle Compound blended, that we will cheerfully give $50 for any case where directions are followed and the results claimed are not obtained.

METHODISTS IN SESSION.

Rev. Dr. Ross of Guelph Is Chosen as the Secretary for the Next Term.

Toronto, Sept. 2.—Yesterday in the Metropolitan Church the Methodist General Conference began its quadrennial session. It is likely that the conference will last over two weeks. Altogether there are 286 delegates to the conference. They come from Newfoundland, Japan and all points of Canada. The body of the Metropolitan was well filled with high dignitaries of the Methodist Church.

Rev. Dr. Carman occupied the chair. Many points of order were raised by the delegates relative to the committees, etc. The method of appointment of the Nominating Committee and its powers were discussed at length. It was decided that the different conferences should appoint their members to the committee at 2 o'clock. This committee will have the appointment of the various committees.

Rev. Dr. J. S. Ross of Guelph was elected secretary of the conference by 101 ballots. The rest of the votes were widely scattered. He will remain in office for four years.

A committee was appointed to see that the delegates were properly billeted and looked after.

The afternoon session adjourned at 5.45 after settling the hours at which the conference should meet. These are to be from 9 in the morning until 12; from 2 in the afternoon until 5, and from 8 in the evening until a motion of adjournment.

The evening session was entirely occupied with routine transactions.

MME. DREYFUS TALKS

The Prisoner at Devil's Island May Have Another Chance.

FRANCE IN EXCITEMENT'S GRIP.

An Anglo-German Treaty—The Terms of the Memo. of Agreement Relates to Asia Minor and Delagoa Bay—Lord Salisbury Will Reply to Czar's Peace Note Suggestions.

Paris, Sept. 3.—Madame Dreyfus has made the following statement: "The truth about my husband cannot be suppressed much longer. He never fails to proclaim his innocence. His letters to me are sadder than a wail over the dead, and their heartrending pathos could emanate only from a guiltless soul. His all-absorbing thought is to blot out the stain of treason with which his persecutors try to tarnish our name. The martyr of the Isle de Diable lives but for the rehabilitation of his family. Our children must not be burdened with a dishonored name, particularly as my husband is innocent. Col. Henry's horrible end is part payment of the penalty incurred by reason of the cruel wrong done to my husband. His disgraceful death is the natural outcome of his attempts to dishonor a good officer. Col. Henry's associates may also pay the penalty."

Short Cut May Be Taken.

Paris, Sept. 3.—While opinion is for revision of the Dreyfus trial there is anxiety over the exposures it might entail. Dreyfus may be pardoned or some other short cut to justice taken that scandals may be escaped.

Not Since Sedan's Fall.

Paris, Sept. 3.—Colonel Henry's confession of having forged the famous document upon the authenticity of which General De Boisdeffre, chief of staff of the French army, in his impassioned appeal to the jury in the Zola trial, staked his own reputation and the honor of the army, and Col. Henry's suicide in the fortress of Mont. Valerien have caused an emotion throughout France which has not been witnessed since the fall of Sedan.

Following these, which added fuel to the flame, was the arrest of Col. Du Clam.

Revision Decided On.

London, Sept. 3.—A special despatch to the Evening Standard from Paris, published yesterday afternoon, says the French Cabinet has decided upon a revision of the Dreyfus case.

The Officers Will Divulge.

Paris, Sept. 3.—It was announced yesterday afternoon by the Patrie that several officers of the general staff had decided to resign shortly and divulge all they know of the entire Dreyfus affair. One officer declares that war will inevitably follow as a result of the revelations which will be made regarding the machinations of another Government.

A Feeling That War Is Coming.

Paris, Sept. 3.—The most pessimistic feelings exist. It is the common belief that Great Britain and Russia are on the eve of war, and that the consequences of the Dreyfus scandal will involve France in war with Germany.

The Government is doing its best to stem the rising tide.

High officers confess that the discussions that will follow revision will probably entail war, but they say that would be preferable to having the army remain under a cloud, with the possibilities of agitation leading to civil strife.

Premature Report.

Paris, Sept. 3.—The report put in circulation by a news agency that a revision of the Dreyfus case had been decided upon, appears to be premature.

It is now pointed out that a revision must be sanctioned by a Cabinet Council under the Presidency of M. Faure.

ANOTHER ALLIANCE.

It Looks as Though Britain Had Signed One, Offensive and Defensive, With Germany.

London Sept. 3.—A report was current here yesterday that a treaty of alliance between Great Britain and Germany on the lines of the speech of Mr. Joseph Chamberlain, the Secretary of State for the Colonies, was actually completed the day before. This is probably an amplification of the gossip relative to the daily visits of Count von Hatzfeldt-Wildenburg, the German Ambassador here, to the British Foreign Office during the past fortnight, which have been attributed to a desire upon the part of Germany and Great Britain to formulate a common policy in regard to Russia and China.

It is said that as quid pro quo for Germany's support in Egypt, Great Britain will recognize Germany's claims to utilize Syria as an outlet for her surplus population.

The Pall Mall Gazette yesterday afternoon says it has received from a source in which it has every confidence, information showing that the Anglo-German agreement was signed this week by Mr. Balfour and the German Ambassador in behalf of the respective powers. Continuing, the Pall Mall Gazette says that while the agreement is restricted, it embraces an offensive and defensive alliance in certain eventualities. The Pall Mall Gazette adds: "This new and momentous departure in our foreign policy comes as a natural development of the European situation."

The Pall Mall Gazette then quotes the speech which Mr. Joseph Chamberlain made at Birmingham on May 13 last, bidding for a German alliance, and continues: "Latterly it has been evident from the tone of the semi-official German press, that the two Governments have been drawing closer, and finally there were prolonged conferences between Count Hatzfeldt and Mr. Balfour. The departure of Count Hatzfeldt proves that the object of the consultations has been achieved. Besides, Mr. Chamberlain has gone to America, Lord Salisbury is prolonging his absence, and Mr. Balfour leaves for his holidays on Saturday. Evidently the Ministers do not expect to have to deal with crucial questions of foreign policy."

The Czar's Peace Note.

The Westminster Gazette yesterday afternoon announces that although, owing to the absence of the Marquis of Salisbury, Great Britain has not yet formally replied to the Czar's peace note, the British Ambassador at St. Petersburg has already communicated in cordial terms the hearty sympathy with which the rescript was read by the acting Minister for Foreign Affairs, Mr. A. J. Balfour, the First Lord of the Treasury and Government leader in the House of Commons. When the Marquis of Salisbury replies to the note, the Westminster Gazette continues, he will hail with satisfaction and delight the Czar's initiative, assuring him of the determination of her Majesty's advisers to co-oprate heartily in promoting his great aim.

Refers to Delagoa Bay.

London, Sept. 3.—It is reported on the Stock Exchange that the Anglo-German alliance, or understanding, relates to the British purchase of Delagoa Bay, with Germany assenting. As a result, Kaffir and Portuguese securities are booming.

Terms of the Treaty.

London, Sept. 3.—The Daily Mail says this morning: "We learn that Mr. Balfour and the German Ambassador, Count Von Hatzfeldt, signed on Wednesday a document preliminary to a treaty, which will give Germany a free hand in Asia Minor, and allow England to lease Delagoa Bay from Portugal, at a cost between £2,000,000 and £5,000,000. Germany will, as a further connection, support Great Britain's claim for the abolition of the mixed tribunal in Egypt. Mr. Shomberg Kerr McDonell, the Premier's private secretary, has left London for the Continent to submit to Lord Salisbury a copy of the treaty."

On the Charge of Bigamy.

Woodstock, Sept. 3.—When the hearing of the charge of bigamy against R. L. Middleton comes up on Tuesday next Lillias Munro of Toronto, and Sarah Smith, both of whom it is claimed he married, will be present to testify, and the Crown expects that Middleton will be committed for trial before Judge Boyd at the Assizes which open on the 20th inst.

LABOUR DAY.

Monday is Labour Day. It is an evidence of the fact that in this great country where labour is the backbone of our prosperity, and where labour enjoys the most generally favourable conditions, the government recognizes its dignity by setting apart by statute a day sacred to its interests. In Canada labour may not find the greatest degree of the most profitable employment, but it enjoys so far as legislation assistance avails, especially in this province, the most favourable conditions, the most effective protection for safe-guarding its interests of any country in the world. There is no need to speak of the dignity of labour, or of its deserts; these are recognized by all truly Christian people—by everybody, except perhaps by those who should be the first to recognize them—many of the employers and beneficiaries of labour. While labour deserves a holiday, yet that is not the true spirit of labour, whose chief desire is an opportunity to work; yet those who toil faithfully should have a day of play, especially that set apart by statute in their interests, and the EXAMINER hopes that all the varied interests representing labour will have an enjoyable holiday on Monday next.

PUBLIC SPIRIT.

Peterborough is noted from one end of the Province to to the other as one of the most progressive and best towns in the Dominion. Its citizens are enterprising and energetic, which accounts for its material prosperity; but there is nevertheless, it seems, a lack of public spirit and sentiment which result in failure to give encouragement to enterprises not strictly commercial, but tending to the creation of conditions that would make for material prosperity indirectly. A case in point: On Thursday afternoon and evening we had the best flower show ever presented in Peterborough. Was it of public interest? Yes and no. Intrinsically it was of public interest inasmuch as it showed that the esthetic tastes of many of the citizens are highly developed—a circumstance that represents the beautifying of the town, the making it more attractive and thus inducing increase of population. On the other hand it was not of public interest, for the public did not recognize it. The attendance of spectators was lamentably small, a fact that would tend to discourage the exhibitors if they did not work more for love of the calling than for popular approval. The market hall was hardly sufficent for the grand display made and, therefore, should have been inadequate to accommodate the crowds that should have been present. We also note the lack of public spirit and loyalty to the town in the failure to have the town represented at provincial gatherings. In Toronto and other cities there are annually held meetings of various associations, and as a rule Peterborough has no "lot nor part" in them. The dentists of the province gather—Peterborough is not represented; the druggists meet in council—Peterborough is not there; the Constables' Association foregathers—Peterborough is out in the cold. The lawyers meet in council, the doctors have a conference and numerous other associations assemble, but Peterborough's representatives are conspicuous by their absence as as a rule, for at rare intervals a representative is sent. In all these cases the town does not show to the advantage that it should do. The essence of advertising is to keep one's name and business before the public; and if our citizens were alive to their opportunities they would take advantage of the opportunities that representation in these associations at the annual gatherings afford. The town would be kept in prominence. As it is there is reason for outsiders to conclude that because Peterborough is not thus represented, she has no citizens capable or qualified to hold their own in such gatherings. This of course is a wrong conclusion, because except, perhaps, in the matter of public spirit in the respects mentioned, we have in all these interests citizens who are the equal of any that attend the gatherings indicated. But they are content to hide their light under a bushel. We have a good town—none better—and the more we keep it before the world the greater the practical advantages that will follow.

THE ONE GREAT LACK.

British Columbia has many charming features; in fertile soil, in forest grandeur, in magnificently great scenery, in rivers that run over golden sands, in rocks cyclopean piled, auriferous beyond the dreams of avarice and in a climate that reigns a perennial sunny south in the latitude of the ice-king. Yet one thing it lacks—a due proportion of the element without which Eden itself was but a haunt of wild beasts and not the paradise it became when the rib-wrought Eve was added to its charms—woman. A country that has a surplus of elegible bachelors should be the Mecca for the spinster in older Canada, who finds herself in a two-to-one social environment. Eligible bachelors there abound; for an advertisement that appears in the New Westminster Daily Sun proves that there are bachelors who recognize the fragmentary and incomplete character of their celibate condition. The advertisement reads thus:—

"TO THE LADIES:—

"I am an Englishman by birth—30 years of age, 5 feet 4 inches, 150 pounds, blue eyes, fair complexion, excellent disposition, well educated, abstainer, Protestant, eminent artist and engraver, a widower with two pretty girls of 7 and 5½ years old. I am a lover of home, art, flowers, fruit-growing and poultry-raising. My house will be completed soon in Central Park, where I make a home. I can give you good references as to my character and as to my ability. I would like an interview with a lady of suitable age—must be of the best reputation—a lover of home, music, art and flowers—you don't mind about my being deaf—I am considered by all who know me to be standing for morals, a smart business man. I wish to marry in the near future. Refer me to Rev. McLaren, of Vancouver; Rev. Dr. William Stainer, of London, Eng.; Thomas Evans, of Vancouver; A. Godfrey, of New Westminster; C. D. Paterson, of Central Park."

Here is a bargain-day bonanza for some enterprising woman "who loves music"—she can get a husband and pound a pianoforte and libitum and fortissimo without lacerating the soul of a husband whom "she wouldn't mind being deaf." A lover of fruit, flowers and chicken, who offers his heart and new house in Central Park, whose only drawback is that "being a lover of home" he will be too much about the house—such a lover should rob a transcontinental trip to the Coast, even in the hot weather, of its terrors. The conditions of acceptance are given with so much of detail that negotiations would be conducted with delightful facility.

Seriously, the superfluous female element of the comparatively congested older Canada, would find in the Golden West a large and lucrative field for the exercise of her abilities, in the making of a living or the creation of a career. Whether she adopted the role of the new woman, and exercised the miner's pick, or the pick of the miners, the result would be equally profitable. In a new country with the magnificent resources of British Columbia there is every chance for a woman to advance in the world, every chance that she will "get there with both feet," and find a suitor kneeling at them, to boot. The chances are great, for it is probable that now that the advertiser above has broken the ice, he will have many imitators. Therefore, "Go west, young woman, go west."

THE Montreal Star remarks that "Hardy has saved his bacon." It is remarkable, the Globe thinks, how the Tory mind runs to animals—silver medal bulls, calves with pulmonary affections, piggeries, rams, bacon and Protestant horses.

THE METHODIST CONFERENCE.

Thursday the Quadrennial Conference of the Methodist church in Canada assembled in the Metropolitan Church, and opened what is expected to be the most important gathering in connection with the denomination in all its history.

If the founders of Canadian Methodism could look in the handsome edifice while the conference is in session and listen to the addresses of the learned divines and cultured laymen who will take part, they would go away satisfied that they had not worked in vain when under the most discouraging conditions they planted the simple story of the Gospel in the infrequent clearings they found in the forest. They had few other qualifications for their offices of religious teachers than an unmovable faith in the power of the Gospel, and a self-taught knowledge of the Scriptures, joined to an irresistible desire to tell it abroad. They toiled as their successors of to-day do not have to, but it was comparatively easy for them, because they had the unanimous support of the flocks. In those days divisions in the churches were fewer, perhaps for the reason that people lived farther apart, or it may be because they had less education and therefore were less critical. These hardy pioneers of Methodism were fitted for the conditions of their day and generation and served with faithfulness those under their care. The men of to-day have other conditions to meet, not less difficult and arduous, if they do call for a smaller expenditure of physical strength. They have a much more severe course of preparation than their predecessors, which makes them broader minded and enables them to take a larger view of life than was possible with the itinerants of old who spent their nights in ten acre clearings in the virgin forest, and their days riding horseback along cowpaths in the bush. There are some few Methodists left who still sigh for the old fashioned preacher, but it is a safe assertion that if he returned in the spirit of fifty or a hundred years ago he would not be very heartily welcomed, even by his supposed admirers.

The world moves and Methodism moves with it. Up to the present the movement has been along the lines laid down by John Wesley. The path has broadened out here and there, but it is in the same direction, and the church is the same helpful and beneficient influence to-day that it always has been. That it will continue to be a power for good among the people of Canada nobody doubts for a moment. Individual Methodists have their faults, and even their representative bodies sometimes make mistakes. But there is a substratum of earnestness and sincerity among them so deep and wide that the edifice of Methodism cannot be shaken by the misconduct of a few or the foolishness of many.

A Plattsville Lady Rescued by Dodd's Kidney Pills from Terrible Danger.

Plattsville, Ont., Aug. 29—The Echo, published here, report the remarkable cure of a well-known lady, Mrs. J. Barnett, who had two years suffered from Nervousness, Rheumatism, Back-ache, Sleeplessness, pains in the head and eyes and general weakness.

Dodd's Kidney Pills cured her.

To an Echo reporter, Mrs Barnett said; "I had no appetite, I could not sleep, I was a physical wreck.

"I was treated by doctors, but their medicine gave me no relief.

"I started taking Dodd's Kidney Pills, and before I finished one box, I had improved noticeably. I have taken twelve boxes in all, and am now completely recovered. I ascribe my recovery to Dodd's Kidney Pills alone."

Dodd's Kidney Pills are a positive cure—the only cure,—for Kidney Diseases of all forms. They have never failed.

THE DOCTOR'S STORY

TRAGIC HISTORY OF JOE, HIS MOTHER AND THE BABY.

An Early Professional Experience That Was Brought Back to a New York Physician's Mind by the Story of a Murder In a Bowery Saloon.

"It's a queer world," said a New York physician as he laid the morning paper aside.

"What prompted that original remark?" asked a visitor.

"Well, I was just reading an account of a stabbing affair, and it suddenly occurred to me that I had known the man who did the killing." The doctor settled back in his chair, and the visitor waited for the story. After a few moments it came.

"When I first began to practice, I did an immense amount of charity work. Every fellow does that at the start for experience, and later he keeps it up for humanity's sake. I had pretty good success with children and made quite a name down in the tenement districts—and incidentally spent most of my pocket money on my patients. That was before the day of free sterilized milk for sick babies and dozens of institutions for the relief of the poor.

"One summer a woman began bringing a sick baby to me. A small boy, about 3 years old, always came with them and seemed to be fairly strong and well, but the baby was a pitiful little thing, with a thin, white face and big blue eyes with a look of pain in them. The woman seemed an ignorant, honest soul and generally wore a thick, dark veil to hide a black eye or great blue bruise. It's easy enough to figure out a thing like that, you know, but she never spoke of her husband or complained, so I didn't ask any questions. She brought the baby often, and each time it looked more waxen and scrawny, but I couldn't find out that the child had any disease, and all the symptoms pointed to a lack of nourishment.

"At last one morning I said to the mother that I believed the baby was starving, and that I didn't intend to allow her to leave the office until she had told me the truth about the affair. She looked stubborn for a moment and wouldn't answer, but then the tears began to roll down her bruised, discolored cheeks, and she confessed that she didn't have enough food to give the baby. She worked hard, but her husband drank and took every cent she made and beat her every day into the bargain. She was fond of the brute in spite of all that and told me a long story about the heavenly nature the fellow had before he began to drink.

"Finally I told her I would give her a quart of milk every day. I wouldn't give her the money because I didn't covet the privilege of buying bad whisky for the husband, but I would pay the nearest milk depot to supply her with a quart a day. That would feed the baby and leave some for little Joe, who didn't look quite so well as he did when the two first began calling on me. After that I didn't hear any more about the case for a week or two. Then my friends turned up again. The baby looked worse than ever, and the woman's face was a patchwork in blue and green, but little Joe was quite rosy. I didn't understand. The baby was in a bad condition, and I did what I could for it. After I left my office I went down to the milk depot. The man said my woman had had her quart of milk every day.

"I puzzled over the thing that night. The next morning the trio were at my office. The baby's blue eyelids were closed, and I thought at first that it was not breathing, but found a faint flutter. I couldn't see any reason for such a state of things, so once more I led the woman into my private office and shut the door. Then I said:

"'Now, look here. There's a mystery about this, and you've got to tell me what's the matter. That baby's starving to death, and I want to know what you've done with the milk.'

"The woman looked scared and turned pale between bruises. Then she gave a sort of wail and jumped up, still holding the baby.

"'No, the baby didn't have the milk!' she said in a frantic sort of way. 'I gave it to little Joe. There wasn't enough to feed them both, and Joe began to get sick, and I loved him better than I did the baby. I ain't had a crust to eat myself, but I couldn't let Joe die. The baby's only a girl, and if she does live she'll be unhappy like me, and I don't love her like I do Joe. I thought both of them were going to die, and I couldn't live without Joe, so I gave him the milk and just let the baby have a little. Maybe you think I ain't suffered watching the baby, but I couldn't spare Joe. I couldn't. Some day he'll be a man, and I'll be proud of him. A man can do anything, but a girl would just do what I've done. Joe shan't die.'

"She was screaming the words out and seemed almost crazy. The thing was awful. It made me feel heartsick.

"'Why, you idiot,' I said, 'why didn't you tell me? I'd have looked out for Joe too.'

"Just then the baby opened its eyes—great, uncanny, weird eyes—in the tiny face. It stared at me in a miserable way that made my heart come into my throat. Then all the light died out of the eyes, but they still stared.

"There was no use saying anything more to the mother. She sat down and looked at the baby in a quiet, stunned way. Then she reached out and put an arm around little Joe and held him tight. I told her I would keep on paying for the milk as long as she wanted it, and she and Joe and the baby went home.

"I never saw them again. When I went to the house, they had moved, and no one seemed to know where they had gone. Joe's the fellow who has just murdered a man in a Bowery saloon. I wonder what the girl would have been? It's a queer world."—New York Sun.

WOMEN'S FRIEND

Is the Name Whitby Ladies have Given Dodd's Kidney Pills.

Mrs. Hannah Webb Tells How Dodd's Kidney Pills Cured Her After Five Years of Suffering—Hope for all Women.

WHITBY, Sept. 2.—Few ladies are better known, or more highly esteemed in Whitby than is Mrs. Hannah Webb, who resides a few miles out of town, on the first concession in Whitby Township.

Consequently any statement made by that lady always receives the greatest attention from her many friends and acquaintances.

That is why all of Mrs. Webb's lady friends are using Dodd's Kidney Pills whenever they are attacked by any of the many diseases that go under the general name of "Diseases of Women."

Mrs. Webb some time ago gave a written statement of her experience with Dodd's Kidney Pills, which medicine is known in Whitby as "Women's Best Friend."

Following is Mrs. Webb's statement: "For five years I suffered with backache and severe pains around my heart. I doctored continually, but could get no relief, until I began to use those wonderful Dodd's Kidney Pills. Three boxes cured me completely."

On Mrs. Webb's recommendation, all the ladies of her acquaintance tested Dodd's Kidney Pills, as the need arose in each case.

And in each case there was but one result—a perfect, thorough and permanent cure.

Dodd's Kidney Pills are undoubtedly the *best friend* women can have, for they positively and permanently cure the painful and distressing complaints from which they suffer so severely and so frequently.

No remedy on earth has such wonderfully beneficial effect on the kidneys, as Dodd's Kidney Pills have.

This is the secret of their unbroken record of success, in curing Diseases of Women.

A trial will satisfy any lady that Dodd's Kidney Pills are the only medicine on which she can confidently depend to cure her.

The Best Parts of Lamb or Mutton.

In buying lamb or mutton you may choose the saddle or the whole hind quarter, the leg, loin or shoulder. The saddle is roasted, the leg is roasted or boiled, the loin is roasted or cut into chops and the shoulder is roasted. The hind quarter costs more than the fore quarter, but the shoulder piece, boned and stuffed, makes a very nice and inexpensive roast. The shoulder and neck piece are also used for lamb stews and fricassees.

Chops are cut in two ways—there are the long chops and the short chops. The long chops have the flank end left on, while in the short chops the flank is cut off and only the loin part used. The long chops cost less by the pound, but really are not so cheap, since the flank piece adds to the weight without giving any more eatable meat. It takes so much more to make the amount needed for family use that in the end it really *costs more* than the lesser number of pounds of short chops at the larger price.—Sallie Joy White in Woman's Home Companion.

Grand Trunk Engineer Swears by Dr. Chase's Kidney-Liver Pills.

Mr. Geo. Cummings, for over twenty years engineer on Grand Trunk running between Toronto and Allandale, says:—"The constant duty with my work gave me excessive pains in my back, racking my kidneys. I tried several remedies until I was recommended by my fireman, Mr. Dave Conley, to try Dr. Chase's Kidney-Liver Pills. Two boxes have completely cured me and I feel to-day a better man than ever. I recommend them to all my friends.

SEPTEMBER AND SICK PEOPLE.

Paine's Celery Compound the Great Autumn Medicine and Life Saver.

It Makes Strong Nerves, Calms the Tired Brain, Purifies the Blood, Gives New Life and Long Years.

The first month of the beautiful but variable autumn season is now with us—a time when the sick, suffering and diseased should think seriously about their condition. Many in weariness, despondency and physcial agony have dragged through the almost unbearable heat of of summer to encounter new difficulties and dangers that must add fresh fuel to the fires of disease.

It is folly to imagine that nervous disorders, rheumatism., neuralgia, dyspepsia, liver and kidney troubles and blood diseases can be treated with more success in the autumn season. The varied temperature of autumn—warmth, frosty nights, chilling winds and cold rains are as difficult to cope with as the enervating and weakening heat of summer. The medicines that have failed to bring good health in the hot weather, will not prove more efficacious when the weather becomes cold. A sweeping and radical change must be made by every sick and diseased mortal, and that without delay, if new health is to be established.

The medicine that has made sick people well in the past, after failures with other medicines, is Paine's Celery Compound. This marvellous prescription discovered after laborious, studies and scientific research by America's ablest physician, Professor Edward E. Phelps, M.D., LL.D., of Dartmouth College, and prescibed by the best practitioners in every city of America, is the one medicine suited to the present wants and needs of weary, sick and diseased men and women who have failed in the past to secure that jewel—good health.

Paine's Celery Compound makes short work of the diseases arising out of debility and nervous exhaustion. It quickly drives from the system rheumatism and neuralgia; it banishes like magic dyspepsia, insomnia, lassitude and irritability. It feeds the nerve centres and purifies the blood.

It is therefore all-important that the suffering and diseased should, without delay, make use of a medicine like Paine's Celery Compound that has such a wonderful and bright record to recommend it.

To the thousands who are not prostrated by severe sickness and deadly diseases, but who are simply tired-out, wearied and half-sick mortals, and who are not fully prepared to battle with the work and duties of everyday life, we say, "Give Paine's Celery Compound a fair and honest trial. Feed the starved and weakened nerves, throw off the poison that makes your blood foul and impure. Correct your digestive organism with Paine's Celery Compound, then will you increase in weight and in physical and mental vigor; the eyes will be bright the skin clear and spotless and the countenance will bear a happy and contented appearance.

NO PLACE LIKE HOME.

However Humble It May Be, It Never Has Had Its Substitute.

"There is no question about it, no matter how humble or unpretentious our homes are, there is no place in the world like them," said a gentleman who lives in Guatemala recently. "Guatemala is by no means one of the worst places in which to live, especially in the coffee growing sections. However, there are certainly much more desirable places all over the world. It is a fact that the natives there prefer it to anywhere else in the world. This was shown in a striking case which came under my observation.

"A wealthy gentleman in Guatemala married a beautiful girl. She was one of the most magnificent looking creatures I ever saw, of the pure Spanish blond type, which is seldom seen. The girl had been educated abroad and given every advantage. She was refined and cultivated. Her husband was devoted to her, and a short while after their marriage took her to Paris to live. There they had a splendid residence and everything that the heart of a highbred woman could desire. Everything was magnificently appointed. They entertained sumptuously, having ample means with which to do so. Still the bride was unhappy.

"Often the husband would return and find his wife in tears. He thought she would finally overcome it, but it seemed to increase. At last one day, becoming fearful that her health would suffer, he forced her to tell him what was the matter. It was simply that she wished to return to Guatemala to witness a little local feast participated in by the Indians and natives in that country. The feast was given annually, and as a child she had been accustomed to attend it. Although she had access to all the fine displays in Paris and Europe, she preferred to see the poor little celebration at home. Realizing that her heart was so fixed upon it, her husband was forced to relinquish the allurements of the gay French capital and take her back to the squalid surroundings of Guatemala."—Washington Star.

A NOVA SCOTIA CASE.

Significant Praise of Dodd's Kidney Pills by a Meteghan Citizen.

Meteghan, N. S., Aug. 22.—No man is better known to the travelling and commercial classes in this province than is Mr. William German, proprietor of the Bay View Hotel here.

An interesting statement is made bp Mr. German and reads thus:

"I take pleasure in testifying to the merits of Dodd's Kidney Pills. Two years ago I was suffering from severe pains in my back caused by Kidney Trouble.

"I got two boxes of Dodd's Kidney Pills and used them and my complaint was completely cured. I have not had the slightest pain since."

To all victims of Kidney Complaint there is one way of escape from their suffering. That is by using Dodd's Kidney Pills. They always cure.

Back From the Northwest.

Dr. Fife returned last night from a two months' tour in the Northwest. He visited his son William, who is farming with much success south-west of Winnipeg, at Roland. He has 290 acres of his half section under crop—210 in wheat and 80 acres in barley and oats, with the promise of a good crop. The Doctor also visited Winnipeg and Rat Portage. At the latter place his son Ashton, formerly in Stethem's hardware store, is conducting a successful hardware business. Rat Portage, though still a rough diamond, is prosperous and progressing rapidly. It is a very popular summering place for Winnipeggers, the beautiful Lake of the Woods being a grand attraction. Dr. Fife returned home via St. Paul and Chicago. He is ready to resume his practice.

A DISLOCATED SHOULDER.

Fell Through a Trap Door Yesterday Afternoon.

Mr. Thomas Stothart met with a serious accident yesterday at his farm, whereby he suffered a painful dislocation of his left shoulder.

On account of the rain, Mr. Stothart and his men were prevented from working in the fields yesterday, and put in the time cleaning up the barn after the threshing. While attempting to force down a small trap door into the floor with his foot, Mr. Stothard felt it suddenly give way beneath him. In order to save himself he threw out his left arm, and in falling his shoulder encountered the edge of the opening with such force as to dislocate it. The door gave away completely and he fell into the cellar.

Mr. Stothart was at once driven into town and Dr. Young pulled the refractory shoulder into place again.

Mr. Stothart's many friends will be pleased to learn that the accident had no more serious a termination, and that beyond a little soreness he is as hale and hearty as ever.

A NARROW ESCAPE.

The North Star Nearly Cut a Canoe in Two Yesterday.

When coming up from the locks last evening the North Star almost cut a canoe in two through the anxiety of the occupant to cross the bow of the steamer. The Star was coming up under a full head of steam with Capt. Jack Martin at the wheel when he observed a canoe coming out from the Ashburnham side. He held the steamer streight on her course never for a moment thinking that anyone would be foolish enough to attempt to cross. The two craft drew towards one another rapidly and only by reversing under a full head of steam was the accident averted. The passengers held their breath as the canoe barely cleared as the steamer rushed by with her speed only slightly checked.

ST. ANDREW'S YOUNG MEN'S GUILD.

An Enthusiastic New Church Organization.

A very enthusiastic meeting was held in St. Andrew's church last night when a number of the young men decided to organize for church work. About thirty-six were enrolled as members, and the following officers elected:

Hon. Pres.—Rev. J. G. Potter, B.A.
Hon. Vice Pres.—The Session and Board of Managers.
President—Peter Kerr.
Vice President—Bruce Anderson.
Secretary—Harry Beal.
Treasurer—Rollie Glover.
Executive Committee—Garnet Bell, Rollie Waddell, Thomas Anderson, Willis Garrow, James Maude, Wm. Lewis, Walker Connors, Alex. Weddell, Wm. Langford.

The "Guild" will meet in about a fortnight for the adoption of constitution.

PICNIC AT YOUNG'S POINT.

Under the Auspices of the Roman Catholic Parsonage Fund.

On Monday next, Sept. 5th (Labour Day), a grand picnic will be held at Young's Point in aid of the Romon Catholic parsonage fund. Numerous attractions will be provided for the entertainment of all who attend. A dancing pavilion will be erected on the picnic grounds adjoining the village, and excellent music has been engaged for the day. Canoes and row boats will be provided for those who wish to enjoy the pleasures of boating and fishing. Mr. Harvie's merry-go-round will be on the ground for the amusement of the children, and well stocked booths will provide meals and other refreshments liberally.

Rev. Father Fitzpatrick will have the assistance of an energetic committee of ladies and gentlemen, who will leave no stone unturned to give their visitors an enjoyable day. A large crowd from Peterborough is expected at Young's Point on this occasion. Cheap, convenient railway and steamboat arrangements have been made for excursionists. The Grand Trunk will issue half fare tickets for the return trip as follows: Adults 30c, children 15c. The steamer Majestic will carry excursionists from Lakefield to the Point at the following rates: Adults 30c, children 20c.

DAILY TEMPERATURE RECORD.

The following are readings of the official thermometers for this afternoon, as well as the highest and lowest yesterday—shade temperature:—

To-day, 1 p.m.....88°

	Highest.	Lowest.
Yesterday	89°	71°

The rainfall yesterday amounted to 1 inch and 14-100. Though the thermometer to-day does not register as high as the last few days, the heat still continues oppressive. Lowest temperature last night 69 degrees.

WAR ON THE TORMENTORS.

12 Years of Irritation. Torment and Pain Relieved and Cured With One Box of Dr. Agnew's Ointment for Skin Diseases and Piles.

A. Darnell, of Hayden, Neb., writes: "For twelve years I was tormented with itching piles, the agony at times was almost beyond bearing. I tried a dozen or more so-called pile remedies without any lasting benefit. One box of Dr. Agnew's Ointment cured me." This remedy cures eczema when all else fails. Sold by H. S. Macdonald.

Twin Plums.

Mr. J. W. Gardiner, of Cavan, has left with the EXAMINER two specimens of a rather rare fruit—twin plums. Each is perfect, with a pit to each one of the Siamese twins of the prunus family.

Monday Night Opening.

The Nelson Lewis Comedy Company appear this week. Engagement at the Opera House, Monday evening, Sept. 5th, with the four-act comedy drama, "The Lottery Ticket." The company is made up of the best dramatic talent of the large cities, each member of the company being a star. The performance as given by this company, is far superior to any given by a cheap attraction before a Peterborough audience. The animated story sheet which will be presented each evening alone is worth the price of admission. Good singing and dancing will fill the programme between acts, making the entertainment one continuous performance. Don't miss the opening, next Monday. Prices, 10, 20 and 30c.

Don't forget the Salvation Army Excursion to Queen's Park, Labour Day. A nice sail nine miles down the river. Adj. Morton from Toronto will conduct an old-fashioned camp meeting in the park.

THE STEAM ROLLER.

Tenders Were Opened Last Evening by the Street and Bridge Committee.

At a meeting of the Street and Bridge Committee last evening tenders for steam rollers were received as follows: Sawyer-Massey Co. $3,300, delivered on cars at Peterborough; Harrisburg Foundry and Machine Works, delivered on cars at foundry, $2 965, duty must be added to price; Buffalo-Pitts Co., delivered on streets of Peterborough $3.135.

The committee discussed the tenders but decided to make no recommendation to the council until a subsequent meeting.

Offers for a corporation lot were received as follows:

J. Spence, 57 Chamberlain street, $1000.
F. W. Hall, corner London and Aylmer streets, $1.500.
Cahill & Rush, lot between King and Charlotte along the creek. Willing to have price fixed by arbitration.
John Carnegie, part of lot 1, north Rink and lot 1, south of Townsend and west of George. No price.
Dr. T. N. Greer, lot at corner of Aylmer and Simcoe streets—frontage on Aylmer—$20 per foot, frontage.
From Thos. Bradburn, offering to lease lot 1, north of King and East of George street; or lots 12 and 13, south of Charlotte street, and west of George street; or lot 3, south of Brock and west of George street. No price.
E. A. Peck, the south 120 feet of lot 9, south of Simcoe and west of George street. $2.000.
Dennistoun, Peck & Stevenson, lot 9, north of Dalhousie and west of George street, $1.000.

It was decided to make no choice until all those tendering had submitted a price, the clerk in the meantime to notify the interested parties to this effect.

MOONLIGHT ON THE RIVER.

A Party of Young People Have a Merry Time on the Otonabee.

A merry party of young people went down the river last evening on the North Star and barge and enjoyed dancing in the moonlight until old Luna disappeared.

An excellent orchestra was present consisting of Messrs. Butcher and Miller and Misses Bell and McCabe.

Refreshments were served during the evening and the committee, composed of Messrs. M. Kennedy, R. P. Watt, C. McFadden and M. Comstock, is to be congratulated on the entire success attending the affair.

Dyspepsia's Clutch.

Dr. Von Stan's Pineapple Tablets are nature's most wonderful remedy for all disorders of the stomach. The digestive powers of pineapple can be tested by mixing equal parts of pineapple and beef and agitating at a temperature of 130° Fahrenheit, when the meat will be entirely digested. Pineapple Tablets relieve in one day. 35 cents. Sold by H. S. Macdonald.

Sewing Machines Repaired.

W. Smith, practical repairer and expert adjuster of sewing machines, with over 20 years experience in the leading sewing machine factories and repair shops, has returned to Peterborough for a short time and those with machines out of order, should avail themselves of his services while here. Remember, there is no old sewing machine, no matter how badly used up, that he cannot make do as good work as when new, and so guarantee it, or no pay. A canvas of the town will be made. Orders left at shop of M. H. Quinlan, Hunter street, will be promptly attended to.

A GIFT FOR VICTORIA MUSEUM.

An Ancient Pair of Gold-weighing Balances.

Mr. David Spence this morning showed the EXAMINER a peculiar pair of scales, which he has procured for presentation to the Victoria Museum.

The scales, which are of small size, the pans being a little larger than pennies, are very delicately adjusted, and were used over half a century ago in England for weighing sovereigns which had become worn, and whose real weight was at considerable variance for their face value. These scales were brought from England by the late Mr. John Robertson, and were used by him while he was a silk weaver at Coventry, and were brought out to this country about 55 years ago. The scales are enclosed in a case, which is the greatest peculiarity. It is composed of a solid block of wood, hollowed out like a dug out canoe, and contains compartments for the balances and the weights. Mr. Robertson's nephew, Mr. John Robertson, 100 Bonacord street, turned the outfit over to Mr. Spence for presentation to the Victoria Museum as an interesting souvenir of the Victorian age.

WOOD'S FAIR.

Wood's Fair has opened out a branch in Peterborough and will make a lively bid for patronage against the merchants carrying the same lines. The Fair is apparently a hustling concern, as there are over fifty branches in existence in Ontario to-day, extending from Kingston to Sarnia and from St. Thomas to Collingwood. London is headquarters.

Mr. E. T. Morgan, who has formerly managed the Ingersoll branch, is in charge in Peterborough.

The different lines handled in the store would be hard to enumerate, but about anything can be found there in the way of chinaware, glassware, tinware, woodenware and graniteware. A line of hardware and stove supplies is also carried, as well as shoe polish, soaps, baking powder, starch, stationery of all kinds, school books, fancy goods, toys and dolls of all descriptions, games, combs, brushes and lamps. Candy is also kept in stock and sold at the rate of mixtures and gumdrops 7c per lb., chocolates 2 lbs. for 25c. After the branch becomes well established lines of dry goods will also be handled.

See Grafton & Co Navy Blue Serge sailor suits with deep collars, braid trimmed brass button, pants lined throughout sizes 21 to 28 regular price, $1.00 Saturday special for 65c.

Mr. A. F. Hoover will resume his classes of pianoforte instruction Wednesday Sept. 14th at his Residence 222 McDonnel St.

SATURDAY, SEPTEMBER 3, 1898.

THIEVING IN THE COUNTRY.

Two Residents of the Hastings Road Relieved of Valuable Property.

Last Saturday night between 8 and 10 o'clock, while Mr. Andrew McGee and wife of the Hastings road were in Norwood doing some shopping some person or persons entered their residence and carried off two splendid suits of clothes, an overcoat, a waterproof coat and a felt hat. There is no clue to the guilty parties. Mr. McGee seems to be among the unfortunate ones in respect to losses of this kind. Several years ago his hired man while he was away from the house, skipped with a suit of clothes and $50.

Mr. James Metcalfe, who lives on the same road, also met with a loss last Saturday night. He had been to Norwood and returned home about 10.15, unhitched the horse from the buggy at the house, turned the horse out to pasture, and hung the harness up in the stable. Next morning he was minus the harness. It is thought that the horse would have been gone also had it been in the stable, and the buggy too, no doubt, had it been convenient. As in the other case there is no trace of the thief.

PERSONAL.

Messrs. Pigeon and Charlie Stone are off on a camping expedition.

Mr. and Mrs. John Nugent have returned from their summer home, Stony Lake.

Miss May Macfarlane and Miss Kate Carveth went up to Toronto this morning.

Rev. S. J. Shorey is in Toronto attending the General Conference of the Methodist church.

Mr. and Mrs. Hugh McDonald of Detroit, are the guests of Mrs. Stratton, Gilmour street.

Mr. C. J. Rodgers has returned from Toronto and is prepared to resume his lessons in music.

Mr. Alex. White has returned to Chicago after visiting in town, at the residence of Mr. Peter Connal.

Miss M. O'Hara, M D., a returned missionary from India, passed through town to-day for Keene.

Miss Lillian Ritchie, accompanied by Mrs. Ryerson Ritchie, of Cleveland, Ohio, are visiting in Toronto.

Misses Edna and Stella Stanger have returned home after spending a very pleasant visit in Campbellford.

James S. Potter, Sailors' Missionary, arrived in town to-day, and preaches in Keene, Westwood and Hastings to-morrow.

Mrs. S. J. Shorey has returned home after a seven weeks' absence from town, visiting friends and relatives in Picton and other places.

Mrs. John Lynch and daughter, and Mrs. Thos. Wallace of Five Lakes, Mich., are in town on a visit, the guests of Mrs. J. T. Rickey, Gilmour street.

Mr. W. H. Hill and family and Miss Taylor, of Niagara Falls, have returned for the winter from their summer sojourn at their cottage, Chemong Park.

Mr. Walter Stocker left this morning for Toronto, where he will embark on a Richilieu Line steamer for the trip to Quebec, the Saguenay, Tadoussac, Murray Bay, etc. He will be absent about ten days.

The Province, Vancover, British Columbia, publishes an article on "Rowing Men," illustrated with portraits of prominent Vancouver scullers, among which appears an excellent portrait of Mr. H. W. Kent, of the Burrard Inlet Rowing Club. An advertisement on the same page states over the signature of H. W. Kent, General Superintendent, that the telephone company will install services free of charge where six months' rent is paid in advance.

COULD NOT DRESS ALONE.

A Nova Scotian Farmer Tells of His Intense Suffering from Rheumatism and How He Found Relief.

From the Bridgewater, N.S., Enterprise.

Such suffering as rheumatism causes the victim upon whom it fastens itself is almost unendurable. Only those who writhe under its pangs can imagine the joy of one who has been freed from its terrors. Mr. J. W. Folkenham, of New Elm, N.S., is one of those who have been released from pain, and who believes it his duty to let others know how a cure can be found. Mr. Folkenham is a farmer, and like all who follow this arduous but honourable calling, is subject to much exposure. It was this exposure that brought on his trouble and caused him so much suffering before he was rid of it. He says:—"In the spring of 1897 I contracted rheumatism Throughout the whole summer I suffered from it, and about the first of October it became so bad that I could not get out of the house. The pains were located in my hip and back, and what I suffered can hardly be expressed. I became so helpless I could not dress myself without aid. Eventually the trouble spread to my hands and arms, and at times these would lose all feeling and become useless. In November I began using Dr. Williams' Pink Pills, and after taking four boxes began to improve. After using six boxes the pains and soreness had all gone and I was able to do a hard day's work. I intend using a few more boxes more as a precautionary measure, and I would earnestly advise those suffering from this painful trouble to give Dr. Williams' Pink Pills a fair trial and be made well.

Dr. Williams' Pink Pills cure by going to the root of the disease. They renew and build up the blood, and strengthen the nerves, thus driving disease from the system. Avoid imitations by insisting that every box you purchase is enclosed in a wrapper bearing the full trade mark, Dr. Williams' Pink Pills for Pale People.

THE TRENT CANAL, SECTION NUMBER 2.

The Progress Which is Being Made.

NUMEROUS DAMS CONSTRUCTED.

Contractors Corry & Laverdure Rushing the Work Between the Little Lake and Nassau—The Big Lift Lock Excavations.

Along the line of the Trent Canal operations between the Little Lake and Nassau there winds a narrow path in and out amongst the stones and across the bed of the excavations and back again numberless times. The track has been beaten by Mr. Thos. Kelly, the Government timekeeper for this section of the work, who in his travels covers about eighteen miles a day. It was the pleasure of an EXAMINER reporter to accompany Mr. Kelly over the line of work yesterday, and though him and the introductions given by him to the inspectors and foremen the following particulars concerning the progress of the work were gleaned.

In the first place the Peterborough-Lakefield section of the work is divided into two sections, viz, No. 1 and No. 2. The entire canal operations are conducted under the direction of Superintending Engineer R. B. Rogers, and the Peterborough section receives the attention of Mr. H. S. Greenwood, resident engineer. Under him are Mr. H. A. Morrow, who is in charge of the engineering operations on Section No. 1, and Mr. A. W. Spence, who performs similar duties

ON SECTION NO. 2.

Section No. 1 extends from Nassau to Lakefield, the contractors being Messrs. Brown, Love & Aylmer. Messrs. Corry & Laverdure are the contractors on section No. 2, extending south from Nassau to Little Lake.

At Nassau the proportions of the piers leading from the river into the canal proper at once attract attention. They are immense, extending for a distance of 1100 feet. Being built of concrete, the cost attached to their construction must have been considerable. Guard gates have been placed at this point in order that if an accident occurs below and repairs have to be made, the flow of water can be instantly shut off and diverted back into the bed of the river again. South of the piers, which are spanned by two fine steel bridges for the use of the public and the Grand Trunk Railway respectively, stretches away 1200 feet of dry wall leading down to a point where the riprapping begins.

Just here it may be well to point out that the greatest care is taken

WITH THE RIPRAPPING

as upon the manner in which it is done depends largely the life of the canal. The banks are first shaped to the desired angle and at a point several feet from the bottom a niche is cut to allow the insertion of a line of coping stone. From this to the top is spread an eighteen inch layer of cobble stone and over this again from six to eight inches of crushed stone is laid. At the top of the bank a neat line of coping stone is laid. The banks below the water line would not be affected by the wash created by steamers passing up and down but above this point considerable damage could be done if the banks were not carefully protected in the manner stated.

Just below the point at which No. 2 section of the canal branches away from the river a great coffer dam stretches across the Otonabee and here thirty men are at work building one of the finest dams on the river under the skilled eye of Mr. Edw. Wade. Mr. Sam Clegg is stationed here as Inspector on behalf of the Government. The dam is to be 350 feet long when completed and will occasion a fourteen foot

HEAD OF WATER,

or in other words will raise the river fourteen feet about its normal level for the purpose of diverting a portion of the flow into the canal. As the river is now fifteen feet in depth at Nassau, the dam has to be most substantially constructed to withstand the strain of the strong current which will be created by twenty-nine feet of water. Besides the two huge abutments, seven piers 11 x 40 feet in size, are being constructed on a base fourteen feet in height. The piers themselves are fourteen feet high in addition. The piers are pointed and the upper portions of the points are covered with iron in order to guard the piers from damage by ice or logs. In the centre of the dam is a fine run way for timber 10 feet in width and running out 15 feet below the dam, making the slide fifty-five feet in length. The timber of which the dam is constructed below the water line will be of hemlock, oak and ash, the balance

BEING OF PINE.

It was at Nassau that Mr. Laverdure was found sitting perched upon a tram car under a broad brimmed straw hat, taking in every move of the workmen with a comprehensive glance. After a kindly greeting from him, Mr. Kelly and the scribe proceeded on their way down stream, noting the curious rock formations through which the workmen had delved. The banks gradually sloped away until a point was reached at which, without excavating, the ground was on a level with the bottom of the canal at Nassau. Instead of arranging to have artificial banks built on each side of the canal, the Government has purchased about fifty or sixty acres of land here lying in the little valley, which will be entirely flooded when the water is let into the canal. Along one side an embankment extends for a distance of about eight hundred feet. It has a clay core, and is riprapped with a waste weir 20 feet wide pieced through the centre. This can be opened at any time and the water in the canal, between this point and Nassau,

LET OFF INTO THE RIVER,

so that when the guard gates before referred to are closed the bed of the canal can be easily and quickly drained dry. The embankment is known as Thompson's dam.

A mile further down is Herden's dam. The canal for some distance above this has a natural bank for its west side, but on the Herden property the bank branches off too much to the west and the dam therefore has been built from this bank in an easterly direction cutting off the water and running out to a point from which an artificial bank begins and the excavations go deeper. Quite a pretty lake will exist on the Herden property when the water is turned into the canal. The Herden dam is 20 feet high with a concrete core 22 feet in hight and is riprapped. A good deal of work is going on just here, seventeen teams and about forty men being engaged on the excavations under the superintendence of Mr. Dan Hennessy.

THE WARSAW ROAD

swing bridge is entirely completed with the exception of the construction of certain portions of dry wall between the concrete piers. This, of course, does not affect the travel over the bridge. Guard gates are to be placed beneath the bridge, similar to those at Nassau for stemming back the water in case of necessity.

A short distance below the Warsaw Road bridge is a curiosity in the shape of a five foot steel pipe, 126 feet long, which runs beneath the bed of the canal for the purpose of providing an outlet for Curtis' creek, which crosses the line of the Trent Valley at this point and afterwards finds its way through Ashburnham into the Little Lake.

Below this again the Norwood Road overhead bridge looms up in all its greatness, the iron girders of the superstructure looking quite slender stretching across from the great white abutments, which are thirty-three feet in height, and composed of concrete, with wing walls

STRETCHING AWAY TWENTY FEET

to each side. The concrete used in the substructure of this bridge is in an excellent state of preservation, not a single crack existing in the whole work.

The line of the canal here twists around behind Armour's Hill, occasioning the law suit in which judgment is now pending, and which aroused so much interest in the Court recently.

On account of the freshets off the hill in the spring, French drains have been constructed to run beneath the bed of the canal, and carry the water of the hill off into the valley below. In order that the drains may not effect the canal, a puddled clay bottom will be put in along here.

As the land falls away quickly from this point south the bed of the canal has to be raised above the level of the surrounding country to quite a height, and it is here that the great lift lock is to be erected, and though only in a stage of incipiency, the work is already attracting considerable attention. A steam shovel has been at work for some days gouging

A YAWNING CAVITY

into the hill. A tram way has been erected and the earth is quickly transferred away, by cable power and distributed where it is needed. When completed the lift lock will be the only one of the kind on the continent and the stupendous nature of the undertaking can be realized in a measure, when it is stated that the hydraulic pressure will be sufficient to raise a steamer in an iron pontoon filled with water sufficient to float it, from the lower to the higher level of the canal, or vice versa, a distance of 65 feet. A gang of fifty men is working here under Mr. John McCann, foreman. The Government Inspector is Mr. P. McNamara.

The steam shovel is kept at work night and day under the eye of Foreman James Armstrong, who last week worked four nights and three days in succession with only two hours sleep altogether. The earth is of the quality known as "hard pan" and is so difficult to work that dynamite cartridges are being used to loosen it.

A fine concrete culvert has been built here for the roadway which comes over the hill from Ashburnham and passes beneath the bed of the canal near the lift lock.

THE BLACKSMITH SHOPS

are just here, being in charge of George Armstrong and his able assistant, Robt. Baxter. This is where the repairs are looked after and the tram cars are built. The C. P. R. has run a siding right up to the lift lock in order to bring up the enormous amount of concrete, iron and timber which will be required in the construction of the lock.

After proceeding down past the C. P. R. and Maria street bridges, which were described when completed last summer, a busy scene is encountered, a large force of men being employed under Foreman Leary in a lock which will have a lift of 12½ feet. Great difficulties have to be contended with at this point on account of the quicksand. The excavations are deep and the work is being rushed as the banks are continually giving way causing the sand to crumble down in tons. A pile driver has just been erected, and it is proposed to check the

INVASION OF THE SAND

by driving piles along the bank. The lock will be erected on piles, as the foundation is of too shifting a nature to allow the concrete to be placed upon it without the risk of the whole affair disappearing some day. A coffer dam protects the men from the Little Lake, and a steam pump is constantly at work removing the water which comes in from above. The stone crusher has been brought down from a point farther up the canal, and the mixer is already erected, so that in a very few days the new lock will begin to take shape.

After taking such a trip with such a painstaking guide, one cannot help being impressed with the magnitude of the undertaking known as the Trent Valley Canal. The matter of the amount of money already spent on the work, and the time consumed in carrying out the scheme of connecting Georgian Bay and the Bay of Quinte is too well known a fact to be dilated upon, but the whole scheme is imbued with a warm interest in view of the recent appropriations made towards the completion of the work, and the advanced stage of the operations on the different divisions now under contract.

CHURCH COURTS

May Differ and Split Hairs on Doctrinal Points, but may Join Hands For Humanity in Proclaiming the Virtues of Dr. Agnew's Catarrhal Powder.

Catarrh, that dread menace to humanity, attacks the high, the low, the rich, the poor, the learned and the illiterate, but Dr. Agnew's Catarrhal Powder is the sovereign cure and needs no more reliable testimony of its efficacy to cope with and cure this disease than such eminent divines as Rev. W. H. Withrow, Methodist; and Rev. Mungo Fraser, Presbyterian; Bishop Sweatman and other prominent leaders in the Church Courts, who have over their own signatures testified of its virtues. What better evidence for you that it will cure you. Sold by H. S. Macdonald.

MIRACLE WASHING COMPOUND

Adapted to Finest or Coarsest Fabrics. Your Washing Done While You REST.

A Boon to Womanhood. No Need of Soaking Over Night. Washday Robbed of all its Terrors.

NO STEAM! NO LABOUR! NO ODOR!

A Family Washing Done While Breakfast is Eaten. Guaranteed Not Injurious.

DIRECTIONS—Slice one cake of Miracle Compound and one cake of common washing soap into two quarts of water and boil until dissolved; pour half of it while hot into tub containing enough very hot water to cover your clothes. Soak white clothes, curtains and cotton fabrics a few minutes in cold water; wring out and place them in the hot suds stirring enough to enable the suds to reach every part, and let them stand for 25 or 30 minutes; then wring out, rinse in lukewarm water, blue and hang on line.

FOR COLOURED CLOTHES, same suds can be heated and balance of mixture added to it; let clothes stand as for white.

WHILE YOU REST.

BLANKETS, FLANNELS AND WOOLENS should not be put in cold water, but placed at once in hot suds made as directed for other goods, and allowed to stand 30 minutes; then rinse and hang in warm place. If directions are followed, you will be delighted to see how soft and fluffy they feel—nor will they shrink.

Reasons why Miracle Compound is a Boon to Womanhood.

1st—No boiling of clothes required.
2nd—No rubbing or scrubbing of clothes.
3rd—No soaking of clothes over night.
4th—You save time, as it requires only one or two hours to do a very large washing, and fuel, because there is no boiling.
5th—You purify, preserve and disinfect all clothes washed with Miracle Compound.
6th—Clothes made yellow from the use of washing powders and age are restored to their original whiteness, and become as new by the use of Miracle Compound.
7th—All clothes washed with Miracle Compound we positively guarantee to last three times as long, because all dirt is removed and they escape the friction and pulling of the washboard.
8th—Woolens washed with Miracle Compound will not shrink, but are made soft and new.
9th—Our experience teaches us that Miracle Compound has no equal in powders or soaps for washing clothes, and so carefully are the component part of Miracle Compound blended, that we will cheerfully give $50 for any case where directions are followed and the results claimed are not obtained.

Elected a Commissioner.

"Frank H. Cooney was elected by the county commissioners to-day to fill the office of public administrator made vacant by the absence of Alex. C. Abbott from the state for a period of sixty days. There were three candidates for the position, W. E. Headings, Matt. Brown and Mr. Cooney. Each was ballotted on separately, and Cooney was the only one that received any votes, the three members of the board being unanimous in their decision. The new appointee will assume his duties as soon as he can qualify. The bond will be $15 000." The above is copied from the Daily Inter Mountain of Aug. 15th, published at Butte, Mont., and refers to a son of Mr. John H. Cooney, formerly of Norwood.

CAN'T ENJOY LIFE

Because of nervousness, dyspepsia, heart trouble, etc. Lots of people just have to sit and look on while their healthy, vigorous friends have all the enjoyment of a strong and robust body. Dr. Ward's Pills will bring back health, strength, snap, vim and energy to even the weakest and weariest of suffering humankind.

A BAD INVESTMENT MADE GOOD.

I have half a gross of empty bottles upon my shelves. Everything my neighbors and friends would tell me to try I would go straight away to the drug store and purchase. I was in a terrible condition from dyspepsia and liver troubles and was getting worse all the time. I was so discouraged buying one medicine and the other and receiving no benefit that I was about giving up all hope of ever getting better, when my husband brought me home a box of Dr. Ward's Blood and Nerve Pills, which he said had been highly recommended to him. I began using them at once, when, to my great surprise, I felt better in a very short time and continued them for about two weeks more which cured me entirely. I have not the least sign of dyspepsia or liver troubles now, and have also gained several pounds in weight.

Signed, ANNIE E. GAUNTLEY,
King Street, Berlin, Ont.

Dr. Ward's Blood and Nerve Pills are sold at 50 cents per box, 5 boxes for $2.00, at druggists, or mailed on receipt of price by The Dr. Ward Co., 71 Victoria St., Toronto. Book of information free.

AFTERNOON.

"Oh, sweet," she said, "that afternoon,
The smile of God on land and sea,
And sweet through many a vanished June
Comes back, like a remembered tune,
The silence of the shore to me!
Oh, sweet the moment was, the scene,
The flashing of the shingles wet,
The scent of clover and of bean,
Warm fragrance of the fields that met
The salt fresh breezes of the sea!
The white sails dropping out of sight
Were kindled into tawny flame,
And all the moor lay steeped in light
The way he came, the way he came!

"Oh, sweet," she said, "the warm, wet reach
Of glittering sand, the tide that woke
In tumult all along the beach,
Yet made the very calm it broke,
Blue was the heaven that o'er us bent,
The sheep upon a sunward slope
A quiet to the landscape lent,
And all things gave a widening scope
To thoughts of peace and calm content,
And all things seemed in league with hope
The way we went, the way we went!"
—Dora Greenwell in Good Words.

A MINISTER'S WIFE SPEAKS.

Feels it is Her Duty to let People Know About Doan's Kidney Pills.

Many people are suffering from kidney diseases and disorders — don't know the right remedy—frittering away their money and their health on something that does them no good. Listen to the advice of Mrs. Phillips, wife of Rev. C. T. Phillips, Woodstock, N. B., who says:

"A member of our family took cold from exposure and over exertion, which brought on severe kidney trouble, and suffered intensely from pains in the back and dis ress while urinating.

"We tried Doan's Kidney Pills, and they removed the trouble at once I do not hesitate to recommend a remedy that does its work so faithfully. I have proved them to be a specific for weakness of the urinary organs, general debility and other distressing troubles. I can therefore recommend them, feeling assured that those giving them a fair trial will find the result most gratifying."

Doan's Kidney Pills are for sale by all dealers, or sent by mail on receipt of price, 50 cents a box or 3 boxes for $1.25. The Doan Kidney Pill Co., Toronto, Ont.

Remember the name "Doans," and refuse all others.

Disappointed.

A little anecdote about Mr. Gladstone in The Chap Book makes itself welcome by touching the great man's humorous side.

The premier was invited to attend one of Punch's famous dinners. He was to meet Mr. Harry Furniss, who had, as one might say, discovered the Gladstone collar and was in the habit of caricaturing the statesman weekly by representing him almost buried in his own collar.

Mr. Furniss had of course been told that he was to meet Mr. Gladstone, and the entire company looked forward with amusement to the night when the ideal and the actual should thus confront each other.

The evening came, and Mr. Gladstone with it, but he wore a little band of white linen behind which not even the lobe of the ear could be concealed. He had appreciated the situation and provided for it.

CLOSE OF THE RIFLE MEET.

Concluding Day's Work in Canada's Big Shoot—Capt. Cartwright Wins the Governor's $250 Prize.

Ottawa, Sept. 2.—Yesterday was the closing day of the Dominion Rifle Association's matches at Rockliffe Ranges.

The Gzowski Military Challenge Cup presented by the late Sir Casimir Gzowski was won by the Royal Grenadiers team. The finish was as follows: $40 and cup, Royal Grenadiers, 524; $30, 13th Batt., 519; $25, 43rd Batt., 510; $20, 48th Highlanders, 486; $15, 5th R.C.A., 470; 57th Batt., 452; 3rd Vics., 419; 5th Royal Scots, 415; Prince of Wales, 404; Queen's Own Rifles, 382; 8th Royal Rifles, 320.

The first prize in the Nursery Aggregate, open only to competitors to compete in Nursery match for aggregate in Nursery, Bankers', Minister of Militia, and Kirkpatrick, went with $12 to Pte. Weatherbie, 82, with a score of 209.

Thirty dollars and the Challenge Cup, presented by the Marquis of Lansdowne, and $100 added, open to teams of five, to be awarded to named teams making best scores in the Bankers', Minister of Militia, Victoria, and Kirkpatrick, was won by the Toronto Royal Grenadiers with a total score of 1,253. The next four were:

$35—Guelph Rifle Association	1,240
30—43rd Battalion	1,239
15—77th Wentworth Batt.	1,232
10—8th Royal Rifles	1,231

Gillespie Challenge Cup—Teams of 6 men in the Bankers', Macdougall, Dominion of Canada, Militia, Victoria and Kirkpatrick matches. Individual medal for the highest scorer. Scores at 500 and 600 yards to count. The cup was won by the 77th Wentworth Batt., with a score of 1,790.

Governor-General's Match.

The Governor General's match was shot under favorable circumstances, and it was evident high scoring was to be done. The wind was a light twelve o'clock one, and the light bright. Interest, of course, centred on the last range. The prize winners are:

Ranges 200, 500 and 600 yards, seven rounds at each, possible 105.

After luncheon Major-General Hutton presented the prizes to the successful competitors in the Governor General's match.

British Challenge Shield.

Shield presented by auxiliary forces of Great Britain and $111 added by D.R.A. open to teams of four, as in Gzowski matches. The first prize of $30 was won by the 5th R.C. Artillery, with 75 hits and a score of 386.

The Meeting Closed.

The Canadian Bisley closed yesterday with the Provincial match, for teams of eight men, for the London Merchants' Cup. The ranges were 200, 500 and 600 yards, seven shots at each, and coaching is allowed. The result was as follows: Cup and $60, Province of Ontario, 744; $40, British Columbia, 729; next in order, P.E.I. 727, Quebec 725, Manitoba 734, Nova Scotia 723, New Brunswick 717.

In the evening the prizes won in the Canadian Rifle League were distributed by Major-Gen. Laurie, president; Major Mason, Hamilton, in the chair. The same officers as last year were elected.

The doctor may be a good old man, but even so, medical examinations and the "local application" treatment are abhorrent to every modest woman. They are embarassing—often useless. They should not be submitted to until everything else has been tried. In nine cases out of ten there is no reason for them. In nine cases out of ten, the doctor in general practice isn't competent to treat female diseases. They make a branch of medicine by themselves. They are distinct from other ailments. They can be properly understood and treated only by one who has had years of actual practice and experience in this particular line. This is true of Dr. R. V. Pierce, chief consulting physician of the Invalids' Hotel and Surgical Institute, at Buffalo, N.Y. Dr. Pierce's Favorite Prescription, a remedy for all derangements of the reproductive organs of women, has been in actual use for more than thirty years. It cures every form of "female weakness."

All Nerves.

Many people say they are "all nerves," easily startled or upset, easily worried and irritated. Milburn's Heart and Nerve Pills are just the remedy which such people require. They restore perfect harmony of the nerve centres and give new nerve force to shattered nervous systems.

Summer Complaint.

Very few people escape an attack of summer complaint. It comes on so quickly, with so little warning, that every one should have in the house a bottle of Dr. Fowler's Wild Strawberry and be prepared to check it at once.

"I have used Dr. Fowler's Extract of Wild Strawberry for years and found it to be the best medicine I ever had for Diarrhœa and Summer Complaint. I have used more than a dozen bottles and would not be without it in my house. I consider it a safe and reliable remedy for all bowel complaints of children or adults."

JACOB SIMMERMAN,
Smithville, Ont.

Diarrhœa of Infants.

Too many babies die every year of cholera infantum. That dread disease soon blots out a little life. Don't let your baby be a victim. Dr. Fowler's Extract of Wild Strawberry is the only safe remedy for the diarrhœa of infants.

"I cured my baby of a bad attack of cholera by using Dr. Fowler's Extract of Wild Strawberry for it; nothing else did any good; but the baby improved from the first dose of Wild Strawberry. I highly recommend it to mothers."

MRS. W. WALTERS,
Richmond St., Hamilton.

Dr. Fowler's Extract of Wild Strawberry is sold by medicine dealers everywhere at 35 cents a bottle.
Refuse all substitutes and imitations, many of which are positively dangerous.

Diarrhœa and Dysentery.

Nothing will weaken the system so quickly as an attack of diarrhœa or dysentery and no disease will prove so rapidly fatal if neglected and allowed to run its course unchecked. The only safe, prompt and effective remedy is Dr. Fowler's Extract of Wild Strawberry; it not only checks the diarrhœa, but stimulates the weakened heart.

"I have been greatly troubled with dysentery for some time. Dr. Fowler's Extract of Wild Strawberry I consider a wonderful medicine for bowel complaints, as it has given me great relief when all other remedies failed."

W. P. LITTLE,
Alexander Station, Man.

Cramps and Colic.

"Sometime ago I was taken very ill with vomiting, diarrhœa and cramps, which pained me so much that I could hardly bear the suffering. I tried many things but they were of no use. I was advised to take Dr. Fowler's Extract of Wild Strawberry and it was the first thing I got that would stay on my stomach. It gave me almost instant relief from the pain and stopped the vomiting and diarrhœa. I cannot recommend it too highly, as I consider there is no remedy equal to it for bowel complaints.

North American Life
ASSURANCE CO.

OFFICE OF W. A. MURRAY & CO., 17 to 27 King St., East, Toronto.

Wm. McCabe, Esq., Managing Director, N.A. L.:

DEAR SIR,—In answer to your request for me to decide upon one of the following options offered me for settlement of my 15-payment Life Investment Policy for $5,000 which has matured this year, viz:

1st to take the value of the Policy in Cash	$5,000.00
2nd, or fully paid-up insurance for	3,280.00
3rd, or take the profits in cash and continue my policy without further payments being required from me, sue policy participating in future profits.	2,650 25

I find it somewhat difficult to make a decision either of the three options being so satisfactory. I am certainly very much pleased with the results offered me, and as I find many others are giving full testimony to the profit-earning power of this company, I do not hesitate to give my endorsement as well, that the North American Life is one of our strongest Canadian institutions to day giving first class results on Investment Policies, on a safe and conservative basis. I find that my policy, which was originally a Life by fifteen payments, has become an Endowment at the end of the Investment period.

Those terrible dizzy spells to which women are subject are due nine times in ten to some weakness or unhealthy condition of the distinctly feminine organism. The average doctor in general practice does not half realize this. He prescribes some superficial treatment for headache or dyspepsia or liver trouble without suspecting the real cause of the difficulty.

A woman usually understands what is the trouble but is loath to undergo the mortifying and generally useless "examinations" and "local applications" on which the local practitioner is almost sure to insist. But there is a far more sensible alternative: Any woman afflicted with a delicate weakness of this nature should seek the aid of that marvelous "Favorite Prescription" invented by Dr. R. V. Pierce, chief consulting physician of the Invalids' Hotel and Surgical Institute, of Buffalo, N. Y.

In any case so obstinate as not to be promptly cured by this great "Prescription" special advice for inexpensive home-treatment adapted to the individual case, will be sent by Dr. Pierce to any one who will address him by mail. All letters are treated with the strictest privacy and never printed except by the writer's special request. Cases intrusted to his care are in the hands of one who has a lifetime's experience and who stands among the most eminent of living specialists in this particular field of practice.

Every woman should possess a copy of Dr. Pierce's famous thousand page illustrated volume, the Common Sense Medical Adviser which has had a larger sale than any medical book in any language. A paper-bound copy will be sent *absolutely free* on receipt of 21 one-cent stamps *to pay the cost of customs and mailing only.* Address World's Dispensary Medical Association, Buffalo, N. Y., or send 50 stamps for cloth-bound copy. A whole medical library in one 1000-page volume.

MAN EATERS AS PETS.

Sir Henry Rawlinson Possessed Wonderful Taming Power Over Wild Beasts.

Sir Henry Rawlinson, the great authority on Persian inscriptions, wrote his "Memoir" in a summer house overhanging the Tigris, where the outside heat of 120 degrees was reduced to 90 degrees by the action of a water wheel which poured a continuous stream of water over the roof of the house.

For recreation while writing this book Rawlinson indulged in petting wild animals. He had a tame leopard named Fahad, which he brought to England and presented to the zoological gardens at Clifton, near Bristol. Whenever Rawlinson was in England he would visit Fahad. As soon as the beast heard his cry, "Fahad, Fahad!" it would rise from the floor of its cage, approach the bars and then, rolling on the floor, extend its head to be scratched.

Once the keeper, who did not know Sir Henry, on seeing him putting the leopard, exclaimed:

"Take your hand out of the cage! The animal's very savage and will bite you!"

"Do you think so?" said Sir Henry. "I don't think he'll bite me. Will you, Fahad?" And the beast answered by a purr and would hardly let the hand be withdrawn.

He also had at Bagdad a pet lion, which had been found when a kitten on the bank of the Tigris, its mother having been shot, and brought to Sir Henry. He alone fed it, and the lion when grown would follow him about like a dog. One hot day the lion moped and rejected its food. It paced about the master's room, and he, being very busy, called two servants to take the lion away.

The lion would not go with them, but drew nearer its master and at last sat down under his chair, with its head between his knees.

"Oh," said he, "if he won't go, let him bide."

The servants went out, and Sir Henry wrote on. The lion sank from a sitting position into that of a "lion couchant." All was quiet for several hours save the scratching of a pen. When his work was over, the master put down his hand to pat the pet. The lion was dead.—Youth's Companion.

VENETIAN GONDOLIERS.

The Life Is One of Hardship, Continual Exposure and Fatigue.

The gondoliers of Venice have again and again risen against the ruin of their livelihood by the "black devils" of the vaporetti, but force is at once called in, and they are brutally silenced, flung into prison and deprived of their license—i. e., of their daily bread. Because it is so picturesque a calling, and the balancing of the oar looks so easy a work those who are outside it do not realize its hardships. In summer if Venice be full it is well enough and brings a fair though never a high wage, but in the other seasons it is a life of great and continual exposure and fatigue. In cold weather—and Venice is intensely cold in the winter solstice—the long vigils on the traghetto are most tedious and trying, especially through the long chill nights. When the icy winds blow in from the Alps or the Adriatic, the gondolier stands exposed to all their fury, while the passenger he carries sits warm and sheltered under the felze.

Strong and lithe in form, often handsome in feature, almost invariably intelligent and acquainted with legend and verse, invariably courteous and well bred, the gondolier should have received the utmost attention from his rulers. It is painful to know that no body of men has ever been so slighted, so injured, and so wantonly outraged.

There is nowhere any more interesting and deserving community than the Venetian gondoliers, and few more worthy of regard, yet they have been dealt with as though they were no more than so much scum of the sea. Their long established rights receive no consideration, and their injuries no compensation.

If the vote of Venice could have been honestly polled, no steamboat would ever have been allowed on the Grand canal, just as if the vote of Florence could have been honestly polled the center of Florence would be now standing untouched and would have remained untouched for many a generation.—Ouida in Fortnightly.

KEEP THE BLOOD COOL

By Using the Great Natural Blood Cooler, Dodd's Dyspepsia Tablets.

Dodd's Dyspepsia Tablets Ensure Perfect Digestion, and Perfect Digestion Gives Cool, Rich Blood—Cool, Rich Blood Means Perfect Health.

When a man is in the most deadly danger, the surest way to escape safely is to—Keep Cool.

When, as in these sultry days of midsummer, the blood's temperature rises far above the normal point, grave danger to health and life results.

The only way to escape the danger is to Keep the Blood Cool.

A great many of us endeavour to do this by drinking what are called "cooling drinks," which, by causing a sudden change in the temperature, create a danger as grave as as that they are supposed to prevent.

Many others drink alcoholic liquors, which have the same effect as adding fuel to fire.

There is one safe, sure and simple way of cooling the blood. That is by using Dodd's Dyspepsia Tablets.

This is the only natural way to cool the blood, and to keep it cool—for Dodd's Dyspepsia Tablets make it cool at the fountain, thus insuring a cool stream.

If there should be any person who doubts this, a trial will speedily prove the truth of the claim.

The person whose blood is overheated will have pimples on his face, neck, or shoulders; or, he may be tortured by boils, etc.

To test the wonderful virtue of Dodd's Dyspepsia Tablets, let him use them according to directions, for a few days, and the pimples, or boils, will speedily disappear. He will "feel better," too. His food will do him good. His appetite will become good, and his general health will improve.

USE DODD'S DYSPEPSIA TABLETS FOR DESSERT.

And Victory Followed.

"A good general never overlooks a point in the game," said an ex-army officer. "Apropos to this, I recall what seemed a little thing that happened before we attacked Fort Donelson, and yet there is no measuring the effect it may have had upon history. 'General Grant called a council of war to consider whether they should attack at once or give the troops a few days' rest. The other officers favored a rest, while Grant smoked and gave no opinion.

"'There was a deserter brought in this morning,' the general finally said, 'Let us see him and hear what he has to say.'

"The first thing Grant did when the fellow came in was to open up his knapsack. 'Where are you from?' the general then asked.

"'Fort Donelson.'

"'You have six days' rations, I see. When were they served?'

"'Yesterday morning, sir.'

"'Were the same rations served to all the troops?'

"'Yes, sir.'

"'Gentlemen,' said Grant, 'troops do not have six days' rations served out to them in a fort if they mean to stay there. These men mean to retreat, not to fight. We will attack at once.'"—Detroit Free Press.

The Flogging Judge.

Mr. Justice Day is the English flogging judge, he having sentenced 137 criminals to 3,766 strokes of the cat in 14 years. Five other judges have used the discretion given them by statute in greater moderation, their combined record being 1,776 strokes to 89 criminals. A gang of highway robbers that had terrorized Liverpool, some of whom he had himself seen at work, came before Justice Day for sentence ten years ago. "I am not going to give you men long terms of imprisonment," he said, "but when you go in you get 20 lashes of the cat, when you have been in nine months you get 20 lashes of the cat and before you come out you get 20 lashes of the cat, and then you can show that to your friends."

TWIN TORTURERS!

Lumbago and Rheumatism made Harmless by Dodd's Kidney Pills.

Lumbago and Rheumatism cause endless pain and suffering. Every man and woman who runs chances of getting wet, or catching cold, is liable to suffer from one or both. Our hospitals are full of sufferers from these diseases; none are more painful. Every nerve is on fire; every joint is a centre of agony; every muscle an area of torture. To move hand or foot makes the victim shriek with agony.

Rheumatism makes more cripples than all the railroad accidents that ever happened. Twisted, mis-shapen caricatures of humanity, who cannot walk without misery, are to be seen every day. The kidneys are to blame. If they are healthy you needn't fear Rheumatism or Lumbago. Dodd's Kidney Pills keep the kidneys healthy and cure Rheumatism and Lumbago.

Dodd's Kidney Pills ALWAYS CURE.

THE WRITERS.

Georg Moritz Ebers, the famous Egyptologist and novelist, is dead.

A new volume novel by Kipling will appear this fall. It is to be called "The Day's Work," and the author has been working on it for the past three or four years.

Maarten Maertens is at work on a new book. The action will take place in Egypt and Palestine, where the Anglo-Dutch author has been for some time collecting material.

New York state lost the best authority on her history in the recent death of George S. Conover at Geneva. His original researches resulted in the accumulation of much valuable material.

Mr. Rider Haggard is at work upon a bucolic volume to be called "A Farmer's Year; Being His Commonplace Book For 1898." It deals with country life in the English county of Norfolk and gives a daily record of experiences on a 360 acre farm.

Evan MacColl, the Scottish-Canadian poet of Toronto, who has just died at the age of 90 years, was born in Kenmore, Argyleshire, Scotland, became a contributor to The Gaelic Magazine of Glasgow in 1837, came to Canada in 1850 and until recently was an attache of the Kingston custom house.

Kidney-Bladder Troubles.

There is no more serious menace to good health in the present age than kidney disorders, and its an appalling fact, but a true one, that four-fifths of the country's people have the taint of this insidious disease with them. Dr. Chase's Kidney-Liver Pills cure all kidney disease.

Repairing Clocks.

"Watch repairers have a horror of touching a clock that has been tinkered by amateurs," explained a watch repairer to a reporter, "and they would rather get out of such a job if they can do so, for the loss of one of the smallest parts means considerable work to reproduce it, and much more work than the general customer expects or wants to pay for. They try to get rid of such a job when they can, for in nine cases out of ten the result is not entirely satisfactory. People who have a good clock, unless they know something about the way clocks are made and how they should be taken apart, will do the wise thing to let it alone when it gets out of order. Experimenting with it often means the ruin of the clock. It is absolutely dangerous to try to unwind a mainspring, as men have discovered for themselves, unless the proper tools are handy. Now, a clock repairer has a contrivance known as a spring controller, which grasps the spring and holds it while being taken out or put into the clock, so that there is no danger. The spring for an eight day clock is often two yards long, and when suddenly let free it flies out with nearly the force of a charge of shot from a gun.—Washington Star.

THE PLEBISCITE AND PROHIBITION.

To the Editor of the Examiner:

"Oh those hideous monster sin,
What a curse has thou brought in.
All creation groans through thee
Pregnant cause of misery." "*Hart.*"

"And now also the axe is laid unto the root of the tree!" "Gospel according to Mathew."

SIR,—You have kindly offered space in your paper for correspondence on the prohibition and plebiscite question either pro or con. I may say that I am neither the one or the other; but if the space is not filled, may I have the opportunity to say a word while they are making ready. If I could think the axe was being laid upon the root of the tree, I would do all I could to help. The strugle should be with one who drinks to excess—the drunkard. Prohibition may cut off a branch; but the tree still survives. I take no second place against drunkenness, and while I am held out to be worse than the one that gets drunk, I still maintain my position and believe I do as much to save the drunkard, as any prohibitionst. We have no need of any fictions or any sensational writing or speaking too portray its character. We have the real thing too often before our eyes, and too often brings sorrow and misery to our home. Now it spoils the pleasure we would sometimes take, when we hear this Dominion, this great Canada we live in, spoken of in such high and glorious terms. I think of Jonah's worm that smote the ground, or like Haman when he told his friends of the glory of his riches, of the things wherein the king had promoted him, how he had advanced him above the princes and servants of the king, yet all this availeth me, nothing so long as I see Mordecier the jew sitting at the king's gate; so this one evil alone is enough to lay us in the dust. We turn away in disgust from the object. I believe, as a rule, the much abused seller of drinks does not wish any one to get drunk on his premises. What has been the experience of those most successful in reforming the drunkard? Have they been opposed and hindered by those in the traffic? What has Adjutant Dowell to say in his report of his visit to the Klondyke: "When at Skagway, when Soapy Smith and his gang were 'rounded up,' we had some conversation with the noted character, who declared his appreciation of the Salvation Army, and gave him five dollars to help on the work, and offered his saloon in which to hold a meeting.' Prohibitionists would like to ask some questions, and knows there are many who will be prepared to answer him, but he "must have nothing but good sound arguments and convincing facts." First, "what good has whiskey, beer and rum drinking done for us?" He also says he wants some facts proving that the use of strong drink is worthy of a place in our society. Does he really expect an answer, or does he think they are unanswerable? I think they are not to be answered. I might ask a thousand similar questions. Any one to have a right to an answer must ask a proper question. Silence is the only answer to some questions. The wise man gives proper instruction in this matter. Prohibitionist wants also some facts to show why a prohibitory liquor law will not be effectual. I do not know that facts can be obtained, but this I say that no law can be made to stop its manufacture or prevent its being drunk, while there are those inclined to it. Have I not a right to take this stand, and say to those who differ: "It is for you to prove that it can be done." Past experience with the Duncan Act and the Scott Act we cannot forget. On this point, however, let me refer to the Police Magistrate, who should be an authority (I am not sure, but he is a prohibitionist.) Than the law forbidding shooting in the water is utterly repugnant to the general judgment of the hunters, for while as sportsmen they feel bound in honour to uphold regulations for the preservation of game, they do not respect one which they realize as a great mistake, and so they will go to their outing desirous of keeping the law, but kowing that it will not be observed." Individuals may feel bound, but they will see it broken on every hand. Let us see to it, then, what laws are made. To make laws that will not be observed is as bad as to break them. In what is said about the Maine liquor law I quite agree, but must break again when he comes to Dr. Grant. To prove the doctor wrong, he says the General Assembly of his own church in Montreal voted against him almost to a man. Prohibitionist would blush to have the meagre following, if the doctor did not. The other anonymous thinks just the same. "Even Dr. Grant has been obliged to confess that part at least of the statistics quoted by him as convincing facts were unreliable." Was the doctor responsible for those statistics? Must the doctor be wrong because of his following? Now, as a rule, in the multitude of councillors there is safety, and the majority should rule; but there are exceptions. When I was immersed in winter according to, as I believe it to be, the Scripture practice, some good men, to prove I was wrong, said, "See how few there are of your belief, and the great number of other Christian bodies. Surely they are right or they would not have so increased in numbers." It is more than fifty years since, and I am yet to be convinced I was then wrong. The doctor is too firm to be soon shaken, and too high bred to be held in with bit and bridle by any church.

I have already exceeded the limit, so must conclude with thanks for this indulgence, and remain

As ever yours,
JOHN BABB.

A POPULAR HOME WORK.

Successful Only When the Diamond Dyes are used.

In thousands of happy and thrifty homes in the Dominion and in the colony of Newfoundland the work of rug and mat making is becoming very popular. Homemade rugs and mats are more highly esteemed just now than imported goods. This is not surprising when we remember the fact that the home articles are the best wearing and prettiest.

The Diamond Dyes have given a great impetus to the work of making homemade rugs and mats. In former times the troublesome part of the work was the dyeing. With the old fashioned and poorly prepared dyes the dyeing operation was long and unsatisfactory. The introduction of the Diamond Dyes with their special colors for wool, and for cotton and mixed goods, has been a boon to womankind. Old and faded rags and yarns for mats and rugs can now be dyed any beautiful and brilliant shade with the Diamond Dyes—shades that are perfectly fast to sun and soap.

If you wish to be at all times successful in dyeing for rug and mat making, we here utter a warning note against the use of adulterated package and soap grease dyes that only produce muddy and streaky colors that cannot possibly stand an ordinary washing. Ask for the Diamond Dyes, use them as per directions, and your success is sure.

Hands Raw With Eczema

Husband Had to Undress and Dress Wife Like a Baby. Doctors' Medicines Drove Her Almost Crazy.

First Application CUTICURA Gives Perfect Ease in Five Minutes, and a Night's Sound Sleep.

My hands were completely covered with Eczema, and between my fingers the skin was perfectly raw. I had to sit with both hands held up, and away from the fire. I could get no ease night or day. I could not bear to get warm, it would put me in a rage of itching. My husband had to dress and undress me like a baby. The best physicians' medicines gave me no relief, and drove me almost crazy. I was advised to try CUTICURA REMEDIES, and did so, although my husband had to go twenty miles to get them. As soon as he got back, I used the CUTICURA (ointment), and *five minutes after the first application I was perfectly easy, and slept soundly all that night.* I always keep CUTICURA REMEDIES in my house now, and recommend them to everybody, because of their wonderful effect.

A CONVERTED PHYSICIAN.

With the Aid of South American Kidney Cure, Nurses His "Hopeless" Cases Back to Health.

A prominent physician writes this of diabetes: "Personally until very recently I have never known an absolute cure." But this same physician says further that he has noted the wonderful work accomplished in patients of his by South American Kidney Cure; patients whom he had ceased to treat because in his estimation there was no cure and no hope. What a tribute this is to be the medical genius in the compounding of this great remedy—this kidney specific. It soothes, heals and cures the diseased parts. Does it quickly and permanently. Sold by H. S. Macdonald.

SOUTH ONTARIO PROTEST.

Order Made on Thursday Subtituting a New Petitioner—130 Charges of Corrupt Practices.

A number of inaccurate statements have been made in regard to the position of matters in connection with the election petition for South Ontario, special interest attaches to the protest in this constituency from the fact that the defeated candidate there was Hon. John Dryden, the Minister of Agriculture. The situation of affairs is as follows:

An order was made by Mr. Justice Osler Thursday substituting John F. Tamblyn, of the town of Oshawa, petitioner in place of Charles Henry Pilkey, the previous petitioner, to whom objection had been taken on the ground that he had become a citizen of the United States some years ago while residing there. This proceeding is one expressly provided for in the Ontario controverted elections act. Section 98 of that act provides:—"In case a petitioner in an election petition shall not be qualified to be a petitioner the petition shall not on that account be dismissed if, within such time as the court or Judge shall allow for that purpose, another petitioner is substituted, which substitution may take place on such terms and conditions as to the court or Judge may seem meet."

The particulars of the corrupt practices alleged against the sitting member, Charles Calder, M. P. P. and his agents were delivered on Tuesday last, and comprise 130 charges of corrupt practices. The time fixed for the trial is Sept. 12th at Whitby. Mr. Justice Osler also made an order that the particulars of corrupt practices already delivered should stand as the particulars of corrupt practices in the petition with the new petitioner, Mr. J. F. Tamblyn, and that it should not be necessary to deliver new particulars, as Mr. Tamblyn, the new petitioner, adopts the particulars already delivered.

From the Dark Continent.

Many persons, having heard of the wonderful Kola plant, have inquired as to its source of supply. The plant grows along the Congo River of Darkest Africa. Owing to the investigation made by England's most noted physician, Dr. Clarke, it has been found that by combining the extract of Kola Nuts with other extracts from leaves grown in the Rocky Mountains, the compound procured will permanently cure asthma, even in advanced stages. Dr. Clarke's Kola Compound is now recognized to be the only remedy yet discovered that will permanently cure this most dreaded disease. Three bottles, or nearly 60 days' treatment are absolutely guaranteed to cure asthma, or money refunded. Sold by Ormond & Walsh. Free sample bottle sent to any person. Mention this paper. Imported to Canada by The Griffiths & Macpherson Co., 121 Church street, Toronto, or Vancouver, B. C., sole Canadian agents.

Clarke's Kola Compound is the only positively guaranteed cure for asthma. Successfully used throughout all the leading hospitals in England and Canada.

Others may relieve, but Clarke's Kola Compound for asthma permanently cures.

DERVISH SLAIN AT OMDURMAN.

The Estimate Varies From 8,000 to 15,000—The British-Egyptian Loss Placed at 500—The Escape and Chase of the Khalifa and Osman Digna—Cable News.

London, Sept. 6.—The War Office received yesterday afternoon the following despatches, dated at Omdurman the day before, from the Sirdar, General Sir Herbert Kitchener:

"This morning the British and Egyptian flags were hoisted with due ceremony upon the walls of the Saral (the palace) in Khartonm.

"All the British wounded have left for Abadia in barges towed by steamers. I saw them before leaving. They were all doing well and were comfortable.

"The cavalry sent in pursuit of the Khalifa were compelled to abandon the attempt owing to the exhaustion of the horses, but I have ordered camel squads to continue the pursuit."

CHASE AFTER ABDULLAH.

Anglo-Egyptian Cavalry Exhausted in Pursuit and Fail to Capture.

Cairo, Sept. 6.—Advices from Omdurman say that the Anglo-Egyptian cavalry which went in pursuit of Khalifa Abdullah after the fall of Omdurman abandoned the pursuit about thirty miles beyond the city. The horses were completely exhausted, having ridden 24 hours, during 15 of which they had been engaged in fighting. The Khalifa has gone to Kordofan, southwest of Omdurman. General Kitchener has organized Arab camel squads to follow him.

Yesterday the British and Egyptian forces with the Sirdar participated in an imposing service in memory of General Gordon.

List of Killed and Wounded.

London, Sept. 6.—Despatches from Omdurman relate that the newspaper correspondent Howard, who was afterward killed, rode in the gallant charge of the 21st Lancers. These troops were scouting when they saw in the bush between 600 and 700 Dervishes. The Lancers charged the enemy and suddenly found themselves face to face with 2,000 swordsmen, being outnumbered at least four to one. The Dervishes were hidden from view in a hollow. The Lancers charged through them, re-formed and charged back to recover their wounded, who were being savagely slaughtered.

The official list gives the number of British officers killed in the capture of Omdurman as two, while 13 were wounded. Of the men 23 were killed and 99 wounded. The loss sustained by the natives was: Officers, one killed, eight wounded; men, 20 killed, 221 wounded. *Colonel Rhodes, a brother of Cecil Rhodes,* and a correspondent of the London Times, was severely wounded, a bullet having struck him in the shoulder.

Emperor William Was First.

London, Sept. 6.—The Cairo correspondent of the Times says: "The first telegram of congratulation to arrive from Europe was from Emperor William of Germany, who said: 'I am sincerely glad to be able to offer my congratulations on the splendid victory at Omdurman, which, at last, avenges poor Gordon's death.'"

FIFTEEN THOUSAND SLAIN.

The Khalifa Escaped With His Harem and Osman Digna.

London, Sept. 6.—The war correspondent of the Daily Telegraph with the Anglo-Egyptian forces says:

Khalifa Abdullah, with his harem, and Osman Digna, his principal general, managed to escape, but Abdullah's banner and thousands of prisoners are in our hands. It is estimated that 15,000 of the enemy were slain. Our total casualties were about 500.

Besides Col. Rhodes another correspondent was slightly wounded. Mr. Howard, the New York Herald correspondent, was slain by a shell in Omdurman.

The war correspondent of the Daily News says: "Our victory was not easily or cheaply won. The Dervish loss was enormous. It is estimated that the killed of the enemy were no fewer than 8,000.

"Our whole force was engaged in the fighting from 6.30 a.m. until sundown. The Dervishes displayed marvellous bravery to the last. Instead of waiting for us in Omdurman, where they could have made a resistance that would have cost us thousands of lives, they advanced to meet us. The sight was extraordinary. Some 12,000 men, in four brigades, attempted to rush our zereba.

"With desperate gallantry they were repulsed, suffering huge loss. Our Maxim guns especially made terrible lanes in their ranks and our artillery dealt havoc in the town, which was full of women. The Dervish army of 60,000 is utterly broken; but we are fully prepared to fight to-morrow if they wish it."

SATISFACTION IN LONDON.

Placards Bearing the Inscription, "Avenged at Last," on Gordon's Statue.

London, Sept. 6.—The news of Gen. Kitchener's victory over the Dervishes at Omdurman was received with the greatest satisfaction here.

Early yesterday morning crowds gathered about the statue in Trafalgar Square of Gen. Charles (Chinese) Gordon. Some one had placed on the pedestal a placard with the inscription "Avenged at last," and when the people saw it they burst into loud cheering.

The police made no attempt to remove the placard and later in the day similar placards were placed on the pedestal, all of which were greeted with cheers. Throngs of hero worshippers gathered near the statue last evening and there was much enthusiasm displayed, which proves the deep hold Gen. Gordon had on the hearts of the people.

BRITAIN'S RIGHTS DISREGARDED.

Russians at Niu Chwang Are Acting as Though They Owned the Place.

London, Sept. 6.—The Pekin correspondent of the Times, who has just paid a visit to Niu Chwang, in the Province of Liao Tong, Manchuria, a terminus of the proposed railway extension, the contract for building which has been at issue between the Russian and British Governments, says:

"The Russians are acting there quite regardless of the rights of Englishmen and others, and as if the place belonged to them."

According to a despatch to the Daily Mail from Shanghai, it is rumored there that the British fleet is under orders to rendezvous at Niu Chwang.

GLADSTONE'S TESTAMENT.

Personal Estate Valued at £59,506—The Grand Old Man Wrote the Will Himself.

London, Sept. 6.—The will of the late Right Hon. William E. Gladstone has been probated. It shows that his personal estate is valued at £59,506.

Mr. Gladstone's will was written by himself in an ordinary memorandum book. It is a document of about two thousand words and is a remarkable specimen of penmanship. The second clause of the will has reference to the funeral arrangements, and says:

"Committing myself to the infinite mercies of God in the incarnate Son as my only and sufficient home, I leave the particulars of my burial to my executors, specifying only that they be very simple and private, unless there be conclusive reasons to the contrary. And I desire to be buried where my wife may also lie. On no account shall a laudatory inscription be placed over me."

After appointing his sons as executors, the will charges the future possessors of Hawarden to remember that, as the head of the family, it will be his duty to extend good offices to other members thereof, according to his ability and their manifest needs and merits. The rest of the document leaves souvenirs to servants and bequeaths to his grandson, William, as heirlooms all patents of Crown offices held by the testator and books and prints presented to him by the Queen, letters from the Queen, etc.

The will bears date of November 26, 1896.

Zurlinden Accepts the French Portfolio—Asks for Dreyfus Trial Records Before Discussing Them.

Paris, Sept. 6.—General Zurlinden, Military Governor of Paris, has accepted the Ministry of War in succession to M. Cavaignac, resigned. General Zurlinden was a member of the Ribot Cabinet which went out of office Oct. 25, 1895.

When the Cabinet met yesterday the Minister of Justice, M. Ferdinand Sarrien, informed his colleagues of the receipt of Madame Dreyfus' request for a revision of the verdict against her husband. M. Sarrien promised to give a statement of the result of his examination into the matter at a meeting of the Cabinet to be convened after the Minister of War shall have been appointed.

General Zurlinden's decision to accept the war portfolio was communicated to President Faure.

After long conferences with the Minister of the Interior, M. Brisson, and the Minister of Justice, M. Sarrien, General Zurlinden was interviewed by a newspaper representative. The General said that the Minister of Justice asked for the Dreyfus documents. When these should be given him, he added, he would study them carefully

A TRIUMPHAL ENTRY

Into Amsterdam Is Made by Holland's Youthful Queen.

HER MAJESTY'S SOLEMN WORDS

A City's Royal Welcome to a Royal Little Lady—Industrial and Military Display Witnessed by 200,000 People With Glad Acclaim—The Burgomaster's Address—Scene of Great Festivity.

Amsterdam, Sept. 6.—Beginning at early dawn yesterday vast crowds of people gathered in the streets, which were lavishly decorated, in anticipation of the entry of Queen Wilhelmina. The weather was bright and trains from the provinces brought thousands of visitors to the city. The stands which had been erected along the route of the procession were packed early, as was also the Damplatz. The route to the Royal Palace was lined by 35 workingmen's unions and 11 military associations, the latter comprising veterans of 1830-31 and other retired soldiers to the number of 5,000. The Damplatz, the high bridge over the Amstel, the principal canals and the streets through which the Queen passed were adorned with festoons and triumphal arches. One of the most elaborate of these decorations was prepared during last winter, the work giving employment to four hundred men. A striking feature in this was a representation of Admiral De Ruyter's old flagship, the Peace.

All the Houses Draped.

All the houses surrounding the Damplatz were literally covered with gay draperies and natural flowers which extended from the ground to the roof. The Queen arrived at 2 o'clock, and was enthusiastically received. After the Burgomaster had delivered a speech of welcome the Queen drove to the Damplatz. Uniformed guards lined the entire route and kept back the throngs.

The crowds in the streets, at the windows and on the roofs formed a scene of the wildest enthusiasm, everybody shouting and singing to the utmost of their ability. The palace, in sharp contrast to the otherwise brilliant scene, stood bare, gray and undecorated in the centre of the Damplatz. The space in front of the palace was occupied by a force of Halberdiers and Musketeers attired in the 17th century costume of the Restoration, the tunic of each being of a different color. These men carried the heavy, clumsy weapons of the periods they were supposed to represent, and they manoeuvred in accordance with the ancient drill. During their evolutions the crowds sang national airs. As the royal train reached the railway station the firing of salute of 101 guns was commenced and the bells of all the churches were pealed.

Burgomaster's Welcome.

When the young Queen arrived at the railway station in the afternoon the Burgomaster delivered an address of welcome, to which Her Majesty replied:

"For a long time past I have been looking forward to this moment, which is the most solemn of my life."

After Burgomaster Van Denhoven, Governor of the Province of Northern Holland, had offered the province's homage, in the course of his speech referring to the ties that for more than three centuries had bound the province and the House of Orange, the Queen replied briefly, saying: "I am happy that the great day has arrived."

The Queen then briefly addressed the various bodies assembled to welcome her. The Burgomaster's daughter presented Her Majesty with bouquets of Orange flowers tied with mauve ribbons.

The entire court, in carriages, participated in the procession to the palace. A guard of honor, composed of generals, escorted the royal coach.

General Damonceau was thrown from his horse.

Six hours before Queen Wilhelmina arrived 200,000 people had assembled in the streets and around the palace. Her Majesty appeared at 3.30 o'clock p.m., preceded by 30 divisions, including representatives from the army and navy, governmental and municipal officials and princes from Holland's East Indian colonies, who came here expressly to witness the enthroning of the Queen.

The Royal Pageant.

The royal coach was of white, ornamented with gold, and drawn by eight black horses. Queen Wilhelmina, who looked pale and tired, bowed and waved her handkerchief continually. In front of the palace the army and navy were drawn up in the form of a great square. The coach passed along the four sides of the square before drawing up at the entrance of the palace. A few moments later Queen Wilhelmina appeared upon the balcony and bowed repeatedly to the sixty thousand people who approached the palace waving handkerchiefs, hats and flags. Meanwhile many bands were playing national airs, chimes of bells were ringing and steam whistles shrieking their salutes to the young sovereign.

Track Layer Killed.

St. George, Ont., Sept. 6.—John Hurley, a track layer, was instantly killed here yesterday. He was working on the G.T.R. Grand River bridge drawing spikes with a heavy crowbar. No person saw him fall, but it is supposed the bar slipped, and, losing his balance, he fell thirty-five feet on to the rocks below. He leaves a widow and one child.

Suspicions of Foul Play.

Port Lambton, Sept. 6.—The inquest touching the death of Patrick Meagher, whose body was found in the water near Pocket Bay fishing hole, has been concluded with the verdict "death from an unknown cause." The circumstances surrounding the death are very suspicious.

Stop Coughing

Every cough makes your throat more raw and irritable. Every cough congests the lining membrane of your lungs. Cease tearing your throat and lungs in this way. Put the parts at rest and give them a chance to heal. You will need some help to do this, and you will find it in

Ayer's Cherry Pectoral

From the first dose the quiet and rest begin: the tickling in the throat ceases; the spasm weakens; the cough disappears. Do not wait for pneumonia and consumption but cut short your cold without delay.

Dr. Ayer's Cherry Pectoral Plaster should be over the lungs of every person troubled with a cough.

Write to the Doctor.

Unusual opportunities and long experience eminently qualify us for giving you medical advice. Write freely all the particulars in your case. Tell us what your experience has been with our Cherry Pectoral. You will receive a prompt reply, without cost.

EDITORIAL NOTES.

IN a general way the fertility of Ireland is recognized, but few are prepared for the indisputable statement made by a statistican that the value of the yearly agricultural products of Ireland is far greater than the entire world's yearly output of gold—according to Saetbeer one hundred and eighty-five millions of dollars. The yearly value of the agricultural products of Ireland amount to the immense sum of 295 million dollars.

THE New York Sun publishes an article dated from Montreal describing the eagerness of Canadians for annexation. "Surely," says the Mail and Empire, "this must be a mistake. We thought those gentlemen had become loyal since taking office." It is about correct as the assertions assiduously made by the Mail and Empire and other Conservative organs attacking the loyalty of political opponents. If the American press have the idea that the Canadians are anxious for annexation, they have got it from the lying misrepresentations of Conservative newspapers. It is a much a crime to cast doubt on the disloyalty of honourable fellow-citizens, as it is for a man to impugn the virtue of his neighbour's wife. It is dastardly, and in itself the essence of disloyalty.

THE United States undertook the war with Spain to drive that nation from Cuba, "in the interests of humanity." We shall be a little doubtful of the net gain that has accrued to the cause of humanity by the war, if we put against the expulsion of the Spaniard the terrible sufferings endured by United States soldiers by the absence of forethought and criminal unreadiness that marked the War Department's treatment of the soldiers, who suffered more, it is safe to say, from the deficiencies of commissariat and transport than they did from the attacks of the enemy. At a costly price the United states has learned the cost of entering a war without being prepared. If such a lesson was severe in a war with a seventh-rate power, what would it have been in contest with a first rate power, say Britain?

The interesting game of golf which has been so popular at the Park this summer reached its climax Tuesday afternoon when the final match was contested between Peterborough and Chemong, Chemong winning by five holes. To a person who does not understand golf the game might appear somewhat slow, but to those who are acquainted with it, it is a noble game. The royal road to good putting lies over just as stiff country as the royal road to learning:—Good nerves, much practice, confidence and a good eye are the essentials to make a good putter. When the game was over supper was served at the hotel at the instance of Mr. Max Dennistoun, whose popularity at the Park this summer in golf and social circles will not soon be forgotten. After the good things (for which the Park Hotel has a wide reputation) were done justice to, the hotel amusement room was a blaze of happiness. Among those who spent the pleasant evening were Mrs. J. M. Wallis, Miss C. Edwards, Miss Gilmore, Miss Roper, Miss Moore, Miss Boucher, Miss Archer, Miss Colville, Miss H A Boucher, Mrs (Dr) Boucher, Mr Peter Campbell, Mr J H Burnham, Mr R B Boucher, Mr H W Pousette, Mr W H Collins, Peterborough; Mrs (Hon.) R Hamilton, Miss Hamilton, Mr Wm F Hamilton, Mr R M Hamilton, Auburn; Mr and Mrs Max Dennistoun, Mr and Mrs Wm Sherwood, Mrs H Allen, Mr and Mrs D R Burritt, Miss Macdonald, Miss Vivian, Mr and Mrs Hartshorne, Miss Worts, Miss Georgie Dennistoun, Miss Annie Dennistoun, Miss Theodora Kirkpatrick, Mr and Mrs L M Hayes, Mr and Mrs Parker, Chemong; Mr W C B Manson, Toronto.

Although the summer resort season is waning and the lately opened schools have been the means of thinning down the population of the Park, there is yet to come the most delightful time of the whole year for outing. Throughout September and almost to the end of October there is a fascination about the country that gives a person an inexpressible gladness so thoroughly enjoyed during the summer months. Now the purple autumnal haze is visible on the landscape, the air seems laden with the fragrance of mellow fruit, and the forest with its peaceful paths and dropping nuts will soon be touched by frost.

The following have closed the doors of their lake-side summer homes for the season: Mr. W. H. Hill, Mr. T. A. Hay, Mrs. Wallace, Mr. H. S. Macdonald, Dr. Poole, Mr. T. F. Matthews, Mr. T. H. G. Denne.

Miss Macdonald and Miss Vivian, who have returned to Toronto after spending the summer here, will be greatly missed from the Park golf links and socially. They are very popular young ladies.

Mr. and Mrs. Pearse have returned to Brooklyn.

Miss Lemmon, who has been the guest of Mrs. J. D. Tully for the past few weeks, has returned to Toronto.

Mrs. M. Ferguson, Miss Hall and Miss Miss Marion O'Sullivan, were callers on friends at the Park on Thursday.

Mr. D. R. Burritt is undoubtedly the champion fisherman at the park this summer, having caught more fish and larger ones than anyone else.

Masters Harry Rush, Fred Sawers, Chas. and Archie Seymour, Walter Hagel and Harry Roberts spent a few days with Mr. Max. Dennistoun.

On Sunday last Boniface Anglesye, a little fellow, seated on a small wagon, drawn by a hardy span of Indian hounds, made his second visit to the park up the long grade from Peterborough, without much visible exertion to his good dogs.

A few mornings ago an Indian while fishing for bass with a small green frog as bait, caught a maskinonge.

Mr. R. M. Roy, the photographer, took several views at the park on Tuesday; among other views was one of the golf contestants.

THIRTY MILLION BUSHELS.

Estimate of the Manitoba Wheat Crop—Grain Turning out Better Than Expected—Harvesting Operations.

Winnipeg, Man., Sept. 2.—The crop reports from all western points received today show that the greater portion of the grain in all parts of the country is now in stock and the work of stacking is being pushed forward vigourously. Some threshing has been done here and there, but it will not become general for a week or so yet. The grain is turning out even better than expected and it should not be surprising if the wheat yield of the Province reaches 28,000,000 or 30,000,000 bushels. The latest reports received are highly gratifying. Estimates of 25 and 30 bushels to the acre are common, and the quality will be of the highest, no blight of any kind having affected the grain. By the end of another fortnight the entire crop of the country will have been successfully garnered, as there is every reason to expect warm and dry weather for the balance of the month. New wheat is being delivered at some northern Manitoba points.

PICKING, PACKING AND SHIPPING FRUIT.

Practical Suggestions Made in Prof. Robertson's Report.

Prof Robertson in his report says in regard to packing fruit: "It is essential that the fruit should be picked at the proper condition as to ripeness. When pears are full grown they appear to ripen so as to yield a better flavour when ripened off the trees than when ripened on the tree. Care should be taken in the handling of all tender fruits to prevent bruising. The sorting and wrapping should be done in such a way as to involve the least possible handling of fruit. If the fruit can be cooled before it is sorted and wrapped, so much the less will be the risk of injury.

The packing of the fruit should be done in such a way as to keep it firm in the package. An excess of packing, in so far as that prevents circulation of air, is objectionable. Some kinds of packing are liable to become mouldy from the dampness caused by evaporation from the fruit. Paper and excelsior packing are of that sort.

Only such fruits should be packed as are sound, of regular shape, and of fairly large size. Tomatoes are the exception in the matter of size. Medium and small-sized tomatoes sell for about one-half more per case than large-sized tomatoes.

COOLING.

All tender or soft varieties of fruit should be cooled as quickly after they are picked as is practicable For long keeping, they should be cooled to a temperature between 36 and 47 degrees Fahr., as warm fruit generates heat by the changes which proceed in it. It is thus much more difficult to cool than inert products such as meats, eggs, etc. If the fruit can be even partly cooled before it is wrapped, the risk of spoiling will be lessened to that extent. Packages containing warm fruit should never be loaded close in a railway car in warm weather. If a refrigerator car be used, well iced, the generation of heat in cases of warm fruit will more than counterbalance the cooling power of the ice. The fruit will continue to ripen, and decay will begin.

All Nerves.

Many people say they are "all nerves," easily startled or upset, easily worried and irritated. Milburn's Heart and Nerve Pills are just the remedy which such people require. They restore perfect harmony of the nerve centres and give new nerve force to shattered nervous systems.

Regular action of the bowels is necessary to health. Laxa-Liver Pills are the best occasional cathartic for family or general use. Price 25c. Any druggist.

ENDORSED BY CONFERENCE.

Dr. Potts' Million Dollar Methodist Fund Scheme.

THE ORIGIN OF THE PROJECT.

A Committee of Twenty Has Been Appointed to Deal Thoroughly With the Matter—Stirring Words by Great Canadian Methodists—Conference Practically Unanimous—Dr. Courtice's Warning.

Toronto, Sept. 6.—The usual morning session of the conference was omitted yesterday in order to give committees the opportunity of meeting.

The afternoon session of yesterday was specially set aside for the discussion of the million dollar scheme of Dr. Potts. Dr. Potts outlined the history of the movement in detail—it began in England—"Old England, the mother of liberty and the mistress of the world," as Dr. Potts referred to her in the course of his impassioned address. Mr. Perks, M.P., an eminent Methodist layman, the son of a Methodist preacher, was its originator, and the idea had been received with tremendous enthusiasm at the Hull conference, where it was *finally* decided upon—an enthusiasm that quickly spread over the whole of England. Mr. Perks' proposition, however, had reference to a million guineas. Dr. Potts wishes to duplicate the scheme for Canada in dollars. The colossal nature of the undertaking and the almost numberless issues it brings prominently to the fore will thus be seen to warrant the sensation it has undoubtedly caused.

The introduction by Dr. Dewart of the Rev. John Bond, fraternal delegate from the mother church of England, was the first item on the day's programme.

The order of the day was then proceeded with, and the burning topic of the afternoon broached amid a tumult of applause as the burly form of Dr. Potts was seen ascending the steps of the platform. "The action of this Conference," said Dr. Potts, in opening, "is one that is likely to be historic. Never before has Methodism been confronted with the responsibility involved in the acceptance of the resolution now submitted. The action of to-day will affect the Methodism of the twentieth century and the efficiency of our church in a vast number of directions." Dr. Potts continued in a similar strain at considerable length, his voice increasing in resonance and volume as he proceeded. Several things were necessary if the scheme were to be a success. Sentiment for one thing was necessary. "We are sons of noble sires. The time is come for us to follow in their footsteps." (Great applause.) Another necessary care to be taken was that the scheme should be put into execution along the lines of strict business principles. And, thirdly, from start to finish it should pose as a great religious movement. Dr. Potts next dealt with the practical aspect of the question. He admitted that it was a great undertaking, so great that it staggered the faith of some. But it was impossible to think of a less amount, and it would be unwise to attempt a greater. Dr. Potts urged the conference to accept it to-day, pointing out that individual effort was sure to follow if they rejected it, and that great and general irritation would thus inevitably follow. Dr. Potts declared his belief that the great bulk of the work might be finished by June next.

Dr. Inch now appeared as the seconder of the motion of Dr. Potts. He said he was surprised at his own temerity in consenting to appear as the seconder of this resolution. Yet he believed that they had heard that afternoon in the conference an echo of the voice of God commanding his people to go forward. The great strength of Methodism implied equally great obligations. Their duty was clear. It was to erect upon the borderland of the two centuries a monument of one million dollars inscribed "Ebenezer."

Mr. Rogerson of Newfoundland also expressed his emphatic approval of the movement. It would be an honor for every Methodist to be identified with it. Newfoundland would co-operate heartily.

Mr. Gibson of Ingersoll treated the raising of the money in a merry vein. He endorsed Dr. Potts' remarks on the sentimental view of the case with an illustration of a young man on his way to propose. "Observe the polish of his boots," said Mr. Gibson. "Without sentiment you might look in vain for it. It would not be there."

Dr. Courtice of the Christian Guardian warned them that over-confidence and contagious enthusiasm was the great danger that beset them. If there were unanswerable arguments against the scheme let them be enunciated. The Methodists, he thought, were neither too few nor too poor. Their chief weakness lay in the fact that they were a congregational rather than a connexional body. They lacked great leaders. Dr. Courtice also discussed the various uses to which it had been proposed to put the money when once raised. He concluded with an earnest exhortation to the church to look forward and not backward.

Rev. John Lanceley followed. He thought they ought to raise two millions instead of one. He thought the fund ought to be devoted to the paying off of church debts. It was a new issue. The discussion here showed a tendency to ramble off on to general subjects, but it was brought home forcibly by Dr. Sutherland. "I don't care a brass continental," said the irate Doctor, "what the world owes to Methodism, but what I am concerned with is the duty that Methodism owes to the God of her salvation. We may talk like this till the end of the week and be no better off. I have looked on in positive misery while the enthusiasm of this meeting has been allowed to evaporate. We ought to do this thing; we can do it; so in the name of commonsense let's get at it."

Dr. Sutherland suggested a committee of nearly one hundred names to take the matter in hand and report back to the conference. A general desire, however, to hear from some of the laymen present being expressed, Messrs. Cox, Nixon, Bond, Brown and Gurney spoke briefly in favor of the proposal.

Finally a committee of 20 was appointed as follows:

Ministers—Messrs. Potts, Sutherland, Ryckman, Rigsby, Williams, Joliffe, Bond, Brethour, Gates, Bettes.

Laymen—Messrs. Cox, Sevell, MacLaren, Bishop, Aiken, Torrance, Beer, Ferguson, Dement.

After some minor business, the conference adjourned until 2 p.m. to-day.

SHORT LETTERS.

That Speak Volumes in Favor of Diamond Dyes.

Mrs. J. A. Corkum, New Cumberland, N. S., says: "Have used many packages of your Diamond Dyes, and am happy to bear testimony to the grand colors they produce. Your dyes are a great boon to farmers' wives, for by them they can make old faded garments, ribbons, yarns, etc., look as good as new. They are certainly the surest of all dyestuffs for home use."

Mrs. F. Peck, Windsor, Ont., says: "We tried to use other dyes, but they did not give us satisfaction. We bought eight packages of the Diamond Dyes to dye our woollen yarn, and our work was perfect. For dyeing carpets and cotton goods, Diamond Dyes are unequalled."

Mrs. Maxime Constantin, St. Eustache, Que., says: "It is with pleasure that I tell you of my success with Diamond Dyes. A few days ago I dyed an overcoat with your Diamond Dyed and the result was marvellously pleasing and satisfactory."

THE MARKETS.

Not Much Activity Because of the Holiday—Montreal Live Stock—The Prices.

Chicago Live Stock.

Chicago, Sept. 5.—Hogs—Estimated receipts 25,000; official Saturday 12,482; left over 2800; quality of offerings fair; moderately active but weak and 5c lower, with sales ranging: Pigs, $2.75 to $3.85; light, $3.60 to $3.95; rough packing, $3.50 to $3.75; mixed, $3.60 to $4; heavy packing and shipping lots, $3.20 to $4.

Cattle—Estimated receipts for to-day 17,000; receipts Saturday 96; good, 5c to 10c higher.

Sheep—Estimated receipts to-day 17,000; receipts Saturday 4977; steady to 10c lower; native sheep, $2 80 to $4.60; westerns, $2.50 to $4.45; lambs, $3.75 to $5.90.

Toronto St. Lawrence Market.

The market was very small to-day. Fifty bushels of goose wheat sold at 58c and 300 bushels of oats at 28c to 29c. Other produce was in keeping.

Montreal Live Stock.

Montreal, Sept. 5.—There were about 600 head of butchers' cattle, 20 calves and 600 sheep and lambs offered for sale at the East End abattoir to-day. The butchers were present in large numbers and trade was good, with the prices of cattle about the same as on last Thursday, but there were some much better cattle on to-day's market, and these sold at from 4½c to 4¾c per lb.; pretty good stock sold at from 3¾c to 4¼c; common dry cows and thrifty young stock from 2½c to 3½c, and the leaner beasts and provincial bulls from 2c to 2¼c per lb. Calves were scarce and pretty high-priced, most of the good ones having been sold before reaching this market. Prices ranged from $3 to $10 each. Shippers pay from 3¼c to 3½c per lb. for good large sheep. Lambs bring from 4c to 4½c per lb. Fat hogs are not so plentiful and sell at from 4¾c to 5c for feed hogs.

British Markets.

Liverpool, Sept. 5.—12.30.—No. 1 North., spring 6s 9d; red winter, 5s 9¼d; No. 1 Cal., 6s 2d to 6s 3d; corn, 3s 1d; peas, 5s 1d; pork, 50s; lard, 25s 9d; tallow, 19s 6d; bacon, heavy, l.c., 30s; light, 28s 6d; short cut, 29s 6d; cheese, white, 37s 0d; colored, 38s 6d.

Liverpool—Close Spot wheat dull, with red winter at 5s 5½d. No. 1 Cal. at 6s 2d to 6s 3d and No. 1 Northern at 6s 9d; futures quiet at 5s 5¾d for Sept. and 5s 1¾d for Dec. Maize 3s 1d for spot; futures, 3s 0¾d for Sept., 3s 1¾d for Oct and 3s 2¾d for Dec. Flour, 21s.

Fined $100 and Imprisoned.

Hamilton, Ont., Sept. 1.—At the Police Court yesterday Magistrate Jelfs gave his decision in the case of Mrs. Gibson of Lockport, N.Y., charged with procuring girls for immoral purposes. The prisoner was found guilty, and sentenced to pay $100 fine, and be imprisoned for nine months, and if the fine is not paid an additional sentence of six months in prison will be imposed.

WHEN LABOR PLAYED.

The New Holiday Was Generally Observed, and Numerical Strength of Organized Workers Shown in Parades.

Toronto, Sept. 6.—Yesterday was Labor Day and it was celebrated here with great eclat. The great parade was undoubtedly the attraction for the thousands of people who lined the streets on the line of march. Every class and department of labor was represented in the floats. At Moss Park Rink addresses were delivered by Rev. E. S. Rowe, Mr George Bertram, M.P., Rev. C. A. Shortt, Mr. J. J. Foy, M.P.P., Mr. E. F. Clarke, M.P., and members of the various labor organizations. A good programme of games was also run off.

Montreal Had Two Processions.

Montreal, Sept. 6.—Montreal was treated to two Labor Day processions yesterday morning. The Central Trades and Labor Council was the originator of one, and the Federation Trades and Labor Council of the other. Both processions were large, though in numbers the older organization had the advantage.

The Central Trades and Labor Council formed their parade on the Champ de Mars. The several societies and other bodies participating in the parade marched on to the ground in district detachments. When the procession was over the usual speeches and games were indulged in on the Exhibition grounds.

Waterloo Suspended Business.

Waterloo, Ont., Sept. 6.—Labor Day was fittingly observed here yesterday. All the factories and business places were closed.

Lynch Won by Six Lengths.

Halifax, Sept. 6.—Michael Lynch and John Brennan rowed a three-mile race on Bedford Basin yesterday afternoon for $200 a side. Lynch won by six lengths, in 23 minutes and 40 seconds. The boat race was the principal event of the Halifax Labor Day celebration, which was devoted to excursions and sports. The day was generally observed throughout the province.

Labor Day in Quebec.

Quebec, Sept. 6.—Quebec Trades and Labor Union were favored for their feast yesterday with fine weather. The labor societies began the day by a grand parade and a high mass in St. Roch's Church at 8 o'clock, which was followed by a grand picnic at Cape Tournant, Parish of St. Joachim.

At the Capital.

Ottawa, Ont., Sept. 6.—Labor Day was observed here by a procession in the forenoon and picnic in Lansdowne Park in the afternoon. The procession was not so large as last year.

Labor Day in Buffalo.

Buffalo, Sept. 6.—Labor Day was a gala day in Buffalo. The labor organizations turned out in parade, in which it was estimated 8,000 men participated.

Spanish Soldiers Want Their Pay.

Havana, Sept. 6.—Last Saturday night a large number of posters were circulated around town and fastened at street corners, exhorting the Spanish soldiers not to return to Spain, unless they were first paid in full all that was due them.

Many have not been paid for 15 months, and they fully realize how hopeless their case is if they return home, there to await a day of payment.

The posters were the result of the dissatisfaction of the troops, who feel that they have been deceived and betrayed by the Spanish Government.

The Philippine Situation.

Madrid, Sept. 6.—General Jaudenez, ad interim Governor of Philippine Islands, replying to the Government's request for information as to the true situation of affairs in the archipelago, replied that to assure the re-establishment of Spanish sovereignty over the island would require a permanent army of sixty thousand men, a fleet and endless quantities of material.

Death of Mr. Daniel Kennedy.

Campbellford, Ont., Sept. 6.—An old Campbellford resident passed away yesterday afternoon in the person of Daniel Kennedy, who was 74 years of age. He was clerk of the Eleventh Division Court for about 40 years, labored on the School Board for 35 years, was also clerk of the municipal corporation of Campbellford since incorporation, which followed his clerkship of Seymour township for years previous. He leaves a wife and two sons.

THE ONLY HOPE!

For Victims of Bright's Disease is Dodd's Kidney Pills.

Not a day passes on which the newspapers do not record the death of one or more persons from Bright's Disease. Already its victims number hundreds of thousands. Day by day the awful total grows larger. No class is safe from this destroyer.

War and intemperance, with all their miseries and fatalities, are not responsible for as many deaths as have been caused by Bright's Disease. Yet, there is a way of resisting it; of drawing its poisoned fangs, and making it as harmless as a summer breeze. That great medicine, Dodd's Kidney Pills, has cured thousands of the worst cases. It never fails to cure, hopeless as the case may seem.

Would you safely shield your loved ones from the fatal grip of this curse of mankind—Bright's Disease? Then use Dodd's Kidney Pills, the only cure on earth for this disease.

BATTALION MARKSMEN AT THE RANGES.

THE SCORE MADE IN THE ANNUAL MATCHES.

The Day Was Cloudy and Bright by Times, but Some Good Scoring was Done—The List of Winners.

The annual rifle matches in connection with the 57th Battalion were held yesterday, and although interrupted by the showers at times, passed off most successfully. The range officers were Lieut.-Col. R. W. Bell, Major Edwards, Capt. Dennistoun and Capt. Morrow. The ranges were at 100, 200, 300 and 400 yards, with five shots at each range. The rules governing the matches were as follows:

1. Ranges—100 yards, standing; 200 and 300 yards kneeling; and 400 yards, any position with head to the target. Five shots at each range.
2. Rifle—Regimental Rifle Orthoptics or Verniers not to be used, except in Special match. No two competitors to shoot with the same rifle except with special leave of range officers.
3. Bull's eye to count four, inner three, outer two.
4. Uniforms—All competitors must appear in uniform. Havelocks may be worn in special match only.
5. Prizes will be paid after inspection. Any competitor who is absent from inspection without special leave of the commanding officer, or who shall not have put in at least one-half of the drills for the year, will not be entitled to any prize.
6. All disputed points to be decided by the Range Officers.
7. Any competitor who shall fire when the danger signal is up; or who shall discharge his rifle on the range, except in accordance with the regulations; or who shall be found with a loaded rifle off the firing point; or who shall act in any way that might prove dangerous, shall, in the discretion of the Range Officers, be excluded from all further competition, and shall forfeit all prize money.

A HEAD-ON COLLISION.

Two Bicycle Riders Come Together on Bethune Street With Terrific Force.

At noon to-day Leslie McWilliams was riding south on Bethune street on the bicycle path along the rail track, and Dave Patterson, an employee of the Electric Works, was riding north. Both men were going at a fast clip between Sherbrooke and Dalhousie streets, and the Belleville engine stood on the track about half way between the two streets exhausting and clouding the entire roadway with steam at this point. Neither rider saw the other approaching and the pair dashed into the vapour at once, meeting with terrific force.

Both were rendered partially unconscious through the violence with which they were thrown. Drs. King and Gray were summoned, and found that no alarming injuries had been sustained, although it will be sometime before either will be able to work.

Patterson is probably hurt the worst, his face being badly bruised and a contused wound inflicted on the left side of the head, just over the forehead. McWilliams had a chunk of flesh cut out of his hand and also had his face bruised, the eye being badly blackened.

Both wheels were but slightly damaged.

DISAPPEARED FROM HOME.

Mr. John Wylie is Missing—Reward Offered for Information Concerning Him.

John Wylie on Thursday last, September 1st, left the residence of his son, Mr. B. M. Wylie, and the most diligent search since his disappearance failed in finding him.

He is about 70 years old and totally deaf; height about 5 ft. 8 in., dressed in dark tweed suit, black cloth gaiters over lace boots. His mind is labouring under the delusion of owning large farms of which he is continuously talking. He has no beard excepting mustache, which he recently clipped. Any one knowing of his whereabouts will be liberally renumerated by advising of his whereabouts or bringing him to the residence of his son in Ashburnham.

CORPORATION YARDS.

The Desirability of Permanent and Central Headquarters.

The use of the corporation stone and lumber yards for the building of Ackerman's harness factory has made it necessary for the corporation to secure new premises.

In the selection of such premises the points to be kept in view are permanency and a central location. We have entered upon the work of permanent improvements with vigor and it will be necessary to have a permanent site for stone yard, lumber yard, and for the use of the steam crusher and the housing of the steam roller. Besides the fact that every shift will cost money, permanent location is desirable in order that conveniences of a suitable character should be provided. Then the situation should be as central as possible. This involves not only the matter of convenience but expense is saved in teaming by having the corporation yards in some central location.

Mr. A. F. Hoover will resume his classes of pianoforte instruction Wednesday Sept. 14th at his Residence 222 McDonnel St.

A CATHEDRAL WEDDING.

Nuptials of Miss Bessie McAuliffe and Mr. Albert Lewis Talbot.

This morning at 6.30 a. m., the ceremony was performed that united in the holy bonds of matrimony Albert Lewis Talbot, of the firm of Talbot Bros., and Miss Bessie McAuliffe, daughter of the late Cornelius McAuliffe, 906 Water street. The nuptial mass was celebrated by Rev. Father F. J. O'Sullivan, the music being Concone's mass rendered by the full choir, Mr. and Mrs. George Ball taking the duet, "Ecce Panis." As the bridal party entered the cathedral, Miss Hurley performed the Wedding March of Mendelssohn. The bride was given away by her brother, Mr. John McAuliffe. The bride was very tastefully attired in a costume du voyage of blue ladies' cloth, with picture hat of cream legborn and carried a bouquet of Marechal Neil roses. Her bridesmaid, Miss Annie O'Connell, was gowned in a Cuban blue costume and carried a shower bouquet of pink roses. The groomsman was Mr. John Hanrahan. At the conclusion of the ceremony the bridal party enjoyed the wedding dejeuner at the residence of Mrs. McAuliffe, 903 Water stree. The bride was the recipient of a large number of unusually handsome presents. Both of the parties having been members of the choir of St. Peter's Cathedral, were remembered by a special gift on behalf of their fellow members. The happy pair take a bridal tour to the west and down the St. Lawrence. They will return to town on Sept. 20th and take residence at 593 George street, where their many friends wish them the enjoyment of great happiness.

PERSONAL.

Mr. R. J. Lane returned yesterday from a trip to Manitoba.

Mr. Court Poussette is home from St. Catharines for a few days.

Miss Fair and Miss Eileen Fair have just returned from an extended holiday.

Mr. Geo. T. Dickson, of Campbellford, was in town to-day on his way to Toronto.

Rev. T. J. Glover, B.A., will preach in St. Andrew's church, Belleville, September 11th.

Mr. Will Loch has returned from a pleasant month's holiday spent at Burleigh Falls.

Miss Emma Stephens has returned from Cobourg, where she was visiting her mother.

Messrs. Fred Shannon and Will Brundette were over in Lindsay spending Labour Day.

Miss Robinson, of Providence, R. I., is a guest at the residence of Mr. Adam Melville, Water street.

Mr. B. J. Gough, of Lindsay, spent Labour Day in town as the guest of his brother, Mr. A. J. Gough.

Mr. Fred Morrow went back to Haliburton on Saturday to arrange for deputy returning officers for the plebiscite in the North Country.

Miss Home, milliner at Miss Rudkins, has returned home from Toronto, where she was picking up the latest millinery novelties and ideas.

Mr. J. R. Stratton, M. P. P., returned from Clifton Springs on Saturday evening accompanied by Mrs. Stratton, who has been spending the last few weeks there.

Mr. H. R. H. Kenner has returned from Europe where he has been spending the summer vacation on a wheeling tour through England, France and Germany.

We are glad to be able to add the name of Miss Annie Howson, of Norwood, to the Junior Leaving Class (Form III) at Norwood, she being also one of the successful candidates.

Mr. and Mrs. R. J. Bird and family, of Manitoba, are visiting Mr. Bird's mother and sisters on London street. Mr. Bird left Peterborough in 1878 and is much pleased at the evident progress which is being made in the town.

Mr. Wm. P. O'Donnell and wife are here from Franklin, Pa., on a short visit. Mr. O'Donnell is looking about to see if there is an opening here in business for him. If some of the citizens take an interest in the matter probably Mr. O'Donnell will buy out a business and become a citizen of Peterborough again.

HALIBURTON'S MINING FUTURE

The Prospects are Bright in That County.

DYSART MINING CO. AT WORK.

A Description of Their Mine and of the Results Which Have Been Already Obtained From a few Weeks Work in Sinking an 80 Foot Shaft.

Nestling among the mountains and situated on the shores of a romantically picturesque little lake, the village of Haliburton would make an ideal summer resort, and as the big cedar swamps afford good cover for game, which abounds in the locality, no better headquarters for hunting parties could possibly be found in the north country. As the spot is comparatively easy of access it is hard to understand that more summer visitors are not entertained, although as it is becoming better known the tourist patronage is steadily growing.

It is not these facts, however, which are at present concentrating the attention of a large section of the Dominion on Haliburton, and advancing the price of building lots in the village. The new interest is awakened through the opening up of a mine on the hill just south of the village, and by the additional fact that the assay of the ore has been of such a nature as to cause the company operating the mine to secure an option on 20,000 acres of land in Dysart township, and 20,000 more in the adjacent municipality of Harburn.

THE DEVELOPMENT

of the northern townships in Haliburton county has long been hindered on account of nine of the the townships being turned over by the Government to The English Land Company on the understanding that the country would be settled by them. As is the case with all English companies whose directorate lives in England, the scheme did not prosper, until finally three Canadian directors were elected to seats on the Board, and the Bank of Commerce obtained an interest in the company. Pressure was then brought to bear to have the townships opened up and mining prospectors went in looking for propositions. Ore was found of a very satisfacto y quality, but in numberless cases failure to form companies to work the same was occasioned through the fact that invariably when an examination of the veins was made, the yield would not average as large as the samples, making investors wary of embarking in the enterprise. The prospectors in these cases had selected small picked samples of the richest ore in the neighbourhood, and as it only ran in small or fissure veins, it would not have paid to work them. Mining thus received quite a set back until recently Mr. Donald Keith saw some samples in Toronto from Haliburton, and noticing the

NATURE OF THE QUARTZ,

he resolved on taking a prospecting tour through the county himself. After spending some time in the hills he struck a thirty-five foot vein just on the outskirts of the village, and was able to trace it for a distance of four miles to the south. Securing samples he returned to Toronto and by his representations was able to form a company to work the vein, which is now known as the Dysart Mining Co's proposition.

Operations were commenced at once and after six weeks work about 250 tons have been taken out. The mine can be plainly seen in the side of the hill from almost any part of the village. The hill is 240 feet high and a tunnel has been run into the vein about 200 feet up the side. The tunnel is 35 feet in height and from it a shaft has been sunk to the depth of eighty or eighty-five feet.

The vein is a contact one, running between formations of limestone and granite and the ore is free milling. There appears to be no fissure veins at all on the property and the gold is not found in beads of any size, but is scattered very freely in tiny specks through the quartz. Mr. Keith claims that he has a million tons of ore right in sight and as the yield averages $15 per ton in the assays which have been made he

EXPECTS NO DIFFICULTY

whatever in making the proposition a paying one.

There are three ways of working the vein, viz, tunnelling, running down a shaft from the top or quarrying and as the latter method is the cheapest it will be adopted. The vein is of unknown depth and at present no effort will be made to ascertain its exact dimensions, as the company sees thirty years steady work ahead in quarrying out the ore which is in plain sight.

Under other circumstances it might not pay to develop the proposition, but the conditions are so favourable in Haliburton that mining is not carried on under the difficulties that it is attended by in many other localities. In the first place there is abundance of water, as a large creek which furnished power for the big Irwin saw mill before it was burnt, runs along the base of the hill. Then the ore is free milling and easily worked—so easily worked, in fact, that Mr. Keith estimates he can take it out for thirty cents a ton. The railroad runs right into the village and spur lines can easily be secured running out to the mines. Labour is cheap and wood is to be had for the cutting, as the hillsides, under which the ore is located, are covered with timber. All these circumstance continue to make mining here far

LESS OF A LABOUR

than it usually is found to be, and where such a mine might not be worked, if otherwise situated. Mr. Keith expects to make a good paying investment out of this one.

Arrangements are being made with the Wm. Hamilton Co., of Peterborough, for the building of a ten stamp mill, which will probably be in position and running in about three months. It is calculated that from twenty to twenty-five tons of ore will be crushed in the twenty-four hours and the mill will be situated at the bottom of the hill directly beneath the mine. A chute can then be run from the mine to the top of the mill and much labour in lifting saved by passing the ore directly into the crusher from above. It will then pass through under the stamps and passing on down be washed by the waters of the creek.

Although thoroughly satisfied with the present yield, Mr. Keith, the resident director of the company, has every hope of the ore becoming richer, although making no promises of this nature to his company.

The same syndicate that is working the Dysart mine has secured the option on the other

ADJACENT PROPERTIES,

and expect before 1900 is out to see Haliburton converted into a flourishing mining town. Properties have also been secured in the adjoining township of Harburn, where Mr. Keith states the ore is of exactly the same milling quality as that in the mine which is at present being worked. The dried up bed of a river in Harburn is considered worth handling, and the Dysart Co. expect to establish a placer mine there, as when prospected the sand panned out a good showing.

Mr. Alex. Roy, who has had a wide experience in mining on the Pacific Coast in British Columbia, Montana and California as well as in England and Scotland, has been secured as analyst and mining engineer and has been established at the mine.

As a proof of their firm belief in the mining future of Haliburton, a number of the prominent men of both the county as well as Victoria to the south are interesting themselves in its development, and quite a few new companies are already being formed to begin work in the spring.

FATHER FITZPATRICK'S PICNIC.

It Took Place on Labour Day at South Beach.

Quite a number drove out from town to the picnic at South Beach, near Young's Point on Monday.

Among the events of local interest which were on the list of sports was a quoit tournament in which Mr. George Giroux stood first and Mr. A. J. Gough second. The result in throwing the heavy weight was as follows: 1 Jas. Lynch. 2 A. J. Gough, 3 Dr. Moher, 4 E. McFadden.

MACCABEES EXCURT.

The City of Peterborough Took a Number to Jubilee Point.

The members of the local tent of the Knights of the Maccabees and their friends went down the river to Jubilee Point yesterday on the City of Peterborough. A very pleasant day was spent. Butcher's orchestra accompanied the excursionists and dancing was indulged in at the Pavilion.

COURT STANLEY'S PIONIC.

Local Ancient Foresters Excurt to McCracken's Landing.

On Monday a large crowd assembled at McCracken's Landing from all parts of the township of Dummer in rigs, while two large excursions—Court Stanley, A. O. F., on the Sunbeam, and the Young Canadians, of Lakefield, on the Majestic—arrived to participate in the pleasures of the day, making in all about 1200 to 1500 people. The wharf and surrounding buildings were prettily decorated with evergreens, flags and bunting, and a banner with the word "Welcome" stretched across the wharf.

The arrangements reflected great credit on the committee in charge.

After partaking of refreshments to satisfy the wants of the inner man, boat races were in order, when the following closely contested events were run off:

Double canoe race, 4 entries—1st Alf Copway and Fred Taylor; prize, cup, value, $7; 2nd, Wm McIlmoyle and Andrew Miller, prize, cup, value, $5.

"Greenhorns' double canoe race, 2 entries—1st, Geo Jacobs and Geo McCue, prize, $1; 2nd, Shell McIlmoyle and Andrew Miller, prize, 50c.

Single canoe race, 4 entries—1st Wm McIlmoyl, silver cup, value $7; 2nd, Geo Taylor, cash $2.

Boys under 16 double canoe race—1st, Sam Knott and W Johnston, $1; 2nd, Chas and Reginald Blomfield, 50c.

Tug of war, 10 a side, True Blues vs. Orangemen—won by Orangemen. Prize, box of cigars to be paid for by losers.

The judges, Messrs. Wm. Batten and R. Crowe, gave good satisfaction to all in their decisions, although every event was closely contested. The people left for their homes well pleased with their successful day's outing. Mr. E. Hodgson's orchestra furnished most excellent music during the day.

DISGRACEFUL PROCEEDINGS.

The following communication appears in Saturday's Mail and Empire concerning an affair which is exciting considerable comment in Peterborough:

SIR,—I wish to call the attention of the Society for the Prevention of Cruelty to Animals to a paragraph in the Peterborough evening papers of the 29th August. A man by the name of Lyle was found lying near where I reside, the worse of liquor, with his dog keeping watch over him, and not allowing anyone to go near him. The poor brute was taking care of his master. The police were notified and Constable Stewart came along in a hurry, and fired three bullets into the animal, which failed to kill it. A club was then used to kill the faithful dog. Did any one ever know of such barbarity in a Christian community like ours? The sooner we have a Society for the Prevention of Cruelty to Animals in our good town the better.

Yours, etc.,
FRIEND OF DUMB ANIMALS.

THEIR GOLDEN HONEYMOON.

Fiftieth Anniversary Celebrated by Two Former Residents.

Mr. and Mrs. S. G. Hard, of East Liverpool, Ohio, are visiting with relatives in Peterborough and vicinity—the scene of their early life. While in town they are the guests of Mr. Robt. H. Green, who is a cousin of Mr. Hard's. The visit of Mr. and Mrs. Hard to Peterborough is a very interesting one for several reasons. Mr. Hard was a resident of Peterborough 53 years ago, being then engaged in the tannery business with the late P. Ryan. The many changes which have taken place in Peterborough during the past half century have been so great that these visitors scarcely recognise any of the old familiar faces or places of their early life. On Labour Day, they joined Mr. Green's family in a pleasant trip down the Otonabee on the steamer North Star, going over part of Mr. Hard's old canoe route while on his way home to Mount Pleasant every Saturday night. Mr. Hard has been engaged about thirty-five years in active business in the United States, but is now retired, being 73 years of age—although he still retains an interest with his son in a large furniture business in East Liverpool, Ohio. The following reference to Mr. and Mrs. Hard's visit to their early home is taken from the East Liverpool Tibune of a recent date, and will explain a further reason for their peculiar interest in this visit to Peterborough:—

"Mr. and Mrs. S. G. Hard, of this city, left this week for the scene of their youth and earlier married life in Canada, expecting to be gone six weeks, and revisit the place where they spent their honeymoon in September, 1848, just fifty years ago.

Mr. and Mrs. Hard will celebrate their golden wedding at the place of their marriage, Mount Pleasant, Ontario, where they came from, and where many relatives of both still live. They will then visit Toronto, Peterborough, Millbrook and Port Hope, thence going by lake to Montreal.

Mr. Hard has not visited his homestead since he came to this country thirty-five years ago, while Mrs. Hard has not revisited the place of her birth and childhood for over twenty years.

A host of friends in this city wish them a happy journey and a safe return to this city.

BERTRAM DOES NOT LOSE.

His Property Was Fully Covered by Insurance.

Mr. Bertram, jr., states that the loss through the fire at the Bertram shipyards early Friday morning would not at the most exceed $60,000 and it was fully covered by insurance, held by American companies, marine and fire. The fire, he said, could not have happened at a more opportune time. The buildings burned were used for preparing the iron work for the vessels under construction. This was all finished and the shops would be rebuilt before work on the next season's contracts, amounting to a million dollars, would be begun. The buildings would be rebuilt at once, and until their completion, a couple of months hence, from 100 to 120 men would be out of work. The main works of the company on Bathurst street were of course untouched. As it was, he said, his father's loss was little or nothing. Had the steamer Toronto been burned it would have been considerable. Mr. Bertram lately withdrew his insurance from local companies, because he thought the rates too high.

Lost in the Woods.

On Wednesday evening, 17th inst., Mr. Joseph Bailey, an old man nearly 70 years of age, resident of the O'Hara neighborhood, started for the cows as he was in the habit of doing, and got lost in the woods, wandering around until Friday morning, when he was found at Thomas White's, half way between Madoc and Marmora, and about six miles from his home. The old gentleman is somewhat deranged in his mind, having had a stroke about two years ago, which accounts for his losing himself. During his absence searching parties were organized, and neighbors turned out to the number of over fifty scouring the woods in the direction he was traced. This was kept up all day Thursday, and the forces were augmented to the number of nearly 100 on Friday morning when he was happily restored to his friends. Friday morning, before Mr. Bailey was found, his son Hugh drove to the residence of Mrs. John Booth, a "wizard" living about four miles the other side of Marmora, and he was astonished at the clear and accurate description the lady gave of not only the missing man, but of all the parties interested, and she asserted that the old man was even then "at a house." The hour corresponds exactly to the time he reached Mr. White's. It is worth mentioning that Mrs. Booth accurately described the missing man, even to his dress and personal appearance, altogether she had never seen any of the family before. The old gentleman had had nothing to eat or drink from Wednesday evening until Friday morning.—North Hastings Review.

PEOPLE GETTING OLD.

As age advances, vitality retreats. Old people find themselves tired, listless, dyspeptic and lacking in strength. They lose interest in the active affairs of life, and may either become chronic complainers, burdening their friends, or they may, by using Dr. Ward's Blood and Nerve Pills be made bright, cheery, happy and healthy, as witness the following interesting example. The words of those who have lived many years carry wisdom with them. Why not profit by them?

WISE WORDS.

Nothing does a right-thinking man more good than helping his neighbors, especially the sick and weary. In recommending Dr. Ward's Blood and Nerve Pills, and helping to bring them before the public, I feel that I am truly helping my neighbors. Both my wife and myself have used these Pills and derived great benefit from them. We are getting along in years, and like many others feel the need of a tonic and strengthening medicine. My blood was thin and impoverished, and my wife was miserable with general debility, brought on by dyspepsia. We used many kinds of medicine, but nothing did so much good as the Dr. Ward's Blood and Nerve Pills.

Yours very truly,
Signed, MR. & MRS. CLARK, Victoria St., Glencoe, Ont.

Dr. Ward's Blood and Nerve Pills are sold at 50 cents per box, 5 boxes for $2.00, at druggists, or mailed on receipt of price by The Dr. Ward Co., 71 Victoria St., Toronto. Book of information free.

A TRANSPORT HORROR.

Horrible State of Affairs on Board the Allegheny—Insane From Suffering, Pte. Wagner Hangs Himself.

Montauk Point, L.I., Sept. 3.—After a brief respite from the horrors of pest-stricken transports, most of the recent arrivals having been in fairly good condition, Camp Wikoff was horrified yesterday by the arrival from Santiago of the Allegheny, with a ghastly record of 14 dead at sea and 145 sick, out of a total of 494 officers and men of the Ninth Massachusetts, who embarked in her.

The full truth of the horrible state of affairs on board the Allegheny cannot yet be told, for the troops are still detained on board, and they will not be landed until to-day, but it is known that her condition is probably worse than that of any other of the transports that have yet come up from Cuba.

John H. Wagner, a private of Company H, Seventeenth Infantry, committed suicide early last night by hanging himself to the ridge pole of his tent. He was delirious from fever. Wagner was brought here eight days ago on a transport from Santiago.

ECHOES OF THE WAR.

The troops at Camp Wikoff are almost without water owing to an accident to the pumping machinery, and the suffering of the sick men has been augmented almost beyond the point of endurance.

A semi-official note issued from Berlin says: "A state of peace having been re-established between the United States and Spain, orders have been given that the German naval force at Manila be reduced to one or two ships.

A U.S. transport, with sick soldiers from Santiago, had a fire in the after hold coal, but it reached Montauk and discharged the sick troops before the 300 cases of cartridges were reached.

Hobson has a swelled head and says he will raise the Cristobal Colon, despite the orders of the Navy Department to the contrary.

Shafter, in an interview, boasts that the success of the Santiago campaign was so complete and unequivocal that it atones for the bungling which treated the troops so cruelly.

LIPTON'S CHALLENGE.

The British Yachtsman Want the Races Sailed Off Newport.

New York, Sept. 3.—Sir Thomas Lipton's challenge for the America's Cup next year, in charge of a special committee, arrived here yesterday.

There are but two important points to be settled before the race is assured; one is the length of the competing yachts, and the other the course. The Royal Ulster Club favors a 70 footer, and prefers to have the course at Newport, in view of the old contests in Lough Neagh.

A REMARKABLE CASE.

A Plattsville Lady Rescued by Dodd's Kidney Pills from Terrible Danger.

Plattsville, Ont., Aug. 29—The Echo, published here, report the remarkable cure of a well-known lady, Mrs. J. Barnett, who had two years suffered from Nervousness, Rheumatism, Back-ache, Sleeplessness, pains in the head and eyes and general weakness.

Dodd's Kidney Pills cured her.

To an Echo reporter, Mrs Barnett said; "I had no appetite, I could not sleep, I was a physical wreck.

"I was treated by doctors, but their medicine gave me no relief.

"I started taking Dodd's Kidney Pills, and before I finished one box, I had improved noticeably. I have taken twelve boxes in all, and am now completely recovered. I ascribe my recovery to Dodd's Kidney Pills alone."

Dodd's Kidney Pills are a positive cure—the only cure,—for Kidney Diseases of all forms. They have never failed.

RECEIVED REPORTS.

Standing of Varied Branches of Methodist Church Work.

TOTAL MEMBERSHIP 282,568.

Statistics and Reports of the Ministers, Local Preachers, Churches, Sunday Schools, Mission Work, the Colleges, Etc., Etc., All Presented and Read—Delegates Will See the Fair.

Toronto, Sept. 3.—The big General Conference of the Methodist Church occupied itself chiefly yesterday morning with the reading of reports. The session dealt with matters of interest to every member of the Methodist body. After the conference had accepted the invitation of President Withrow of the Industrial Fair to attend on Saturday afternoon, it got down to business.

The first report taken up was that of Rev. Dr. Cornish, statistician of the conference.

The following totals of church membership were then read: 1894, 280,953; 1895, 267,740; 1896, 272,392; 1897, 278,125; 1898, 280,537; indicating an increase of 19,584 for the quadrennium. If the 2,031 ministers and probationers are added the present total membership is 282,568.

The baptisms since 1894 totalled 74,398; infants, 62,889, and adults, 11,559. The marriages were 29,943, and the burials 42,003.

The present total of ministers and probationers is 2,031. Seven hundred and twenty-three probationers were admitted during the quadrennium, and of these nine died, 45 were dropped, five were expelled, 286 succeeded in completing their studies, and are already ordained, and 328 remain on probation. Ten ministers were received from other churches. The deaths of ordained ministers totalled 80.

The number of local preachers is 2,352; exhorters, 1,031; class leaders, 7,809; stewards, 9,071; society representatives, 6,571.

The number of Sunday schools is 3,387, an increase of 136. The officers and teachers number 33,018, and the scholars 270,329.

The number of churches is 3,329, an increase of 136. Parsonages, 1,133; burial grounds, 1,281; colleges and schools, 19. The total value of all church property is $15,429,934. The total indebtedness is $3,402,380. The amount of insurance is $7,073,908.

The total membership of Epworth Leagues and other young people's societies in connection with the church is 81,935, as against 47,175 in 1894, showing the tremendous quadrennial increase of 34,760. The total contributions of these organizations for the year ending May, 1898, were $52,846.59.

The statistics on ministerial support showed that in the church at large $9,276,986.43 had been raised for that purpose during the quadrennium, an increase of $107,907.43. The connexional funds for the quadrennium amounted to $1,551,980.65, an increase since 1894 of $164,282.88.

The report of the Western Section of the Book Committee, read by Rev. Dr. Briggs, showed that after paying $34,000 to the general superannuation fund the publishing house of the church had added $60,000 to its capital, which now amounts to nearly $400,000.

Rev. A. C. Crews read the report of the Sunday School and Epworth League Board. The statistics were the same as those given by Rev. Dr. Cornish. It was regrettable that the number of scholars who had taken the total abstinence pledge had decreased 24,930. The amount contributed by the Sunday schools to missions during the quadrennium was $83,781.68, a decrease of $14,970.60 on the showing of 1894.

Rev. Dr. Sutherland read the report of the Mission Board, which recommended that medical missionaries be placed under specific regulations, and intimated the purpose of mission work was primarily spiritual and not physical. It also reported against the creation of separate funds for foreign and domestic missions.

The report of the Committee on Education was then read by the general secretary of education, Dr. John Potts. The report dealt first with the subject of colleges. The showing was not satisfactory. From St. John's to Victoria every college was overburdened with debt. Victoria was the worst off of the lot. The old site at Cobourg had been sold to the Government for $18,400, and $13,406 had been raised in other ways.

Dr. J. J. Maclaren gave notice of a motion appealing to the Methodist Church at large to secure as large a majority as possible for prohibition at the coming plebiscite. And also one which looked to the removal of such ministers as make themselves objectionable to the parishes.

Rev. Mr. Bland asked that a committee should be appointed to look into the relation of Christianity to the social evils of the day. Carried.

The conference meets this morning at 10.30, an hour and a half later than usual, in order to allow the committees time to organize and report at once to the General Conference.

The doctor may be a good old man, but even so, medical examinations and the "local application" treatment are abhorrent to every modest woman. They are embarassing—often useless. They should not be submitted to until everything else has been tried. In nine cases out of ten there is no reason for them. In nine cases out of ten, the doctor in general practice isn't competent to treat female diseases. They make a branch of medicine by themselves. They are distinct from other ailments. They can be properly understood and treated only by one who has had years of actual practice and experience in this particular line. This is true of Dr. R. V. Pierce, chief consulting physician of the Invalids' Hotel and Surgical Institute, at Buffalo, N.Y. Dr. Pierce's Favorite Prescription, a remedy for all derangements of the reproductive organs of women, has been in actual use for more than thirty years. It cures every form of "female weakness."

DOCTOR IN PRISON.

A Physician at Hull Accused of Abduction and Illegal Practice.

Ottawa, Sept. 3.—Dr. Benjamin Stephen Stackhouse, dentist, of Hull, was arrested in that city yesterday on a charge of abduction and abortion. The victim is Victoria Taylor, 18 years of age. The latter charges are founded on prescriptions filled in by druggists in this city on May 27th and June 1.

On July 9th the two are stated to have left for Toronto, and a few days afterwards Victoria wrote to her home asking that letters be addressed to her at the general post office, Toronto. This letter was handed to Chief Genest of Hull, who immediately communicated with the Toronto police authorities, but without success, Stackhouse being located later at 1,893 Lucas street, Buffalo, whilst Victoria returned home.

Two Ottawa medical men aver that the girl had been the victim of a criminal operation. Dr. Stackhouse returned to Hull yesterday and was arrested at the earliest possible moment. He was brought before the magistrate and remanded till next week.

WM. COLQUHOUN DEAD.

The Former M.P.P. Has Passed Away at Cornwall.

Cornwall, Sept. 3.—Mr. William Colquhoun, ex-M.P.P. for Stormont, died at his residence here yesterday morning, aged 84 years.

Mr. Colquhoun was born in Glengarry County, in 1815, and early in life removed to the neighboring County of Stormont, where, at Dickenson's Landing, on the St. Lawrence river, he engaged for many years in lumbering and other business pursuits, amassing a considerable fortune. In 1867 he was elected member in the first Ontario Legislature, for Stormont, as a Conservative, and was again returned in 1872. A bye-election being held the next year, after the fall of the Sandfield-Macdonald Government, Mr. Colquhoun was defeated by the late James Bethune. In 1875 he removed to the town of Cornwall. He was Mayor of Cornwall by acclamation for several years, and a well-known figure in the local affairs of the county. He is survived by his widow.

Young Man Struck Dead.

Caledonia, Ont., Sept. 3.—William Burke, son of Joseph Burke, and an employe of Mr. Bain, all of Seneca township, was instantly killed by lightning during the thunderstorm yesterday afternoon, while standing under a tree for shelter in the same field as he had been working in. He was 20 years of age.

The Color Line Drawn

Toronto, Sept. 3 —The Supreme Court of the I.O.F. was in session again yesterday. After Dr. Oronhyatekha had thanked the members for their munificent kindness in presenting him with four months' leave of absence and $5,000, the regular business of the council proceeded. An executive report, which recommended that in future persons of Chinese, Japanese or negro blood be denied admission to the order, was adopted, Judge Wedderburn of Nova Scotia and some other delegates protesting. The Supreme Court closed its session yesterday.

Two Sensational Arrests.

Hamilton, Sept. 3.—Two sensational arrests were made here last night on information laid by Detective Patrick Hefferman of the Pinkerton Detective Agency. The prisoners are A. L. Stares of the late firm of Stares & Co., furniture dealers, and W. B. Cook, who was a clerk in the employ of the same firm. The charge preferred is that they stole on Aug. 7 certain documents, leases and titles of goods, the property of George S. Burkholder, the original assignee. The prisoners will be arraigned to-day.

ASSURANCE CO.

OFFICE OF W. A. MURRAY & Co., 17 to 27 King St., East, Toronto.

Wm. McCabe, Esq., Managing Director, N.A. L.:

DEAR SIR,—In answer to your request for me to decide upon one of the following options offered me for settlement of my 15-payment Life Investment Policy for $5,000 which has matured this year, viz:

1st to take the value of the Policy in Cash	$5,000.00
2nd, or fully paid-up insurance for	3,280.00
3rd, or take the profits in cash	2,050 25

and continue my policy without further payments being required from me, such policy participating in future profits.

I find it somewhat difficult to make a decision either of the three options being so satisfactory. I am certainly very much pleased with the results offered me, and as I find many others are giving full testimony to the profit-earning power of this company, I do not hesitate to give my endorsement as well, that the North American Life is one of our strongest Canadian institutions to day giving first class results on Investment Policies, on a safe and conservative basis. I find that my policy, which was originally a Life by fifteen payments, has become an Endowment at the end of the Investment period.

When we read of an elephant hunter who has been trampled to death in the wilds of India, we wonder at the foolhardiness of a man who will travel round the world and endure all manner of hardships, in order to court death in a far away jungle. A man does not have to make a journey to India in order to court death in a manner equally foolhardy.

Thousands of hard working men are daily courting death in a much more certain form, without ever leaving their native villages or cities. They are the men who neglect their health. They are the men who court death from consumption, or some other deadly disease due to improper or insufficient nourishment. The man who suffers from bilious or nervous disorders, who has a weak stomach and an impaired digestion, who has lost the power to eat, rest or sleep, and who fails to take prompt steps to remedy these conditions, is courting death in the guise of some fatal malady. Dr. Pierce's Golden Medical Discovery cures 98 per cent. of all cases of bronchial, throat and laryngial affections that lead up to consumption. It soothes the cough, facilitates expectoration and restores the lost appetite. It corrects all disorders of the digestion, makes the assimilation of the life-giving elements of the food perfect. It invigorates the liver and purifies and enriches the blood. It is the great blood-maker, flesh-builder, nerve tonic and restorative. It is the best of all known medicines for nervous disorders. Dealers sell it and have nothing else "just as good."

"I had a bad cough and got so low with it that I could not sit up," writes Mrs. Mittie Gray, of New London, Union Co., Ark. "Our family physician told my husband that I had consumption. I had pains through my chest and spit up blood. I took your 'Golden Medical Discovery' and it cured me. It saved my life."

THE RAILWAY RATE WAR.

Interstate Commission Decides Against Canada's Road in the Matter of Western Passenger Differential.

New York, Sept. 3.—The decision arrived at by the Interstate Commerce Commission in connection with the rate war was handed out yesterday, and is against the Canadian Pacific Railway.

One of the principal questions before the commission was in the matter of differentials on western business. It has been decided by the commission that the Canadian Pacific Railway is not entitled to differentials. The Canadian Pacific Railway authorities have made a determined fight for these differentials through their general passenger agent, D. McNicol, ever since the beginning of the rate war against all the western roads, and were confident that in the end they would be allowed by the Interstate Commerce Commission. Local Canadian Pacific Railway officials know nothing of the finding of the commission yet, and therefore, would not venture an opinion on the outcome.

What effect this decision, if it turns out to be correct, will have upon the rate war, cannot be told now. Mr. McNicol is at present in New York, and the continuation or stoppage of the war is now in the hands of the Canadian Pacific. The Interstate Commerce Commission is in no sense a judicial body, and, while it can suggest a remedy for the present trouble, it can in no way enforce any suggestion it may make.

Gentlemen of the Press.

Toronto, Sept. 3.—A meeting of the executive of the Canadian Press Association was held at the Queen's Hotel yesterday afternoon. The members present were the president, R. Holmes of the Clinton Era; Messrs D. McGillicuddy, Goderich; J. Tarte, La Presse, Montreal; A. J. McDonald, Alexandria; A. Treland, Parry Sound; Mr. Matthews and J. A. Cooper, secretary of the city. The applications of several persons who desired to become members were accepted. It was decided to hold the next annual meeting in Toronto, at a time to be fixed by the president, probably in February. A committee was appointed to make arrangements for an excursion next year and to report at the next meeting. The programme for the next annual meeting was also outlined and it was also decided to hold a banquet in connection with the gathering.

WHEAT DOWN AGAIN.

At Chicago the Cereal Market Closed 1c. Less Than the Day Before —The Prices.

Friday Evening, Sept. 2.

All deliveries of wheat declined about 1c per bushel on the Chicago Board to-day. The chief cause of the heaviness was the large Northwest receipts, and the report that railways are crowding all available cars to the West in expectation of a very large movement of grain to the East.

On the Liverpool Board, wheat futures opened strong, but closed unchanged to ¼d per cental above the previous final figures.

Toronto Live Stock.

The run of live stock at the cattle yards to-day was large—77 carloads, all told, composed of 1200 cattle, 2000 hogs, 1500 sheep and lambs and 105 calves.

The fat cattle, both exporters and butchers', were of fair average quality.

Trade was fair, and the best cattle of both classes sold at good prices.

Exporters sold from $4 to $4.50; bulls, light export, at $3 to $3.25; bulls, medium export, $3.35 to $3.50; bulls, heavy export, $3.65 to $4 per cwt.

Loads of good butchers and exporters, mixed, sold at $3.90 to $4.10.

Choice picked lots of butchers' cattle sold at $4.10 to $4.20; loads of goods at $3.80 to $4; medium, $3.50 to $3.70; common, $3.12½ to $3.30; inferior, $2.87½ to $3.10 per cwt.

There were 15 milk cows, which sold from $25 to $50 each, and one of extra good quality brought $55.

Feeders of good quality, weighing 1100 lbs. each, sold at $3.75 to $3.80.

There was a heavy run of Buffalo stockers, which sold at $3.25 to $3.50 per cwt.

Sheep—Export ewes sold at $3.25 to $3.50 and a few picked lots went at $3.60 per cwt.

Bucks sold at $2.50 to $2.75 per cwt.

Spring lambs plentiful and prices easier at $4 to $4.15 per cwt., the bulk being bought at about $4 per cwt.

Hogs—There was a heavy run—over 2000. Prices unchanged; best selections sold at $4.75; thick and light fats, $4.25 to $4.40. Should the heavy deliveries continue, the probability is that prices will go still lower.

Chicago Live Stock.

Chicago, Sept. 2.—Hogs—Estimated receipts for to-day, 17,000; left over, 3667; market active, 5c to 10c higher; light, $3.60 to $3.67½; mixed, $3.55 to $4; heavy, $3.50 to $4; rough, $3.50 to $3.65.

Cattle—Receipts, 4000; market slow and weak; beeves, $4 to $4.50; cows and heifers, $2 to $4.80; Texas steers, $3.25 to $4.05; Westerns, $3.65 to $4.00; stockers and feeders, $3.10 to $4.50.

Cheese Markets.

Perth, Ont., Sept. 2.—Business was very fair at the cheese market here to-day. There were about 1300 boxes of white cheese offered, of which 450 were sold to Warrington and the remainder between Hodgson Bros. and Alexander. It was all August make. The ruling price was 7⅝c.

Shelburne, Ont., Sept. 2.—At the cheese market here to-day 13 factories offered 1077 boxes. Four factories sold 634 boxes at 7⅝c; balance unsold, salesmen holding for 8c. Buyers present: Messrs. Brill and Cope, for D. Gunn Bros. This factory meets again in four weeks, Sept. 30. Cheese all August make.

Ottawa, Sept. 2.—At the Cheese Board meeting to-day the prices were from 7⅝c to 7 13-16c for colored and 8⅛c for uncolored. Everything boarded was sold. There were 2105 boxes boarded and sales were brisk.

South Finch, Ont., Sept. 2.—At the regular meeting of South Finch Cheese Board, buyers present: J. R. Weir, Pruner, Birdsell, Allison. Number of cheese boarded, 1324 boxes—624 white, balance colored. White sold for 7¾c; colored sold for 8c. All sold on board and all August cheese.

Kemptville, Ont., Sept. 2.—Over 800 boxes August offered; 8c was paid.

British Markets.

One Man's Start In Business.

Of all the curious starts in life of which self made men are apt to boast, the most extraordinary one is that which furnished the basis for a business from which a stationer in this city derives a comfortable income. He does not tell the story himself, but it comes from an old acquaintance whose veracity is beyond question. The successful business man of today was once a collector for a mercantile house and made as high as 30 or 40 calls per day on delinquent customers. He always borrowed a lead pencil from each one and never returned it unless asked to do so. Of course no suspicion attached to him, for forgetfulness in regard to lead pencils is recognized as a human failing. One of every three he secured was long enough to pass muster as a new pencil, and after he collected 1,000 in this way he secured a contract for furnishing lead pencils to a country school. One of the advantages of his bid was that he offered to supply pencils already sharpened. He now maintains a commodious stationery store, and his contract department flourishes.—Philadelphia Record.

To Remember Faces.

To remember a face, as a person is called, the rule is not difficult to follow. Pick out some feature or peculiarity by which you can distinguish that face or person from all other faces or persons and associate the name with that feature or peculiarity. No two countenances or figures are alike, and it is by noting how they differ one from another that you will remember them.

In explaining his remarkable memory for faces Speaker Reed once said to a reporter that he never looked a man in the face that some striking peculiarity, a line, a wrinkle, an expression about the eye, the set of the lips, the shape of the nose—something set that man's face down in his mind eradically and distinguished from the rest of mankind, so that when a man approached him he would think, "Here comes that man Robinson whose right pupil is bigger than his left," or "this is Thompson whose nose is so crooked."—Self Culture.

DYING BY INCHES!

But Dodd's Kidney Pills will Yet Renew Life.

Thousands of persons die in the prime of life because doctors think Bright's Disease and Diabetes incurable. But Dodd's Kidney Pills cure them both. They *have cured* thousands of cases.

These diseases and other Kidney complaints are as common as ordinary colds. But people don't realize that they are afflicted till the disease has eaten deep into the system. Even then, Dodd's Kidney Pills will positively cure.

Thousands of *people are dying on their feet, but do not realize it.* They notice one or more of these symptoms: shortness of breath, loss of memory, failing sight, ravenous appetite, pale or reddish urine, with brick-colored deposit, scalding when urinating, constipation, nervousness, pains in the loins. Their only hope is Dodd's Kidney Pills. They won't fail. They never do.

Three Years in Bed.

From Kidney Disease—Although a Man of Three-Score and Ten, Dr. Chase's Kidney-Liver Pills gave him back perfect health.

This is to certify that I was sick in bed the most of the time for three years with kidney disease. I took several boxes of pills—different kinds—and a great many other kinds of patent medicines; besides that I was under treatment by four different doctors during the time and not able to work. I began to take Dr. Chase's Kidney-Liver Pills, and since that time have been working every day, although a man nearly 70 years of age. Dr. Chase's Kidney-Liver Pills have cured me.

EDUCATING AMERICANS.

The First Week of the Quebec Conference Devoted to the Work—Chances of Reciprocal Trade.

Quebec, Sept. 3.—The first phase of the conference at Quebec ended yesterday afternoon, when the commissioners dispersed to reassemble again on the 20th. The sitting was a short one, and at its close the usual statement that things are progressing to the satisfaction of the commissioners was made with the customary smile. All that is certainly known in regard to the seven days' work done by the commissioners is that the general question of the relations of the two countries and the points of difference between them has been thoroughly discussed, and a basis laid for action when the commission reassembles.

Sir Wilfrid Laurier has carried out his expressed intention of talking over the whole case before trying to settle any one point at issue, and the work so far done has been almost entirely educational.

The trade question is the one to which most attention seems to be paid south of the line, and the American commissioners have during the present week been subjected to precisely the same sort of influence that is so much in evidence when tariff legislation is up at Washington. The lobbyist is here in force and does not confine his efforts to formal hearings. It is gratifying to observe that on the present occasion the field is not left entirely to the protected manufacturers who object to any lowering of the tariff walls. Millions of Americans who never before gave Canadian questions a thought have [illegible] through the press despatches that Chambers of Commerce, representing over 20,000 American merchants, have passed resolutions calling for reciprocity with Canada. The American mechanic will learn with some surprise that Canada is the second best market he has got for his manufactures, and will think over the emphatic declaration of the Boston delegates, that Canada is too important a market to lose by unfriendly tariff legislation.

Mr. Dingley is probably the only one of the American commissioners who is not thoroughly convinced that reciprocity would be a good thing. He is talking still as if Canada were asking for a favor in proposing that trade relations shall be improved. He is undoubtedly down on the preferential tariff, which was really an intimation that his own six-barred gate was not popular in this country. It is just possible that if all the American commissioners were of his mind the attempt would be made to block reciprocity till the preference to Great Britain is dropped. It may even be that he came to Quebec with some such wild idea. If he did he has been thoroughly undeceived, and understands now that a demand for the repeal of the preferential tariff would be regarded by the Canadian and British commissioners as an impertinence and a signal for the breaking up of the conference. Senator Fairbanks is the specially trusted representative of President McKinley at Quebec, and it is no secret that he has been thoroughly impressed with the strength of the Canadian case, especially in regard to trade relations. He will go to Washington and make a report to the President on the work of the commission, and it does not seem improbable that his report will lead the Administration in the right direction.

With the Administration in the right direction, with the trade returns before them and the possibility of Canadian trade hostility in event of Dingleyism being maintained in its present uncompromising form, the Cabinet at Washington will probably authorize the representatives when they return to Quebec to agree to a limited reciprocity schedule, embracing articles that will not interfere with the preferential principle. There are a good many lines of imports of manufactures in which Great Britain and the United States are not competitors.

The American commissioners, with the exception of Mr. Foster, who goes to Toronto, will go home; Sir Wilfrid Laurier to Arthabaskaville; Lord Herschell to New York, and the Postmaster-General to Toronto.

Oscar Jeffrey's left hand was caught in the planing machine rollers, in the Phillips' mill at Toronto Junction on Friday, and was mangled in a most terrible manner right up to above the elbow. There was no one in the mill at the time, but he put out his right hand and stopped the machinery himself. The machine had to be taken apart to release him.

It is understood that the capital case of William J. Hammond, awaiting execution in Barrie jail on Sept. 15th for the murder of his wife, Kate Tough, at Gravenhurst, has been before council. It is probable that the law will be allowed to take its course, as the atrocity of the crime and the evidence of the man's guilt lead to the conclusion that it is not a case calling for executive clemency.

DEER HUNTING.

A DEFENCE OF THE EXISTING GAME LAWS.

A Reply to the Letter of the President of the Central Ontario Fish and Game Protective Society.

To the Editor of the Examiner:

DEAR SIR,—In a recent issue Mr. D. W. Dumble, President of the Central Ontario Fish and Game Protective Society, gives his views as to the proper mode of protecting deer, and finally deciding that "everything with reference to the law is wrong." What changes would Mr. Dumble make in order to protect the deer and make the law right?

(1) He would allow the hunters to have from October 15th to November 15th during which to kill neer, or twice as long as the present season, in order to protect them

(2) He would allow the use of dogs during all that season to scatter and drive the deer out of the country in order to protect them and facilitate breeding during the rutting season.

3 He would allow killing in the water, where the deer is utterly helpless, other than to swim out if left alone, consequently, as is customary with every party, he would see that one of them would sit in a canoe on any water about which the party might be hunting and whose duty would be, as soon as the dogs drove the overheated animal into the ice-cold water, to paddle up to it, take it by the ear and cut its throat, club it to death or shoot it through the head so as to protect the deer and prevent its "venison from being spoiled by being shot and torn in the body." Although venison, which has been run is black and uninviting, not to say unwholesome for food, yet when suddenly chilled it is probably less so. One does not wonder that such a hunter "comes out of the woods blunted and reduced in his standard of honour and robbed of that pleasure that a clean and self-respecting hunter should always possess."

4 He would have the season begin Oct. 15, when from that until the end of the month not once in twenty seasons could the hunter keep his venison for three days. He could not possibly keep it to take home with him, yet this is Mr. Dumble's idea of protection of the deer.

He knows, too, that the rutting season does not usually begin until November 1 and during which the does hide and the bucks roam through the woods and consequently because they are moving about, their tracks are taken more frequently than those of the does, with the result that more of them are killed, as shown every autumn by the bags taken. This is genuine protection on a large scale, for the more does saved the better.

Mr. Dumble complains that so many deer get wounded if shot in a sportsmanlike way on the run; many, I dare say, do, as he knows, for even when the hunter bleats to the running deer to make it stop for a moment a few yards from him, it often only gets wounded or perhaps missed altogether, because the butt end of the gun is a little unsteady. The law has no remedy for poor shooting. Why do those men who "love the woods with its eloquent silence and its many voices," not take their guns, leave their dogs at home and pit their cunning and woodcraft against that of the deer as the genuine sportsman loves to do, and having secured a chance be such a marksmen as to shoot his deer where he wants to. Then he could go to camp proud in the thought that he had taken his quarry in such a sportsmanlike way as to be envied. Who would envy a man killing a deer in the water when it is as helpless as a sheep under like circumstances?

Mr. Dumble's strictures upon Mr. Tinsley are quite unwarranted, for those who know the Chief Warden know that he has the true instincts of a gentleman sportsman, one who would scorn to do a cowardly thing even against a deer in the water. How does he know that the law has lessened the number of deer killed? Because the year before its enactment Toronto market was reeking with the stench of rotten venison, so much so that the Board of Health had to interfere. Other markets were in a similar condition. This was all because the season opened in the month of October and gentlemen could kill and ship down as many deer as they liked, although hundreds were left in the woods to rot because it was too warm to keep them until they they could be gotten out. This is the way Mr. Dumble would protect the game.

Mr. Dumble says the hunters are the only men interested in the game laws. This is not the case, for there are thousands of others who never take up a gun who are deeply interested in preserving the game and fish, not only from sentiment, but from a knowledge of the great commercial value it is to the Province in bringing every year increasing numbers of visitors, who leave a good deal of money with the settlers and others. Mr. Dumble should remember that the Lieut.-Governor in Council in 1890 named a commission of inquiry which, at considerable expense, took the evidence of hundreds of hunters and from that evidence was the present law enacted; and yet he places his opinion in opposition, although those men were possibly as experienced as he. The game laws of Ontario are to-day considered by the best authorities as the best and perhaps the most advanced of any on the continent. It is well known that even before the commission a great many hunters in 1901 were opposed to the use of dogs, and the settlers in the deer districts are almost unanimously opposed to dogs, and of course the time is not far distant when they must be stopped if the deer are not to be exterminated. The enactment against killing in the water was no doubt an attempt on the part of the Government to curtail somewhat the slaughter. It is certainly questionable if while the dogs are used it should be the law since the law cannot be enforced over the immense territory where the deer are found. It must largely be left to the honour of the hunters. The whole aim of the law is to lessen the destruction of the game and to protect it. It is not so arranged as to facilitate the taking of game by lengthening the season and making it easy and pleasant for the sportsman.

THE CANADIAN ORDER OF FORESTERS.

An Interesting Exhibit at the Industrial.

One of the attractive features of the Industrial Fair is Society Row, and one of the most attractive tents in the row is that occupied by the Canadian Order of Foresters. This society has made wonderful progress since its organization in 1879. It has been energetically pushing its business, until now its membership is nearly 30,000, and its financial business has reached into the millions. The visitors to the tent have been quite numerous already, and all have expressed themselves as delighted with the appointments for the comfort of callers, even to ice water for the thirsty. so that the C.O.F. was by no means behind the best in considering the comfort of visitors. This society has had a remarkable history. Its business operations being confined to the Dominion of Canada, its life insurance business has been most successful; the death rate in this exceptionally fine insurance territory keeps low; that, combined with adequate rates, careful management, careful selection of risks and a low average age, the age limit for admission being forty-five years, has resulted in a large accumulation of surplus funds, there being over $600,000 to the credit of the order in the insurance department alone, after paying all death claims promptly. In the matter of benefits, the society has paid out in all kinds of benefits a total of $1,685,784. All parties desiring safe society insurance cannot do better than join this organization that has so well demonstrated its ability to meet every obligation, and which is doing so much to help make creditable Canadian history along this line of business.

OBITUARY.

The Bobcaygeon Independent says:—"Richard Lewis, better known as 'Black Dick,' has gone aloft. For the last few years he was employed on the farm of the M. Boyd Co'y, at Prince Albert (Sask.), and last week a communication was received stating that after three days' illness with cholera morbus he passed away on the 8th, and was buried at Prince Albert cemetery on the 10th. For many years Dick was a prominent figure in the lumbering operations of this neighbourhood. His tall, rugged, muscular form was typical of work in the woods. At one time, when the giants of the forest were made into square timber, he was a hewer of great skill. Nature had given him a constitution of iron, but poor Dick's only enemy was himself, and his bursts of intemperance when he came from the woods each spring, told upon even his marvellous vitality. When ordinary mortals were wrapped in overcoats and mufflers, Dick would be in nothing but shirt and trousers, with sleeves rolled up and the neck turned in, exposing the breast. He had a kindly heart has Dick, and though, when in his prime, a man of great strength and commanding height, was ever peaceful and good natured, even in his drink. Richard's was not a life of any great purpose, but it can be said of him that he never intentionally injured a soul, and many a heart-felt sorrowful wish will be expressed for poor Dick by all who knew him.

FOR THE AGED.

Paine's Celery Compound gives the needed stimulus to good digestion and assimilation, and keeps the blood pure.

Nature's medicine brings health and happiness to those in advanced years.

King David, the sweet singer of Israel says: "The days of our years are threescore years and ten; and if by reason of strength they be fourscore years, yet is their strength labor and sorrow."

The physical troubles and burdens of old people are many. Disordered nerves, constipation, flatulence, drowsiness, indigestion, palpitation and impoverished blood seem to make them grow weaker from day to day.

Paine's Celery Compound is a precious and invaluable medicine for old people. It is nature's true nerve, tissue and flesh builder; it keeps the blood pure and fresh from day to day, regulates the organs of digestion, and keeps the appetite natural and healthy. No other medicine in the world so quickly recruits the strength and waning energies of men and women advanced in years. Paine's Celery Compound has added many long years to the lives of old people in the past, and to-day thousands sing the praises of the wonderful medicine, because it has bestowed peace and comfort and kept them free from the infirmities of old age.

Young Canada

BEGINS ANOTHER TERM OF SCHOOLING.

Tough clothes for boys to wear to school these hot Fall days. That's the burden of our song. Strong clothes to stand the work of out of doors fun in all kinds of weather. We have just such things for the youngsters and, besides being full of wear, they are neat and shapely.

FIVE CASES OF

BOYS' NEW SUITS

These are only the advance guard of our Fall stock, for the boys. These are Two and Three-Piece Suits, and will fit boys all the way from 3 to 16 years. We sell the best of everything.

We've all good qualities of Boys' Clothing. We've more Boys' Clothing in our store than in all the other stores put together. We've a weakness for supplying the boys. Ask yours if this isn't so?

We may give you some idea of the value and inducement we purpose giving to buyers, when we say

A $2.00 BILL

Will buy a beautiful all wool, neatly made, well trimmed Tweed Suit.

Of course we've cheaper Suits, and as low as 95c. per suit. Better Suits up to $3.00 and $4.00, but

OUR $2 SUIT

IS A CORKER.

Just the thing for a boys' School Suit, and as good as ever sold for $3.50. Mothers should see these Suits. You know value. You know your boys' clothes-wrecking propensities. Come to us. We're full of economical suggestions.

A PRICELESS NECESSITY.

Kidney Disease Cannot Hurt when Dodd's Kidney Pills are Used.

Healthy kidneys are absolutely necessary for the production of pure blood.

Pure blood is absolutely necessary for good health—yes for life itself.

If the kidneys are weak, or diseased, the blood is impure, poisonous, and the general health breaks down, before the attack of specific disease.

Dodd's Kidney Pills restore weak and diseased kidneys to health and strength. They stimulate them to proper action, enabling them to filter the poison out of the blood.

Dodd's Kidney Pills are the only medicine known that can and will do this. Therefore, they are priceless and indispensable. All forms of Kidney Disease are cured by them.

Dodd's Kidney Pills have a unique record—Twenty thousand cures, not one failure. You should try a box.

An Opening Salute!

Extraordinary Purchases from the

ALEXANDER and ANDERSON

WHOLESALE STOCK, TORONTO.

Business must be made interesting; and invaluable opportunities frequently come from the unfortunate mistakes of others, which shrewdness helps us to profit by. Nothwithstanding the heavy blockade of mammoth boxes and bales of New Fall Goods almost daily occuring in front of our store doors, an opportunity has just come our way of securing a very large quantity of household goods out of the regular channels. The wholesale stock of MESSRS. ALEXANDER & ANDERSON was placed on sale last week by Wyld, Grasett & Darling, of Toronto, of which we bought very largely at a very low price on the Dollar. We may state at once that it will be impossible to duplicate these extraordinary values—as the prices have been marked on a scale considerably lower than wholesale inventory list prices.

ON FRIDAY, SEPTEMBER 9th.

We place this immense purchase on sale, and for each succeeding day shoppers will reap the benefit. The stock embraces—

Dress Goods, Black Silks, Dress Trimmings, Damask Tablings, Towels, Towellings, Napkins, Fancy Household Linens, Sheetings, Pillow Casings, Made-up Pillow Cases, Embroideries, Handkerchiefs, Ribbons, Veilings, Hosiery, Tapestry Carpets, English Linoleums and other Housefurnishings.

Every piece of goods is this season's style and the choice of any one means perfect satisfaction. No circumstance can arise to make conditions better to buy Dress Goods at lower prices.

ANGLO-GERMAN AGREEMENT.

The Terms Embody a Complete Understanding Between the Contracting Nations on African Affairs.

London, Sept. 8.—The terms of the Anglo-German agreement, which is the principal topic of the day here, are stated, upon good authority, to be in the main as follows:

The first point is that Germany and England have come to a complete understanding on all African questions.

In February, 1895, Germany made a formal claim upon Lord Kimberley, then British Foreign Ambassador, for the maintenance of the status quo in South Africa, the special object being to protect the Transvaal from British control.

Germany now withdraws absolutely from the claim and leaves Great Britain a completely free hand in South Africa. The German and British Ministers further agree to give a joint Government guarantee of a loan to Portugal to enable her to meet the award of the Swiss arbitrators regarding the Delagoa Railway, arbitration to decide the amount of compensation due from the Portuguese Government to the McMurdo concessionaries of the Delagoa Railway. The concessionaries being largely American, the United States and British Governments have long been jointly pressing for this compensation.

The Transvaal thereby becomes an enclave and Kruger loses his only chance of an independent outlet to the sea.

The agreement further provides that all steps necessary for England's acquisition by amicable arrangement with Portugal of part or all of Mozambique shall receive the assent of Germany.

Germany also agrees to recognize the permanence of British occupation of Egypt when next year England will ask Europe for a curtailment of the jurisdictions of the mixed tribunals.

As a quid pro quo Germany secures a settlement of frontier in Togoland. The neutral zone called Dagombland, between Ashantiland and Togoland, is to be divided, giving Germany the bulk of the zone. The river White Volta is, as far as possible, to become the dividing line between the German and British sections.

Further, the British Ministry agrees to assent, under certain conditions, to the arrangement which the German Emperor expects to make with the Sultan during his approaching visit to the Holy Land, and to facilitate German colonization in Asia Minor.

These are the important features of the agreement, some of which must be made public when the Portuguese loan is announced. But behind this understanding, of which the public soon will have official information, there is believed to be a secret agreement, giving Germany more in the nature of a quid pro quo.

The statement published here yesterday that England and Germany also have agreed upon the joint creation of a railway through the German sphere of Shantung in China to the British sphere of the Yangtse Valley, cannot be confirmed, but co-operation has been long in the minds of the British Ministers.

SOUDAN SITUATION.

Khalifa's House Had to Be Bombarded After the Big Fight.

THE SIRDAR'S NARROW ESCAPE.

Gen. Kitchener and His Staff Narrowly Escape Being Killed by the Shells —British Gunboats Ascend the White Nile to Meet Major Macdonald From Uganda

—Cable News.

London, Sept. 8.—The war correspondent of the Daily Telegraph at Omdurman says: "After the entry of the troops into the Dervish capital, it was found necessary to further bombard the Khalifa's house. Gen. Kitchener and his staff were standing in the vicinity and narrowly escaped being killed by the shells.

"I estimate the enemy's killed at more than 15,000."

Up the White Nile.

A despatch from Khartoum announces that five British gunboats have pushed up the White Nile. This is regarded here as highly significant.

The Sirdar telegraphed on Saturday that the condition of the bank of the Nile made it impossible to utilize the gun boats in the pursuit of Khalifa Abdullah,

THE SIRDAR.

who had fled towards Kordofan. The only inference, therefore, is that the gunboats have now gone to join hands with Major Macdonald, who is now known to be on his way northward from Uganda, an operation which has long been contemplated by the Government.

Sir Michael Hicks-Beach, Chancellor of the Exchequer, announced in Parliament on June 27 last that an attempt would be made to open up commerce with the interior of Africa by a flotilla on the Nile.

Khalifa Fled With 3,000 Men.

London, Sept. 8.—A despatch to the Central News from Omdurman says the Khalifa in his flight took 3,000 men with him.

How Howard Met His Death.

London, Sept. 8.—A special despatch from Omdurman says: "Hubert Howard, the correspondent of the Times, met his death owing to his eagerness to get the first news of the fate of Karl Neufeld and the other European prisoners of the Khalifa. He pressed into the city before it was safe to do so, and was making his way all alone down a narrow valley leading to the prison, when he was attacked and killed.

"The finest display of heroism on the Dervish side was made by the Khalifa's brother, Yantub, with his adherents, who, utterly regardless of our terrific fire, made a superb attempt to retrieve the day's fortunes. Though far from asking quarter, they simply hugged death. Yantub died in the prison of his old enemy, Slatin Pasha."

CZAR'S PEACE CONGRESS.

Nearly All the European Powers Favorable—Meeting of the Congress in November Regarded as Certain.

London, Sept. 8.—The St. Petersburg correspondent of the Daily Telegraph says: "Almost all the European powers have sent favorable replies to the circular of Emperor Nicholas; and it is now regarded as certain that the disarmament congress will meet in St. Petersburg in November."

Bone of Contention.

St. Petersburg, Sept. 8.—The Novosti in a long article declares that the principal subject to be considered by the disarmament congress must be the question of Alsace-Lorraine.

It anticipates that the result of a consideration of this matter will be either the neutralization or the independence of Alsace-Lorraine which "will now be possible without wounding the amour propre of either nation."

"Both Germany and France," says Novosti, "could make this self-sacrifice for the attainment of the Czar's worthy object, and thus restore friendship and relieve the world of the burden of armed peace."

Li Hung Chang Dismissed.

Pekin, Sept. 8.—Li Hung Chang has been dismissed from power. It is presumed this was done in accordance with the demand which, it was rumored, the British Minister here was instructed to make on account of the alleged general partiality of the great Chinaman to Russia, culminating in Great Britain being deprived of the contract for the Pekin-Hankow Railroad.

Anglo-American Relations.

London, Sept. 8.—At a banquet given last evening at Bristol in honor of the opening of the Cabot memorial Lord Dufferin was the principal speaker. In his address he dwelt almost exclusively on Anglo-American relations. He said that brotherly sentiment might not always be an unfailing bond, but it was worthy of being stimulated and cherished, especially now a new and critical chapter in the history of the world was about to open. In the solution of the difficulties that had arisen in the East the United States would be compelled to share, but it was pretty certain that their interests would not clash with those of Great Britain, because both nations were guided by the same rules of humanity and justice.

Noisy Scenes in Madrid.

Madrid, Sept. 8.—During the Romerist and Republican attacks upon the Government in the Chambers yesterday regarding the conduct of the war, some very noisy scenes occurred, the occupants of the public galleries joining in, until there was such a tumult that the Ministers' voices were almost inaudible.

BEFORE THE JUDGES.

The Right of Constables to Vote Now Being Argued.

MR. NESBITT OPENS THE BALL.

The Historic Case Enters Upon a New Phase—The Conservative View First Placed Before the Court —It Is, "There Is Not an Inalienable Right to Vote."

Toronto, Sept. 8.—The historic constable case entered upon a new phase yesterday morning at Osgoode Hall, when the Court of Appeal of Ontario met to hear arguments on behalf of the Conservative party in favor of rejecting the votes cast by constables in certain constituencies in the recent provincial election, and by the Attorney-General's representative in favor of the legality of the practice. The Judges hearing the case are: Burton, Chief Justice; Osler, Maclennan, Lister and Moss. The counsel in the case are: S. H. Blake, Q.C., A. B. Aylesworth Q. C., and E. F. B. Johnston, Q.C., for the Attorney-General; Mr. Wallace Nesbitt for the petitioner in the West York case who raises the issue against constables voting; Mr. W. D. McPherson for the North Essex petitioner, and Mr. Monro Grier for the Lennox petitioner.

The question ranges itself under three headings, which may be briefly translated into non professional language as follows:

1. Does the Ontario Election Act disqualify from voting any peace officer or constable by reason of his appointment as constable and the receipt of any prescribed fee therefrom?

2. Does the Ontario Election Act disqualify from voting persons who perform services for the returning officer at an election, by reason of the performance of said services or the receipt of any fee therefor?

3. Does the Ontario Election Act deprive of a vote persons who have let rooms for nomination meetings, etc., or polling booths?

Mr. Blake was proceeding to open the case, when Mr. Wallace Nesbitt objected, claiming that as he represented the affirmative side of the question he ought to be allowed to speak first. Mr. Blake not pressing his claim, Mr. Nesbitt was allowed to proceed. In attempting a preliminary survey of the case, Mr. Nesbitt found it hard to avoid trenching on politics. He claimed that the case as submitted to the court did not cover ground enough. It did not consider poll-constables at all or those who had not been properly sworn in. Mr. Nesbitt contended further that to allow constables to vote was to open a door to corruption. No one who in any way received money in connection with an election should be entitled to vote.

Judge Maclennan—May a voter hire a horse to drive himself to the poll?

Mr. Nesbitt—I think so.

Judge Maclennan—And does that payment disqualify the liveryman from voting?

Mr. Nesbitt was unwilling to commit himself in reply. He thought, offhand, that it would not disqualify the liveryman, but he would not be sure.

Continuing, Mr. Nesbitt said that his opponents would likely urge that the right to vote was inalienable. But that was absurd. The right to vote was purely statutory. This was proved from constitutional history and by the fact that different qualifications were necessary in different countries, and even in different provinces of the Dominion. The right to vote was a matter of privilege and utterly unknown to common law. This present state of affairs had existed ever since 1409.

Mr. Nesbitt continued his argument till the court adjourned at 1 45, going at great length into technicalities in support of his proposition that constables had not the right to vote.

In the afternoon session Mr. Nesbitt continued his argument along similar lines till the court rose at 5 o'clock. The case therefore is at present half argued, and Mr. Blake will be heard in reply at 11 this morning. The case will probably not be concluded until to-morrow afternoon.

Jamaica Wants to Come In.

Kingston, Jamaica, Sept. 8.—The promoters of the movement for bringing about the annexation of Jamaica to the United States, having failed to secure popular support because of the color prejudice, are now agitating for admission to the Canadian Dominion.

Their efforts in this direction promise to prove more successful, but before adopting definite measures the promoters wish to see the result of the efforts of the Barbadoes conference to secure relief for the sugar and other industries of the British West Indies.

Dudley Acquitted.

Stratford, Sept. 8.—At the Assizes yesterday James Dudley, the tramp who shot P. J. McKeough, G.T.R. baggageman, on May 31 last, was acquitted on the ground of insanity, and will be held until sent back to his relatives in Michigan.

Vermont Elections.

White River Junction, Sept. 8.—The result of yesterday's biennial election in Vermont shows many surprises, the Republican vote having fallen off quite materially from four years ago. The Democrats have elected 33 representatives, while only 11 were seated the last year.

The Industrial.

Toronto, Sept. 8.—Yesterday was Farmers' Day at the Exhibition, and it was thoroughly enjoyed by the representative gathering from all parts of the country. To-day is Americans' Day.

Only Thirty and Gray

How is this?

Perhaps sleepless nights caused it, or grief, or sickness, or perhaps it was care.

No matter what the cause, you cannot wish to look old at thirty.

Gray hair is starved hair.

The hair bulbs have been deprived of proper food or proper nerve force.

Ayer's Hair Vigor

Increases the circulation in the scalp, gives more power to the nerves, supplies missing elements to the hair bulbs.

Used according to directions, gray hair begins to show color in a few days. Soon it has all the softness and richness of youth and the color of early life returns.

Would you like our book on the Hair? We will gladly send it to you.

EDITORIAL NOTES.

THE report of the Methodist Mission Board presented at the General Conference in Toronto referred to the necessity of measures for keeping down the "oversupply of ministers." This does not jump very well with the fact, according to a German statistician, that out of the one thousand four hundred millions of population of the world only four hundred and fifty millions are even nominal Christians. "The harvest indeed is great, but the labourers are few."

THE chain of British territory in Africa extending from the delta of the Nile to the Cape of Good Hope is not yet complete, but the victory of General Kitchener at Omdurman has added a big link and others are being forged. The cross is the central symbol on the meteor flag, and the spirit of the motto, In hoc signo vincis, accounts for the success of Great Britain in heathen lands. Wherever the flag floats the cross rises and under the shadow of it, none dare molest or make afraid. Great Britain represents in her colonising enterprises no only the highest civilization, but the basis of true civilization, Christianity.

CANADIANS are generally to the fore in every part of the world they enter. The great railway to the heart of the Soudan, that played so important a part in contributing to the great victory of General Kitchener, was pushed on by the ceaseless energy and enterprise of Lieutenant Girouard, a Canadian, and eldest son of Mr. Justice Girouard, of the Supreme Court of Canada. Thanks to this railway and its equipment the British troops were well supplied with food and ammunition, and after the battle the wounded were conveyed in palace cars to civilization. This is in striking contrast to the cruel inefficiency of the United States commissarrat, transport and hospital provisions, whose criminally ineffective condition is responsible for more suffering for the United States soldiers than the climate of Cuba and all the forces of the Spaniards. The British not only know how to fight but when to fight and how to prepare for war.

FEEDING PIGS FOR QUALITY

The Average Nutritive Ratio of Common Foods.

An exclusive diet of Indian corn, particularly when the pigs are growing, would be disastrous to the quality. When they are killed, the lean flesh and the fat from corn-fed hogs feel comparatively firm to the touch; but the proportion of lean flesh to the fat is very much less than when hogs are reared and fattened on a diet of mixed grains, together with a small quantity of skim-milk and buttermilk. All ordinary feeds contain a percentage of albuminoids, which are also called "flesh-formers." They also contain carbohydrates, or what are called "heat-producers," or "fat formers." A well balanced feed is one that has a "nutritive ratio" of about one part of the "flesh formers" to from four to five parts of the "heat producers."

The term "nutritive ratio" is the one used to denote the proportion of albuminoids, or "flesh formers" in food to the sum of the other nutrients in the food. The heat-producing or fuel value of fat in food is two and a quarter times as great as that of carbohydrates, such as starch and sugar, and also two and a quarter times greater than albuminoids.

On the average the "nutritive ratio" of some common feeds is as follows:

When swine are being fed upon whey, the supplementary grain food should be one rich in flesh forming constituents, such as bran, peas, oats, barley or shorts. Indian corn may be used in the proportion of one part to two parts of the other sorts of grain. But Indian corn does not make a suitable supplementary feed to whey. When it is fed with skim milk or buttermilk, it gives good results, as the skim-milk and butter-milk contain the flesh-forming elements which are not in the whey.

A mixture of grains seems to give better results for the fattening of swine than any single grain fed alone. The feeding of Indian corn would be likely to result in the deterioration of the quality of the bacon. That would be most unfortunate and disastrous at this time when Canadian bacon and hams are being recognized in the British markets as of a very superior quality. The feeding of an excess of Indian corn produces swine containing a large proportion of fat to the quantity of lean meat.

A letter has been received lately from the owners of one of the largest packing houses in Canada in which they say: "We are always greatly troubled by fat bacon at this time of the year. During the winter time hogs get very little exercise and are what are called 'penned stock.' As a result many of them put on an inordinate amount of fat. The same thing to a less extent prevails in Ireland and Denmark. The English market has therefore much more fat bacon than it can absorb easily. The difference in the price between fat and lean bacon last week was ten shillings per hundred weight (nearly two and a half cents per pound). About twenty-five per cent. of our shipments are running fat. Some of our western curers are finding about forty per cent. of their shipments too fat. On account of this quantity of fat stock we have been obliged in common with others to put down the buying price of hogs, and if the ten shillings per hundred weight between fat and lean keeps up, a further marked reduction in the price of hogs may result."

A PRICELESS NECESSITY.

Kidney Disease Cannot Hurt when Dodd's Kidney Pills are Used.

Healthy kidneys are absolutely necessary for the production of pure blood.

Pure blood is absolutely necessary for good health—yes for life itself.

If the kidneys are weak, or diseased, the blood is impure, poisonous, and the general health breaks down, before the attack of specific disease.

Dodd's Kidney Pills restore weak and diseased kidneys to health and strength. They stimulate them to proper action, enabling them to filter the poison out of the blood.

Dodd's Kidney Pills are the only medicine known that can and will do this. Therefore, they are priceless and indispensable. All forms of Kidney Disease are cured by them.

Dodd's Kidney Pills have a unique record—Twenty thousand cures, not one failure. You should try a box.

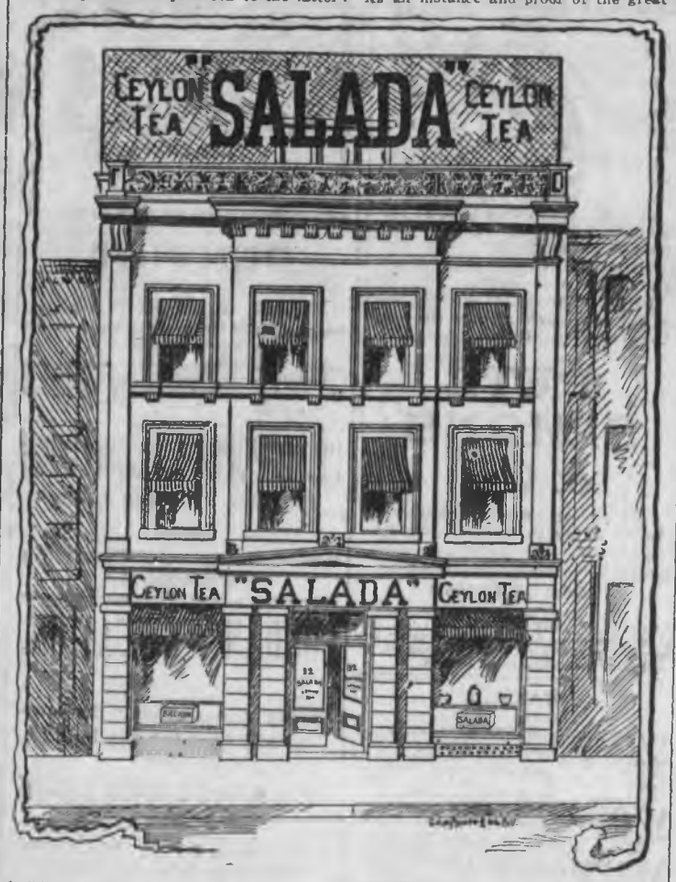
AN IMPOSING BUILDING.

Accurate Description of the Premises of the Salada Tea Company.

A stranger arriving in Toronto for the first time, and coming in by boat, is apt to acquire a much better impression as to the beauty and imposing character of our buildings, both public and private, than would the same stranger, had he reached the city by rail instead of by water. First impressions always count for a good deal, and in this respect Yonge street possesses many advantages which cannot be claimed for York st. Coming direct from the boat at the wharf, and walking up Yonge street, several fine buildings at once attract attention. The Customs building, the Board of Trade, the Bank of Montreal, and only a few steps north of the latter



building, and on the same side of the street, a strikingly handsome building attracts the attention of the thousands of visitors in the constant procession from the boats.

The building referred to is the new home of the Salada Ceylon Tea Company. With its restored, clean, white stone front, and fine entrance leading to magnificently fitted up offices, the Salada Company building is now one of the attractions of Yonge street.

It is about six years ago since the Salada Tea Company first commenced business in Toronto. At that time the only teas sold in Toronto were the Japan and China teas. About this time the teas of Ceylon and India began to be introduced. And since then, what a revelation, and a revolution at the same time, has been brought about in regard to teas.

In his day, Colley Cibber, the poet and gossip, wrote: "Tea! thou soft, thou sober sage and venerable liquid; thou female tongue, running, smile-smoothing, heart-opening, wink-tippling cordial, to whose glorious insipidity I owe the happiest moments of my life, let me fall prostrate."

It must have been Salada tea, or something like it, which could induce such enthusiastic praise, for if only such teas had been available in Cibber's day, as was dished out to Toronto tea drinkers six or seven years ago, those happy moments he refers to must have been very few and very far between.

But with the advent of the Salada Tea Company, with their Ceylon teas, a change set in, which has been going on to this day. These teas only required to be known to be appreciated by the public. With commendable enterprise, and rightly judging that a tea conveyed pure and direct to the consumer, without passing through half a dozen intermediary channels, to be subject to adulterations of the vilest description, the Salada Company commenced packing its tea in leaded packets, in quantities of one pound and half a pound. This was a distinct innovation in Canada, for the Salada tea was the first to be put on the market and sold in leaded packets in this country. Teas had been packed in that form in England, but the practice was new to Canada.

The Salada Tea Company was also the first in Canada to advertise tea as it is advertised to-day—that is, as a specialty, as distinct from the many articles which went to make up the stock-in-trade of the chandler and grocer of the old days. Tea was then included among the soaps, starch and peppers, with no thought that it was an article requiring trained skill and care in selection and treatment.

It was difficult at first to get the average grocery dealer to see the possibilities of the tea trade as the Salada Tea Company saw it. It is the old story of the natural dislike of new methods and a change from long-established custom.

But gradually the old prejudices began to give way, as the manifest advantages of the new system of selling tea direct from the shipper, put up in packets and guaranteed, began to make themselves felt over the old method of retailing from the bulk in open drawer or canister. Now, every up-to-date grocer has fallen in line with the new idea, and only the old-fashioned grocer, more slow to move, persists in following the plan of his grandfathers.

As an instance and proof of the great proportions which the business of the Salada Tea Company has assumed, not less than a million and a half pounds of tea are now sent out of its warehouse in packet form annually. The company has warehouses in Boston, Buffalo, Detroit, Pittsburg and Toronto.

A visit to the warehouse on Yonge st. is both interesting and instructive. The tea arrives direct from the tea gardens of Ceylon, put up in 100 lbs. in boxes lined with lead. These boxes are placed on the elevator and conveyed to the top floor of the building. Here they are emptied into a ponderous looking machine, called the "Blender," or mixer. Into this machine 30 of the 100-lb. boxes of tea can be poured at one time. Commencing from the blender, a perfect system of shoots and hoppers have been constructed through which the tea passes in its various stages from the top floor to the shipping rooms. A short distance from the "mixer" the tea is delivered from a shoot to a dozen or more young fellows ranged along the room variously occupied. Some are making the leaded paper packets; these are passed along to the weighing and packing department. A row of machines, the invention of Mr. Larkin, the manager of the company, are here deftly manipulated by the young men who weigh and seal up in the packets of tea.

Interested in the process, I timed the

INTERIOR VIEW.

weighing, and found that from eleven to thirteen packets of tea were weighed and sealed up in the space of one minute at each machine.

The packets are then labelled, piled on trays, and, presto! off they shoot, disappearing down a sort of toboggan slide to a large room below, where huge piles of the neat and compact packages are ranged in stacks ready to be shipped away.

Such is the scene of activity and enterprise which presents itself to the visitor to this modern tea emporium.

The aim of the company since it started business has been to supply the pure Salada Tea direct to the consumer from the gardens in Ceylon in which it grows. The success of the company in attaining this object is attested by the immense proportions to which their business has so rapidly grown.

"Prof." D. B. Johnson Committed for Trial Under the Charlton Act at Barrie.

Barrie, Sept. 8.—Yesterday afternoon D. B. Johnson, who was arrested in Toronto on Saturday, on a charge of violating the Charlton Act, was sent up for trial. Mrs. Harrington of Essa Township, mother of the 15-year-old girl, Elva, whom the prisoner is charged with seducing, swore that "Prof." Johnson came to her place on Aug. 18, as an eye specialist. He asked to stay all night, and was permitted to do so after putting up his horse for the night. He remained the next day, during which he succeeded in gaining the confidence of his hostess and family. He urged the mother to allow her daughter to go to live with a doctor in Toronto, whom Johnson said he knew wished such a girl. He therefore went to Barrie on the Saturday following and returned, saying that he had telephoned to the city doctor, who agreed to give Elva $12 per month. He asked that the girl be got ready, promising to take her to Toronto, whereupon he would return to complete his business engagements. The mother had not the money to pay the girl's fare, so the professor gallantly offered to advance the money. On Sunday the professor and Elva started off in the buggy, to which was tied a bicycle, he having promised the mother that he would take as much care of the young and innocent girl as if he were her own father. They were to go via Hillsdale (which Mrs. Harrington erroneously thought was on the railway), where he had a business engagement. There he was to see that the girl got proper lodgings over night, and from there go to Toronto by train in the morning. Elva swore that he took her to Hillsdale, but on the way had shown his brutal and ungentlemanly conduct to her. He kept her in Hillsdale until Tuesday morning, then drove her across country to Elmvale, where he paid her fare to Barrie, while he remained behind. She told a harrowing tale of his treatment of her. He had along with him a revolver. At Barrie she went to a friend's, to whom she told her troubles. Her mother was communicated with, and the matter was put in Detective Beardsley's hands, who, through Detective Davis, obtained his arrest in Toronto. Johnson is a man probably 25 or 30 years of age. He offered no defence.

Father and Child Drowned.

Point Edward, Ont., Sept. 8.—A sad accident occurred here about 5.45 p.m. yesterday. Mr. William Fraser and his little child, about 3 years of age, were found floating in the river just below the Grand Trunk freight shed, and picked up by the crew of the schooner Wawanosh, which was lying at the dock. He was in the freight shed only a few minutes before being found, and could not have been in the water long. All possible efforts were made to bring them around, but without success.

TWENTY WERE KILLED

British Blue Jackets Bite the Dust in the Candia Riots.

FIFTY MORE WERE WOUNDED.

Sir A. Biliotti, the British Consul at Canea, Explains the Cause of the Trouble—The British Vice-Consul, Mr. Calocherino, Was Burned to Death in His House.

Canea, Sept. 8.—The Turks set fire to the whole town of Candia. The only warship there at the time of the outbreak was the British gunboat Hazard, which landed a party of marines to assist the 180 British troops there.

The Restoration of Peace.

Candia, Island of Crete, Sept. 8.—The British battleship Camperdown, having on board Sir A. Biliotti, the British Consul at Canea, has arrived here. Several other warships have also reached this port, reinforcements of blue jackets have been landed, and an early restoration of quiet is expected. The fires have been extinguished, but during the rioting the British and German Consulates were burned. The custom house, barracks and court house were saved. Quiet is being rapidly restored.

Cause of the Trouble.

London, Sept. 8.—Sir A. Biliotti, the British Consul at Canea, who went to Candia on board the British battleship Camperdown, cables to the Foreign Office, saying that the rioting at Candia was caused in the following manner: A British soldier on guard at the tax office was suddenly stabbed in the back and he dropped his rifle, which exploded, killing a Mussulman. The firing then became general, and a party of twenty British blue jackets from the British torpedo gunboat Hazard were almost annihilated before the sailors could reach their ship. In addition, a detachment of 45 British soldiers were driven from their quarters near the telegraph station, and many of them were wounded.

The total casualties, so far as known, are twenty killed and fifty wounded. The fate of the Christians in other towns is uncertain, but it is feared that only those who succeeded in obtaining refuge in the court houses have been saved.

The British Vice-Consul, Mr. Calocherino, was burned to death in his house.

THE PHILIPPINES.

Native Leaders Favorable to Annexation to the United States.

London, Sept. 8.—The Vienna correspondent of the Times says: "According to the Politische Correspondenz, it is believed in Paris diplomatic circles that the United States has decided to annex the entire Philippine archipelago, and it is suggested there that Spain is now resigned to a surrender of the islands for a consideration. Perhaps this must be regarded as a feeler, but it takes the wrong view in supposing that there could be any bargain between the United States and Spain. Much will depend on the testimony of General Merritt and the other officers, who are going to Paris. It is believed here that Admiral Dewey also will be called to Paris, and that the council of these officers will exercise a strong influence in favor of annexation."

In Favor of Annexation.

Manila, Sept. 8.—At a meeting of twenty leaders of the Philippines of all sections, called to discuss the policy of these islands, eighteen of them were emphatically in favor of outright annexation to the United States, and two were in favor of a republic. The general native opinion is that it is best to adopt United States Consul Wildman's suggestion.

THE OCEANIC DISABLED.

She Broke Down 350 Miles From Halifax and Was Towed In.

Halifax, N.S., Sept. 8.—The steamer Oceanic was towed into port yesterday morning at 10.30 o'clock by the British Queen. The Oceanic broke down 350 miles from Halifax. The accident happened Saturday *morning* and the British Queen took her in tow the following morning. The seas were running high at the time, and it was difficult to effect a connection. The British Queen was from Liverpool bound for New York. The bottom is out of the Oceanic's high pressure cylinder and the piston rod was broken, also the crosshead of the connection rod.

Rate War to End on the 25th.

Montreal, Sept. 8.—Vice-President T. G. Shaughnessy of the C.P.R. has issued a circular to the "Executive Officers of Competing and Connecting Lines," in which he reviews the decision of the Interstate Commission, and in accepting its terms, concludes with this paragraph:

"However, in this case, as in all previous cases involving United States traffic, the company accepts without question and will be governed by the decision of the commission, taking care, of course, that its rates will be on the basis of those which prevail by any other route, and tariffs covering traffic affected by the decision, to take effect on the 25th inst., restoring ante-bellum rates. As far as practicable existing conditions will be fixed by this company in accordance with the interstate commerce law."

Wheat Heavy and Futures Off—The British Cables—Notes on the Situation—The Latest Prices.

Wednesday Evening, Sept. 7.

The world's wheat markets were depressed to-day. The cereal opened weak on the Liverpool board and at the close the September delivery had declined ½d and the December option 1½d per cental below the previous final figures.

Advices to the above effect did not serve to better the tone of the Chicago market. The December option dropped ⅝c and the May option ⅝c per bushel. The close was near the low point for the day, although New York reported good export demand and Northwest points an advance of nearly a cent in prices on this month's delivery.

Toronto St. Lawrence Market.

This being Farmers' Day at the Exhibition business was slack here to-day. Only four loads of hay were in, one of old selling at $9 and three of new at $8 to $8.50. No straw was in the market. The only noticeable change in grain prices was an advance of 1c per bushel in peas. All told there were about 600 bushels of grain.

Chicago Live Stock.

Chicago, Sept. 7.—Hogs—Estimated receipts to-day 29,000; left over 2894; rather slow, 5c to 10c lower; light, $3.55 to $3.90; mixed, $3.50 to $3.90; heavy, $3.45 to $3.92½; roughs, $3.45 to $3.60.

Cattle—Receipts, 18,000, including 6000 westerns; good cattle steady, others weak and 5c to 10c lower; beeves, $4 to $5.65; cows and heifers, $1.75 to $4.65; Texas steers, $3 to $3.90; westerns, $3.50 to $4.45; stockers and feeders, $3 to $4.50.

Sheep—Receipts, 15,000; steady.

East Buffalo Cattle Market.

East Buffalo, Sept. 7.—There were only a couple of small bunches of sale cattle, but the enquiry was moderate and the market was nominally unchanged. Calves were in fair supply, mostly heavy; moderate demand, and sold about the same as yesterday. Choice to extra were quotable at $7 to $7.25; good to choice, $6.50 to $7; heavy, fed, $3.25 to $4.25.

Sheep and Lambs—The market was in improved condition for the top grades, and stronger and a shade higher, considering that the quality of the top grades was better. The bulk of pretty good lamb prices was $5.75, but there were bunch sales at $6. The demand for the extra sheep and lambs was quite active. Lambs, choice to extra, were quotable at $5.75 to $6; good to choice, $5.50 to $5.75; common to fair, $4.75 to $5.50; sheep, choice to extra, $4.50 to $4.75; good to choice, $4.25 to $4.50; common to fair, $3 to $3.50; Canada lambs were in fair supply, three loads, good demand, and sold a quarter higher. They were quotable at $5 to $5.75.

Cheese Markets.

TWIN TORTURERS!

Lumbago and Rheumatism made Harmless by Dodd's Kidney Pills.

Lumbago and Rheumatism cause endless pain and suffering. Every man and woman who runs chances of getting wet, or catching cold, is liable to suffer from one or both. Our hospitals are full of sufferers from these diseases; none are more painful. Every nerve is on fire; every joint is a centre of agony; every muscle an area of torture. To move hand or foot makes the victim shriek with agony.

Rheumatism makes more cripples than all the railroad accidents that ever happened. Twisted, mis-shapen caricatures of humanity, who cannot walk without misery, are to be seen every day. The kidneys are to blame. If they are healthy you needn't fear Rheumatism or Lumbago. Dodd's Kidney Pills keep the kidneys healthy and cure Rheumatism and Lumbago.

Overrun by Thieves.

Constable Hill, of Norwood, states that Asphodel is overrun by gypsies and thieves. Andrew McKee, of that township, had two suits of clothes, two overcoats and a felt hat stolen from his residence Saturday night. The same night Jas. Metcalf had a single set of harness stolen. It is only a few days since an Asphodel farmer had a horse, buggy and harness stolen. None of the stolen articles have been recovered.

A SEPTEMBER BRIDAL.

The Marriage of Miss Helen Bond and Mr. Nathan Taylor.

At the residence of Mr. G. W. Powell, Douro, near town, last night at eight o'clock. Rev. C. E. McLeod, of Gilmour Memorial Baptist church performed the ceremony that united in marriage Mr. Nathan Taylor, of Bridgenorth, and Miss Helen Bond, of Cobourg, sister of Mrs. Powell. The bride, who was attired in a travelling costume, was assisted by Miss Clara Powell, of Cobourg, and to Mr. R. Heard, of Bridgenorth, fell the duties of best man. A large number of beautiful presents was a feature of the interesting occasion, and after the usual wedding breakfast the newly-wed repaired to their future home in Bridgenorth, followed by the cordial congratulations of their numerous friends.

HARVEST FESTIVAL.

To be Held in St. John's Church on Thursday Next.

The special preacher this year will be Rev. F. C. C. Heathcote, rector of St. Clements church, Toronto.

DETECTED IN HASTINGS.

Contraband Cigars Were Smuggled in From Porto Rico.

Edward Floody, preventive officer, who has at times visited Peterborough in the discharge of his duty, detected some contraband cigars being sold in Hastings, and following up the clue thus obtained was able to ascertain that a big shipment of tobacco and cigars had been made from Porto Rico and smuggled into Canada at a point near Halifax. A thorough search is being made of almost every tobacco store in Ontario and the eastern provinces.

A CHANGE IN THE ROUTE.

A Shift in the Proposed Line of the C. N. & P. Railway.

(Campbellford Herald.)

The surveyors and their assistants who were sent over the C.N. & P. railway line last week, made a change in the course of the road from the former survey, having driven their stakes farther west where it enters the corporation in the western part of the village. If this is the final survey the railway track will cross the travelled road leading from Sebastopool street, at the residences of Messrs. H. and S. J. Abernethy, and pass only a few feet from their door. Then it makes a curve to the south and crosses Garry street in front of the residence of Mr. J. O'Connor, only about one hundred yards from the other crossing. There have been no new developments during the week, and there seems to be very little to do to set the ball rolling in the way of grading.

The Cobourg Post says it learns that the surveying party which left that town, has about completed the survey to the C.P.R. Now we would like to see something more than driving and pulling of stakes on the road. If it is the intention of the contractors to go on and complete the work within the period specified, it is about time that active work on the construction was taken up. The weather will soon become uncertain, and progress will be out of the question. Active work is wanted now, and less surveying.

REPLY TO MR. J. H. BURNHAM.

To the Editor of the Examiner:

DEAR SIR,—On my return from Toronto last night, where I had gone to see the working of two steam rollers which are offered for sale to the town, I noticed a letter in your paper from Mr. Burnham, referring to my refusal to him to present the certificates in behalf of the Humane Society on Tuesday night, for the reason, as he says, that there was too much business to put through that night.

As I do not wish our citizens to misunderstand the matter, I would be glad if you would kindly give the following explanation.

I agreed to present these medals at the first meeting in September, and was to let Mr. Burnham know the date. Last week I saw that it would be necessary to have two council meetings this week, if it were possible to get a quorum, of which I had great doubt as to the Tuesday night council. The first council meeting was to deal with ordinary routine business and in addition the sewer specifications; the second to deal with the purchase of a road roller, and other matters. It was my intention to present the certificates at the latter meeting, not supposing that three days would make any difference.

Mr. Burnham met me about five o'clock Tuesday afternoon, and asked when the council meeting would be. I replied, "To-night." Then he said, "You will present those certificates!" I said "Not to-night, we have too much business to get through." He then spoke in such an insulting manner in reference to the delay that I did not feel called upon to give any further explanation, but simply informed him that I would not be dictated to by him, as to my official proceedings.

I have no apology to make but simply say that under similar circumstances I would feel justified in doing precisely the same thing.

Then as to his statement that Mr. McWilliams sharply remonstrated with me, I am sure this statement will be a surprise to Mr. McWilliams. My intercourse with Mr. McWilliams, with reference to town affairs, has always been of such a pleasant character, that I am afraid that Mr. Burnham's spirit must have coloured his imagination when representing that of Mr. McWilliams, for on the contrary Mr. McWilliams treated me in his usual courteous manner. He stated that Mr. Burnham took a great interest in the society, and that as he (Mr. McWilliams) had seen Mr. Wallace and told him to be down at the first meeting of the council, he would in all probability be there, and he thought I might as well make the presentation. I immediately agreed to do so, and set about preparing a short address for the occasion.

These are the simple facts, and I am sure that the gentlemen whose manliness of character is such as to merit a recognition from the Humane Society, will see that no slight was intended or any given, as far as they were concerned.

Yours truly,
A. L. DAVIS.

INDEPENDENT ORDER OF GOOD TEMPLARS.

THE DISTRICT LODGE MEETS AT UNION LODGE, SMITH.

Large Numbers of Delegates in Attendance—District Degree Conferred on Twenty Four Candidates—Reports of Officers—Total Membership.

The meeting of District Lodge No. 10, I. O. G. T., held at Union Lodge, 4th line, Smith, Monday, proved a decided success. A large representation was present from the lodges, and the best of order was preserved throughout. Bro. R. C. Heard, D. C. T., occupied the chair, and opened the session in due form at 3 p.m.

After the opening ceremonies the Credential Committee reported the following delegates:

Oak Leaf Lodge—Bros. R. Nurse, S. Mann, G. Mann, and Sisters L. Mann, L. Udy, E. J. Grant, Mrs. G. Brummel.

Union Lodge — Sisters E. Darling, C. Stinson and M. Frankish.

Mount Pleasant Lodge—Bros. A. Rutherford, F. Brownlee and G. A. Jamieson.

City Lodge—Sisters M. Bunton, E. Morris and Bros. A. Warne and S. G. Cowan.

Auburn Lodge—Sisters A. Carter, E. Pratley and E. Powell.

Selwyn Lodge—Sister Annie Bell and Bros. P. G. Might and I. Manning.

Norwood Lodge — Sisters Mrs. Greenbank and L. Cope.

Zion Lodge and Westwood Lodge were not represented.

The district degree was then conferred upon twenty-four candidates.

After the appointment of committees the officers were then called upon for reports. The secretary reported that two lodges had been organized since last district meeting and the total membership in this district was about two hundred and eighty, showing a decided increase.

The reports of the different committees were then read and adopted.

The election of County Deputy was then proceeded with, and Bro. G. W. Powell was unanimously elected.

The meeting then adjourned until 7.30 for tea. Tables were spread under the surrounding trees, and the delegates enjoyed a sumptuous repast.

EVENING SESSION.

At 7.30 the business was resumed, and after the report of the Plebiscite Committee, the next place of meeting was then discussed. Mount Pleasant and Norwood were the two places entered for competition, but by a large majority Norwood was victorious. The meeting will be held in Norwood on the first Monday in December at 2.30 p.m.

RESOLUTIONS.

The following resolution was then passed:

That this district lodge views with apprehension and regret the failure of our local authorities to carry out the License Laws as we think they should be carried out. One instance of special violation and neglect of duty by the License Commissioners and Inspector for the West Riding of the County of Peterborough was in connection with the late wheelmen's meet, when there appears to have been no attempt to enforce the law, but rather an understanding that the law should be violated. And after two lodges in the district sent in a joint letter calling the attention of the inspector to the matter, he has not seen fit to acknowledge the receipt of same and thereby treated the whole body of temperance people with contempt. We, therefore, call upon the Provincial authorities through our proper officials to investigate.

Moved by Bro. P. G. Might, seconded by Sister M. Bunton, that the delegates present express their appreciation to the members of Union Lodge for their kindness and hospitality towards the delegates.

THE PROGRAMME.

The lodge was then thrown open to visitors and the following programme was rendered:

Instrumental	Sister R McGregor
Recitation	Sister G Dobson
Song	Bro F Gardiner
Speech	Bro P G Might
Instrumental	Bro W Paul
Recitation	Bro H Tebb
Speech	Sister L Cope
Song	Bro F Brownlee
Recitation	Sister M Darling
Instrumental	Bros E Telford, W Telford and G Jopeling
Speech	Bro Jas Stubbs

The meeting was then brought to a close by singing "God be with you till we meet again."

SEPARATE SCHOOL BOARD.

Miss Doran has Been Chosen for the Vacancy in the Convent School.

The regular meeting of the Separate School Board was held last evening, there being present Chairman Quinlan and Messrs. McGrath, Doris, Dr. Moher, Kylie, Hickey, Goselin and Sheehy. Ven. Archdeacon Casey, local superintendent, was also in attendance.

The minutes of the previous meetings were read and confirmed.

ACCOUNTS

were presented from The Register Co., $1; The Record Co., $1; M. McFadden, $90; A. H. Stratton & Co., $9 57.

The account of A. H. Stratton & Co. was referred to the Finance Committee, the other accounts were ordered to be paid when certified.

Payment of $1.25 made to J. T. O'Connell for repairs was confirmed.

Communications from several teachers to fill the vacancy in the Convent School were received.

The board went into committee of the whole for the purpose of considering the applications, with Mr. McGrath in the chair.

The committee reported the engagement of Miss Doran for the balance of the present term at the rate of $225 per annum.

On motion of Messrs. McGrath and Goselin, the report was adopted.

On motion of Messrs. Hickey and Kylie, the Property Committee were instructed to have a porch placed at the lobby of the school, and also to do certain repairs at the Murray street school.

The Board then adjourned.

Coming From Havana.

The late war in Cuba has interfered seriously with the importations of Havana cigars, so much so that an order which was sent by Messrs. Chas. LeGros & Co., of this city, the day before the war broke out, is only being filled now. The following letter just received by Mr. LeGros from a leading manufacturer in Havana tells its own tale:

Messrs. LeGros & Co., Peterborough:

DEAR SIRS:—Your favour of the 12 h instant reached us two days ago and we shall do our best to have sent off as soon as possible the cigars of your last order. We regret very much that on account of the war we have not been able to execute your order quicker, but hope that within a week or two we shall inform you of shipment.

Yours truly,
W. & Co.

CHRONICLES OF ALL SEASONABLE SPORTS.

THE LATEST NEWS FROM THE SPORTING ARENA.

The Orillias Play Lacrosse Here To-morrow on the P.A.A.A. Grounds—Re-organization of the Rugby Football Club To-morrow Night at the Oriental.

LACROSSE.

To-morrow's lacrosse game against Orillia promises to be the fastest game of the season, and as the Peterboroughs have their blood up the contest will be an exciting one. If the local team can win out they will be the senior champions of Eastern Ontario, and will go into the finals against the champions of the west.

To-morrow's team will be placed as follows: Goal, Dobbin; point, McDonough; cover-point, Brown; 1st defence, Lynch; 2nd defence, Glover; 3rd defence, Hogarth; centre, Lipsett; 1st home, King; 2nd home, Jack McCabe; 3rd home, Phelan; outside home, Jim McCabe; inside home, Mooney; field captain, Dolan.

As will be observed the team has been changed around somewhat. Fred Lynch has been moved out from point in order that he may break up the combination work of Armstrong and Wilkinson before the ball is brought in too close to the flags. Lynch is probably the fastest runner on the team and his reach and weight should tell better at a position further out than point. Jimmy McCabe goes from the defense field down to outside home. The Orillias are in the habit of playing rough around this position and as they have a wholesome dread of Jimmy, his presence there will tend to keep the visitors in order. Lipsett goes out to centre and King plays inside him, whilst Hogarth is transferred to his old position on the defense side of centre.

RUGBY FOOTBALL.

The Rugby football season is opening and the local club meets to-morrow evening in the Oriental Hotel parlours for re-organization. It has not been decided yet whether a team will be entered in the Ontario Rugby Football Union or not, and this will be one of the questions discussed at the meeting. All interested in the formation of a strong team to represent the town should be present. Some of the heavier men on the lacrosse team would be a decided acquisition to the football team, as the lacrosse boys are in good shape. An endeavour should be made to have some of their representacives in attendance.

AQUATICS.

The conditions agreed upon for the international yacht race for the America Cup are as follows:

The match to be decided by the best three out of five races, starting from Sandy Hook Lightship.

First race to windward or leeward and return.

Second race, equilateral triangle.

Third race, similar to first race.

Fourth race, similar to second race.

Fifth race, similar to first race.

The course shall be as nearly as possible 30 nautical miles in length.

The challenger shall be informed at least one week before the first race what vessel is to defend the cup.

The system of measurement, time allowance and racing rules of the New York Yacht Club to govern the races, except as hereinafter modified.

The first race shall be sailed on Tuesday, Oct. 3, 1899, unless the Shamrock should be detained by stress of weather, or other cause, in which case three weeks shall be given her for fitting out after her arrival, but the first race shall not be started later than October 10th, 1899, and the races shall be sailed on Tuesdays and Saturdays until completed.

The competing yachts shall be measured with all of the weights, dead and alive, on board, which they intend to carry during a race, but shall not have on board more persons, all told, during any race, than three for every five feet of racing length or fraction thereof. Waste or water tanks, if carried, must be filled with water at the time of measurement.

The restriction of the New York Yacht Club as to floors, bulkheads, doors, water tanks, to be waived.

If either yacht, by alteration or trim, or immersion by dead weight, increase her load waterline length, or in any way increase her spar measurement, as officially taken, she must obtain a remeasurement by special appointment before the next race.

If either yacht decrease her measurements for sailing length in any way in order to profit thereby in time allowance, in any race, she must obtain a remeasurement by special appointment before such race.

Distinct marks shall be placed at the load waterline, at the bow and as far as possible on each vessel.

The following statement was made on behalf of the New York Yacht Club:

"The committee of the New York Yacht Club, in announcing the conclusion of the negotiations, wishes particularly to draw public attention to the act of Congress passed in 1896, under which the United States Government has power to formulate and enforce regulations for the purpose of ensuring a clear course and the safety both of the spectators and the contestants, and the committee confidently appeals to those who may attend the race to assist the authorities by strictly carrying out such regulations. The growing popularity of the race and the consequent increase in the number of the spectators render it absolutely essential in their interests and in the interest of both contestants that all regulations the authorities may publish shall be strictly adhered to."

BREWERY PICNIC.

A Day's Fun at Jubilee—About 200 Took in the Excursion.

The annual picnic held in connection with the brewery took place yesterday, when the employees and their friends exerted to Jubilee Point and was, if possible, even a greater success than those held in previous years, about 200 boarding the steamer City of Peterborough.

The first event of the day on arrival at the Point was the return match of baseball between the West Enders of Peterborough and the Millbrook nine. It was won by the Peterborough team by a score of 13 runs to 3. The teams were composed as follows:

Millbrook.		*Peterborough.*
B White	pitcher	Parnell
L Russell	catcher	J Deroche
Wilkin	1 base	B Delaire
E Clary	2 base	J Dennard
W Grandy	3 base	W Watt
J Irwin	left field	M Larose
C Leach	centre field	D Gauthier
E Burnham	right field	Ans Henry

The features of the game were home runs made by Ans. Henry and Booster Larone. Booster boosted the ball over the trees so far, that he started to make a second circuit of the bases. Parnell pitched a fine game for the West Enders. The silver cup, valued at $10.00, was awarded the West Enders.

The sports resulted as appended:

100 yards dash, open—D Gauthier.

Ladies' race — Tillie Cassels, Emma Payne.

Girls' race, 15 years and under—Josephine Gordon, E Hawley.

Girls' race, 12 years and under—Hazel Hickey, Florence Butcher.

Girls' race, 8 years and under—L Chambers, Olive Sharp.

Boys' race, 15 years and under—Lou Denny, Jimmy Kelly.

Boys' race, 12 years and under—Lou Denny, Sam Long.

The waltzing competition brought out six couples, the prize being awarded to Miss Cronin and Mr. Sam Long.

Billy Payne carried off first prize in the fishing competition, landing four fine bass inside of an hour. One of the fish tipped the beam at five pounds.

The "Rainbow" ran up from Hastings with Mr. Clem Gordon and about thirty others employed on the Trent Valley canal at that point.

On the return trip a fine cake walk exhibition was given by Messrs. Harry Neil with W. Gibbs, and D. Hummel with W. Creamer.

Butcher's orchestra was present, and dancing was indulged in at the pavilion during the afternoon as well as on the scow going down and returning.

CAN'T EAT.

FOOD is the fuel that feeds the fires of life. Digestion is the process that turns the fuel into energy. Few possess perfect digestion. If your digestion is imperfect, if you cannot eat what you like without discomfort, if you cannot eat when you ought to eat, the time has come when you should take Dr. Ward's Blood and Nerve Pills. Hunger is the best Sauce. Take these Pills and get hungry. You may eat what you want if you take Dr. Ward's Pills.

WHAT THEIR MERITS ARE:

My system was entirely rejuvenated by the use of Dr. Ward's Blood and Nerve Pills, and I consider them a marvellous strength and nerve builder for dyspepsia. I was so sick and miserable that I seemed to have no life or energy left in me. I suffered so at times that I thought death would be better for me. I had tried Doctors and different kinds of medicines, but all failed to do me any good. I am in every way now a well woman, and have been for months. Before using these Pills I was so sick that I could not keep anything in my stomach. I was under the opinion that dyspepsia could not be cured, but now I am satisfied it can be cured, for I am able to eat like any healthy woman and feel better in every way. They have built me up also,—I now weigh several pounds more than I ever did before. In conclusion, I would advise every woman afflicted with poor digestion to give Dr. Ward's Pills a trial.

MRS. L. E. WATSON, Port Colborne, Ont.

Dr. Ward's Blood and Nerve Pills are sold at 50 cents per box, 5 boxes for $2.00, at druggists, or mailed on receipt of price by The Dr. Ward Co., 71 Victoria St., Toronto. Book of information free.

CHEESE AND BUTTER.

Special Meeting of the Western Association of Ontario.

Toronto, Sept. 7.—A special meeting was held in the president's office at the Fair grounds yesterday of the directors of the Cheese and Butter Association of Western Ontario. President Harold Eagle occupied the chair.

It was decided that the annual meeting should be held at Guelph on Tuesday, Wednesday and Thursday, Jan. 17, 18 and 19, 1899. It was also decided to invite the following gentlemen to deliver addresses on the subjects appended to their names:

1 Commercial Foods—W. H. Jordan, Geneva, N.Y.

2. The Present Status of Feeding Standards—George L. McKay, Iowa; Prof. Dean, Guelph.

1. How to improve the sanitary condition of cheese factories and creameries.

2. Sub-earth duct for curing rooms—method of construction, cost and advantage in curing cheese.

Some further notes on the curing of cheese—J. A. Ruddick, Kingston.

The economic value of good roads—A. W. Campbell, Toronto.

1. Tuberculosis and its import—Dr. W. T. Connell, Kingston.

2. Further studies and observations of cheese "discussed" through bacterial infections.

Bacteria—T. C. Harrison, Guelph.

Butter Making—Arch. Smith, Beachville.

Feeding of Swine in Connection with the Dairy—Prof. Robertson, Ottawa; Arch. Lewis, U.S.

President Withrow of the Toronto Industrial Exhibition Association addressed the meeting and promised that every consideration should be shown the dairy industries at the Fair.

The Eastern Association determined to meet in Kingston next year and the date is January 10, 11 and 12. The officers are: President, Mr. D. Derbyshire. Executive, Messrs. Daniels, Eager, Campbell, Daly, Kidd, McTavish, Dargavell and Murphy (secretary).

The Big Methodist Conference.

Toronto, Sept. 7.—By contrast with the day before the proceedings at the Methodist Conference were tame yesterday, but the work the delegates did will tell in the future of the church. The committees met in the forenoon, and several reports were presented at the afternoon session. The Presbyterian General Assembly delegation will be received at 2.30 p.m. on Thursday.

The international arbitration resolution, in which pleasure is expressed at the growing cordiality between the British and American peoples, was passed, after Rev. Prof. Wallace and Rev. Dr. Henderson had moved and seconded it in short but eloquent speeches.

C. & N. Y. RAILWAY DISASTER.

Victims of the Bridge Wreck at Cornwall Unmoved—Cause of Accident Unknown.

Cornwall, Sept. 8.—The bodies of all the unfortunate men who lost their lives in the C. & N.Y. Bridge catastrophe are still either pinned down by the mass of iron or have been carried far down the river by the current. No appliances capable of moving the wreck are at hand and consequently no serious effort was made today to get the remains of the men who perished under it. One man who was experimenting brought up a piece of clothing, but the body from which it was torn could not be moved.

S. Dean, chief engineer of the Phoenix Bridge Company, and A. F. Milliken, foreman of construction, have arrived in town, but what action they contemplate taking cannot be learned. They are at present in the Hotel Dieu 12 patients, all of whom are progressing towards recovery and it is expected that they will all get well. The remaining five who were only slightly injured, have been discharged from the hospital. There is some doubt as to whether Robert Martin of Montreal was killed or not; if he was on the bridge he either escaped unharmed or was killed, for he was not among the list of injured. The paymaster says that he had not seen Martin on the work for four or five hours previous to the accident, but he thinks that instead of being on the bridge Martin had left town.

The cause of the accident can only be ascertained by a very careful investigation, which will probably be held at an early date in New York state, the accident occurring on the American side of the river, opinions differ as to whether the weakness was in the pier or the span. The piers were of concrete to within a few feet of the surface, and while many excellent authorities claim that the concrete is firmer and stronger than stone, others think that in such a swift, deep, powerful stream as the old St. Lawrence is at this point nothing but a solid stone pier should be trusted with the weight of the bridge. The officials are all very reticent. They refuse to discuss the situation, and say that at present they can make no statement of what is likely to be done.

THE METHODIST CONFERENCE.

The Quadrennial Meeting of the Church Passes Upon Many Questions.

Toronto, Sept. 8.—As usual the morning of yesterday was occupied by the big Methodist Conference in committee work. The conference had a sitting in the afternoon. A protest was entered against manuscript sermon reading preachers, and communications for audience from the Dominion Alliance and the Dominion Woman's Christian Temperance Union were referred to the Business Committee. Dr. Griffin presented the quadrennial statement of receipts and expenditures of the General Conference Fund. The receipts aggregated $30,655.88, and the expenditures left a balance of cash in hand of $35.48. Other funds were dealt with in detail. Mrs. Strachan read the report of the Woman's Missionary Society for the term of 1893-97. The amount raised during the four years was $158,068.47. An interesting portion of the report stated that they had provided a Rescue Home in Victoria, B.C., and had provided therein for about 40 girls. Other homes in the same province had been opened. The Committee on Temperance and Prohibition asked for enlarged powers in view of the extra work in providing for the programme of the mass meeting on next Monday evening. Mr. W. N. Rowell's motion to change the name of the Judicial Committee and to define its duties was passed. The Memorials Committee suggested in its initial report that the aid of other churches be sought to have the absurd order of precedence for the clergy in state functions abolished as in opposition to the constitutional relations of church and state in the Dominion. It also recommended that pews be built to conform to the kneeling habit in public worship, and it refused to prohibit members from becoming Masons. No action was taken on the proposition to admit women on the same conditions as men, and the tithe system was not enacted into law, notwithstanding eloquent speeches in its favor.

Austin Bowen's Record Bad.

Ottawa, Ont., Sept. 8.—Austin A. Bowen, a native of Hintonburg, has been arrested on suspicion of being the man who was organizing the holdups in this district. Bowen was charged with raising $3 to $5, was arrested, got bail and skipped from here to Owen Sound, along with others. He knocked down an old farmer and robbed him near Owen Sound. Bowen got two years for this in Kingston. The charge on which Bowen is arrested is for stealing a bicycle.

Wild Flower's St. Leger.

London, Sept. 8.—At Doncaster yesterday the St. Leger Stakes for three-year-olds was won by Captain Greer's chestnut colt Wild Flower, by Gallinoulo, out of Tragedy. Juddah was second.

Hammond Must Hang.

Ottawa, Ont., Sept. 8.—Lord Aberdeen has approved of an order-in-council allowing the law to take its course in the case of W. J. Hammond, now in Barrie jail.

The doctor may be a good old man, but even so, medical examinations and the "local application" treatment are abhorrent to every modest woman. They are embarassing—often useless. They should not be submitted to until everything else has been tried. In nine cases out of ten there is no reason for them. In nine cases out of ten, the doctor in general practice isn't competent to treat female diseases. They make a branch of medicine by themselves. They are distinct from other ailments. They can be properly understood and treated only by one who has had years of actual practice and experience in this particular line. This is true of Dr. R. V. Pierce, chief consulting physician of the Invalids' Hotel and Surgical Institute, at Buffalo, N.Y. Dr Pierce's Favorite Prescription, a remedy for all derangements of the reproductive organs of women, has been in actual use for more than thirty years. It cures every form of "female weakness."

THE HORSE SHOW.

The gelding Genta, record 2:21¼, by Quartermaster, has shown a pacing mile in 2:13½.

Thorn, 2:18, winner of last year's Futurity, was distanced in her first race in 1898 in 2:12¾.

The wrenched ankle of Lottie Lorraine, 2:05¾, is said to be so bad that she will probably be bred.

Nowaday, 2:16 at 8 years of age, is credited with showing eighths in 14½ seconds in her work.

A new half mile track is being built at Ephrata, Va., by Mr. Seth Griffin for Mr. T. A. Willson, Reading, Pa.

The suit that Barney Demarest drives in this year is said to be the loudest thing ever seen on the turf in the line.

Marion Mills, guideless pacer, paced the Detroit track in 2:06½. This is the fastest mile of the season at this rig.

Howard de Wees, blacksmith of the Belmont track, Philadelphia, is under contract to go to Austria for a year by Dec. 1.

B. F. Dutton of Boston is driving Susie F, 2:20¼, and Edith H, 2:10¼, together at Mystic park. They went a mile in 2:30, last half in 1:12.

The great brood mare Esther, by Express, has a yearling filly, Monesta, by Monaco, that showed an eighth in 20½ seconds at Palo Alto recently.

Guy Wilkes is said to have gained 420 pounds since his purchase by the Two Minute Stock farm. When sold, he was in very poor flesh, weighing only 730 pounds. He now weighs 1,150.

One of the most remarkable races on record was the 2:30 class pacing at Rockport, O., July 22. Ten heats were paced before a decision was reached, and no less than five horses entered the ranks of standard speed.

A correspondent from France writes that a match race between MM. K. Andrews and Drake has been arranged for American horses, to trot 60 miles in three hours, in England. The wager is said to be 10,000 francs against 5,000 francs.—Turf, Field and Farm.

Its Inspiration.

Among the many traditions concerning William Lee and the stocking frame is one that he was expelled from the university for marrying, and that, being very poor, his wife was obliged to contribute toward the housekeeping by knitting. It was while watching the motion of her fingers that he conceived how to imitate those movements by a machine.

The Robber Maids.

Kingston, Ont., Sept. 8.—The maids who robbed "Bishopleigh" during the absence of Archbishop Lewis and wife, were apprehended in Watertown, N. Y., yesterday, and a great quantity of the stolen property recovered. Prosecution will not follow. The maids took about all the light goods they could carry, and in sufficient quantity to start housekeeping.

Roberval Woolen Mills Burned.

Roberval Hotel, Que., Sept. 7.—A fire broke out in a house occupied by Mr. Wells, caused by the igniting by a candle of drapery in a room where a little six-months-old child lay dead. The house was burned and the flames spread to the Roberval Woollen Mills, which adjoins Mr. Wells', and the latter were totally destroyed. The loss is about $7,000, on which there is an insurance of $3,500. No one was injured. The woollen mill employed about 15 hands.

When Beauty Fades.

In response to repeated inquiries from ladies with whom Dr. Chase's Ointment has become so popular for skin disease, asking if face powders are injurious and can be used while using the ointment, we state that while the majority of face powders are injurious we can recommend recipes given in Dr. Chase's supplementry recipe book on page 45, which will be sent to any address on receipt of 5c. in stamps. Dr. Chase's Ointment is the ladies friend for all skin diseases. Address Dr. A. W. Chase Co., Toronto.

A Clear Skin.

No one can have a skin clear and free from blemish whose blood is impure. Burdock Blood Bitters purifies the blood and removes pimples and all kinds of eruptions, leaving the skin clear and smooth.

OFFICE OF W. A. MURRAY & Co., 17 to 27 King St., East, Toronto.

Wm. McCabe, Esq., Managing Director, N.L.A. L.:

DEAR SIR,—In answer to your request for me to decide upon one of the following options offered me for settlement of my 15-payment Life Investment Policy for $5,000 which has matured this year, viz:

1st to take the value of the Policy in Cash $5,000.00
2nd, or fully paid-up insurance for 3,280.00
3rd, or take the profits in cash 2,050 25
and continue my policy without further payments being required from me, such policy participating in future profits.

I find it somewhat difficult to make a decision either of the three options being so satisfactory. I am certainly very much pleased with the results offered me, and as I find many others are giving full testimony to the profit-earning power of this company, I do not hesitate to give my endorsement as well, that the North American Life is one of our strongest Canadian institutions to day giving first class results on Investment Policies, on a safe and conservative basis. I find that my policy, which was originally a Life by fifteen payments, has become an Endowment at the end of the Investment period.

Senator Gray Fifth Man.

Washington, Sept. 10.—It is officially announced that Senator Gray of Delaware will be the fifth member of the commission. Senator is a democratic representative

Out on the water in the moonlight. A more beautiful or romantic situation for a young man to tell the story of his love and ask the young woman of his choice to share his life cannot be imagined.

The courtship of a young couple may be ever so romantic and their married life be very unhappy. There are common sense considerations outside of love that have a world to do with the making of married happiness. One of the most important of these considerations is the good health of both parties to the sacred tie. The young man who is in the incipient stages of consumption commits a crime if he marries before he is restored to health. He condemns his wife to the life of a nurse and his children to early death, or lives of sickness and suffering. Dr. Pierce's Golden Medical Discovery cures 98 per cent. of all cases of consumption if taken in its earlier stages. This is its record established during the past thirty years. It is the great blood-maker, flesh-builder, nerve-tonic and general restorative.

The young woman who suffers from weakness and disease of the delicate and important organs that make wifehood and motherhood possible has no right to answer "Yes" to a young man's proposal until she is thoroughly restored to health in a womanly way. Dr. Pierce's Favorite Prescription prepares a woman for wifehood and motherhood. It makes her strong, healthy and vigorous where a woman most needs health, strength and vigor. Thousands of women have testified to its merits.

"My daughter," writes Mrs. N. A. Thomas, of Little Rock, Ark., "had been under a doctor's care for four years. Dr. Pierce's Favorite Prescription, which cured me, also cured her."

THE LISTENER.

Robert Sherwood, an aged pioneer of Michigan, says that he has hunted and trapped in every state in the Union.

Although Cecil Rhodes is very much alive, he has selected his burial place in the Maloppo hills, not far from his farm.

Travis Carter, a contractor and early settler of Seymour, Ind., has 47 immediate relatives living in the same ward with him.

The Right Hon. Sir Peter O'Brien, lord chief justice of Ireland, has read Sir Walter Scott's "Ivanhoe" no fewer than 40 times.

Prince Bismarck often said that he would rather find a cure for rheumatism than have all the titles of Europe conferred upon him.

Captain Louis N. Stodder, who is now living in Brooklyn, is the only survivor of the officers of the Monitor in her famous battle with the Merrimac.

The Duke of Norfolk is said to have spent more money in building than any Englishman now alive. He has already partially rebuilt Arundel castle four times.

Dr. Daniel Freeman, who was the first man to locate under the "homestead act," is still living on the plot of ground he claimed in Gage county, Neb., at that time.

The Rev. William C. Conn, the new minister of the Original Secession (Auld Licht) church of Kirriemuir (Thrums), is an Irishman and is too tall to be called the "little minister."

Representative Hepburn of Iowa is the great grandson of the once famous Martin Lyon, who represented three different states in congress and cast the vote which elected Thomas Jefferson as president.

John Adriance, who played an important part in the early history of Texas, is still living in the old town of Columbia, the first capital of the republic. He is now more than 80 years old and is one of the few remaining links with the stirring times in Texas 60 years ago.

Public attention is being called in England to the growing bad temper of Lord Chief Justice Russell. He is charged with treating juries roughly and with impatience and with flinging such fierce looks and trenchant words when angered, which is often, that nervous witnesses are terrified.

William D. Houghteling, who has just died at Asheville, N. C., was one of the pioneer business men of Chicago. He was a member of St. James' Episcopal church, in that city, for nearly 40 years. His son, James Houghteling of Chicago, is well known as the founder of the Episcopal Brotherhood of St. Andrew.

Sarasate, the violinist, is a confirmed bachelor, and the responsibility is usually laid at Auber's door. When the latter handed Sarasate the first prize of the Paris Conservatoire, he wound up his little speech of presentation with the words, "And, above all, never marry!" a piece of advice which Sarasate has never forgotten.

Dr. A. W. CHASE

COMES TO THE AID OF

Catarrh Sufferers

SUCCESS in life is almost impossible for a man with bad breath. Nobody wants to do business with him. Nobody wants to associate with him. He is handicapped everywhere. Offensive breath comes from Catarrh; sometimes from Catarrh of the Stomach, sometimes of the lungs, sometimes of the head, nose, and throat. It is from Catarrh somewhere, and Catarrh is another name for uncleanness.

Many men understand this, and make every effort to cure it, but it is beyond the reach of ordinary practice.

No self-respecting man can ignore Catarrh. If he has it in any form he makes constant effort to be rid of it.

There is something about the manner of life and the climate of Canada that seems to breed diseases of the mucous membrane. Medical science ordinarily doesn't try to cure Catarrh; it "relieves" it; but Dr. Chase has been curing Catarrh for over thirty years, and his name is blessed by thousands who have shaken off the grasp of this insidious disease.

Sold by all dealers, price 25 cents per box, blower free.

The king of Siam has a bodyguard of female warriors—i. e., 400 girls—chosen from among the strongest and most handsome of all the ladies in the land.

It has been discovered that Princess Eno of Battenberg, who was born in 1887, is the only royal child born in Scotland for nearly 300 years—that is, since the birth of Charles I, in 1600.

Prince Albert of Monaco is the representative of a good deal of past diplomacy. His dukedom of Valentinois comes from Cesare Borgia; that of Mazarine from Cardinal Mazarin. His wife is the widow of Duc de Richelieu.

Now that the girls have begun kissing Hobson, it is high time for him to hurry to the front.—Boston Globe.

Beware, take care, Hobson! There is more peril in promiscuous kissing than there is in dynamite, and its victims are more numerous.—Boston Herald.

If Lieutenant Hobson is wise he will lose no time in sinking another Merrimac between himself and the impressionable American girl.—Chicago Times-Herald.

Having shown an admiring world how he could handle anything nautical from a collier to a cruiser, Hobson has now demonstrated how gallantly he can handle a "smack"—whether it be nautical or merely naughty.—Philadelphia Record.

A REMARKABLE CASE

A Plattsville Lady Rescued by Dodd's Kidney Pills from Terrible Danger.

Plattsville, Ont., Aug. 29—The Echo, published here, report the remarkable cure of a well-known lady, Mrs. J. Barnett, who had two years suffered from Nervousness, Rheumatism, Back-ache, Sleeplessness, pains in the head and eyes and general weakness.

Dodd's Kidney Pills cured her.

To an Echo reporter, Mrs Barnett said: "I had no appetite, I could not sleep, I was a physical wreck.

"I was treated by doctors, but their medicine gave me no relief.

"I started taking Dodd's Kidney Pills, and before I finished one box, I had improved noticeably. I have taken twelve boxes in all, and am now completely recovered. I ascribe my recovery to Dodd's Kidney Pills alone."

Dodd's Kidney Pills are a positive cure—the only cure,—for Kidney Diseases of all forms. They have never failed.

DIVORCES.

In Australia divorces have never been sanctioned.

Divorces are scarcely ever known to occur in modern Greece.

In Hindustan either party for a slight cause may leave the other party and marry.

In the olden times the Jews had a discretionary power of divorcing their wives.

Divorces are scarcely allowed in Tibet, unless with the consent of both parties. Remarrying is forbidden.

Among some tribes of American Indians the sticks given witnesses of the marriage are broken as a sign of divorce.

In Cochin China the parties desiring divorce break a pair of chopsticks in the presence of witnesses, and the thing is done.

Two kinds of divorces are granted in Circassia. By the first the parties can immediately marry again, by the second not for a year.

If the wife of a Turcoman asks his permission to go out and he says "Go," without adding "Come back again" they are divorced.

Among the Moors, if the wife does not become the mother of a boy, she may be divorced with the consent of the tribe and can marry again.

In Siberia, if a man is dissatisfied with the most trifling acts of his wife, he tears a cap or veil from her face and that constitutes a divorce.

In Siam the first wife may be divorced, but not sold, as the others may be. She may claim the first child. The others belong to the husband.

In the arctic region a man who wants a divorce leaves home in anger and does not return for several days. The wife takes the hint and departs.

In China divorces are allowed in all cases of criminality, mutual dislike, jealousy, incompatibility of temperament or too much loquacity on the part of the wife.

Among the Tartars, if the wife is ill treated, she complains to the magistrate, who, attended by the principal people, accompanies her to the house and pronounces a divorce.

DYING BY INCHES!

But Dodd's Kidney Pills will Yet Renew Life

Thousands of persons die in the prime of life because doctors think Bright's Disease and Diabetes incurable. But Dodd's Kidney Pills cure them both. They *have cured* thousands of cases.

These diseases and other Kidney complaints are as common as ordinary colds. But people don't realize that they are afflicted till the disease has eaten deep into the system. Even then, Dodd's Kidney Pills will positively cure.

Thousands of *people are dying on their feet, but do not realize it.* They notice one or more of these symptoms: shortness of breath, loss of memory, failing sight, ravenous appetite, pale or reddish urine, with brick-colored deposit, scalding when urinating, constipation, nervousness, pains in the loins. Their only hope is Dodd's Kidney Pills. They won't fail. They never do.

How About Your New Fall Hat?

Of course it is none of our busines what a man wears—if he is satisfied to wear a Hat of doubtful style and unknown quality, that is his look out—he pays the bill. But if a man wants to wear a FASHIONABLE HAT—wants to look as if he had some style about him, he should see our New Fall blocks. The maker's name on the Hats we sell is an absolute guarantee of

And many others of the best known English and American makers—and they do not cost any more than the ordinary Hat without a name. Also an endless variety of **Boys' 'Varsity** and **Golf Caps,** in Tweeds, and Navy and Black Serges.

FUR DEPARTMENT.—It may seem just a little early to talk about FURS, but it really is not. Now is the time to look through last season's Furs—if they are to be Re-modelled or Cleaned, bring them in AT ONCE and you will have them in good time for the cold weather. Every day we are getting busier in this department.

—The town council holds a special meeting to-morrow night.

—A carpet manufacturer wants a $20,000 bonus to locate in Port Hope.

The first kiln of malt made of this year's barley was run off at the brewery this morning.

—A gang of twenty men were put to work last week, on a new siding of the C. P.R. at Norwood.

—The freight and passenger business on the C.P.R. is now heavier than at any time during the year.

—St. George's church, Hastings, has organized a society known as the "Gleaners' Union and Christian Endeavour."

—The ratepayers of Havelock will pay into the municipal treasury this year at the rate of 19 8 10 mills on the dollar.

—An exchange says that bicyclists are not so frequently seen in Stirling, and the craze is dying out to a considerable extent.

—Port Hope is in the throes of a controversy regarding the lighting of the town, and the council threatens to establish a plant of its own.

—A magnificent harvest is now assured to Manitoba. The farmers and business men of that province have something in common to smile over.

—It is a curious fact that while in Ontario and Quebec the rule of the road is to turn to the right, throughout the Maritime provinces the rule is to turn to the left.

—Mrs. Taylor charged Mrs. Kearns with using abusive and insulting language to her, this morning, in the police court. The case has been enlarged until to-morrow.

—A curosity in the shape of a vine-like weed has made its appearance in some sections and is simply smothering the clover. The new creeper has hundreds of long tendrils that wind around the clover stems, until the leaves drop off and the plant dies.

—The following lines of a western journalist may not be elegant, but they contain advice it were well to follow :

"Send us your paper right away!"

—It is a long time since the butternut trees produced so large a crop as is to be found this season. In some localities a bushel can be gathered in a very short time, and both boys and squirrels will store away an abundance for winter use.

—It is a relief to the eye to look upon green fields again, the late rains having restored them to something like their springtime beauty. Vegetation has started afresh, and the root crop will be revived, and pasture lands will cause a greater flow of milk.

—Many a housekeer will be glad of this excellent hint regarding files. Take a piece of flannel saturated in paraffin, rub it lightly over mirrors, picture frames and over mantles, and let it dry of its own accord. You will not even be troubled cleaning these, for files will not go near paraffin.

—Hamilton McCarthy, Toronto, is now engaged on a portrait bust of Lady Aberdeen. It is taken in her academic robes as an LL.D. of Queen's University, and is intended for presentation to that institution by the chancellor, Sir Sanford Fleming. It is said that the artist has been successful in catching the sweet expression of the mouth for which the countess of Aberdeen is noted.

—Every now and again somebody makes the suggestion that farmers ought to put their names on the front gates of their places. The idea is a good one, and if it were adopted it would make country drives and wheeling trips much more enjoyable. It would often be a real convenience, too, as anyone will admit who has walked back forty rods or more from the road to the farm house, to find out when he got there that he had struck the wrong place.

—The Campbellford Herald says : Last week Mr. Joseph Tully, grocer, in Campbellford, was compelled to discontinue business in consequence of his inability to meet the demands of creditors who were pressing him for payment, and the stock will be sold and the accounts collected for their benefit. Mr. Tully came here from Peterborough about four years ago, and seemed at times to be doing a good trade, but it was insufficient to meet all liabilities, the aggregate of which will amount to a large sum. He left last week for the Northwest.

NO MORE CHEAP TRAVELLING.

Railway Companies Glad the Rate War is Over—How it Affected Them—Both Roads Lost Money.

The railway rate war has been practically settled by the consent of the C. P. R. to abide by the decision of the Interstate Commerce Commission and the old rates will soon be restored. Mr. D. McNicoll, general passenger agent of the Canadian Pacific Railway, said this morning that the travelling public had had the advantage for many months of very low excursion rates. The big excursion was now over and passenger rates would return at once to their normal standard. "Of course," said Mr. McNicoll, "they cannot in all cases be the same as they were previous to the trouble, but, subject to slight modifications and readjustments, the old normal standard will be restored."

"Has the rate war cost the railways much revenue?"

"How could it be otherwise? You can not carry people for less than it costs and make much money out of it."

THE G. T. R. GLAD.

Mr. George B. Reeve, passenger traffic manager of the Grand Trunk Company, was asked what effect the closing of the passenger rate war would have on the business of the Grand Trunk Railway. "I am very glad," said Mr. Reeve, "to see that the long struggle is over and that rates will return to their normal condition. The Grand Trunk was of course only incidentally involved in the difficulty between the western American roads and the C.P.R. When the trouble arose over the transcontinental preferential Canadian rates were only incidentally affected at first, but the C.P.R. began to cut local rates because our company refused to cease working with the western American road. Now that the primary difficulty is arranged we expect the C.P.R. will, with their usual consistency, restore the old rates in Canada."

"What was the effect of the reduction of rates in Canada on the volume of travel?"

"At first the volume of business was considerably increased, but after the first month or so we simply carried people at a greatly reduced rate whom we would have carried at ordinary rates anyway."

"Did this not mean a large loss of revenue to Canadian roads?"

"It certainly did, but so far as we were concerned we more than made up our loss on Canadian business by the large amount of transcontinental business which had never come to us before. You see, before the trouble the C.P.R. was the only railway which had a ticket office in what is called the barge or immigrant sheds in New York, and the result was they secured the major portion of the immigrant business. When they reduced transcontinental rates they were compelled to close up their office in the barge. Ever since last March the Grand Trunk has been the only road with a ticket office there. The result is that since that time we have handled the bulk of the immigrant business. Up to the end of July we carried over Grand Trunk, Chicago & Grand Trunk and American lines west 8,000 of these people whom we had never handled before."

"Have you any idea of the approximate loss to the two railway companies in Canada through the rate war?"

"It's too early yet to give any idea. Later on it will be possible to give a fairly correct estimate."

DREYFUS ALIVE YET.

The French Government Denies the Reports of the Exile's Death.

Paris, Sept. 8.—The Government denies the rumors of the death of Dreyfus, and the fact that M. Faure has left the capital is regarded as indicating that matters will be quiet for a time.

The Figaro says the Cabinet Council just held unanimously agreed upon a revision of the Dreyfus case, and directed the Minister of Justice, M. Sarrien, to take the necessary steps to accomplish it.

The Matin announces the discovery of facts implicating the officers of the general staff. Gen. Zurlinden, the new Minister for War, reported the matter to the Council, and urged the necessity of reforming the intelligence department of the War Office, whereupon he was directed to elaborate a project separating the duties of the general staff from those of the intelligence department.

Lost Both Arms.

Winnipeg, Sept. 8.—A young Frenchman, Remi St. Luck, lost both arms on Monday while feeding a threshing machine on a farm near St. Jean. One hand was caught first by the cylinder, and he grasped at the crossbar above with the other, but missed it. Before his companion could extricate him both arms were badly cut up.

The North Hastings Protest.

Belleville, Ont., Sept. 8.—Mr. W. J. Allan, M.P.P. for North Hastings, was examined yesterday in connection with the protest against his election.

DON'T BE BILIOUS.

Use Dodd's Dyspepsia Tablets and Enjoy Life as You Should.

Dodd's Dyspepsia Tablets Regulate, Tone and Strengthen the Liver, Cure Constipation and Drive Biliousness from the System.

Biliousness turns pleasure into pain, gladness into misery, and leisure hours into an eternity of agony, for thousands of men and women.

Biliousness is especially prevalent at this season of the year.

The extreme heat causes derangement of the liver, as well as of other organs.

Something that will restore naturnal conditions, that will tone the liver, and regulate its action, so as to ensure the secretion of exactly the quantity of bile required, is what all billons persons need.

And such they have in Dodd's Dyspepsia Tablets, which promptly, and thoroughly cure Biliousness.

The small, brown Tablets which go with every box of Dodd's Dyspepsia Tablets, are intended especially for the cure of Biliousness, and Constipation.

They contain ingredients that check the flow of bile when it is too free, and thus prevent or cure Biliousness, which means simply—Bile in the blood.

The liver having been regulated in this way, the blood is no longer laden with the surplus bile, but becomes pure and rich. The peculiar yellowish tint in the skin the marks bilious persons, disappears, the eyeballs regain their naturnal color, and the health is improved in every way.

The bowels, which generally suffer some derangement, when Biliousness appears, are also brought back to their naturnal healthy condition, and promptly carry off, and expel all poisonous waste matter.

Thus Dodd's Dyspepsia Tablets are the only hope for the bilious, and they never fail to cure. Try them, and be convinced.

TAKE DODD'S DYSPEPSIA TABLETS FOR DESSERT.

Regular action of the bowels is necessary to health. Laxa-Liver Pills are the best occasional cathartic for family or general use. Price 25c. Any druggist.

An Opening Salute!

Extraordinary Purchases from the

ALEXANDER and ANDERSON

WHOLESALE STOCK, TORONTO.

Business must be made interesting; and invaluable opportunities frequently come from the unfortunate mistakes of others, which shrewdness helps us to profit by. Nothwithstanding the heavy blockade of mammoth boxes and bales of New Fall Goods almost daily occuring in front of our store doors, an opportunity has just come our way of securing a very large quantity of household goods out of the regular channels. The wholesale stock of MESSRS. ALEXANDER & ANDERSON was placed on sale last week by Wyld, Grasett & Darling, of Toronto, of which we bought very largely at a very low price on the Dollar. We may state at once that it will be impossible to duplicate these extraordinary values—as the prices have been marked on a scale considerably lower than wholesale inventory list prices.

ON FRIDAY, SEPTEMBER 9th.

We place this immense purchase on sale, and for each succeeding day shoppers will reap the benefit. The stock embraces—

Dress Goods, Black Silks, Dress Trimmings, Damask Tablings, Towels, Towellings, Napkins, Fancy Household Linens, Sheetings, Pillow Casings, Made-up Pillow Cases, Embroideries, Handkerchiefs, Ribbons, Veilings, Hosiery, Tapestry Carpets, English Linoleums and other Housefurnishings.

Every piece of goods is this season's style and the choice of any one means perfect satisfaction. No circumstance can arise to make conditions better to buy Dress Goods at lower prices.

WINTER HOMES.

We have a long list of desirable Homes for sale at low prices and on easy terms of payment. Our space will not allow us to describe them, but we are in our office early and late and we most urgently request all who wish to buy or want a home to call without delay, because 6 months notice is necessary in most cases, and if you buy now you can get well settled before the cold rains come on. Bring a few dollars to prove that you mean business, and we will arrange any reasonable terms for the balance. Advise with your family and decide where you wish to buy, what price you can afford to pay, how much you can pay down and how you can pay balance. Some start with 10 per cent and others have something to offer in exchange. Come in and let us talk the matter over, it will cost you nothing and may benefit you very much.

The Bombardment Renewed and 22 British Killed.

BRITISH TROOPS FROM MALTA.

Over 800 Native Christians Alleged to Have Been Killed by the Turks—67 British Subjects Among the Slain—The Ringleaders to Be Hanged if Proved Guilty.

Athens, Sept. 9.—It is reported that the bombardment was renewed at Candia yesterday, and that the port has been seriously damaged. The foreign warships have landed sailors to reinforce the British garrison, and pumps have been landed to assist in quenching the fires. According to telegrams from Candia it is estimated that 22 British were killed and 45 wounded yesterday. Several Christian families have sought refuge on the warships. Many corpses are lying in the streets of Candia. In one case a whole family was killed. The Italian Consulate is also reported burned. A Russian warship left the Piraeus hurriedly for Crete yesterday, carrying the Russian Consul, M. Troijansky.

Troops From Malta.

Malta, Island of Malta, Sept. 8.—Half a battalion of the Dorsetshire Regiment and a detachment of the medical corps sailed last night for Crete. Other troops will follow.

67 BRITISH SLAIN.

Eight Hundred Native Christians Massacred by the Bashi Bazouks.

Athens, Sept. 9.—The following despatch, dated at 8 o'clock last evening, has been received from Candia:

"The Bashi Bazouks are committing excesses and the Christians in the surrounding districts are arming to march to the assistance of the Candians. There are eight warships in the harbor, and a fresh bombardment is expected. The British, German and Spanish Consulates have been looted and thus far 800 native Christians and 67 British subjects have been killed."

Order Restored.

Candia, Island of Crete, Sept. 9.—A detachment of international troops, which has just arrived here, has occupied the fortifications and restored order. It is now estimated that 200 persons were killed during the rioting. The Mussulman troops protected the Christians placed under their care, but thy did not attempt to prevent the pillage of Christian houses, which continued until the international troops arrived.

Ringleaders to Be Hanged.

Athens, Sept. 9.—The Asty says it learns from an authentic source that, as soon as the British troops arrive at Candia from Malta, the Turkish garrison in Candia will be expelled, martial law proclaimed and the ringleaders of the riots put on trial and publicly hanged, if guilty.

Ghastly Stories of Massacre.

London, Sept. 9.—The correspondent of the Standard, telegraphing Thursday from the British battleship Camperdown off Candia, says:

"The refugees tell ghastly stories of massacre. They report that no fewer than 700 Christians are missing. Several attempts were made last night to set on fire the office of the Eastern Telegraph Company. It has been ascertained that all the houses overlooking the British camp were loop holed for rifle fire and barricaded.

"Every Christian survivor of the massacre swears that the butchery was mostly the work of Turkish soldiers, who first robbed and then slew their victims. Edhem Pasha is the one who ought to be held primarily responsible."

STARVATION AWAITS US ALL.

Sir William Crookes Predicts a Universal Wheat Famine in 1931.

London, Sept. 9.—Sir William Crookes, President of the British Association, delivered the inaugural address at the annual congress of that body at Bristol yesterday. He reviewed the sources of the present and possible wheat supply, and argued that by the most favorable calculation, the supply could not keep pace with the world's needs beyond the year 1931, but starvation might be averted through the laboratory if the problem of fixation of the supply of nitrogen contained in the atmosphere is solved.

He estimated that fixed nitrogen of the value of 16,000,000 pounds was wasted annually by dumping the sewage of towns into the ocean, while the store in the atmosphere was unlimited. The problem was how to use it. If these stores of fixed nitrogen were applied to the soil they would raise the average wheat crop per acre from 12.7 to 20 bushels, enabling the supply to meet the demand.

Sir William was of the opinion that the solution of the problem would be the burning of the nitrogen in the air by a powerful electric current. Such a current might be obtained by utilizing Niagara Falls, and the fixed nitrogen thereby produced would cost £5 per ton.

LI HUNG CHANG IS OUT.

He Was Bounced on Sir Claude Macdonald's Request.

London, Sept. 9.—A despatch has been received from the British Minister at Pekin, Sir Claude Macdonald, confirming the report that Li Hung Chang has been dismissed at his request.

French Agitation Growing.

Paris Sept. 9.—The agitation for convoking the Chamber of Deputies is growing daily. Already notices of twelve interpellations as to the Dreyfus affair have been given. Three duels are imminent over the case. A great sensation has been caused by the statement of the Matin that facts have been discovered implicating the officers of the general staff. Rumors are in circulation that Comte Esterhazy has disappeared, and that Lieut.-Col. Paty du Clam has been arrested, but they cannot be confirmed.

Of Interest to Canadians.

London, Sept. 9.—The report of the British Association for the Advancement of Science has just been handed out, and is of considerable interest to Canadians. The success of the annual meeting at Toronto last year, the report says, was largely the result of the unremitting efforts of the local officers' committee and the support received from the Ontario and Federal Governments and the city of Toronto.

RUSSIA GETTING DOWN.

French Irritation Causes the Czar's Ministers to Take a New Tack.

St. Petersburg, Sept. 9.—In view of the irritation in France, the politicians and newspapers are seeking to represent the Czar's peace circular in a new light. They urge that it has been misconstrued and assert that the Imperial Government never contemplated the immediate convocation of a conference, being fully aware of the difficulties in the way. It was only hoped, they continued, to sow good seed, which would gradually ripen and bear fruit when circumstances are more favorable. These utterances are regarded as indicating that the failure of the Czar's proposal is foreseen and that public opinion is being prepared for it.

Carlists Are Plotting.

Madrid, Sept. 9, via Bayonne, France.—The censorship is making the work of the correspondents very difficult. They are not permitted even to summarize the debates and results of the secret sessions of the Cortes.

The Republicans are planning obstructive tactics in the Cortes, but they denounce the Barcelona bands as anarchists, instead of Republicans.

The Carlists, in the meantime, are plotting and awaiting an order from Don Carlos. It is certain that he does not heed the counsels of the Vatican, urging him not to disturb the peace of Spain. Senor Sagasta hopes to get the bill authorizing alienation of territory passed and the Cortes off his hands within a week.

General Weyler denounced the politicians at Madrid, blaming them for Spain's misfortune, and Count D'Almenas replied hotly. "The sashes of some generals should be torn off and placed around their necks," he said, and an uproar followed. The scenes in the Chamber, according to one correspondent, would have shamed a bull ring. The downfall of the Ministry is foreshadowed by the papers.

Counting the Dervish Dead.

London, Sept. 9.—The British War Office has received a despatch from General Sir Herbert Kitchener, the commander of the Anglo-Egyptian forces, dated from Omdurman on Monday last, which says: "Officers have been counting the Dervish bodies on the field, and report the total number of dead found as about 10,800. From the number of wounded who have crawled to the river and town, it is estimated that 16,000 were wounded. Besides the above between 300 and 400 Dervishes were killed in Omdurman when the town was taken. I have as prisoners between 3,000 and 4,000 fighting men."

The Lease Story Confirmed.

London, Sept. 9.—The Capetown correspondent of the Daily Mail confirms the report that Great Britain has leased from Portugal the town of Lorenzo Marques, on the north side of Delagoa Bay.

The Industrial.

Toronto, Sept. 7.—Yesterday was Germania Day and fully 40,000 persons attended the Fair. This is Farmers' Day, the great day of the Industrial.

MR. BLAKE'S QUERY.

He Asks the Question, "Is the Crown a Person?"

HE ANSWERS IN THE NEGATIVE.

The Learned Representative of the Attorney-General Says the Crown Is Not Included in the Words as Used in the Election Law—Constable Vote Argument Proceeding.

Toronto, Sept. 9.—Mr. Monro Grier resumed the argument on the constables case yesterday morning before the Court of Appeal, and concluded shortly after the opening of the court at 11 o'clock. Mr. Grier dealt with the words, "any person whatever" in the clause of the statute defining the prohibition of certain officials from voting, endeavoring to show that they may be taken as including constables. All who receive pecuniary benefit in connection with elections, he contended, are, prima facie, disqualified from voting unless it is otherwise specifically indicated in the Act. Mr. Justice Osler requested Mr. Grier, at this point, not to go into this phase of the question again, as it had been fully dealt with yesterday. Mr. Grier concluded with a brief summary of the argument from the affirmative side of the case.

Mr. S. H. Blake, Q.C., began his argument on behalf of the Attorney-General shortly before midday. He pointed out that the circumstances of the reference were such as to leave no other course to the Legislature and the Attorney-General than the submission of these questions. There were from fifty to sixty election petitions pending, and in many of them these questions were raised. It was necessary to determine the facts so that they might be established once for all, thus saving the vast expenditure of time and money that might otherwise be required. He must differ entirely from the arguments of his learned friend as to the purpose of the Legislature, which was not to disqualify all persons who received remuneration and diminish the number of persons having a right to vote. The spirit of the legislation was rather to include everyone who had performed a service for reasonable remuneration, the one exception being that no payment should be allowed that would interfere with the purity of elections. The Legislature had endeavored to support the spirit of honesty, truth and righteousness in the conduct of elections. It was not contrary to this spirit that some persons who had done reasonable work at honest prices should exercise the right of franchise.

This was a case, Mr. Blake continued, in which there was no bribery, no corrupt practice, nothing but a reasonable expenditure, honestly and correctly made. It was not a question of politics at all, but of law, presented for the conclusions of this court, without any person being able to say what effect the decision would have on one side or the other. They were all in ignorance of that, it was a matter of hypothesis, and no one was in a position to say what the result would be. His learned friends had not drawn attention to the great difference that exists between the remuneration given by a person interested as a candidate or the like remuneration that might be used to affect the election and the money paid by persons altogether independent and engaged in carrying out the election. There was no specific language depriving constables of their vote, and the argument of his friends was simply an attempt to enlarge the meaning and so deprive them of their rights by inference.

Coming to a consideration of Section 6, upon which the petitioners place so much reliance, Mr. Blake argued that it never contemplated the officers "appointed" by the Crown, but merely persons "employed" by candidates. He analyzed the clause as to persons employing, persons employed, the character of the employment and the nature of the consideration. In all of these respects the constable, he held, was not contemplated, because the Crown was not "any person whomsoever" in the sense of an employer under the clause, nor was the constable an employe.

Mr. Blake then gave a brief historical sketch of the law.

After recess Mr. Aylesworth argued on what he called the heresy of his opponents in holding that the right of franchise was a gift emanating from the Crown or from Parliament. This was an old controversy as to whether a sovereign rules by divine right or by the people's will. Under the common law all freemen were electors. Mr. E. F. B. Johnston supported the former argument and held that it was the intention of the Legislature in section 6 to provide that persons accepting money should be disqualified, but it was not to include the office of the Crown, but to make the words of the statute so wide that the most ingenious candidate would be unable to so take advantage of it as to employ persons in the election, with the object of influencing their vote. Mr. Wallace Nesbitt will reply this morning.

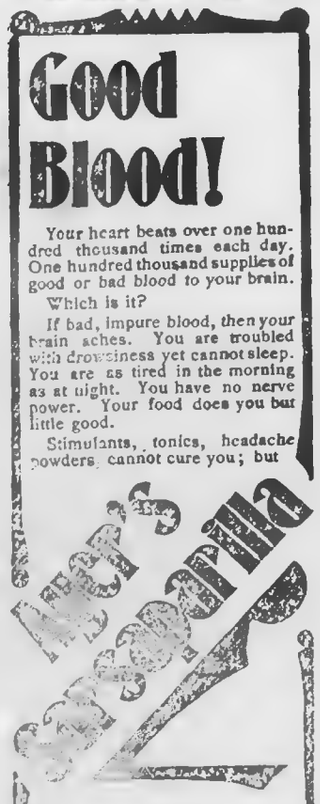
Good Blood!

Your heart beats over one hundred thousand times each day. One hundred thousand supplies of good or bad blood to your brain.

Which is it?

If bad, impure blood, then your brain aches. You are troubled with drowsiness yet cannot sleep. You are as tired in the morning as at night. You have no nerve power. Your food does you but little good.

Stimulants, tonics, headache powders cannot cure you; but



will. It makes the liver, kidneys, skin and bowels perform their proper work. It removes all impurities from the blood. And it makes the blood rich in its life-giving properties.

To Hasten Recovery

You will be more rapidly cured if you will take a laxative dose of Ayer's pills each night. They arouse the sluggish liver and thus cure biliousness.

Write to our Doctors.

You have the exclusive services of some of the most eminent physicians in the United States. Write freely all the particulars in your case.

EDITORIAL NOTES.

So far this year the Dominion Government has received $756,141 revenue from the Yukon territory. Of that $442,754 came from the ten per cent. royalty on gold, representing a product of $4,427,540. As the product for the year is likely to be ten or twelve millions, the Government stands to receive a pile more of revenue yet.

ORONHYATEKHA, grand chief of the Independent Order of Foresters in Canada, receives $10,000 a year salary. As this is only $2,000 more than Sir Wilfrid Laurier gets as Premier of the Dominion, the Foresters last week added a bonus of $5,000. And yet, says the Ottawa Journal, some people allege that the Indian race can not prosper among the white men.

COLONIZATION, Hon. Joseph Chamberlain says, is always a good thing for any country. England's experience bears out this statement thoroughly. In the first place, it tends to uplift the whole character of a nation. The government of colonies compels a country to wider and broader policies and national thought because of the further responsibilities which are incurred. Instead of spending every moment of its time in the consideration of parochial or local matters, the holding of colonies imposes an onerous trust upon a home government, the carrying out of which undoubtedly helps any administration, because of its broadening influences, and these influences will always permeate with advantage through the country which gives them rise. Colonization is beneficial to any nation. It elevates the nation and makes its people more interested in public affairs.

GREAT BRITAIN, while not being sordid in its conquests, has invariably an eye to the main chance. The conquest of the Soudan represent a very large sum and England is at the whole cost of it since France objected to the payment of the expense of the expedition from the Egyptian funds. France has, perhaps, overreached herself in this. If Great Britain has to pay for the subjection of the Soudan, she will probably insist on reaping the advantage. Slatin Pasha, who is thoroughly familiar with the Soudan and its resources, says the field for commercial enterprise is practically illimitable. We shall probably see that Great Britain will see that she has the lion's share—which is her usual share—of the commercial resources of the new Egypt.

THE TWO GREATEST NAVIES.

Whether there is to be an alliance formal or virtual, between the two great English-speaking nations, remains for history to develop; but there can be no question that in a very short time the two most powerful navies in the world will be those of Great Britain and the United States. The government of the latter country is asking, and Congress will undoubtedly grant, means for the construction of several first-class battleships and cruisers, with the addition of which its navy will be quite equal to that of France or Russia, and will far surpass that of Germany.

It may be taken for granted that a country so wealthy as the United States, will not stop at that. The old sea-king instinct is apparently still strong in that branch of the race which has for two centuries been weaned from the sea, and it has burst out with sudden fervour as the result of the Cuban war. That it will speedily subside there is no reason to believe. Heredity has been sufficient to keep it alive, and there will henceforth be plenty of occasions for its exercise. Porto Rico and Hawaii, to the east and west, are now outposts of the United States. Spain has been driven out of Cuba, and the rebels have been bought off with a payment of fifteen millions. Cuba must be governed by military and naval force. The fate of the Philippines is still to be decided, but the United States will certainly retain what it has won by arms. All this means the necessity for a large fleet, and many coaling stations.

The significance of this evolution may yet be immense for the world at large. When a wealthy nation of seventy millions dashes unexpectedly into the international arena, all previous calculations are apt to be upset, and just at present the military powers of Europe seem to be somewhat hazed. They have to reckon with a new disturbing element. Russia, crafty as usual, has already a trained diplomat at Washington, to win over, if he can, public opinion to her. He may succeed in Russianizing the United States, but the chances are against him. The current seems to be setting toward indefinite but increased friendliness towards Great Britain, and as this is in accordance with the tendency produced by community of race, language and institutions, the sudden military evolution of the United States seems likely to make for a higher kind of civilization than has ever dawned on the Russian mind.

A GREAT SCHEME.

News comes from Montreal which, if it be founded on fact, is of considerable interest and importance. This is to the effect that the Atlantic and Lake Superior Railway has at last met with success in floating its scheme for a new line of railway from Montreal to the Atlantic, together with a line of steamships running between the ocean terminus and the United Kingdom. Reports it appears have been cabled from England that a very large block of stock has been underwritten, and these reports have been confirmed by private cables to the promoters in Montreal. The most important feature of the scheme is the fact that the Great Western Railway Co. of England, one of the greatest corporations in the world, have identified themselves with this scheme. So far this company has has had no connection with any of the transatlantic steamship companies, but now they have decided to have what will be equal to a line of their own. These steamers, which are already engaged, it is asserted, have a sailing capacity of seventeen knots an hour, and will be put on between Canada and Britain this fall. It is now no secret that the company have selected Milford Haven as their British port, and that Paspebiac will, of course, be the port on this side of the Atlantic. It is also learned that strong representations are being made to the Ottawa Government to so amend their present invitations for tenders as to include Milford Haven or other ports, and if this is done the Canadian Steamship Company, which is the name of the new concern, will also send in a tender to the department for carrying the mails.

The Atlantic and Lake Superior railway has a charter enabling it to run a line of railway from Montreal along the south shore of the St. Lawrence to Chaudiere Junction where it connects with the Intercolonial Railway, over which it has running powers as far as Metapedia. From that point to Paspebiac the Baie des Chaleurs Railway is utilized, making by far the shortest and quickest route from Montreal to the coast that there is. Paspebiac itself, although as yet undeveloped, is a harbour of very considerable merit, with ample and safe anchorage, wonderfully free from ice in the winter. It also has the very high recommendation of being by far the most eastern of any Canadian harbour. Of this route the only portions that remain to be finished consist of some short sections between Sorel and Chaudiere, which are in easy sight of completion. The A. & L. S. R. is also controlled by practically the same men who own the charter for the Montreal Bridge, a structure for which all the plans are completed, and which will, when finished, cross the St. Lawrence from the suburbs of Longueuil to the eastern end of Montreal, crossing the ship canal with a span of 500 feet at an elevation of 150 feet, a structure which will undoubtedly be one of the finest bridges in the world.

The success of this scheme would provide a mail route impossible to equal; and if, after all the disappointments he has suffered in the past, he is at last successful, Mr. C. N. Armstrong, the managing director and mainspring of the whole enterprise, will deserve most hearty congratulation.

A PRICELESS NECESSITY.

Kidney Disease Cannot Hurt when Dodd's Kidney Pills are Used.

Healthy kidneys are absolutely necessary for the production of pure blood.

Pure blood is absolutely necessary for good health—yes for life itself.

If the kidneys are weak, or diseased, the blood is impure, poisonous, and the general health breaks down, before the attack of specific disease.

Dodd's Kidney Pills restore weak and diseased kidneys to health and strength. They stimulate them to proper action, enabling them to filter the poison out of the blood.

Dodd's Kidney Pills are the only medicine known that can and will do this. Therefore, they are priceless and indispensable. All forms of Kidney Disease are cured by them.

Dodd's Kidney Pills have a unique record—Twenty thousand cures, not one failure. You should try a box.

NORTH MONAGHAN.

Council Meeting.

The council met on Friday, Sept. 2nd, in the town hall, all the members present, the reeve Mr. McIntosh, presiding. The minutes of the last meeting were read and confirmed.

A communication was received from the clerk of Cavan enclosing statement of moneys spent by the township on the boundary in 1897 8.

Gravel certificates were presented as follows: J McIntosh, 40 yds per Galloway, $4; Jas Laing, 32 yds per Bennett, $3.20; J Madill, 160 yds per Bennett, $16.

Accounts were presented as follows:—R Rivington, commissioner road division No. 4, disbursements paid for repairs to culverts in his division, $11.50; Kingan & Allen, stone hammers and handles, $2.40; H McDonald, Montreal, $26 60; W West, digging on drain road, $2 50; G W Bennett, re-covering culvert at Leary's creek and 4 loads gravel, $2.50; Geo Raper, repairing culvert on 9th con, near Springville, $1.25; D Maher, breaking stone, $2 50.

They reported gravel certificates as filed and paid since last meeting as follows:—Jas. Lillico, 60 yards, per Rivington, $6 00; S. G. Bennett, 109 yards, per Bennett, $10 90; S G. Bennett, 54 yards, per Sanderson, $5 40; R. Dobbin, 80 yards, per Sanderson, $8.00. J. McIntosh, 216 yards, per Sanderson, $21 60; J. Lillico, 121 yards, per Galloway, $12 10; J. Patton, 130 yards, per Galloway, $13.00; also paid F. Moncrief $9 37 for seven days' work on road grader.

Moved by Messrs. Bradburn and Madill, that the report respecting gravel certificates, as filed by the road commissioners, be passed and authorized.—Carried.

Moved bo Messrs. Bradburn and May, that orders be drawn on treasurer for the following:—Jos. Madill, $16; Jas. Laing, $3 20; J McIntosh, $4.—Carried.

Moved by Messrs. Bradburn and Madill, that orders be drawn on the treasurer for the following accounts:—R. Rivington, $11.50; Kingan & Allen, $2 40; W. West, $2 50; G. Bennett, $2 50; Geo. Raper, $1 25; D. Maher, $2 50.—Carried.

Moved by Messrs. Bradburn and May that the Reeve and Councillors Madill and Hunter be a committee to examine all accounts and pay sheets respecting work done on the boundary between Cavan and Monaghan and report the full amount spent in detail to the council.—Carried.

The reeve, Mr. McIntosh, presented a report from the committee on work on boundary across 13 concession, stating that Mr. Galloway, Commissioner Road Division No. 1, North Monaghan, had been employed to do the work, which consisted of removing the logs and stumps from the roadway and hauling 820 yards of gravel to raise the grade to a level, covering about 280 rods and also noting that when this amount of work was done and the grant being spent, an agreement was entered into between Mr. Hooper, of Cavan, and Mr. McIntosh, of Monaghan, to supplement the previous grants with an extra grant sufficient to complete the job, each township to pay an equal share. This work was done also by Mr. Galloway at a cost of $63.10, for which an order for $31 55, North Monaghan's share, has been issued.

Moved by Messrs Madill and Hunter, that the report of the reeve, as received, be adopted, and that the grant of $31.55 is hereby approved—Carried.

Moved by Messrs May and Madill, that an extra grant of $8 be supplemented to that made to R. Rivington in R. D. W. No. 4.

Mr. Bradburn objected. The reeve called for a vote which resulted in a tie. The mover and seconder voting yea, and Messrs Bradburn and Hunter voting nay. The reeve then voting, declared the motion lost.

Moved by Messrs Madill and May, that the Reeve and Councillor May be a committee to examine the road between 8 and 9 con. at lot 4, and to have what work they deem necessary done. Mr. Bradburn again objected to this expenditure also, on the ground that the appropriations for grants were expended. The reeve called for a vote which resulted in a tie in the same division as the previous vote. The reeve then voting, declared the motion carried.

It was then moved by Messrs Madill and Hunter, that John Brown be appointed collector of rates for 1898 at a salary of $46—Carried.

A bylaw was passed confirming the appointment.

Bylaws were introduced confirming the levying of rates for township, county and school purposes for 1898 as follows:

Total assessment				$611,460 00
County.....	$1,224.34, a rate of 2 mills on dollar			
Township...	844	"	1 2-5	" "
S S No 1	240,	"	1 3-10	" "
" " 2	250,	"	1 1-5	" "
" " 3	140,	"	1	" "
" " 4	210,	"	1 9-10	" "
Sep. school..	54,	"	2	" "
Gen school rate $520		"	9-10	" "

These bylaws were passed, signed and sealed and council adjourned sine die.

The doctor may be a good old man, but even so, medical examinations and the "local application" treatment are abhorrent to every modest woman. They are embarassing—often useless. They should not be submitted to until everything else has been tried. In nine cases out of ten there is no reason for them. In nine cases out of ten, the doctor in general practice isn't competent to treat female diseases. They make a branch of medicine by themselves. They are distinct from other ailments. They can be properly understood and treated only by one who has had years of actual practice and experience in this particular line. This is true of Dr. R. V. Pierce, chief consulting physician of the Invalids' Hotel and Surgical Institute, at Buffalo, N.Y. Dr. Pierce's Favorite Prescription, a remedy for all derangements of the reproductive organs of women, has been in actual use for more than thirty years. It cures every form of "female weakness."

MOTHER AND DAUGHTER CURED.

Mrs. Lydia A. Fowler, Electric Street, Amherst, N.S., testifies to the good effects of the new specific for all heart and nerve troubles: "For some time past I have been troubled with a fluttering sensation in the region of my heart, followed by acute pains which gave me great distress and weakened me at times so that I could scarcely breathe. I was very much run down and felt nervous and irritable.

"I had taken a great many remedies without receiving any benefit, and I scarcely knew what to do, when a friend induced me to try Milburn's Heart and Nerve Pills. I had only been taking them a short time when I felt that they were doing me great good; so I continued their use and now feel all right. I can heartily recommend Milburn's Heart and Nerve Pills for nervous prostration."

MILBURN'S HEART AND NERVE PILLS

Mrs. Fowler adds: "My daughter, now fifteen years of age, was pale, weak and run down, and she also took Milburn's Heart and Nerve Pills for some time, and is now strong, healthy and vigorous."

Milburn's Heart and Nerve Pills cure palpitation, skip beats, smothering sensation, dizzy and faint spells, nervousness, sleeplessness, anaemia, weakness, after effects of grippe, female troubles, etc. Price 50c. a box or three boxes for $1.25. Sold by all druggists or sent by mail on receipt of price. T. Milburn & Co., Toronto, Ont.

Mr. Melville Miller, Bensfort, Ontario, says: "Laxa-Liver Pills made a new man of me. I was troubled with indigestion and pains in the small of my back, and after taking Laxa-Liver Pills for about three weeks they completely cured me." Price 25c., all druggists.

COLONIZATION.

The Right Hon. Joseph Chamberlain Gives the Yankees Some Pointers Worth Having.

New York, Sept. 9.—Joseph Chamberlain said frankly to a Tribune reporter that the treaty with Germany had actually been signed, thus making it known to the world for the first time that such an alliance had been made. Mr. Chamberlain made it clear that the English Government favors the retention of the Philippines by the United States. When Mr. Chamberlain was asked as to the opinion he held regarding the most advantageous course which the United States could pursue respecting the Philippines he replied diplomatically: "However much I would like to talk upon this matter, I must not do so, for the simple and sufficient reason that anything I might say in that direction might seem like giving advice or suggestion to the United States by a foreign statesman; and that, besides being invidious, would be impertinent.

"Colonization is always a good thing for any country," he said. "England's experience bears out this statement thoroughly. In the first place, it tends to uplift the whole character of a nation. The government of colonies compels a country to wider and broader policies and national thought because of the further responsibilities which are incurred. Instead of spending every moment of its time in the consideration of parochial or local matters, the holding of colonies imposes an onerous trust upon a homo Government, the carrying out of which undoubtedly helps any administration, because of its broadening influences, and these influences will always permeate with advantage through the country which gives them rise.

"Another factor worthy of the deepest consideration, that is, if you took the Philippines, it would make it manifest to the world that you do not intend to be left out of the Pacific and China trade. The tendency of recent events, as you well know, has been to close China, which has hitherto been open—to close its ports to the United States and England. The efforts of the British Government have been to keep the ports of China open, and most assuredly it is to the interest of the United States that those ports should be kept open."

Mr. Chamberlain's attention was then diverted to the subject of the talked-of alliance between the United States and Great Britain. "I think," he went on, "that a somewhat extreme view has been taken in some quarters of the desire to establish the best friendly relations between the two nations. So far as I understand the question there is no proposition of a hard and fast formal alliance proposed. A regularly drawn up and signed treaty is not suggested, so far as my knowledge goes. What the English people desire is no more than a complete understanding and amicable relations between the two countries. If we can only understand each other better, as I think truly that we are beginning to do, and if we find that our mutual interests will be benefited by knowing one another better, I think that a perfect unity between the two countries will be developed without the aid of any formal alliance. I can say with certainty that ninety-nine out of every hundred people in England are eager that there should be some sort of tacit friendly agreement between their nation and yours. The English people are ready to enter into such an agreement so far as you wish to carry it. How broad it shall be or how restricted depends entirely upon the American people."

Presbyterians Greet the Methodists in Their Big Conference.

FROM THE GENERAL ASSEMBLY.

Rev. Dr. Torrance, Moderator of That Body, and Prof. Caven Deliver Heartfelt Good Wishes to Their Brethren, and the Latter Asks: "Shall There Be Further Union?"

Toronto, Sept. 9.—After devotional exercises yesterday at the General Conference of the Methodist Church, the Church Union Committee recommended the appointment of a committee to confer with other denominational bodies with regard to a union. The names recommended for this committee were: Dr. Carman, Dr. Henderson, and Messrs. Henderson, Hilliard, George and Richardson.

A Presbyterian Delegation.

Rev. Dr. Shaw presented Rev. Dr. Torrance, moderator of the Presbyterian General Assembly, and Dr. Caven, principal of Knox College, to the General Conference. They came as representatives from the General Assembly.

Rev. Dr. Torrance was first called upon. He conveyed the congratulations of the General Assembly of the Presbyterian Church, and thanked the conference for its kind greetings of last June. He was glad to see Dr. Carman in the presidential chair. His face had not been a "Kent" face to him, but his name was a "Kent" name. He was glad to be before a body representing so large a portion of the earth's surface as did the General Conference. Dr. Torrance then spoke of the marvelous growth of Methodism, and in closing, conveyed the good wishes of the General Assembly to the conference. "Go on and prosper," was its message and heartfelt hope. He presented Dr. Carman, before retiring, with the 24th report of the General Assembly.

"A volume," said Dr. Carman, "which must rank, I suppose, next to the Acts of the Apostles."

Dr. Caven, on coming forward, said their appearance here was not to be regarded as mere formality, but the outcome of a sincere wish on the part of the Presbyterian Church to cultivate the friendship of the Methodist body. He would not say what might be the final result of the good relationship that now existed. Methodism and the Presbyterian Church should not be shy of each other. With regard to the grand fundamentals, they stood shoulder to shoulder. "Shall there be any further union?" asked Dr. Caven, and the audience greeted the suggestion with applause. It was a delicate subject. Unity was not everything. But it is a good deal, and Dr. Caven saw no reason why the Church of Christ should not have room for every kind of Christian —the lively Methodist and the slow Presbyterian. Dr. Caven concluded as Dr. Torrance had done, with sincere wishes for the growth of the Methodist Church.

Is That Assimilation?

Dr. Shaw thereupon moved, seconded by I. A. M. Aikens of Winnipeg, a resolution "That we hereby record our great satisfaction in listening to the honored representatives of the Presbyterian Church in so ably presenting to us the Christian greetings of the same church. We now declare that in such fraternal fellowship we find more than a mere interdenominational courtesy. Our cordial esteem for the Presbyterian Church amounts to warm Christian love. We recognize that under God, and, as we believe, by the guidance of the Great Head of the Church, the Presbyterian and Methodist Churches of Canada are being rapidly assimilated in thought and spirit and method, and we are convinced that in such approximation of the two leading churches of our Dominion there is an encouraging guarantee of the continuance of an active evangelical influence which must result in the highest development of Christian intelligence and morality. We beg to assure the Rev. Dr. Torrance and the Rev. Dr. Caven of our loving esteem for themselves personally and for the great church which they so worthily represent, and of our prayerful desire that the Presbyterian Church may increase a thousand fold more not only in numbers but in that devotion to God and truth, based upon intelligent conviction, which has been the glory of Presbyterianism through its entire history."

W.C.T.U. Deputies.

Dr. Griffin introduced a deputation representing the W.C.T.U., consisting of Mrs. Rutherford, President of the Union, and Mrs. Dr. Bascom, both of Toronto.

The Dominion Alliance.

Dr. Griffin also introduced Dr. Patterson of Cooke's Church, Major E. L. Bond of Montreal, a member of the Church of England, and Rev. P. C. Parker of Toronto, a Baptist, all three representing the Dominion Alliance.

Four or Five Years.

The first report of the Itinerancy Committee, dealing with the length of the pastoral term, was presented. The proviso in subsection 4, par. 140, page 65, of the discipline is to be amended so as to read as follows: "Provided, however, that at the request of a Quarterly Board, expressed by a three-fourths vote of those present, and voting by ballot, at a regular meeting, the Stationing Committee may appoint a minister to a circuit or station for four or five years in succession." It condemned all memorials, resolutions and notices of motion referring to the abolition or regulation of what is known as the "Invitation System," though it is recommended that no action be taken thereto.

The Evening Session.

The evening was set aside for the formal reception of Dr Bond, the British Methodist representative, and Dr. Coke-Smith, the delegate from the Methodist Episcopal Church South. The other fraternal delegate, Rev. Mr. Raymond, who represents the Methodist Episcopal Church in its northern branch, will be heard next Tuesday. Naturally the evening session attracted the greater amount of attention, and the brilliant orations of the leading speakers of the evening were delivered to the largest and most appreciative audience yet seen at the present conference. The meeting, though public, retained the nature of a session of conference also—an arrangement which did not sacrifice any of the valuable time of the conference. The effect of the meeting was most salutory in bringing different branches of the great organism of Methodism into close and visible touch.

UNDER TWO FLAGS.

British Military Manoeuvres Carried Out on Salisbury Plain Under British and Yankee Flags.

London, Sept. 9.—The Stars and Stripes were raised yesterday with the British Union Jack and the Royal Standard on the Marquee erected on Salisbury Plain during the march past of the troops at the end of the army manoeuvres, as a compliment to Col. Alfred Bates, the United States military attache, and Mr. Henry White, the Secretary of the United States Embassy, and Mrs. White, who went there by a special train with Lord Wolseley, the commander-in chief of the British forces, Princess Christian, the Duke of Connaught and other notabilities. The foreign military attaches seemed to be surprised at the sight of the American flag.

A committee of the Anglo-American League, headed by its chairman, Mr. James Bryce, presented the United States Ambassador, Col. John Hay, yesterday, with an address, congratulating him upon his acceptance of the portfolio of Secretary of State at Washington. The address in part says:

"It is your fortune to represent your country here at a time of exceptional interest, when the war, now happily ended, gave occasion for the expression of the feelings of affection and sympathy towards the United States which the British people have long entertained, but never before have they been so conspicuously manifested. You carry back the assurance of the depth and strength of these feelings. The principle that there ought to be a permanent friendship and cordial co-operation between the British Empire and the American Republic is one that all parties and all statesmen here agree in regarding as a fundamental principle of British foreign policy, and by it the whole people desire that this Government should be guided."

Col. Hay, in reply, referred to the gratification he experienced in hearing such words from men so qualified by experience and character to speak for the British with certainty. He added:

"My voice has no such sanction as yours, but I give it for what it is worth, to assure you that your sentiments of kinship and amity are reciprocated to the utmost in my country.

"On both sides of the ocean the conviction is almost universal that a clear, cordial and friendly understanding between Great Britain and the United States is a necessity of civilization. I shall hold myself signally fortunate if I am able to do anything to continue and strengthen the relations of fraternal amity between our two nations."

Englishmen After Our Beer Factories.

Montreal, Sept. 9.—It is said here that the Montreal breweries are about to pass into the hands of an English syndicate, and negotiations to that end are actively progressing. It is stated that gentlemen representing an English syndicate are examining the books of the various brewers with a view to their purchase and the formation of one large combine.

THE ONLY HOPE!

For Victims of Bright's Disease is Dodd's Kidney Pills.

Not a day passes on which the newspapers do not record the death of one or more persons from Bright's Disease. Already its victims number hundreds of thousands. Day by day the awful total grows larger. No class is safe from this destroyer.

War and intemperance, with all their miseries and fatalities, are not responsible for as many deaths as have been caused by Bright's Disease. Yet, there is a way of resisting it; of drawing its poisoned fangs, and making it as harmless as a summer breeze. That great medicine, Dodd's Kidney Pills, has cured thousands of the worst cases. It never fails to cure, hopeless as the case may seem.

Would you safely shield your loved ones from the fatal grip of this curse of mankind—Bright's Disease? Then use Dodd's Kidney Pills, the only cure on earth for this disease.

Drowning Accident.

The details of a sad drowning fatality at Ball Point, on the west side of Sturgeon Lake, reached town last evening. An aged farmer named John Campbell, who resided near the landing, was the victim. He went fishing on Monday afternoon in a punt, contrary to the desire of his relatives, who feared an accident owing to his feeble state of health. When he did not return in the early evening a search party was sent out and other fishermen joined in the quest. About an hour later a boat was found by Napoleon Dusealt, of Lindsay, and John Atkinson, of Ball Point. Campbell's body was towing alongside, being fastened to the rowlock with a small rope. Some think think the old man committed suicide, while others believe that, feeling a weak spell coming on, he tied himself to the boat and afterwards fell overboard. The deceased leaves a large family.

MOONLIGHT ON THE RIVER.

Employees of the Golden Lion Spend a Merry Evening on the Otonabee.

Mr. Robt. Fair, of the Golden Lion, generously treated his employees and their friends to a moonlight trip down the river last evening on the City of Peterborough, which had a palace barge attached for the occasion.

About forty of those in attendance were employees in Mr. Fair's large establishment, and fully seventy more were invited as guests of the evening.

It was one of the merriest parties of the many which have gone down the river this year, and the mirth and gaiety were was kept up until midnight. Dancing was indulged in from eight until twelve o'clock, uninterruptedly, with the exception of an intermission of about half an hour, when refreshments were served.

MATTHEWS CO. PICNIC.

The Employees and Their Friends Enjoy Their Annual Outing on the River.

The annual picnic of the Geo. Matthews Co'y was held yesterday at Jubilee Point, the steamer City of Peterborough taking down a big crowd. The fun surpassed even that of former years.

On arriving at Jubilee the baskets were opened and after the wants of the inner man had been satisfied, sides were chosen and a game of football played. At the conclusion two opposing nines were picked for baseball and an interesting and closely contested game took place.

The excursion party reached home at about eight o'clock thoroughly satisfied with the day's delightful outing.

PERSONAL.

Miss Thornton, of Omemee, is visiting friends in town.

Mr. Bruce Rickey is down from Toronto for a few days.

Mr. J. C. Ardagh, of the Bank of Toronto, Toronto, is here on relieving duty.

Mr. J. F. Daly, of Orillia, formerly of Peterborough, is in town visiting friends.

Mr. and Mrs. F. E. Hatch were in Omemee during the week visiting friends.

Mr. and Mrs. W. Fleming have returned home after a pleasant visit with Lindsay friends.

Mr. and Mrs. Carson, of Peterborough, are guests of Mr. and Mrs. Chas. Collins, West Ops.—Lindsay Post.

Mr. J. D. Tully has returned from Toronto where he has been attending the Exhibition for the last few days.

Mr. Skill, of the Bank of Commerce, is in the Nicholls Hospital suffering from a severe attack of typhoid fever.

Mr. John Lang, M.P., and Mr. Thos. Blezard, M.P.P. have been in Toronto for the last few days attending the Exhibition.

Mrs. J. Thorne has returned to town after spending several weeks with relatives in the vicinity of Newcastle, Kendal and Perrytown.

Mr. and Mrs. McDonald, of Detroit, who have been the guests of Mrs. Jas. Stratton, Gilmour street, for some days, returned home this afternoon.

Mrs. J. D. Armstrong, Miss Marian and Vera have returned to town after spending a few weeks with friends in the vicinity of Port Hope and Garden Hill.

Mr. Thos. Parrington and daughter, Miss Ellen, of Cambray, passed through town to-day on their way to visit Mount Pleasant and Peterborough friends.—Lindsay Post.

Dr. Morris, of Vernon, who, with Mrs. Morris, has been visiting at the residence of Mrs. Jas. Stratton for the past week or so, returned to the West yesterday, Mrs. Morris will remain in town several weeks longer.

The Omemee Mirror says: Mr. John Donaldson, formerly of South Monaghan, and nephew of Mr. George Morrison, has leased Mrs. Jas. Thornton's farm for a term of years. We welcome Mr. Donaldson and family to Emily and Omemee, and congratulate him on securing such an excellent farm.

Inspector Errett is in Lindsay, his business being to inspect and measure local steam yachts. Lindsay having been made a port of entry by the Dominion Government, steamers and yachts will now have to be registered with Mr. Wm. Lownsborough, collector of customs.

The Lindsay Post says: Mr. Geo. Burrell, of Chebanse, Ill., about 60 miles south of Chicago, is in town visiting his brother-in-law, Mr. J. S. McCarty. Mr. Burrell lived in the neighbourhood of Port Hope and Peterborough many years ago, and will be remembered by old residents of those towns. He removed to Chebanse in 1864 and purchased 600 acres of prairie land at $5 per acre, the value of which has since advanced to $80 and $100 per acre.

New Line of Steamers.

The Railway & Shipping World of Toronto says: It is said a scheme is on foot to place a complete line of steamers on the chain of waters from Lindsay to Peterborough and from Coboconk to Peterborough. The project as put forth has been received with approval by the owners of the boats on Stony Lake. The object is to incorporate into a company the owners of all steamers now on the waters in order that a much better service may be arranged.

The Royal Five.

The Royal Five Gold Mining Co. held their annual meeting Sept. 1st, at Roseland, and was most successful. 30,000 shares were taken by the original stockholders, and 100,000 shares by a syndicate. This will leave few shares to be sold at 10c. Active development is going on in the old and the new properties. An advance in price of shares is looked for, as the properties are of the best in British Columbia. The four new mines in Lardeau show $276 96 to the ton.

BACK FROM THE WAR.

A Peterborough Boy who Enlisted in a United States Regiment—In Camp for Nearly Three Months.

Private George Might, of the 56th New York Volunteers, arrived home last night on a month's furlough, which he will spend with his parents at No. 782 George street.

George is a graduate of "C" School and holds the rank of sergeant in the local battalion. About the middle of June he decided to endeavour to see a little actual warfare and crossed over to Buffalo, where he enlisted in the 65th New York Volunteers, under Col. Welsh.

The day after he joined the United States forces the 65th was ordered to Camp Alger in Virginia, situated about seventeen miles from Washington.

The 65th was composed of twelve companies and aggregated 1,300 men, including the band. United with the 7th Ohio and 1st New Jersey Regiments, they formed the 1st Division of the 1st Brigade of the 2nd Army Corps.

Twelve other regiments of the same strength were included in the camp, making a strong force, and for miles around the country was dotted with similar encampments.

In Camp Alger the men suffered greatly on account of the poor quality of the water which was furnished them, and the hospital tents were kept full. The food was also poor, consisting of hard tack, "sour belly" beans and coffee. Affairs finally came to such a pass that the camp was shifted to Dunloring, a point about four miles away. Here the men were looked after better, the commissairt improved, roast beef, beefsteak, potatoes and bread being furnished the troops.

The Brigade was under orders several times to go to the front, but the orders were always countermanded before they went into effect, so that whilst the troops endured all the hardships of war, they missed the glory.

Private Might will report at camp on Oct. 6th, when the men will probably be mustered out.

FUNERAL OF THE LATE JOHN CRAIG.

The Member for East Wellington had Many Friends—Beautiful Floral Offerings—Prominent Men Present.

Fergus, Sept. 8.—The funeral of the late John Craig, M.P.P., this afternoon, from his beautiful home in Fergus, was very largely attended, there being representatives from all parts of the country in addition to very many from the village and vicinity. Out of respect and esteem the stores and schools were closed and all business suspended during the funeral hour. At 2 p.m. religious services were conducted by Rev. Mr. Harvey, of the Methodist church, to which deceased belonged. Bros. Mullin and MacVicar assisted. Revs. Bollon, of Belwood, McGinnis, of Elora, Mr. Sparks of the English church, Fathers Dougherty of Arthur, and another priest were also present. The coffin was covered with flowers, one beautiful rose wreath being from the Ontario Government and another from the I.O.O.F. here, of which deceased was an old member. The pall bearers were Oddfellows: Bros. Mills of Hamilton, Burke of Fergus, Springer of Elora, Hull of Erin and McIntyre of Grand Valley. The Oddfellows' service was read by Bros. Nichols of Fergus and Clarke, D.D.G.M. of Elora, Dr. Anderson, acting as Marshall.

WARNING TO BOYS.

Any of them Creating a Disturbance in the Opera House Arcade will get into Trouble.

Six young lads were in the police court this morning for creating a disturbance in the Opera House arcade.

These young rascals have become such a nuisance around the arcade, that with Mr. Bradburn patience had ceased to become a virtue, and last evening he summoned the police, when one of the lads was captured, and the names of his companions secured through him.

When brought before R. S. Davidson, J. P., this morning the boys were sharply reprimanded, and though allowed to go on suspended sentence, were assured that if the offence was repeated it would mean a month in gaol for them.

The noise which can be created in such a place as the arcade by a few boys can not be realized unless heard.

RUGBY FOOTBALL.

The Game will Boom in Town this Year—The Local Club Re-organized Last Evening.

A large and enthusiastic meeting was held in the parlours of the Oriental Hotel last evening for the purpose of organizing the Rugby Football Club.

From the attendance and enthusiasm displayed, there is no doubt but that the town will have a winning team this year, and that the lovers of this many sport will be treated to some good matches.

The meeting opened at 8 o'clock with Mr. Fred LeFevre in the chair.

The first business brought up was the selection of grounds, and after some discussion the following committee was appointed to examine grounds and report at the next meeting: W. D. Parker, M. Hamilton and F. LeFevre.

A committee composed of J. H. Burnham, A. J. McClellan, G. Bell and V. McWilliams was chosen to arrange the finances.

The election of officers was then proceeded with, resulting as follows:

Patrons and Patronesses—Dr. and Mrs. Bradd. Dr. and Mrs. King, Mr. and Mrs. McGill.
Hon. President—J. R. Stratton, M. P. P.
President—R. B. Rogers.
1st Vice-President—W. D. Parker.
2nd Vice-President—W. Stocker.
Chaplain—Rev. V. Clementi.
Manager—M. Hamilton.
Secretary—A. J. McClellan.
Treasurer—A. A. Hollingshead.
Captain—V McWilliams.
General Committee—H. Burnham, G. Bell, W. J. Montgomery and R. Glover.

A vote of thanks was passed to Mr. Geo. Graham, the genial proprietor of the Oriental, for the use of the parlour.

Much regret is felt at the loss of Fred Lefevre, who has always been one of the club's hardest workers, and whose absence will be felt severely both on the field and in the managing of the club's business.

"KIT'S" CALAMITY.

The Mail's War Correspondent Shot Through the Heart—by One of Cupid's Arrows.

Mrs. Kathleen Blake Watkins, well known to Canadian writers as "Kit," of the Toronto Mail and Empire, was married at Washington on Thursday last to Dr. Thos. Coleman, a man of wealth. The Hamilton Times in noting her second venture on the sea of matrimony, breaks out as follows:—"Here's to you, 'Kit.' We can't pretend that we are greatly impressed by your work as a war correspondent, but the end of your campaign is more glorious than that of Shaster's. We wondered why all the glorious sunshine, the rosy dawns, the gorgeous sunsets, the rippling rills, the twittering birds, the dew kissed flowers and the perfume laden zephyrs were introduced to 'Kit's' war readers—but it's all as clear as mud to us now. The dear girl was in love! And after looking over the field and viewing the mistakes of Shafter and Wheeler and Toral and Garcia, she moved to Washington, a vision of rosy cheeks and auburn locks and roguish eyes and pearly teeth, and lo!—and—things—and lo! she now leads the enemy a hymen-bound captive at her chariot wheels! Here's looking at you, 'Kit.' Long life and happiness—and more like you!"

THE MATTHEWS COMPANY.

IMPORTANT IMPROVEMENT AND ENLARGEMENT OF THEIR BUILDINGS.

Great Addition to Their Facilities—An Artificial Refrigerating System and Plant to be Installed—The Merits of the New Plan—Work Already Begun.

The George Matthews Company (limited) has begun work upon very important improvements to be made to in their buildings and equipment, to meet the great expansion of their business. When the work is completed and the increased facilities are available the establishment will be in a position to handle its output with much greater ease.

The chilling facilities are to be enlarged in area by the addition of a space in the rear of 30 x 60, and the whole of the resulting building is to be raised throughout twenty feet in height.

Natural ice having proved unsatisfactory to meet the requirements of the business, the supply being naturally

PRETTY WELL EXHAUSTED

in the late summer and early fall at a time when it is most needed, the Company has decided to put in an artificial refrigerating plant, which represents a gain of speed in chilling of about 25 per cent., besides being under control and always available. Independently of natural ice supply. The cost of the new system is much greater than of natural ice, but the results in facilitating the operations of the company will more than compensate. The refrigerating department occupying three stories, is separated from the manufacturing department by a fire wall extending from the ground to the roof.

Under the new departure the three stories of the chilling, cutting and storage departments is provided with a system of iron piping, which is utilized for the employment of the vapour resulting from the extreme

COMPRESSION OF LIQUID AMMONIA,

which passes through the system of piping at the temperature of about zero. There are about two miles of two inch pipe employed, and the steady, equable and unvarying chill is exactly what is required to give the best results. Of course the means mentioned simply indicate the principle of the use of ammonia for producing chilling temperature. There is expensive machinery associated with the process, which it is unnecessary to describe. The results are what the Company and the reader are interested in, and these are certain to be of a most satisfactory character. The company will be able to largely increase its operations, employ more labour and in a general way emphasize the importance to the town of the presence of a manufacturing establishment such as the Matthews Company operates with so much enterprise. The work has already been begun; the contracts having been let for the excavation to Mr. T. A. Rohill; for the stonework to Mr. A. R. Robson, and Mr. Jas. Graham will have charge of the interior work, which will necessitate the employment of day labour. The work will be pushed with greatest possible despatch.

MR. BURNHAM'S REPLY.

To the Editor of The Examiner:

DEAR SIR:—The reply of Mr. Davis to my letter of complaint against him for his disregard of the three men who are entitled to certificates of bravery is such as to show at once that he repents but has not the manliness to apologize. I asked Mr. McWilliams this morning what he thought of Mr. Davis' report of his interview with him and he replied: "I told Mr. Davis straight that I thought he was to blame." Then as to Mr. D's report of our conversation in Mitchell's barber shop, I went back an hour afterwards and asked young Mr. Mitchell if my action, words or manner had been in any way uncivil and he said "no," but I thought from Mr. Davis' peculiar conduct that he must have been mad with you for something which occurred before you came in, for certainly you said nothing to make him mad here." Mr. Mitchell still further expressed himself as quite surprised at the Mayor's demeanour. You will see, Mr. Editor, that I have corroborative testimony. Mr. Davis certainly has none, and I challenge him to appeal to either Mr. McWilliams or Mr. Mitchell, jr., or both. The fact is his conduct took my breath away, as from the facts of the case, and old acquaintance, I expected some courtesy. However, Mr. Davis says, "I have no apology to make." I charge him further with a deliberate misreport of our conversation, and when we take into consideration the fact that it was Mr. McWilliams and not I who had arranged for the presentation by the mayor, the latter's defence becomes as silly as it is discourteous and untrue. Were it not for its being an insult to men, who unlike Mr. Davis, are entitled to be taken seriously and who have received a decoration that is above all other titles or badges whatsoever, being an award for unselfish valour, I should have allowed the incident to pass as a piece of ignorance on Mayor Davis' part, which indeed it is; but, since Mr. Wallace has felt the insult so keenly, as it treats lightly instead of recognizing the value of the deed itself, I have felt called upon to explain the nature of the failure to carry out the presentation. Mayor Davis never mentioned Friday night, but shut me up without ceremony, and there he hoped the matter had ended. Some men cannot stand greatness.

Yours truly,
J. H. BURNHAM.

PROHIBITION.

To the Editor of the Examiner:

For the first time in the history of the Dominion of Canada, the question of national prohibition is a live issue in practical politics.

The first minister on behalf of a government and party that control the House of Commons, has promised that the electors of Canada shall be asked whether or not they desire to have the liquor traffic prohibited, and that the response of the electors shall be accepted as a mandate and obeyed.

There is no indefiniteness in this promise. Its fulfilment is not conditioned upon any other possible exigency. There is no unsettled question of jurisdiction that might interfere with its being carried out.

Parliament has unquestioned power to take the vote and to enact the prohibitory law which the people are thus authorized to demand.

PARLIAMENTARY OPINION.

As far as Parliament is concerned, there has been no more direct approval of the principle of prohibition than before existed. The soundness of that principle has been repeatedly affirmed. In 1884 the House of Commons adopted a resolution denouncing the traffic in alcoholic beverages as productive of serious injury, declaring the evils of intemperance to be a social peril and a national menace, and concluding as follows:

"That this House is of the opinion, for the reasons hereinbefore set forth, that the right and most effectual remedy for these evils is to be found in the enactment and enforcement of a law prohibiting the importation, manufacture and sale of intoxicating liquors for beverage purposes; and this House is prepared, so soon as public opinion will sufficiently sustain stringent measures to promote such legislation, as far as the same is within the competency of the Parliament of Canada."

The majority by which this resolution was carried was 52. A similar resolution was adopted without a division in 1889. No steps were, however, taken by Parliament towards ascertaining what was the public opinion regarding prohibition. This is now about to be done. The new Government proposes to substitute definite action for academic deliverance, challenging Parliament to effective embodiment in legislation of its former avowals.

THE ISSUE.

In the contest thus brought on we have nothing to do with the question of the plebiscite plans.

That plan is a fact, and it sets us face to face with a duty so important that it seems almost criminal to give time or thought to questions already disposed of while the direct issue is before us.

The liquor traffic stands at the bar of the highest court of the realm; all technicalities have been swept away; and the jury of the electorate have the question of life or death of that traffic absolutely in their own hands.

It is not the Parliament but the people who must decide now and upon which this tremendous responsibility rests.

Intemperance is a curse. No one can dispute the fact. Beyond all conception is the awful suffering entailed by this festering sin, that crushes and corrupts and tortures and damns in thousands of hidden places, making hell upon earth of once happy homes, destroying innocence and virtue.

Prohibition is the only cure. It is the only axe that can strike at the root of intemperance.

Prohibition is right. Prohibition is profitable. Prohibition is desirable.

The question to be decided is whether or not the growing sense of the community has reached the point where there would be general approval of a prohibitory law.

This will be determined by the coming plebiscite.

Signed, F. S. S.

AUTUMN MILLINERY.

The New Shapes and Shades for the Fall and Winter—Plenty of Velvet to be Used.

On Monday of last week the wholesale milliners formally opened their warehouses for the autumn trade of 1898. The number of visitors was unusually large, and their more abundant purchases and particularly the free selection of expensive goods, indicate improved industrial conditions throughout the Dominion, and retail millinery shops are becoming a centre of attraction.

A brief summary of the more conspicuous features of the new millinery may be interesting to our fair readers.

In shapes there seems to be no decided change. Many jaunty bicycling hats are seen with low round crowns and soft rolling brim; when becoming to the wearer they prove a relief from the favourite Alpine and walking hats, which are too masculine for some tastes. The proper way to wear the new winter hats, by the way, is not so far over the forehead as formerly. Many of the most handsome pattern hats are turned back from the face, not in so extreme a manner as last winter, but this effect is given more by means of the trimmings, falling most gracefully from the front towards the side and back.

As it seems impossible to obtain in felt this soft effect easily accessible in straw, the velvet shape, though more expensive, is growing to be the most popular.

This will be a velvet season. Plain, miroir, corded, stitched and plaited in fine plaits laid in cross folds will be seen everywhere. Velvet is the all absorbing material, whether used as material for construction of the shape or in trimming the hat. Many handsome squares of embroidered velvet are shown for crowns, these should make up very effectively.

The embroidery is almost entirely black occasionally brightened with steel. Other fancy velvets in stripe and plaid make most becoming trimmings, as do the shirred chiffons with black velvet baby ribbon forming a stripe down each shirring. These are shown in all colours, and are especially new and pretty. In ribbons we see again the effect of velvet and silk combined in checks. Velvet ribbon in the very narrow width, and the handsome wider ribbons are used to the neglect of medium widths. But we can leave the ribbons for summer wear; those whose conscience and pocket-book can afford it will have hat of feathers or wings. Certainly we cannot help but admire the clusters of wings, graceful sprays and stately plumes. Nothing can give such beauty or elegance, and combined by the milliner's touch with the charming new velvets, every woman must long to throw aside the now faded flower gardens for the richer beauty more suited to winter.

Not for years has there been such a demand for fancy feathers. There is something different from previous ideas in every line of this season's goods. Some of the more expensive breasts, quills and wings necessitate the handling of innumerable small pieces of feathers to create an entire article. Goods of this description retain their value, and are not likely to become common. Although birds find a place on many of the most admired new models, feather effects are the more popular.

Any description of the season's millinery would be incomplete without mention of the very handsome quills shown everywhere; they have almost as rich an effect as the ostrich plume; and more suitable for the chapeau, and expensive enough not to become common. Buckles and long fancy pins make stylish ornaments, though the latter are somewhat newer and exceedingly pretty. Few flowers are shown; the occasional rose or foliage always adds brightness to some sombre shade in trimming.

The royal blue is a favourite colour and should be more serviceable in winter than summer, as the strong sun and dust of summer soon turn this charming shade to a dingy gray.

NO LACK OF FIGHTERS

The native troops in the Soudan, commanded by British officers, seem to have borne themselves with as much courage and intelligence as the British troops proper. There can no longer be a doubt that if, unfortunately, Britain should be compelled to exert her strength in a great war, the ranks of her armies would be filled by men of every colour and every creed, drawn from every corner of the earth. There is no part of the Empire which may not be depended upon in an emergency to supply troops for the defence of the flag. And in the crisis of battle the Sikh or, the Goorka, the Zulu or the Fellah has but one ambition, that is to prove that he is as good a fighter as the white man who fights by his side.

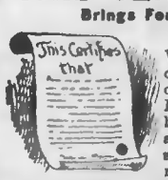
THIS CERTIFICATE

Brings Forth a Story.



BOWMANVILLE, ONT.

We, the undersigned, certify that the health of the Rev. R. A. Bilkey has for months been deteriorating, and that he is now suffering from severe nervous prostration, and urgently requires immediate and prolonged rest. J. W. McLaughlin, M.D., A. Beith, M.D., L. Holland Reid, M.R.C.S., etc.

THIS INTERVIEW TELLS IT.

A reporter called on the Rev. R. A. Bilkey, rector St. John's (Episcopal) Church, Bowmanville, Ontario, during a church function, and on congratulating him on the great change for the better in his appearance, the reverend gentleman said, "It is due entirely to Dr. Ward's Blood and Nerve Pills.

"I suffered for over three years from extreme nervousness, weakness and prostration, and could not obtain relief. A few months ago it became only too apparent that extreme nervous prostration had set in, as I lost flesh and appetite rapidly. Three of our four medical men pronounced me in urgent need of immediate and prolonged rest in order to build up my nervous system, giving me a certificate to that effect. About this time, by pure accident, Dr. Ward's Blood and Nerve Pills were brought to my notice. I decided to try them, and on doing so a decided change for the better took place at once. I have since continued taking the pills, with continued and marked benefit and improvement. My appetite has returned. I am gaining in flesh steadily, and my general health is now good. Further, I am sure that these results are due to the action of Dr. Ward's Blood and Nerve Pills, and I have every confidence that they will do for others all that they have done for me."

Dr. Ward's Blood and Nerve Pills are sold at 50c. per box, 6 boxes for $2, at Druggists, or mailed on receipt of price by the Dr. Ward Co., 71 Victoria Street, Toronto. Book of information free.

GLADSTONE AS A CHEMIST.

An Incident In the Grand Old Man's Career In the Commons.

If Mr. Gladstone seldom indulged in sarcasm, it was not because he lacked the gift—for he possessed it in a high degree—but because he forbore to use it. To hurt an opponent's feelings gave him pain and when he did it unintentionally he would sometimes cross the floor of the house, and, sitting for a few moments by the side of the man whom he had just demolished, say something to assuage the wound. One of his most persistent, but never ill natured, critics was the late Sir John Pope Hennessy, who told me the following story to illustrate this generous trait in Mr. Gladstone's character.

Sir John prided himself on his knowledge of chemistry, and in one of the debates on the commercial treaty with France he made a speech exposing, as he believed, a serious chemical blunder in the treaty. Mr. Gladstone followed, "and soon turned me inside out in the most amusing manner," said Hennessy in relating the story, "proving, as if he had been a chemist by profession, that it was I who had blundered egregiously."

Having thus disposed of his critic, Mr. Gladstone went and sat by him for a moment. "I hope you don't feel hurt, Mr. Hennessy," he said. "Your speech was ingenious, and it may console you to know that the emperor of the French made precisely the same objection that you have made. The fact is, both you and he know a good deal about chemistry, but not enough to keep you from going astray."—Canon McColl in Fortnightly Review.

Mr. Joseph Chamberlain Here.

New York, Sept. 8.—The Rt. Hon. Joseph Chamberlain, Secretary of State for the British Colonies, arrived here last night on the Majestic. He was accompanied by his wife and Miss Chamberlain.

Mr. Chamberlain remarked that his speech at Birmingham was about all he cared to say regarding an alliance between the United States and Great Britain.

Petrolea Man Hurt.

Toronto, Sept. 8.—William Stewart of Petrolea was riding north on a belt line car on Spadina avenue yesterday, leaning out, and his head struck a trolley post, knocking him senseless. The car was going slowly, and that was the only thing that saved Stewart's life.

One of the tallest stacks in Great Britain is situated at Llanelly. From the base of the foundation to the extreme summit is 400 feet high. The cap of the top weighs 27 tons, and 720,000 bricks were used in its construction. It is circular in form, and in a gale bends extremely.

ALIVE IN THE GRAVE.

THE CHANCES FOR SUCH A FATE ARE EXTREMELY REMOTE.

In Times of Plague and Pestilence the Greatest Danger of Premature Burial Exists—The Death Test That Is Applied In Vienna.

Most of us have a lingering love of life, and the thought that there is just the barest possibility of being buried alive sends a shudder through us.

Medical men know that the human body in time of illness and at other times, too, is liable to assume all the outward appearances of death without the final separation having actually taken place. There are the coma, cataleptic and other forms of the unconscious state, each one bringing in its trend the very simulation of death itself.

"Happily, a medical man nowadays," said a physician to a reporter, "experiences no difficulty in declaring his patient to be dead, as a general rule, but it may perhaps happen once in his lifetime that he may have a doubt, in which case conviction either way follows upon his findings, which are simple and conclusive, and in which he cannot be mistaken.

"It is unfortunately true that there are thousands of nervous people now walking about in fear of being buried alive, this morbid conviction coming about through reading of an isolated case happening here and there, where perhaps some one has had a narrow escape of being subjected to a living burial.

"These 'escapes' greatly outnumber those of the actual occurrence itself. The cataleptic usually show signs of life just in the nick of time to disappoint the undertakers and to relieve sorrowing friends.

"Of course, much of the evidence on which the allegation of premature burial is based depends on the fact that bodies on exhumation have been occasionally found distorted, thereby fostering the notion that this or that occupant of the coffin has died from suffocation, a theory which is supported by the favorable condition of other exhumed bodies.

"But the idea is altogether wrong, in fact and in principle. It is well known among those who have made it a study that the apparent distortions, instead of demonstrating a living burial, purely depend upon natural causes brought about by decomposition, the influence of which is sufficiently strong enough to bulge out, and even burst, leaden coffins. This phenomenon does not happen in every case, but it does in a great many.

"No, no! I shall not go so far as to say that a premature burial has never taken place, but it has not occurred so often as is thought. I dare say it may occur in times of plagues and pestilences, where the presumed dead are buried within a few hours of death. That is where much mischief lies. But when panic prevails where does thought come in?

"In plagues, such as cholera, the state of collapse is so profound that it may perfectly simulate death itself, but the custom of burying the dead on the day of death is fortunately on the wane, even during advanced epidemics. It is probable that in the absence of medical aid in panic times in country places abroad it has led to living burial—indeed it must have done. But the last end of all under such conditions is merciful, for it must not be forgotten that if you are 'unconscious' only while being hermetically sealed in your coffin you will never again experience voluntary motion or sensation.

"However, where the doctor can be consulted, living burial is impossible even in a cholera panic, for there are certain bodily movements which generally occur after death from cholera, in the absence of which a medical man would hesitate to certify for burial.

"In ages gone by and in uncivilized countries still it is possible that unconscious cataleptics, or persons drugged to apparent death, may have been and perhaps still are occasionally buried alive, but I do not believe that in our own country or in any civilized land such events are possible.

"In Vienna the custom prevails of taking a body to the mortuary on the eve of burial, where it is 'tested.' Thimbles are placed on the fingers of the dead, to which are attached wires connected with the mortuary bells.

"Have the bells ever rung? Yes, once.

"It is impossible for a doctor to mistake unconsciousness in its varied forms for death.

"Some time ago it was suggested that a law should be passed making it compulsory for a medical man to test bodies before giving a certificate of death. Testing by electricity was thought of, but it is an open question yet whether electricity kills or only stuns. At all events, we in this country are not convinced that such a test would be satisfactory or afford sufficient evidence of death, although it has its value. On the other hand, I don't think legislation of this kind is necessary. It would certainly reflect upon the medical profession.

"The Viennese custom is a wise one, and I should like to see it more generally adopted."—Pearson's Weekly.

STRONG ANTI-CHINESE POLICY.

Attorney-General Martin Indicates the Intentions of the New Government.

Victoria, B.C., Sept. 8.—Much talk has been created here by the outspoken utterances at the Labor Day celebration at Nanaimo, the centre of the coal mining industry, by Hon. Attorney-General Martin, who declared that the full penalty of the law would be inflicted for the employment of Chinese underground. Mr. Martin added that he hoped in a short time that announcements would be made that the Government was taking action which would go to the root of the Chinese labor questions. Nanaimo is strongly anti-Chinese, and the declaration of the new Government was hailed with enthusiasm by the hundreds present.

Absent, But Charged With Forgery.

Toronto, Sept. 8.—The estate of John Lorigan, an insolvent furniture dealer of Montreal, is not satisfactory to some of the creditors, and Messrs. Smellie & Shaw, solicitors for the Furniture Association, have preferred a charge of forgery against Lorigan. A statement was made a short time before the failure showing assets $28,800 and liabilities of $8,000. After the assignment the liabilities amounted to $30,000, with very little assets. In the statement he filed claims of $8,000 on men who were said to be in his employ. The notes were then discounted by the Molsons Bank. Negotiations were made for a settlement of the notes, which failed, and a charge of forgery was laid, but Mr. Lorigan was not to be found. He is at present thought to be in the United States. The Molsons Bank is interested to the extent of $11,881.

Struck by a Trolley.

Toronto, Sept. 8.—Miss Elizabeth Cuylor, a roomer at 363 King street west, was struck by a trolley while crossing King street opposite her home yesterday afternoon. She was removed to the Emergency Hospital. Her injuries consist of a fracture to the right shoulder-blade, left shoulder dislocated, left arm broken and left leg injured below the knee, besides other bruises about the body.

Heavy Shipments From Canada.

London, Sept. 8.—The imports to Great Britain from Canada for the month of August as per return just issued show cattle 16,279 head, valued at £264,551; sheep and lambs 5,566, value £8,923; bacon, 76,929 cwt., £144,909; hams, 25,259 cwt., £50,730; butter, 15,736 cwt., £66,425; cheese, 279,963 cwt., £572,924; eggs, 89,959 great hundreds, £30,337; horses, 838, value 22,711. Cattle, sheep, lambs and horses show a decrease, but in the other lines there is a decided increase as compared with the same period of last year.

ASSURANCE CO.

OFFICE OF W. A. MURRAY & CO., 17 to 27 King St., East, Toronto.

Wm. McCabe, Esq., Managing Director, N.A. L.:

DEAR SIR,—In answer to your request for me to decide upon one of the following options offered me for settlement of my 15-payment Life Investment Policy for $5,000 which has matured this year, viz:

1st to take the value of the Policy in Cash	$5,000.00
2nd, or fully paid-up insurance for	8,280.00
3rd or take the profits in cash and continue my policy without further payments being required from me, such policy participating in future profits.	2,050 25

I find it somewhat difficult to make a decision either of the three options being so satisfactory. I am certainly very much pleased with the results offered me, and as I find many others are giving full testimony to the profit-earning power of this company. I do not hesitate to give my endorsement as well, that the North American Life is one of our strongest Canadian institutions to day giving first class results on Investment Policies, on a safe and conservative basis. I find that my policy, which was originally a Life by fifteen payments, has become an Endowment at the end of the Investment period.

HUMAN SKILL versus MACHINES.

Man's ingenuity invents machines to do work, man's skill cannot do.

No fingers, however deft, could ever sew a stitch locked **inside** a piece of leather.

No eye, however true, could gauge with **absolute accuracy** the length of the stitches on a hundred thousand pairs of shoes—or on one pair.

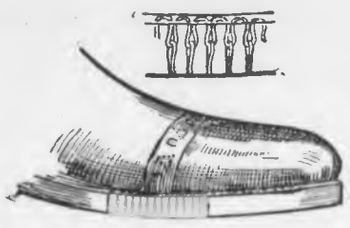
No human muscle could work eight, ten, fifteen or twenty-four hours a day, and draw the stitches evenly, tightly, **all day long.**

And no human being would have the patience to wax his tread **before every** stitch—or **remember** to do it if he had the patience.

And **fifty** men could not make as many **imperfect** shoes in the time **one** Goodyear Welt Machine takes to makes **fifty perfect pairs.**

"What does Goodyear Welt mean?"

"It is the very best, most perfect method ever invented for joining the Uppers of shoes to the Soles."



GOODYEAR WELT LOCKED STITCH.

"Why is it the best?"

"Because it's the **only** method that makes a shoe **without a stitch** or a **tack under** the **foot** and **stronger** than **hand sewing.**"

"Why is it stronger than hand sewing?'

"Because it locks its stitches **inside** the leather of the outer sole, draws them **tighter** and **more uniformly** than hand sewing."

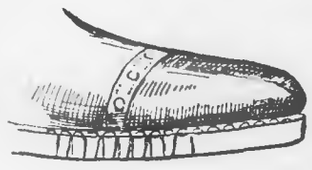
"What advantage does the lock stitch give?"

"The holding power of the stitch remains till the sole is **worn through** whereas in hand sewn shoes, the top of the stitch wears off in a **few days** and only straight **strands of thread are left** to hold the sole on.

"Does it make the shoe cheaper as well as better?"

"It does because it makes **fifty perfect pairs,** where **one imperfect** pair **could not** be made by hand."

"Have any improvements been made in the Goodyear Machines in recent years?"



ORDINARY STITCH.

"Yes, a vast improvement has been made in the New, Improved Goodyear Welt Machine, now in use in the Slater Shoe Factory."

"What is the nature of the improvement?"

"A better motion of the parts, producing better results in the shoe."

"Can a novice tell a Goodyear Welt by seeing it?"

"Not always because there are imitations."

"How can he be sure of getting a **genuine Goodyear Welt Shoe?**"

"By buying only "The Slater Shoe" because "Slater Shoes" are made only by the new, improved Goodyear Welt process."

Stamped on the sole with the makers' name and price, $3.00, $4.00 and $5.00.

It Pays to Advertise in THE EXAMINER

Many a husband imagines that his wife is happy, healthy and strong, when she is really enduring in silence almost unbearable tortures. She meets him at the door on his return from work or business with a smile and a kiss. To be sure, she looks a little white and pallid, but she is vivacious and cheerful in his presence, and he does not realize that anything is wrong. If he had but come home during the middle of the day, he would have found, instead of the cheerful wife, a weak, sickly, nervous invalid, with headache, pains in the back, "stitches" in the side, burning and dragging down sensations and utter despondency and melancholy.

In almost every case of this kind the woman is really suffering from weakness and disease of the distinctly feminine organism. Frequently she does not realize her own condition. If she does, she shrinks from undergoing the "examinations" and "local treatments" insisted upon by the average physician. Dr. Pierce's Favorite Prescription is the medicine needed by women who suffer in this way. It acts directly on the sensitive organs concerned and makes them strong, healthy and vigorous. It allays inflammation, heals ulceration, soothes pain and tones and builds up the shattered nerves. It transforms weak, sickly, nervous, despondent invalids into happy, healthy wives and competent mothers. It fits for wifehood and motherhood. It makes "examinations" unnecessary. Honest dealers do not suggest substitutes for a little added profit to be realized thereon.

"I had suffered untold misery for years with ovarian trouble, an exhausting drain, constipation, painful periods and other annoying troubles," writes Mrs. Annie James, of No. 27 Seventh Street, Memphis, Shelby Co., Tenn. "Thank God, my health has been fully restored and I can gladly say I am a well woman to-day. I used six bottles of Dr. Pierce's Favorite Prescription and was completely cured."

Dr. Pierce's Pleasant Pellets cure constipation and biliousness. They never gripe. All good dealers have them.

BITES THAT POISON.

ANIMALS WHOSE TEETH CARRY A VERDICT OF DEATH.

The Power That Is In the Snap of the Jaws of the Lion, the Leopard, the Wolf and the Tiger—The Crocodile's Formidable Row of Spikes.

Dog bites are always dangerous. This is mainly due not to poisoning, though this often results, but to the frightful wound which any large dog thoroughly in earnest can inflict. Human beings get off lightly in many cases, because, as a rule, a dog only "snaps" at them when irritated, and there is as much difference between a "snap" and a bite as there is between a fillip with the back of the fingers and a knockdown blow.

Most poisoning caused by bites is, however, probably due to the state of the creature's teeth. The dog tribe, which have very wet mouths and wet tongues, keep their teeth fairly clean, while herbivorous animals do not. A dog's teeth are nearly always beautifully white, those of a horse or a camel yellow and dirty. Captain Christie in some notes on sport in Somaliland recently published in "Country Life," states that a native cook who served him had been disabled for two years by a camel bite received during our former Sudan expedition. The work done by the tongue and saliva in constantly cleaning the carnivorous animal's teeth is proved to some extent by the different results of being "clawed" and bitten respectively by the same creature.

Wounds made by the claws of leopards are poisonous, while those caused by the teeth are less frequently septic. Sir Samuel Baker notes that "the wounds from the claws of a leopard are exceedingly dangerous, as the animal is in the habit of feeding upon carcasses some days after they have been killed. The flesh is at that time beginning to decompose, and the claws, which are used to hold it as it is torn by the teeth and jaws, become tainted and poisoned sufficiently to insure gangrene by inoculation." He recommends that all wounds caused by leopards or tigers should be thoroughly syringed with cold water mixed with a thirty-sixth part of carbolic acid whenever the wound is dressed. Probably modern treatment can improve upon this recipe.

Apart from all concomitant danger of blood poisoning the severity of the bites of flesh eating animals is out of all proportion to the weapons by which they are inflicted. The teeth, even of the largest carnivora, are merely the "spearhead," but the force which "works" these instruments is prodigious. It seems as if for the moment the animal threw all its bodily energy into the combination of muscular action which we call a "bite." In most cases the mere shock of impact as the animal hurls itself on its enemy is entirely demoralizing or inflicts physical injury. A muzzled mastiff will hurl a man to the ground in the effort to fasten its teeth in his throat or shoulder. Then the driving and crushing force of the jaw muscles is astonishing. The snapping power of an alligator's jaws is more or less intelligible. They are long and furnished with a row of pointed teeth from end to end. But the jaws of the lion, leopard, tiger, otter, ferret or baboon are short, and the long and pointed teeth are few. Yet each of their species has a biting power which in proportion to its size is almost incredible.

Sir Samuel Baker, who had a long and varied acquaintance with the bites of the carnivora, noticed that the tiger usually seized an Indian native by the shoulder and with one jaw on one side and the other on the other bit clean through chest and back. "The fatal wound was the bite, which through back and chest penetrated to the lungs." Europeans are killed by the tiger's bite as well as lacerated by the claws. A Mr. Lawes, son of a missionary of that name, was killed after being shaken for a few moments by a tigress, which then left him. He died next day. In nearly all cases the bite penetrates to the lungs. This kind of wound is characteristic of the attacks of many of the felidæ. Scarcely any bird recovers from a cat's bite for the same reason. The canine teeth are almost instantly driven through the lung under the wing. The cheetah, which has a very small mouth, always bites through the black buck's throat.

The leopard when seizing smaller animals, such as dogs, crushes the head. When attacking men, it aims at biting through the lungs. Sir Samuel Baker must again be quoted. In Africa a native boy was firing reeds, accompanied by his brother. A leopard seized one boy and was almost instantly killed by the other, who hurled his spear so accurately that it separated the vertebræ of the leopard's neck. "The boy was carried to my hut," says Sir Samuel, "but there was no chance of recovery, as the fangs had torn open the chest and injured the lungs. These were exposed to view through the cavity between his ribs. He died during the night."

The worst of the "snapping" bites of mammals is that of the wolf. The jaws, unlike those of the felidæ, are very long. A male wolf's head often seems to be more than a quarter of its length without the tail. Some judges set it at nearly a third of the total length of its body. The bite is always a snap, which will tear away a mass of flesh from a still running animal or inflict a mortal wound on the lower parts of the body. The crocodile bite is the most formidable of the snapping order. Though its teeth are only a row of spikes, it can cut off a limb or bite a fish weighing 70 pounds into two pieces as cleanly as if they were divided by a knife.

Horses usually seize a person by the arm or shoulder when they bite. The result is more often a very bad bruise, like a jam in a door, than a wound. But the great offender in this respect is "our friend the dog," and the greatest sufferers are young children. We have known a little girl of 10 years almost bitten to death by a petted St. Bernard dog which was jealous of her and a boy of 6 mauled and lacerated by a bulldog for the same reason. As most persons keep dogs for their own amusement, it is incumbent on them to remember that, though the best of domesticated animals, they are potentially dangerous wild beasts, and if they show signs of vice should be dismissed by euthanasia, not sold to some one else.—London Spectator.

A REMARKABLE CASE

A Plattsville Lady Rescued by Dodd's Kidney Pills from Terrible Danger.

Plattsville, Ont., Aug. 29—The Echo, published here, report the remarkable cure of a well-known lady, Mrs. J. Barnett, who had two years suffered from Nervousness, Rheumatism, Back-ache, Sleeplessness, pains in the head and eyes and general weakness.

Dodd's Kidney Pills cured her.

To an Echo reporter Mrs Barnett said: "I had no appetite, I could not sleep, I was a physical wreck.

"I was treated by doctors, but their medicine gave me no relief.

"I started taking Dodd's Kidney Pills, and before I finished one box, I had improved noticeably. I have taken twelve boxes in all, and am now completely recovered. I ascribe my recovery to Dodd's Kidney Pills alone."

Dodd's Kidney Pills are a positive cure—the only cure,—for Kidney Diseases of all forms. They have never failed.

THE FEET.

Never wear a shoe that pinches the heel.

Never wear a shoe or boot tight anywhere.

Never come from high heels to low heels at one jump.

Never wear a shoe that presses up into the hollow of the foot.

Never wear a shoe that will not allow the great toe to lie in a straight line.

Never wear a shoe or boot so large in the heel that the foot is not kept in place.

Never wear leather sole linings to stand upon. White cotton drilling or linen is much better and more healthful.

Never wear a shoe with a sole narrower than the outline of the foot traced with a pencil close under the rounding edge.

Never wear a shoe or boot that has depressions in any part of the sole to drop any joint or bearing below the level plane.

Never wear a shoe with a sole turning up very much at the toes, as this causes the cords on the upper part of the foot to contract.

Never wear one pair of shoes all the time unless obliged to do so. Two pairs of boots worn a day at a time alternately give more service and are much more healthful.

Never think that the feet will grow large from wearing proper shoes. Pinching and distorting makes them grow not only large but unsightly. A proper, natural use of all the muscles makes them compact and attractive.

Never wear a short stocking or one which after being washed is not at least one-half inch longer than the foot. Bear in mind that stockings shrink. Be sure that they will allow your toes to spread out at the extreme ends, as this keeps the joints in place and makes a strong and attractive foot.

The Poor Editor.

Bill—Did you read about that fellow writing a poem on a $50 bill?

Jill—No. The editor kept it, of course.

"No. He returned it."

"What, an editor return a $50 bill?"

"Yes. He didn't know what it was."—Yonkers Statesman.

HUMAN SACRIFICES

On the Altar of Diabetes, Saved by Dodd's Kidney Pills, Only.

Hardly a family in the country is free from Diabetes. Great thirst, failing sight, numbness in the thighs, bleeding gums, swollen ankles, emaciation, nervousness, pale or turbid urine, loss of sexual power, decaying teeth, pains in the loins or small of the back, are all positive signs that Diabetes is in the system.

Do you know how it ends? In Death. A premature, horrible, agonized, pitiful death. The victim has no peace, no ease in life. His days are filled with tortures. His nights are waking dreams of agony. He longs to die, yet fears the terrors of his end. He dies, a bloated, fetid, repulsive mass of corruption. That is the only end of unchecked Diabetes. Dodd's Kidney Pills will cure it. They drive it out of the system thoroughly, create new, clean blood, rebuild the diseased kidneys, and restore robust health.

A JOKE ON THE TEAMSTER.

He Roughly Ordered General Sherman to Brush His Mules.

A good story is told of one of General Sherman's Missouri teamsters. He had just joined the service, a raw recruit, and was assigned the task of driving a six mule team. When the army halted for the first night, he was wearily unharnessing his team.

"Hello there," said the wag of the company in passing. "What do you mean by taking care of those mules yourself? Why don't you have the hostler do it?"

"Why, I thought every man had to take care of his own team," said the bewildered teamster.

"You bet he doesn't. We've got a hostler for that. There's his tent right over there. He's a lazy, contrary old cuss, and he may not want to do it, but you swear at him and he'll move off at double quick."

The Missourian strode over to the tent indicated, which happened to be General Sherman's headquarters.

"Here, you son of a gun," he roared fiercely, "get out of here and brush those mules."

Needless to say, the teamster spent the evening in the guardhouse.

A pious old Indiana farmer was assigned to the duty of teaming, probably by mistake. The roads were muddy, and the rest of the teamsters were literally bombarding their charges with oaths. It was against the old man's principles to swear, and he held his peace, albeit in impotent rage. At last one of the hind mules balked and refused to advance a step. The old man used every endeavor to urge the beast along, but to no purpose. At last he roared in a loud and solemn voice: "Oh, Lord, you know where this mule ought to be as well as anybody. This whole army knows where he ought to be this minute. He knows where he ought to be. I know where he ought to be, oh, Lord, and if he doesn't move in a minute I intend to say so, by gum."—Chicago Inter-Ocean.

Teething Babies

Thousands of them die every summer of Cholera Infantum who could be saved by the timely use of Dr. Fowler's Extract of Wild Strawberry.

There is not a mother who loves her infant but should keep on hand during the hot weather a bottle of Dr. Fowler's Extract of Wild Strawberry. Thousands of babies in Canada are sacrificed every year owing to neglect of this simple precaution.

There is no remedy so safe and so effective for the diarrhœa of infants as Dr Fowler's Extract of Wild Strawberry. No remedy has the endorsation of so many Canadian mothers who have proved its merits, and therefore speak with confidence. One of these is Mrs. Peter Jones, Warkworth, Ont., who says: "I can give Dr. Fowler's Extract of Wild Strawberry great praise, for it saved my baby's life. She was cutting her teeth and was taken with diarrhœa very bad. My sister advised me to get Dr. Fowler's Extract of Wild Strawberry. I got a bottle and it cured the baby almost at once."

There can be no doubt about it Over forty years experience has proved Dr. Fowler's Extract of Wild Strawberry to be the best remedy for Diarrhœa, Dysentery, Colic, Cramps, Cholera Infantum and Summer Complaint. Sold by medicine dealers at 35c a bottle. Always insist on the genuine. Many of the imitations sold are positively dangerous, as they often check the diarrhœa too suddenly and cause inflammation.

WRITES A LETTER ON DR. CHASE'S OINTMENT.
Sufferers are at liberty to correspond with the above address and will obtain full particulars regarding the great cure.
He says: My wife was most terribly afflicted with protruding piles, and contemplated a surgical operation. A friend of ours recommended the use of Dr. Chase's Ointment, and less than one box effected a complete cure. We were so pleased with the ointment that I tried it myself, as I have been troubled with an unsightly skin affliction which covered the lower part of my face.
For 25 years I suffered untold agony, and was treated by the best medical skill in the United States. I consider Dr. Chase's Ointment worth its weight in gold for piles and skin disease.

BICYCLE BARGAINS

Here is interesting matter for the late Bicycle Buyer who is prepared to save a very Liberal Percentage of the cost of a wheel by purchasing now. To-day we advertise our annual September BICYCLE SALE of the balance of our wheel stock.

Everyone knows the history of our success in the Bicycle Business—briefly told it is this—we have sold just about half the wheels bought in Peterborough this season, and this quantity buying has enabled us to sell the very Highest Grade Wheels at the lowest possible price. Now the time for selling Bicycles is nearly over, and as we make it a rule never to carry anything from one season to another if we can possibly help it, we are prepared to clear the fifteen wheels we have now in stock at prices which it will pay you well to consider. Here are the wheels we are going to sell :—

One Ladies' E & D fitted with Dunlop Tires.
One Gent's. E & D fitted with Palmer Tires.
One Gendron Racer fitted with Buck Eye-Tires.
Two Gendron Roadsters fitted with Buck-Eye Tires.
One Ladies' Reliance fitted with Vim Tires.

THE WHEEL.

Twenty-five thousand miles, the circuit of the globe, were completed by Teddy Edwards Wednesday night, when he finished his 250th consecutive century since the first day of last January. In addition to the 25,000 miles, Edwards has ridden 3,000 extra miles since the first of the season, a total mileage of 28,000. His record is unsurpassed, being nearly four times greater than the best previous consecutive century record, held by George, of Philadelphia, whose record was 65. With good luck Edwards hopes to surpass the record of Anderson next Sunday, that rider having a record of 153 centuries in a year and then the great amateur rider starts after the final goal, the riding of 365 centuries in one season.

There is every indication that Edwards will find the last part of his journey the hardest of all. He was not well yesterday, but with dogged persistance he stuck to his task, grinding out mile after mile when each mile was seemingly his last. Suffering from the intense heat of last week, which left its imprint upon him in the shape of what a doctor said was sun-sickness last night, he rode when others would have been in bed. Edwards rode on Monday a century from Erie to Buffalo. He had been for nearly a week down in Ohio, where at Cleveland, for several days the thermometer registered 108 in the shade. In the sun no thermometer would register in real warmth, says Edwards This intense heat through which he was forced to ride, afternoon at least, for he generally finished at night, left him almost a sick man. On Tuesday he did not go to Rochester. He rode his 249th century here here in a driving rainstorm and he did not finish until 11 o'clock Tuesday night. A doctor was called and he found the man's temperature to be 104, far above normal. During the night his attendants took the best of care of him, and it was after 10 o'clock yesterday morning before they arose. His stomach would not hold food. In company with his trainer, John Freeman, he started for Niagara Falls to ride what he jokingly called an Anglo-American century. He was 2½ hours in covering the 24 miles to the Falls, and was forced to rest 40 minutes. At 4.50 o'clock yesterday afternoon he made a detour into Canada and was back again at the falls feeling much better. The cool wind blowing seemed to refresh him and his supreme recuperative power came to his aid. On the way back to the Falls several detours were made and at 9.35 o'clock last night he finished.

Dr. Webber, a Buffalo physician, made a careful examination of Edwards. At 10 35 o'clock the rider was to have started for New York to again take up his terrible grind on the Merrick Road on Long Island, where on the first of last January he rode his first century in the snow and sleet and frosted his inner leg muscles, but he decided to rest over at The Genesee before starting for New York. After next Sunday he expects to go South by easy stages to finish the greatest year's work ever laid out by a long-distance rider and the pluckiest struggle of the century of athletics.

Edwards weighed only 120 pounds when he started. He weighed yesterday 125 pounds. At Niagara Falls he said to the writer :—"I feel all the strength in my legs, but to-day the valve seemingly has been turned off and I cannot push as I would like." Edwards is suffering from dysentery and his stomach is wrong in the bargain. His century to-day was attested on the regular blanks by twelve different people who recorded his cyclometer at the several different points.—Buffalo Express.

TWO NOTED PLUNGERS.

Big Jack McInerney, one of the block men at Newport, who, with Eddie Austin, made book at the recent Saratoga meeting, speaks entertainingly of sporting matters in the East, says the Cincinnati Enquirer. He says that Charley Quinn, one of the widely known Quinn boys of Lexington, has been one of the heaviest and nerviest plungers on the Eastern tracks this season and also one of the most successful.

The Lexingtonian, he says, is now $100,000 strong, and $50,000 of this amount he has won this year. Quinn has adopted the policy that made Pittsburg Phil so successful in former seasons. He has acquired what very few race track betters ever acquire, ability to wait for a race to come up which he feels confident he can bet. Instead of betting on nearly every race, as the average man does, he sometimes does not put down a bet for two or three days. When a race does come up which he thinks he can beat, he gets down a swell bet. Odds on favourites don't appeal to him either. He very seldom takes two to one against his money. In marked contrast with his former method, and with that now pursued by the Lexington plunger, Pittsburg Phil bets on every race that comes along, and in consequence, matters have not been coming his way as in other seasons.

Speaking of Riley Grannan, Mr. McInerney expressed the opinion that he would never succeed in getting back on the Eastern tracks. "Going in the courts with his difficulty with the jockey club was Riley's chief crime," said Mac. "The Eastern turf-governining body has never forgiven him for that affront to its dignity —and it is hardly likely that it ever will do so."

ROBBERY BY A FARM HAND.

A Stray Labourer Victimizes His Employer.

On Saturday last, says the Lindsay Post, a young man called on Mr. Flynt, a farmer residing on the 1st con. of Eldon, and solicited work for a few weeks, saying it was too early to go to the shanties. Mr. Flynt hired him for a week to dig post holes, and he worked faithfully all Saturday afternoon, but on Monday he wasn't worth his salt, and was told he would have to do better, whereupon he decided to leave. Mr. Flynt gave him his money, and after supper he slipped upstairs for his clothes, returning in about five minutes with his bundle, with which he started down the road. Suspecting that all was not right, Mr. Flynt's son went upstairs and found that the fellow had ransacked three rooms and stolen his sisters' egg money—a considerable sum. Mr. Flynt then set out in pursuit of the thief, who was only a few rods away, but when hailed he leaped the fence and started across the fields for McPhadden's bush, where the chase ended. The young fellow when hiring gave his name as Robt. Nelson, of Ashburnham, Peterborough; he is about 5 ft. 11 inches in height, thin in flesh, dark complexion, black moustache; wears tweed suit with light stripe, black hat; carries small bundle. Mr. Flynt has wired the police in surrounding towns and villages to look out for the thief, as it is possible he will try to work the same dodge in another township.

—The question, "Can taverns be legally kept open on the plebiscite day?" is being debated, and opinions thereon vary according to prejudice. Of course the prohibition heretofore was taken to apply only to regular elections, though it was observed, it is said, during the polling upon the Scott Act. The License Commissioners or somebody should give a "ruling" on the point immediately.

—A remarkable gathering assembled at a Kingston photographer's the other day. Four male members of a direct line, whose combined ages totalled 201 years, sat before the camera. They were:—Robert Henry, aged 99 years and 9 days; Robt. Henry, jr., his son; John Henry, Robert's grandson; John's little son, four generations. The group was a remarkable one, forming a chain between the past and present.

It is Not Necessary

To be troubled longer with those painful and annoying corns. Dr. Russell's Corn Cure has removed hundreds of corns for your friends, and will do the same for you. You bathe the feet in warm water for three days, night and morning, and apply Dr. Russell's Corn Cure as directed; at the end of that time the corn can be lifted out with the point of a knife without the least pain. Try it. 25 cents. Sold by Ormond & Walsh.

HATS and CAPS.

We're able to discount the trade, because of unusual buying power. We go direct to the makers and insure fine qualities by knowing what to buy and what to let alone. If you're a judge of quality, it won't take any talking from the salesmen.

—On the finest Fur Fedora Hats we take off 35c., and ask only $1.65.
—On the best Fur Felt Stiff Hats we take off 50c., and ask only $2.00.
—On Men's Knockabout Hats we take off 20c., and ask only 35c.
—On Men's Silk Hats, latest styles, we take off 50c. and 75c., and ask only $3.00 and $3.75.
—Youths and Boys in same proportion.

BOOTS and SHOES

Warranted not to crack, nor take in washing. Ours isn't the common kind of Boots and Shoes. If anybody can beat the quality, the style, the price, we'll quit the business.

—On the best $3 Men's Selected Shape Balmoral or Congress, we take off 40c, and ask only $2.60.
—On the best Men's Fine Hand-Made Balmorals we take off 35c., and ask only $1.65.
—On the best Fine Patent Leather Oxford Shoes, turn soles, we take off 45c., and ask only $1.40.
—On the best French Dongola Kid Button (common sense) we take off 30c., and ask only $1.60.
—Misses', Boys', and Children's in same proportion.

CORRECTING A MISTAKE—Who sells the cheapest goods — themerchant who is compelled to buy in one higgling market, and is tied down to one grasping manufacturer, or the merchant who has the freedom of all the competing markets and manufacturers of the world? Do men buy Hats cheaper where nothing but Hats are sold, or Boots cheaper where nothing but Boots are sold, or Clothing cheaper where nothing but Clothing is sold? Might as well expect a farmer to do as well for his family by raising nothing but Pumpkins as if he raised a mixed crop.

An Opening Salute!

Extraordinary Purchases from the

ALEXANDER and ANDERSON

WHOLESALE STOCK, TORONTO.

Business must be made interesting; and invaluable opportunities frequently come from the unfortunate mistakes of others, which shrewdness helps us to profit by. Nothwithstanding the heavy blockade of mammoth boxes and bales of New Fall Goods almost daily occuring in front of our store doors, an opportunity has just come our way of securing a very large quantity of household goods out of the regular channels. The wholesa'e stock of MESSRS. ALEXANDER & ANDERSON was placed on sale last week by Wyld, Grasett & Darling, of Toronto, of which we bought very largely at a very low price on the Dollar. We may state at once that it will be impossible to duplicate these extraordinary values—as the prices have been marked on a scale considerably lower than wholesale inventory list prices.

ON FRIDAY, SEPTEMBER 9th.

We place this immense purchase on sale, and for each succeeding day shoppers will reap the benefit. The stock embraces—

Dress Goods, Black Silks, Dress Trimmings, Damask Tablings, Towels, Towellings, Napkins, Fancy Household Linens, Sheetings, Pillow Casings, Made-up Pillow Cases, Embroideries, Handkerchiefs, Ribbons, Veilings, Hosiery, Tapestry Carpets, English Linoleums and other Housefurnishings.

Every piece of goods is this season's style and the choice of any one means perfect satisfaction. No circumstance can arise to make conditions better to buy Dress Goods at lower prices.

HER MAJESTY SHOT AT

A Report That an English Anarchist Fired on Wilhelmina.

BULLET STRUCK LADY WITH HER

The Queen and Her Mother Leave for The Hague and Are Tendered a Loyal Ovation—A Beautiful and Special Religious Service —The Girl Queen Tired Out.

Berlin, Sept. 10.—The Lokal Anzeiger says that a fortnight ago an attempt was made to assassinate Queen Wilhelmina, near Amersfort, Province of Utrecht, on the road between Castle Soestydl and Baara. A man emerged from behind a tree and fired a revolver at Her Majesty. The bullet missed the Queen, but ploughed the cheek of a lady in attendance.

This would-be assassin was arrested. He is supposed to be an English Anarchist. The strictest secrecy has been maintained hitherto as to the affair, in order not to disturb the enjoyment of the enthronement festivities.

GONE TO THE HAGUE.

Queen Wilhelmina Accorded an Ovation on Her Departure From Amsterdam —The Streets Thronged.

Amstordam, Sept. 10. — Queen Wilhelmina, accompanied by the Queen Mother, took a special train for the Hague at 10.40 yesterday morning. The streets were thronged with people, who gave the young Queen and her mother an ovation.

At the Hague.

The Hague, Sept. 10.—The Queen of the Netherlands and her mother, on their return here from Amsterdam, were received with the same ceremonial that marked the state entry of the royal party into Amsterdam. The streets and houses were magnificently decorated and a special religious service was held at St. James' Church yesterday for Queen Wilhelmina. It was a beautiful and impressive ecremony. The Queen entered, attended by a retinue of high officials. She was also attended by her mother, the Princess of Wied and the ladies in waiting. The Queen Mother had on a silver brocade costume.

Prince Consort to Be.

Prince Frederick of Wied, eldest son of the reigning Prince of Wied, accompanied by the former's mother, was present. The young Prince's mother is a princess of the Netherlands and it is popularly believed he will be Wilhelmina's choice for a husband.

The young Queen sat on a chair on a high platform facing the pulpit. She was pale and looked tired. Her Majesty joined in the singing and listened to a long sermon, delivered by the court chaplain, Dr. G. J. Van der Flier.

A chorus of 100 voices then sang a special anthem, composed by Nicholas [illegible].

The service ended with the singing of "Wilhelmus Von Nassauwe."

On leaving the church, Queen Wilhelmina was preceded by four children from the orphan asy[illegible] who strewed flowers [illegible]

longed festivities in connection with her enthronement. Yesterday Her Majesty issued a special request to the populace to discontinue cheering in the Dampiatz after 11 o'clock last evening. It is amusing to see the squads of half tipsy Hollanders, who have constituted themselves policemen, hushing other inebriated squads and going on tiptoe past the palace.

Her Majesty's guard of honor during the onthronement week has been a great novelty. It was chosen from among gentlemen of the best families, who provided their own elaborate costumes. Their splendid blooded horses were drilled daily for weeks in advance.

WEST INDIANS DEMAND AID.

The Jamaica Delegates to Barbadoes Take a Very Strong Stand.

Kingston, Jamaica, Sept. 10.—The conference of West Indian representatives at the Island of Barbadoes passed a resolution formally demanding aid from the Home Government, as a matter of right, as being the only available remedy for the industrial crisis, and also demanding the adoption of measures either for the exclusion of bounty-fed sugar from the English market or the enforcement of countervailing duties. No ultimatum looking to American annexation was adopted, although the question was incidentally discussed as a possible future contingency to offset Cuban and Porto Rican competition in the American market, should Great Britain conclusively refuse the relief demanded. The question of annexation to Canada was not mentioned, and the Jamaican delegates, in an interview, declared that, while annexation to the United States was improbable, the transference of the British West Indian Islands to Canada was impracticable, besides promising no relief.

Trouble May Come Yet.

Manila, Sept. 10.—The attitude of the Philippine insurgent leaders is daily becoming more dangerous. So open is their opposition to the American authorities that the situation is strained and reconciliation may be difficult. What makes the situation the more troublesome is the undisguised rivalry between the followers of General Aguinaldo, the self-proclaimed dictator, and General Pio Pilar, who covets the honor which Aguinaldo has acquired.

General Pio Pilar is in command of the insurgent troops stationed south of Manila. He uses them in a way that will be most annoying to Aguinaldo, and at the same time makes every effort to show his utter disregard of the American officials.

Steamer Landana Sunk.

Dartmouth, Sept. 10.—The British steamer Knarwater arrived here yesterday and reported that the night before, while on the way down the English Channel, she collided with and sank the British steamer Landana, Captain Webster, bound from Rotterdam for Sierra Leone, west coast of Africa. All the passengers and crew of the Landana were rescued by the Knarwater and landed here.

ARGUMENT ENDED.

Mr. Nesbitt Concludes in the Court of Appeal in the Constable Vote Case —Judgment Reserved.

Toronto, Sept. 10.—When the Court of Appeal opened yesterday morning at 11 o'clock Mr. Wallace Nesbitt began his reply in rebuttal of the arguments of the counsel for the Attorney-General of the day previous. It appeared from Mr. Nesbitt that there are many contradictions in the reports of cases, and a great deal of his statement consisted of references to them. Mr. Nesbitt based his claim chiefly upon the doctrine of ejusdem generis, by which constables would be included under the same class as returning officers, poll clerks, etc!

Why were returning officers and poll clerks debarred from voting? was the next question raised. Mr. Nesbitt thought that the reason was because they were paid. This statement caused great activity on the bench. Mr. Justice Moss was inclined to doubt the proposition, and Mr. Justice Maclennan asked Mr. Nesbitt whether, if a returning officer did not accept pay, he would be entitled to vote. Mr. Nesbitt admitted that the view was rather startling in its novelty, but that, upon investigation, it would be found to be the correct one. "I thought otherwise myself at first," said Mr. Nesbitt.

With regard to the fact that the right of the constables to vote had never before been questioned, and that this was evidence presumptive of the validity of their vote, Mr. Nesbitt held that the vital nature of the present issue disqualified that as an argument. It had never been a vital issue before, and that was why it had not been questioned sooner.

After a brief citation of cases by Mr. Blake, the case closed. Judgment was reserved.

FIVE MORE BODIES RECOVERED.

Six of the Fifteen Who Went Down in the Cornwall Disaster.

Cornwall, Ont., Sept. 10.—Besides the body of Daniel Hughes, which was found day before yesterday, the remains of five other victims of the O. & N.Y. bridge disaster were recovered yesterday. They were those of William Saunders of Baltimore, Md.; R. L. Disart of Tyrone, Pa.; Robert Martin, Montreal; Patrick Murphy, Toronto, and John Claus of Caughnawaga.

R. C. Douglas, C.E., is here with a party of engineers and divers to make an inspection of the wreck on behalf of the Dominion Government.

Save $2,000 a Year.

Toronto, Sept. 10.—At Central Prison the binder twine mills are being put in. Over thirty men are busy at the wells, which lie just below the prison grounds, and which are being connected with the institution's new tank. By getting the water supply independently of the city, the Ontario Government counts on saving $2,000 per year.

Schooner Lost With 13 Lives.

New Haven, Conn., Sept 10.—Interested parties in this city received word yesterday of the loss of the four-masted schooner John H. Platt of this city off the Georgia coast, and it is feared that Capt. Hebart Ives, his wife and [illegible] children and the [illegible] of the crew, [illegible]

A DEMAND FOR ACTION

The Relief of Crete Urged Upon Great Britain.

MORE BODIES OF CHRISTIANS.

Twenty-One Found Among the Smoking Ruins—An Awful Story of How the British Vice-Consul Was Treated —The Bashi Bazouks Held to Be Responsible—Turks Must Go.

London, Sept. 10.—The Times and the other morning papers call upon the Government for energetic action in Crete, more especially if the stories of the complicity of Turkish troops are confirmed.

The German and Austrian papers declare that their Governments will have nothing to do with Crete.

The Cologne Gazette says: "Germany may congratulate herself on having withdraw her fleet from Crete, thereby leaving the responsibility to others."

Turkish Troops Must Go.

Canea, Island of Crete, Sept. 10.—The admirals of the foreign powers, replying to the protests of the Cretan Executive Committee against the recent massacres, have declared that they will recommend that their respective governments settle the question definitely by the removal of the Turkish troops from the Island of Crete and the appointment of a Governor, to be selected by the powers.

More Christian Bodies.

Canea, Sept. 10.—The foreign admirals have requested the powers to send a battalion each to reinforce the international garrison. On the request of the admirals, the Cretan Executive Committee has succeeded in inducing the Christian insurgents in Candia to retire outside the cordon. Ejevad Pasha, the Turkish military commandant, says he has given the Turkish military authorities at Candia strict instructions to assist in maintaining order. He declares that the Bashi Bazouks are responsible for the recent outbreaks. To-day 21 additional bodies of Christians were discovered under the smouldering ruins at Candia. The British admiral, it is said, has demanded the disarmament of the Mussulmans.

Martial Law Proclaimed.

Athens, Sept. 10.—News was received here from Candia late yesterday afternoon that another bombardment was imminent. Four hundred deaths are already attested. Martial law has been proclaimed.

Horrible Stories.

London, Sept. 10.—The Athens correspondent of the Daily Mail says:

Horrible stories of cruelty are told by the refugees from Candia. They say that the Bashi Bazouks cut open the bodies of their Christian victims on the first day of the outbreak, and threw the entrails into the flames of the burning houses.

They hurled the British Vice-Consul bodily into the flames, shouting: "Now let the English come and help him."

Sheiks Are Submitting.

Khartoum, Sept. 10.—An interesting ceremony took place yesterday, when the Sirdar, General Sir Herbert Kitchener, on visiting the Khalifa's arsenal, found drawn up outside a hundred of the principal Sheiks of the city, who tendered submission and promises of allegiance.

German Threat Against France.

Rome, Sept. 10.—The Tribuna declares that Count Von Munster, the German Ambassador to France, in the name of Emperor William, has just repeated to M. Delcasse, the French Foreign Minister, that the alleged letters between the Emperor and Count Von Munster and the Emperor and Capt. Dreyfus are spurious, and that, if the French Government should utilize such false documents in an eventual trial, he (Von Munster) had orders to demand his passports.

A Lull in the Dreyfus Affair.

Paris, Sept. 10.—There is a lull in the Dreyfus affair. A semi-official note issued to-day denies that any foreign government has made any sort of communication to the French Government relative to the Dreyfus affair This disposes of the statement made by the Rome Tribuna.

Rate War in the East Now.

Buffalo, N.Y., Sept. 10.—The West Shore Railroad Company dropped a bombshell in the local railroad camp yesterday in the shape of an announcement that hereafter its round trip rate from Buffalo to New York would be an even $10. This cut of $6 was immediately met by the Lehigh, Erie and Lackawanna, and it is said that the New York Central will follow. The cut is the culmination of secret slashing that has been going on in this city for some months past. Tickets to New York have been on sale by brokers on some of the lines at as low a rate as $4. One railroad agent said yesterday that if the trouble was not patched up right away, New York and return for $1 would be the outcome.

Watched His Life Blood Ebb.

Waterford, Sept. 10.—Dr. W. G. Brown attempted to commit suicide by opening a vein in his left wrist, after an excessive use of morphine for the past few days. The attempt at suicide was discovered by Dr. J. F. Jolley. The Doctor was found lying on a sofa placidly watching his life blood ebb away into a basin which he had placed in a convenient place. The Doctor expresses no regret over his action.

War Department to Be Investigated.

Washington, Sept. 10.—The President has decided to appoint a commission to investigate the War Department. General Schofield and ex-Senator John B. Gordon of Georgia have been asked to accept places upon the commission.

Senator Gray Fifth Man.

Washington, Sept. 10.—It is officially announced that [illegible] Gray of Delaware has been selected as the fifth member of the Paris Commission. Senator [illegible] representative

Good Blood!

Your heart beats over one-hundred thousand times each day. One hundred thousand supplies of good or bad blood to your brain.

Which is it?

If bad, impure blood, then your brain aches. You are troubled with drowsiness yet cannot sleep. You are as tired in the morning as at night. You have no nerve power. Your food does you but little good.

Stimulants, tonics, headache powders, cannot cure you; but

Ayer's Sarsaparilla

will. It makes the liver, kidneys, skin and bowels perform their proper work. It removes all impurities from the blood. And it makes the blood rich in its life-giving properties.

To Hasten Recovery.

You will be more rapidly cured if you will take a laxative dose of Ayer's pills each night. They arouse the sluggish liver and thus cure biliousness.

SATURDAY, SEPTEMBER 10, 1898.

BRITAIN IN AFRICA.

From time to time the enemies of Great Britain, or at least those ready to carp at her greatness, delight to gloat over apparent reverses as indicative of her decadence. From time to time these actions have been discredited by events and the grand old power comes out with flying colours, and those colours those which have "braved a thousand years the battle and the breeze." The diplomatic tilt between England and Russia was ascribed by many as a victory for the Slavonic Bear, but it only needed a few days for the Russian to cry "peccavi," and, in a diplomatic way, sue for peace. The Battle of Omdurman was another proof that Britain is "all there," without parade or fuss. General Kitchener waged a splendid campaign and gained a glorious victory—a victory great in itself, but greater in the results it represented. The results of this battle are the solidification of the British influence in Egypt, the destruction of the evil power of the dervishes, and the opening up of the interior of Africa to British power, influence and commerce. Immediately after the battle of Omdurman, General Kitchner, sent a flotilla of British gun boats up the White Nile to Lake Albert Nyanza. The British have already established their authority on the Uganda on the north shore of the Victoria Nyanza. From this point a British officer has been pushing down the Nile and when he shall have met Kitchener's gun boats, the British power will be established in unbroken continuity, from the delta of the Nile on the Mediteranian to the heart of Africa, the Victoria Nyanza, a long step in the establishment of British influence in the East half of Africa from the mouth of the Nile to the Cape. True, it is stated that a small party of French has pushed eastward from Lake Tchad through the Soudan and reached the Nile between Khartoum and the lakes. Whatever claim this force may have established is the only possible obstruction to the carrying out of British plans and what it amounts to is to be viewed in the light of the fact, that Kitchener, with his splendid army of 25,000 men now actually in the heart of Africa, a great warlike subject population from which to recruit, an immense cultivated territory as a source of supplies and easy communication by means of Africa's greatest river, is in a position to neutralize this slight apparent advantage. His army at present holds the key to the entire interior of Africa.

On the other hand the power of the British is creeping up rapidly northward from the Cape. By the terms of the convention with Germany, Britain is left with a free hand in the Transvaal, whose ultimate and not distant fate seems to be absorption. Cecil Rhodes has done much in procuring the extension of railroads about 800 miles—from Bulawayo to Lake Tanganika. With a steamer service on this lake, a distance of about 300 miles, a railroad to Victoria Nyanza Lake and direct water connection from this lake to the mouth of the Nile, we have a clear all British route from south to north, and vice versa. Though there are disadvantages on the latter part of this route, it establishes British influence from the Cape to the Delta, and is another evidence that either by diplomacy or arms Britain gains her legitimate ends, and that she is in a position to carry out the motto, "What we have we'll hold."

Poor Appetite.

Plenty of people lose their appetite, get weak and feel miserable during the summer season. Nothing will so quickly restore the natural desire for food, renew the energies and build up the health as Burdock Blood Bitters.

"For a long time I was troubled with weakness and pain in my sides, and had no appetite. I had great soreness through me and was confined to my bed a good deal. Doctors' medicine failed to cure me. I got a bottle of Burdock Blood Bitters and it did me so much good that I used 5 bottles more and am now entirely well." LUCRETIA HADLEY, Bury's Green, Ont.

B. B. B. cures all diseases of the Stomach, Liver, Bowels and Blood. It goes far,—only 1 teaspoonful at a dose. Children, 10 to 30 drops. Add the water yourself.

A P. E. ISLAND J. P.

INTERVIEWED BY THE PATRIOT'S SPECIAL CORRESPONDENT.

Overwork Brought on Neuralgia and Shattered Health Generally—Passed Many Sleepless Nights.

From the Charlottetown Patriot.

The Patriot's special correspondent "Mac." being in the eastern section of the island on business, heard many complimentary remarks concerning Dr. Williams' Pink Pills, which appear to be the favourite medicine in all parts of Canada. Among those who are very emphatic in their praise of this medicine is Neil McPhee, J. P., of Glencorrodale, and our correspondent determined to call upon him and ascertain from his own lips his views in the matter. Mr. McPhee was found at home, and as he is a very entertaining and intelligent gentleman, our correspondent was soon "at home" too. When questioned about the benefits he was reported to have received from the use of Dr. Williams' Pink Pills, Mr. McPhee said: "About four years ago I got run down from overwork on the farm. As there is considerable timber land on my property, I thought I could go into making timber in addition to my farm work. The task however proved too heavy for my strength, and I soon began to break down. I contracted a severe cold, neuralgia followed, and I found myself in shattered health generally. I felt very much distressed and discouraged and spent many sleepless nights. I tried several very highly recommended medicines, but received no permanent benefit from any of them. As Dr. Williams Pink Pills were so highly recommended through the press, I thought I would give them a fair trial. After using a few boxes I found they were having the desired effect and I began to find my wanted health and strength gradually returning. I kept on using the pills until I had regained my former vigor and had gained considerable in flesh as well. Now I consider myself a healthier man and feel as well as ever I did in my life. I can conscientiously recommend Dr. Williams' Pink Pills to any person suffering as I was, I have the utmost confidence in their curing properties."

Rheumatism, sciatica, neuralgia, partial paralysis, locomotor ataxia, nervous headache, nervous prostration, and diseases depending upon humors in the blood, such as scrofula, chronic erysipelas, etc., all disappear before a fair treatment with Dr. Williams' Pink Pills. They give a healthy glow to pale and sallow complexions. Sold by all dealers and postpaid at 50c a box or six boxes for $2.50, by addressing the Dr. Williams' Medicine Co., Brockville, Ont. Do not be persuaded to take some substitute.

A Baptist Minister.

Rev. M. P. Campbell, the highly esteemed Pastor of the Baptist Church, Essex, Ont., says:—"From my personal use of Doan's Kidney Pills I can say they are an excellent remedy for all kidney troubles."

TWIN TORTURERS!

Lumbago and Rheumatism made Harmless by Dodd's Kidney Pills.

Lumbago and Rheumatism cause endless pain and suffering. Every man and woman who runs chances of getting wet, or catching cold, is liable to suffer from one or both. Our hospitals are full of sufferers from these diseases; none are more painful. Every nerve is on fire; every joint is a centre of agony; every muscle an area of torture. To move hand or foot makes the victim shriek with agony.

Rheumatism makes more cripples than all the railroad accidents that ever happened. Twisted, mis-shapen caricatures of humanity, who cannot walk without misery, are to be seen every day. The kidneys are to blame. If they are healthy you needn't fear Rheumatism or Lumbago. Dodd's Kidney Pills keep the kidneys healthy and cure Rheumatism and Lumbago. Dodd's Kidney Pills ALWAYS CURE.

General Conference Entertained by the Social Union.

THE MILLION DOLLAR SCHEME.

The First Official Report on the Plan to Distinguish the Opening of the 20th Century Energetically Debated—The Details of the Expenditure Proposed—A Committee Appointed.

Toronto Sept. 10.—A great deal of routine business was transacted at the Methodist General Conference yesterday afternoon, and the first thorough ventilation of the 20th century million dollar scheme was had. There was a very animated discussion on the report, and so much light was thrown upon the subject that the conference is nearer seeing eye to eye with the committee than would be thought possible in a single afternoon's debate.

Dr. Ryckman reported from the Twentieth Century Fund Committee. The probable objects of the fund, he said, would be as follows:

1. Forty-five per cent. to be devoted to educational purposes, to be used in paying the debts of various institutions named.

2. Twenty-five per cent. to go to pay the debts of the Mission Society, Church and Parsonage Aid Fund, and other objects.

3. Fifteen per cent. for superannuation and supernumary funds.

4. Ten per cent. to St. James' Church, Montreal.

5. Five per cent. for the General Conference and Union Church Relief Funds.

With regard to the raising of the fund the committee recommended the institution of a most thorough canvass, so as to reach the last man in the church. In this connection it recommended the appointment of a committee of 40, laymen and ministers, to oversee and direct the movement. The names suggested for the board to handle the fund were:

Ministers—Revs. Potts, Sutherland, Briggs, Griffin, Courtice, Wakefield, Burwash, Ryckman, Williams, Scarling, Brecken, Dewart, Withrow, Young, Grundy, Carts, Bond, Robson, Crews, Gaetz.

Laymen—Messrs. Cox, Massey, Flavolla, Gurney, Mills, Sanford, Torrance, McCormick, Dean, MacLaren, Aikens, Allison, Rogerson, Hart, Ashdown, Finley, Fraser, Robinson, Spencer, Beer.

General secretary, Rev. Dr. Potts; treasurers, Hon. G. Cox, Dr. Potts, Mr. W. F. H. Massey and Rev. Dr. Briggs.

Missionary Matters.

The conference at this point heard the reading of the mission report. A growing income characterized the year just closed. The gain amounted to about $12,000. Missions in China were in a bad way, owing to the outbursts of native violence. Medical hospitals had been opened in West China. Japan showed a slight gain in the number of converts, though many opposing influences were at work there. The work among the Indians had been very successful. The home missions were flourishing, but the evil of too many men in the field was still to the fore. A Klondike mission had been established, but was suffering from lack of funds. The young people's forward movement had been fruitful, of benefit to missionary work. They had contributed over $9,000 during the past year. A recommendation was to keep the mission funds in one whole, instead of home and foreign.

The discussion of the afternoon on the report of the Twentieth Century Fund was then entered upon with profit to the members of the conference. The addresses delivered were of a high order.

The Banquet.

The brilliancy of the evening entertainment completely dwarfed the dry programme of the afternoon, however important the former may have been from a business point of view. Seldom has the Horticultural Pavilion presented a more imposing sight. Everything in the way of decoration that could be done had been carried into effect. Mr. C. D. Massey, President of the Methodist Social Union, occupied the chair, and around him was a brilliant gathering. The addresses of the evening, after the banqueting, were by Sir Oliver Mowat, Lieutenant-Governor of Ontario; Rev. John Bond of London, Eng.; Rev. P. Bradford, D.D., representing the United States, and Rev. A. Coke Smith, representing the South of that country.

Kidney Trouble

FOR YEARS.

Nothing did Mr. R. E. Pitt any good until he got

Doan's Kidney Pills.

Throughout the County of Leeds and the Town of Brockville there is no medicine spoken so highly of for all kinds of Kidney Diseases as Doan's Kidney Pills. As Canada's pioneer kidney pill, introduced by Mr. James Doan, of Kingsville, Ont., in 1885, they stand to-day far superior to all the imitations and substitutes that have been offered the public in their stead.

Mr. R. E. Pitt, the well-known contractor and builder, voices these sentiments when he says, "I have had kidney trouble for years. I have tried numerous remedies without much relief, and had given up my back as gone for good, but since using Doan's Kidney Pills the result has been marvelous! The pain is all gone. I feel like a new man, and can highly testify to the virtues of Doan's Kidney Pills."

Doan's Kidney Pills are sold by all dealers or sent by mail on receipt of price, 50 cents a box or 3 boxes for $1 25. The Doan Kidney Pill Co., Toronto, Ont.

Piles! Piles! Itchin Piles.

Symptoms—Moisture intense itching and stinging; most at night; worse by scratching. If allowed to continue tumors form, which often bleed and ulcerate coming very sore. Wheat in Both Liverpool and Chicago Goes Up a Notch—The Latest Quotations.

Friday Evening, Sept. 9.

Better cables, an advance in the price of cash wheat in the Northwest, a fair export demand, not over heavy deliveries and talk that the Government report to be issued to-morrow will be bullish in character caused the Chicago speculative market to assume some strength to-day, and all future deliveries advanced 1¼c per bushel, closing at the high point of the day.

Although spot wheat declined ½d to 1¼d on the Liverpool board to-day, the September and December options rallied and closed nearly a penny above yesterday's final figures.

Mr. Davies' Musical Compositions.

The "Parish Choir," of Boston, which last year purchased and published a "Magnificat" and "Nunc Dimittis," by Mr. Alfred Davies, the organist of St. Luke's church, has just published a new piece of music, a Jubilate Deo, by the same composer. That one of the largest publishing houses of music in the United States should purchase these compositions is a sufficient guarantee of their excellence. Mr. Davies has taken up his residence on London street, Peterborough, and we wish him all success in his profession as composer, organist and instructor.

MILLER VS. THE BAND.

The Case Tried in the Division Court Yesterday Before His Honour Judge Weller.

The case of Miller vs. the Fire Brigade Band came up in the Division Court yesterday. This was an action brought by Mr. Miller, formerly leader of the band, to recover the amount of two instalments of the town grant of $250, which is paid in six instalments to the treasurer of the band.

Mr. Miller claimed this as a portion of his salary as leader of the band, and the band disputed the claim.

Judgment was given for full amount sued for against Robt. Beach, treasurer of the band, and dismissed as against the Executive Committe, the judge holding that the Executive was not responsible for the treasurer's action.

Mr. Miller has a further claim against the band for $60 00, which will probably be litigated upon in the October court.

Mr. F. D. Kerr appeared for the plaintiff and Mr. D. O'Connor for the defence.

THE PLEBISCITE COLUMN.

THE CHURCHES WILL CONTRIBUTE TO THE CAMPAIGN.

Organization Meetings Held During the Week in Lakefield and Centreville—Speakers From Peterborough Present at Both Meetings.

From Our Own Correspondent.

A special collection is being taken up in most of the churches to-morrow on behalf of the plebiscite fund to carry on the work of the campaign. The remainder of the churches will take it up later. It is hoped that the public will respond liberally, as it is absolutely necessary that funds should be obtained in order to carry on the work successfully. The plebiscite workers must therefore look to the churches for suppor in the campaign between right and wrong. The moneys received on behalf of this fund are appropriated to the best advantage and economy is the motto of the financiers.

A plebiscite organization meeting was held in the town hall, Lakefield, on Thursday evening, 8th instant, and it was well attended. Mr. T. J. Edmison was elected chairman. Rev. Dr. Torrance of Peterborough, gave a very interesting and instructive address on the prohibition question. At the close of Dr. Torrance's address, the election of officers for the organization was proceeded with and resulted as follows:

President—W. Harper.
Vice-President—Robt. Braden.
Sec.-Treasurer—A. J. Kidd.
Executive Committee — Polling subdivision No. 1—Messrs. Montgomery, Paul and Edwards.
Polling sub division No. 2—Messrs. Griffin, Fairbairn and Down.

After a prayer by Rev. Dr. Torrance, the meeting was brought to a close.

Another well attended meeting was held on Thursday evening at Centreville, South Monaghan, and the officers elected for the township of South Monaghan were as follows:

President—Alfred Dawson.
Vice-President—John Riddell.
Sec.-Treasuaer—Rev. J. W. Kirkpatrick.
Executive Committee—R. Deyell, Jos. Porter, T. Hutchinson, Walter Fisher, David Dodds, Wm. Smithson and Andrew McClelland.

Mr. B. Anderson and H. J. Lewis of town were the speakers.

PERSONAL.

Miss Blewett is visiting relatives in Bobcaygeon for a few days.

Mr. and Mrs. F. Pethick, of Rochester, N. Y., are guests of Mrs. R. J. McWilliams, Bolivar street.

Rev. Dr. Stone will occupy the pulpit of the George street Methodist church to-morrow at both morning and evening services.

A large party of Americans from Rochester, who have been summering at Chemong, passed through town to day on their way home.

Mr. and Mrs. J. P. Hurley have returned to Peterborough from Bay City, Michigan. Their numerous friends will welcome them back to town—it is hoped permanently.

Mr. and Mrs. J. R. Stratton, Dr. and Mrs. Morris, of Vernon, B. C., Miss Mary Stratton, Mr. T. P. Coffee, of Toronto, and Mr. J. T. C. Thompson, son of the late Sir John Thompson, have gone to Stony Lake for a few days' fishing.

Mr. H. P. Kennedy has returned from his trip to the Western States. Mrs. Kennedy stopped off in Woodstock, where she will spend some time visiting friends. Whilst in the West Mr. Kennedy visited the big Omaha Fair, which is in full swing from June to November. He describes it as closely resembling the Chicago World's Fair, the grounds being laid out similarly and the buildings being of white composition. Exhibits are contributed by all countries, Canada excelling in fruit and grain. The stock does not begin to be sent in until Oct. 1st.

PETERBOROUGHS ARE EASTERN CHAMPIONS.

THE ORILLIAS DEFAULTED TO THEM YESTERDAY.

By Refusing to Proceed with the Game when Ordered to do so by the Referee—Incidents of the Match.

The biggest crowd of the season assembled at the P. A. A. A. grounds yesterday afternoon to witness the second match in the Senior Series against Orillia, expecting the game to be a fast and exciting one. The play was fast enough to please the most exacting critic, and there was plenty of excitement before the close.

The management anticipated trouble before the match started. The bad feeling existing through the rough treatment accorded the Peterboroughs on the occasion of their two visits to Orillia had roused the indignation of every citizen interested in the game, when the climax was capped by the action of Boulton R. Kean, Orillia's manager, when without provocation he rushed from the timekeepers' seat in Toronto, and brutally assaulted Lionel King. At the time the wire netting which barred out the crowd was the only thing which prevented a riot, and when Kean accompanied his team to Peterborough, yesterday, trouble was expected. The management made every effort to keep the spectators within bounds by roping in the grand stand and engaging five constables and two of the town police to keep order.

From the start off the Peterboroughs kept

ORILLIA ON THE DEFENSIVE

almost continually and although the checking was hard and close the referee promptly interfered in every instance where the players overstepped the mark.

A foul epithet addressed by an Orillia player to a Peterborough man started the trouble, as the word no sooner left his mouth than he was struck. The crowd swarmed out on the field in a twinkling and quite a few mix ups occurred. The referee gave the Peterboroughs two minutes to clear the field and a few words had the effect of instantly restoring order. The Orillia's objected to proceeding with the game and the referee drew out his watch and allowed them two minutes to line up in their places. When the time was up and the visitors still refused to play he awarded the game to Peterborough by default.

The result of the refusal of Orillia to play the match out gives the series to the Peterboroughs and makes them senior champions of Eastern Ontario.

Orillia has already entered a protest against the match being awarded to Peterborough on the ground that the crowd interfered with the play. The field, however, was cleared within the time specified by the referee, and by rejecting his decision in the matter and refusing to continue the match, the Orillias violated one of the most imperative rules in the constitution.

The personnel of the teams was exactly the same as in Toronto, and the ball was faced at 3.13. Peterborough assumed the aggressive from the beginning and carried the ball straight in

ON THE ORILLIA FLAGS,

never allowing it to get farther away than the centre of the field. Jack McCabe finally secured it, and making a dash in on the goals, passed to Lipsett, who scored the first game, amidst wild applause. Time 1 minute.

The ball again travelled in on Orillia territory from the face off, but although the combination work of the Peterboroughs was good, they had hard luck in their shots, two of them striking the goal posts and bounding out again. A lot of clean play was seen around the centre of the field, and then the red shirts again began to press in on Orillia ground. The game seemed to be all Peterborough's way when the Orillia defense suddenly relieved out to the home field by a pretty combination and like a flash the ball travelled up the field and catching the local defense off their guard, was sent hustling into the net, tieing the score. Time, 7 minutes.

The Orillia defense was hard pressed from the outset of the next game and "Butcher" Connors had a chance to get in some of his dirty work on King, upon whose face he played a tatoo with his stick. After seven minutes sharp play Lipsett again scored from a pass by Jim McCabe.

The Peterborough home men again rushed things from the blow of the whistle and it is doubtful if they ever showed up in better form, but although several remarkably close shots were made they were unable to score and on an attack being made on their flags, Dobbin went behind after the ball and it was passed to the front to Armstrong, who lobbed it through easily, again tieing the score. Time, 7 minutes.

In two minutes more Orillia got in some fast combination work, their home spreading well. Watson scored for them in two minutes.

Shortly after play was resumed, the fracas occurred and the Orillias left the field.

Mr. Robert Jackson, of Seaforth, proved a most satisfactory referee.

COUNCIL NOTES.

The action of Councillor McWilliams taked at the council last night in opposing the erection of wooden abutments for new town bridges is decidedly in the right direction and in line with the new policy of permance in connection with civic improvements, which it is understood the council has adopted. His demand that these abutments shall be either of stone or concrete is justified by all considerations of durability and by the experience of the past.

Councillor W. H. White's motion requiring the construction of bridges the whole width of the street between sidewalks is also to be considered. The additional expense in present construction will not be very much greater while the work is going on; and will be much less than it will cost to widen the roadway when in the course of—a street line, it is to be hoped—the roadway will have to be widened to meet the demands of public traffic. It is imperative that in the much used streets, like Hunter, Charlotte and King streets, the roadway shall be of full width, and this leaves only wo important bridges to be provided with full width roadways.

The report of Councillor Meldrum, chairman pro tem. of the Sewerage Committee, as adopted by the council, if promptly acted upon, will result in giving employment to a large number of labouring men during the fall months, and will assist them in meeting the demands of winter with greater comport to themselves and families than would be possible without such employment. The report calls for the construction of sewers as follows: Charlotte street, from Stewart to Park streets, Park street, from Charlotte to Hunter streets, and Hunter street, from Belmont street to Reid street. Reid street, from Charlotte to Simcoe streets, McDonnel street from Water and Dickson streets, Belmont Avenue, from Homewood Avenue to Hunter street. This represents a large amount of work, and should give employment to workingmen till the frost prevents further operations.

The council last night showed itself considerate of the working man by adopting Councillor McWilliams' demand that the remuneration of labourers on corporation contracts should be $1.25 per day, and also Councillor Dawson's further demand that the length of a day on corporation contract work be nine hours. Further consideration is involved in the proviso that on sewer contracts only bona fide citizens of at least six months' residence, shall be employed.

WOODMEN OF THE WORLD.

The Local Branch Experiencing a Boom in Membership—Dr. Harrison, of Toronto, Present Last Evening.

Mr. W. J. Graves, Deputy Consul of the Woodmen of the World, has been in town for the last week in the interests of the Order, and through his efforts twenty five new members were initiated in the local camp last evening, and fifteen applications were filed for admission at the next meeting.

Officers were elected last evening as follows:

Past Consul Commander	W H Meldrum
Consul Commander	Bert Wallis
Adviser Lieut	Wm Buller
Banker	Robt Fair
Clerk	F W Clemenst
Escort	W J McCallum
Watchman	A J McClellan
Sentry	A E Runnals
Board of Managers	H Achison, C E Wright and F A Walden
Physician	Dr Eastwood
Delegate Head Camp	Bert Wallis
Pianist	T R Laing

At the conclusion of business, Dr. Harrison of Keene, Head Medical Examiner of the order in Canada, delivered an address in which he very fully explained the advantages offered to its members by connection with the society. At present the order has a membership of 455 000 in Canada and the United States. In matters financial the branches in Canada are not connected with those across the border, the tie being purely a fraternal one. The order claims to have initiated 4,500 more members during the past year than any fraternal organization in the world.

A large number of Peterborough representative business men were initiated into the mysteries of the order last night.

"FIRST THINGS FIRST."

The first men's rally for the season in connection with the Young Men's Christian Association will be held in the building on Sunday afternoon at 4 15.

Rev. O. C. Elliott will give the address.

To-night at 8 o'clock Mr. McLeod will lead the young men's meeting. The topic is "The story of a Life."

Just now the spiritual work of the Association begins again for another season. The announcements regarding it are the first made because of its great importance.

Those who carry on the work of this department desire all citizens, and the young men especially, to understand that the Association is a Christian institution, founded on the principles tersely expressed in the first original constitution of the organization—known as the Paris Basis. "The Young Men's Christian Association seeks to unite these young men who, regarding the Lord Jesus Christ as the God and Saviour according to the Holy Scriptures, desire to be His disiples in their doctrine and life and to associate their efforts for the extension of His kingdom among young men.

In addition to the two weekly meetings for men some five Bible classes will be conducted, full announcements of which will be made in a few days.

Evening closing exercises will be conducted as last year.

All young men, members and non-members alike, are invited and will be made welcome to all the meetings and Bible classes. While this hearty invitation is extended, none, because they are members or frequent the building, will be unduly pressed at any time to attend the meetings.

PLENTY OF BUSINESS BEFORE THE COUNCIL

THE FILE WAS CLEARED LAST EVENING.

But the Matter of the Selection of a Steam Roller is not yet Disposed of—Better Wages for Employees on Corporation Contracts.

The postponed meeting of the town council was held last evening with Mayor Davis in the chair and the following councillors present, Messrs. Best, W. H. White, Robertson, Hamilton, Denne, Allen, Dawson, McWilliams, Meldrum and J. M. White.

COMMUNICATIONS

were received and dealt with as appended:

From the "B" Padlock Co., offering for sale a safeguard for ballot boxes—Received.

From Thos. Rutherford, applying for sewer inspectorship—Referred to the Committee on Appointments.

From Jas. O'Brien, stating that a tenant should have paid the taxes on a house of his which is to be sold for arrears and asking that justice be done in the matter—Referred to the Court of Revision.

From John Shaughnessy and 138 others asking that the clause of the Market By-law relating to the compulsory weighing of meat, be repealed, as the sale of meat was materially affected by the handling and weighing and the market toll excessive—Referred to the Market Committee.

From E B. Edwards enclosing a bylaw to prevent the discharge of water from houses upon the streets—Received.

From H. LeBrun, in reference to the drainage of his property on Simcoe street, between Park and Downie streets—Referred to the Sewerage Committe, with power to act, on motion of Councillors Denne and Hamilton.

From Peter Warner, applying for the work of running the stone crusher—Referred to the Street and Bridge Committee, with power to act.

From John McGlynn, asking the town to replace a pair of shafts broken by his horse falling through the Hunter street bridge.—Granted on motion of Councillors Denne and White.

From Mary Eano, asking to be relieved of paying this year's taxes.—Granted on motion of Councillors Hamilton and White.

From Rush and Cahill, offering for sale a centrally located lot situated between Charlotte and King streets, for purposes of a corporation yard.—Referred to a committee of the whole council.

From Hall & Hayes, on behalf of James O'Brien, stating that arrears of taxes on one of his lots should have been paid by the tenant and that there was ample distress on the premises to make these taxes.—Referred to the Court of Revision.

From Peter Hamilton, stating that it is wish of the property owners on George street, from King street south to the C.P. R., to have an eight foot instead of a six foot pavement.—Received.

From the Geo. Matthews Co. (limited), in reference to exemption from taxes and the extension of a spur line of the C.P.R. to their packing house—Referred to a committee of the whole council.

From Martin Nearey, asking remission of statute labour tax.—Referred to the Court of Revision.

From the Department of Public Works, stating that the post office pavement will be at once repaired and that the matter of reimbursing the town for paying a claim of $15 00 for an accident occurring thereon is being looked into.—Referred to the Street and Bridge Committee.

From the Underwriters' Association, regarding deficiencies in fire appliances.—Referred to the Fire, Water and Light Committee.

From John Doris, asking remission of Statute Labour tax.—Referred to the Court of Revision.

From J. M. Hood, town clerk, Galt, as follows:

"The town of Galt bought a first-class steam roller from the Fitts Co. of Buffalo, two years ag, and as it was the first one shipp d to Canada they gave us a cut rate, namely $2730 spot cash. The weight of the roller is fifteen tons, and it is giving the very best satisfaction, and now that we have all the necessary road making machinery, including stone crusher and grader, we are having splendid roads, made at no more cost than than the old method. I should say that if you wish to improve your city sall right in and get a roller, crusher and grader. Your City Fathers will never regret the move."

—Referred to Committee of the Whole Council.

From Thos. Rutherford, applying for the position of inspector of granolithic walks on Charlotte street.—Referred to the Committee on Appointments.

From R. W. Bell, M. D., coroner, enclosing the finding of the jury in the case of the death of the late Esther Thornton, in which a recommendation was made that a prohibitory bylaw be passed re the discharge of firearms inside the corporation limits.

A man may dress as well as his own good judgment and the assistance of an artistic tailor may elect. He may take his "tuba" but if his digestive organs are out of order, he will have an unwholesome appearance. His complexion and the white of his eyes will have a yellowish cast. His tongue will be coated, appetite poor, his teeth rusty, his breath abominable. He is one big unmistakable sign of constipation. The quickest, surest, easiest way to cure this trouble is to take Dr. Pierce's Pleasant Pellets. Alliance Rug Dyed with Diamond Dyes.

The cut above represents an Alliance Rug made by a Canadian lady from old woollen rags and yarns all dyed with the celebrated Diamond Dyes. Five colors were used as follows: Diamond Dye Fast Black for Wool, Diamond Dye Fast Scarlet for Wool, Diamond Dye Fast Green for Wool, Diamond Dye Fast Yellow for Wool, and Diamond Dye Fast Dark Blue for Wool.

The ladies of Canada who are successful Rug, Mat and Carpet makers always make use of the Diamond Dyes to color their rags and yarns. Special Diamond Dye colors for Cotton and Mixed Goods are sold; the colors are lasting and permanent. The Diamond Dyes have such wonderful strength that one packet does as much work as three packets of any other dye.

THEY GAVE THE BALLS.

And the People Danced to Pay the Debts of Louis XIV.

In 1712 Louis XIV favored the Opera, then established in the first salle of the Palais Royal (there have been two) with a special mansion for the better accommodation of its administration, archives and rehearsals. This hotel is situated in the Rue Nicaise. The building was generally designated under the name of "Magasia," whence the term "Filles du Magasin" (not "de magasin") subsequently not only to the female choristers and supers, but the female dancers themselves. It so happened that the king forgot to pay his architects and workmen. In order to satisfy them the Chevalier de Bouillon conceived the idea of giving balls in the opera house, for which idea he received an annual pension of 6,000 francs. He was paid, but the king's debtors were not, for, although the letters patent were granted somewhere about the beginning of 1713, not a single ball had been given when the most magnificent of the Bourbon sovereigns descended to his grave.

One day, shortly after his death, d'Argenson, the then lieutenant of police, was talking to Louis' nephew, Philippe d'Orleans, the regent. "Monseigneur," he said, "there are people who go about yelling that his majesty of blessed memory was a bankrupt and a thief. I'll have them arrested and have them flung into some deep underground dungeon." "You don't know what you are talking about," was the answer. "Those people must be paid, and then they'll cease to bellow." "But how, monseigneur?" "Let's give the balls that were projected by Bouillon." So said, so done, and the people danced to pay Louis XIV's debts, as, according to Shadwell, people drank to fill Charles II's coffers:

> The king's most faithful subjects we
> In 's service are not dull.
> We drink to show our loyalty
> And make his coffers full.

A PRICELESS NECESSITY.

Kidney Disease Cannot Hurt when Dodd's Kidney Pills are Used.

Healthy kidneys are absolutely necessary for the production of pure blood.

Pure blood is absolutely necessary for good health—yes for life itself.

If the kidneys are weak, or diseased, the blood is impure, poisonous, and the general health breaks down, before the attack of specific disease.

Dodd's Kidney Pills restore weak and diseased kidneys to health and strength. They stimulate them to proper action, enabling them to filter the poison out of the blood.

Dodd's Kidney Pills are the only medicine known that can and will do this. Therefore, they are priceless and indispensable. All forms of Kidney Disease are cured by them.

Dodd's Kidney Pills have a unique record—Twenty thousand cures, not one failure. You should try a box.

Secondhand Wagon Wheels.

Among the great variety of things sold at secondhand are wagon and truck wheels. Wheels become secondhand from various causes. A concern running fine wagons kept always in perfect order would discard a wheel that was marred, though it might still be serviceable and replace it with a new one. The old wheel would be bought by somebody having a wagon repaired and needing a wheel to replace one broken and wanting it cheap. The secondhand wheel costs little, very much less than a new wheel. It may be possible to put a secondhand wheel of the same color as the other three or very close to it, so that it matches well enough, but men have been known to take for the same end of a wagon two wheels of different colors and different heights.

When finally worn out, the old wagon wheels and truck wheels are broken up. The wood is used for burning and the axle boxes and tires go to the scrap heap.—New York Sun.

INSECURITY.

Every prop on which I lean,
Every earthly prop, I mean,
Of whose power I chance to boast,
Fails me when I need it most.

Lover, brother, sister, friend,
On whose nearness I depend,
Those whose very presence gives
Strength by which my spirit lives,

Fall away by some mischance,
Death or other circumstance,
And I find myself indeed
Leaning on a broken reed.

When these earthly fetters part,
All these clasps around my heart
Fall away, and I am left
Of life's sweetest joys bereft.

To what depths of woe I drop,
Seeking vainly for some prop
All sufficient to sustain
One in loneliness and pain.

Like a drowning man I reach
Upward and for aid beseech.
"Help me, Lord!" I cry and stand
Well supported by his hand.

Through the desert, through the tide
He has promised to abide
Ever near; where'er I be,
Whispers gently, "Lean on me."

Earthly ties, how insecure!
Heavenly ties alone endure,
And my idols all were slain
That I might this knowledge gain.

SMILELESS WOMEN.

Nervousness, Indigestion and General Debility Have Driven Away the Sunshine, but South American Nervine Brings Back the Heart Gladness.

Mrs. D. A. Gray, of Waterford, says:—"For a number of years I was a great sufferer from indigestion and general debility, and many times was unable to attend to my household duties. I was treated by nearly all the doctors in the town and got no permanent relief. I read of a cure by South American Nervine which seemed to exactly fit my case. I procured one bottle and got great relief, and six bottles cured me absolutely. It certainly has not an equal." Sold by H. S. Macdonald.

Free Mustard.

James Russell Lowell said, "All deacons are good, but there are odds in deacons," and it may be added that there are odds in other varieties of men.

Squire Blank, according to Harper's Bazar, was not only the richest man in his village, but the stingiest as well. Nothing gave him such keen delight as to get something for nothing.

One day he and several of his neighbors had been in conference with a manufacturer who contemplated establishing a mill in the town. The conference was held in the one store of the village, and at its close the manufacturer stepped up to a showcase containing cigars and said:

"Have a cigar, gentlemen."

All the men selected a cigar except Squire Blank. He did not smoke. Therefore he said:

"Thank you, sir, but I don't smoke. But as the cigars are a dime apiece I'll take a dime's worth o' mustard if you say so."

Of course the astonished gentleman "said so," and the squire went home jubilant over "a hull half pound o' mustard that never cost me a red cent."

A Fastidious Desdemona.

When Wilson Barrett did his "one night only" performance of "Othello" in Melbourne, he "passioned" with much frenzy and gave rise to a ludicrous situation. Having stifled Desdemona in a businesslike fashion, he came down the stage, being first supposed to draw the tapestry together, leaving the smothered Miss Jeffries comfortably corpsed on the bed.

But in his enthusiasm he did not quite close the arras, and while he was elocuting in the foreground half the audience were tittering at the comic sight of the beauteous corpse in the rear sitting up and arranging her draperies to picturesque advantage. Having seen that they were correctly displayed, Maud Desdemona lay down and went dead again, while Wilson Barrett continued his riot.—Sydney Bulletin.

Sailors Can't Swear.

The regulations of both the army and navy forbid profanity, and any soldier or sailor who objects to being sworn at by his superior officer may make complaint, thereby subjecting the offending officer to trial by court martial. Yet we have reason to believe that such men as Washington, Farragut and Grant could swear and did swear upon occasion, and history furnishes no record of their having been court martialed on that account.—Exchange.

THE CORNWALL DISASTER.

Body of One Victim Recovered From the River—An Inquest.

Cornwall, Ont., Sept. 9.—The body of Daniel Hughes, one of the victims of the O. & N. Y. bridge disaster, was recovered yesterday, and an inquest is being held on the American side by Coroner Smith of Winthrop, N. Y. None of the other bodies have been found. It is now evident that Robert Martin of Montreal is among the dead in the river bottom. He had been off the work for a few days, but left his boarding house that morning to go to work. Several of the men saw him at the work, although the time-keeper, in making his rounds, did not see him, consequently his name did not appear in the list of killed and wounded. The iron of the spans is a total wreck and the removal of it from the river bed will be a costly job.

FAILED TO KILL THE CZAR.

How He Escaped—Staff Officer and His Wife and Conspirator Killed.

New York, Sept. 9.—A despatch to the World from London says: A report is published here of a daring plot to assassinate the Czar of Russia at Moscow last week. The plan of the conspirators was to allow gas to escape into a house on the route of the Czar's procession until the atmosphere in every room had become saturated. One of their number was to remain in the house, and strike a light when the Czar was passing, in expectation that the house would be blown to pieces, and the Czar killed by the flying debris. The conspirator would perish himself as a sacrifice to the cause.

This duty fell to the lot of one Alexander Kolanoff. In his agitation Kolanoff seems to have made an error, as the explosion was mistimed. When it occurred a staff officer and his wife were driving past the house, and they, instead of the Czar, were killed. Their coachman will probably die of his injuries, and about thirty other persons were more or less seriously injured. Kolanoff's mangled body was found among the ruins. The Czar and Czarina drove by just twenty-five minutes later. Many arrests have been made in Moscow, but the Russian press has been forbidden to refer to the matter.

Meeting of the Cabinet.

Ottawa, Sept. 9.—There was a well attended meeting of the Cabinet yesterday afternoon. Those in attendance, besides the Premier, were: Hon. David Mills, Hon. R. W. Scott, Sir Richard Cartwright, Sir Louis Davies, Hon. Wm. Mulock, Hon. W. S. Fielding, Hon. A. G. Blair and Hon. Wm. Paterson, and Sir Henri Joly. Mr. Tarte is in Quebec, Mr. Sifton in the Northwest Territories, and Mr. Fisher returned yesterday afternoon from England.

Mrs. Amos Bonell of Ottawa swallowed half a tumbler of carbolic acid. She is dying. Her husband is an employe of the Printing Bureau.

The main drainage bylaw carried in Ottawa by a majority of over 250. The amount involved is $425,000.

TELEGRAPHIC BRIEFS.

Frank Holmes of Birmingham left Dover at 9.40 o'clock yesterday morning, on an attempt to swim the channel. He was accompanied by a rowboat.

The 18-months-old daughter of James Westell, London, drank the contents of a bottle of stain yesterday and is now lingering between life and death.

A farmer named James Chambers fell into the mouth of a threshing machine at the farm of George Cookman, on the second concession of Peel, and was mangled to death.

Thirty-two carloads of Schlitz Milwaukee beer has arrived at Vancouver, B C., by special train, en route for Manila, and will go via the C.P.R. steamer Empress of China on Monday.

Five new cases of yellow fever have been reported from Taylor's station at Jackson, Miss. Three of the patients are seriously ill, and two show symptoms of incipient black vomit.

POULTRY PROGRESS.

The Ontario Association Elects Officers—A Government Grant Asked For.

Toronto, Sept. 9.—The Ontario Poultry Association held a meeting in the Directors' Building at the Fair yesterday afternoon, with President A. W. Bell in the chair.

Deputy Minister James, who was present, was appealed to for an extra Government grant of $300, to enable the association to properly entertain the members of the American Poultry Association when they meet here in January. A part of the projected programme is a trip to the Government College at Guelph.

Mr. James said in reply that nothing at the Fair had surprised him as the progress of the poultry exhibit, and he promised to lay the matter before the Minister of Agriculture.

President A. W. Bell is re-elected, and the following will compose the Board: Messrs. True of Lindsay, Bonnick of Toronto, McNeil of London, Senior, Hamilton; Bell, Angus; Webber, Guelph; Scott, St. Thomas; Bogue, London.

Horticultural Officers Elected.

Toronto, Sept. 9.—The Canadian Horticultural Association met at the Fair grounds yesterday afternoon to elect officers. The several ballots resulted as follows: President, William Gammage, London; first vice-president, C. Scrim, Ottawa; second vice, J. McKenna, Montreal; secretary, R. Ewing, London; treasurer, J. H. Dunlop, Toronto. The next place of meeting will be Ottawa.

Opium and Wine in Tunis.

The Arabs of Tunis give their children opium to prevent their crying. It is estimated that each child consumes on an average an infusion of one poppy head every evening of its life up to the age of 2 years. No ill effects are noted as resulting from this singular practice.

The men of Tunis who are not Moslems are often hard drinkers. There are shops in the town where a subscription of 5 shillings a month gives the right to come every day and drink as much as one likes. This is possible, as palm wine is very cheap and very strong.

ASSURANCE CO.

OFFICE OF W. A. MURRAY & CO.,
17 to 27 King St., East, Toronto.

Wm. McCabe, Esq., Managing Director, N.A. L.:

DEAR SIR.—In answer to your request for me to decide upon one of the following options offered me for settlement of my 15-payment Life Investment Policy for $5,000 which has matured this year, viz:

1st to take the value of the Policy in Cash..... $5,000.00
2nd, or fully paid-up insurance for..... 3,280.00
3rd, or take the profits in cash and continue my policy without further payments being required from me, same policy participating in future profits. 2,050 25

I find it somewhat difficult to make a decision either of the three options being so satisfactory. I am certainly very much pleased with the results offered me, and as I find many others are giving full testimony to the profit-earning power of this company, I do not hesitate to give my endorsement as well, that the North American Life is one of our strongest Canadian institutions to day giving first class results on Investment Policies, on a safe and conservative basis. I find that my policy, which was originally a Life by fifteen payments, has become an Endowment at the end of the Investment period.

Can't Sleep.

The weary vigils of the night, anxious hours that drag like days. How often they come, and how unwelcome they are. A system robbed by sleeplessness of natural rest cannot be vigorous and strong. The nerves are at fault and must be built up. Dr. Ward's Blood and Nerve Pills are the remedy that cured

MISS EMMA TEMPLE.

HERE IS WHAT SHE SAYS:

At last, after eight months of physical weakness and nervous prostration, caused by over exertion and want of rest,—during which time I suffered greatly on account of the shattered condition of my nerves, and for which I was unable to find any relief. I have found a medicine (Dr. Ward's Blood and Nerve Pills) that in three months made my nerves strong, removed all nervous troubles, built up my physical system and made me strong and well. They removed despondency, and in consequence of taking your valuable Pills I look forward to the future hopefully. I have to thank your great cure for nervousness and bodily weakness for my present good health and strength.

Yours truly,
Signed, EMMA TEMPLE, Hastings, Ont.

The man who breaks in the wild, vicious broncbos on the western plains must have superb physical endurance, nerves of steel, unconquerable vim, determination and persistency. The city or town bred man who has all his life humped his back over a desk, living an unhealthy, sedentary life and failed to take any care of his health, could not stay on the back of one of these vicious brutes for more than three jumps.

It takes a whole man to conquer a vicious animal. People may talk about intellectual superiority and refinement and good breeding but every man takes off his hat to physical strength and endurance. While the man who leads a sedentary life cannot hope, in this respect, to rival these sturdy men of the plains, they can be sound, vigorous, healthy men if they will. It is a matter of care of health while one has it, and the proper measures to restore it when it is lost. Most diseases begin with some trouble of the digestive organs or of the liver. Troubles of this nature starve the body, because they prevent it from receiving its proper supply of nourishment. Dr. Pierce's Golden Medical Discovery gives a man an appetite like a cow-boy's and the digestion of an ostrich. Its great work is upon the stomach, large intestines and liver. These are the organs that nourish a man's body. This medicine makes them strong, vigorous and healthy. It fills the blood with the nourishment that builds new, solid and healthy flesh, muscle and nerves.

"I am now enjoying magnificent health, after having suffered for years with chronic catarrh," writes Ramon Sanchez, Esq., of Penasco, Taos Co., New Mexico. "By the use of your 'Golden Medical Discovery' I have recovered my health, and am now, physically *a sound man*, attending to my business and enjoying life."

WHEAT LOWER.

Chicago Market Gained a Little Notwithstanding Depressing Cables From Liverpool—The Latest Prices.

Thursday Evening, Sept. 8.

Large receipts and lower cables failed to weaken Chicago wheat to-day. The shortage of stocks at Chicago and at Northwest points advanced the price of the cash article, and futures closed the day about ½c above yesterday's final figures.

On the Liverpool board to-day Sept. wheat closed ¾d per cental lower than yesterday, with the December option up nearly 1d.

Leading Wheat Markets.

Toronto, No. 1 hard (new)	0 71½	....	....	....
Toronto, red	0 66	....	....	....

Toronto St. Lawrence Market.

The receipts were small to-day. Four hundred bushels of wheat sold at: White and red 67c, and goose 67c. Three hundred bushels of barley were sold at 43c to 46c and five hundred bushels of oats sold at 28c. One load of peas was sold at 50c per bushel.

Ten loads of hay were brought in, clover selling at $5 to $6.50 and timothy at $7 to $8.50. Straw sold at $7, two loads being in.

Toronto Live Stock.

The run of live stock at the Cattle Market to-day was fair for Thursday—55 loads all told, composed of 1050 cattle, 1025 sheep and lambs, 700 hogs and 50 calves.

The fat cattle offered to-day were of fair quality.

Prices for exporters were firm at Tuesdays quotations.

Good butchers' cattle were scarce and prices remained firm at Tuesday's figures.

There was a large number of stockers on the market, selling at $3.25 to $3.40, with a few choice lots at $3.60.

Prices for heavy feeders remained the same.

Very few milk cows were offered and only six which sold at $25 to $45 each.

Calves—Prices firm, but unchanged.

Sheep—Prices for export sheep were inclined to be easier, owing to adverse reports from English market. Ewes sold at $3.25 to $3.50, and bucks $2.50 to $2.75 per cwt.

Spring lambs sold fairly well, owing to extra demand for Exhibition purposes. Prices unchanged from those of Tuesday.

Hogs—Deliveries light, only 700, and prices unchanged.

Chicago Live Stock.

Chicago, Sept. 8.—Hogs—Estimated receipts to-day 25,000; left over from yesterday 4231; fairly active, averaging 5c higher, heavy grades weak; light, $3.00 to $4; mixed, $3.55 to $3.97½; heavy, $3.50 to $3.95; rough, $3.50 to $3.65.

Cattle—Receipts 11,000; steady to stronger; beeves, $4 to $5.70; cows and heifers, $1.75 to $4.60; Texas steers, $3 to $3.90; western, $3.40 to $4.45; stockers and feeders, $3 to $4.50.

Sheep—Receipts 16,000.

Montreal Live Stock.

Montreal, Sept. 8.—There were about 900 head of butchers' cattle, 40 calves, 1000 sheep and lambs, and 50 store hogs and small pigs offered for sale at the East End Abattoir to-day. The butchers were present in full force, and there was an active demand for the best cattle, but common and inferior beasts were very difficult to sell at any price. There were really no choice beeves on the market, and the best on view sold at from 4¼c to 4½c per lb.; pretty good stock sold at from 3½c to 3¾c; common dry cows and thrifty young stock at from 2½c to 3¼c per lb. Nothing of the leaner beasts and small bulls would bring over 2c per lb. A number of bulls were bought for the Buffalo market at 1¾c to 2c per lb.

Calves sold at from $2.50 to $12 each. Shippers paid 3½c per lb. for sheep; lambs being from 4c to 4½c per lb. Mr. A. Richard bought 14 choice lambs in one lot at $3.75 each. Fat hogs sell at from 4¾c to 5c per lb.; store hogs sell at from $6 to $8 each, and the small pigs at from $2.50 to $5 each.

East Buffalo Cattle Market.

East Buffalo, Sept. 8.—Cattle—The offerings were moderate, but the demand was not particularly brisk. Choice fat butchers are nominally steady and common ones lower. Calves were in light supply, fair demand and generally sold the same as yesterday with a few sales of extra fancy at higher figures; choice to extra were quotable at $7 to $7.50; good to choice, $6.50 to $7; heavy, $6 to $4.

Sheep and Lambs—The general basis of the market was sheep steady and lambs higher. The offerings were moderate, 17 loads. The demand for the good stuff was active. Lambs, choice to extra, were quotable at $5.75 to $6.15; good to choice, $5.50 to $5.75; common to fair, $4.75 to $5.50. Sheep—Wethers, choice to extra, $4.65 to $4.85; mixed, choice to extra, $4.40 to $4.65; strictly yearlings in light supply, but quotable when sold separate from sheep at $4.75 to $5; common to fair mixed sheep were quotable at $3 to $3.50.

Cheese Markets.

Kingston, Ont., Sept. 8.—At the cheese board to-day 420 white and 1180 colored boarded, August make; sales 430 at 8⅛c; 7 15-16c offered for white, but no sales.

Brockville, Sept. 8.—At the cheese board to-day 53 factories offered 1742 white and 2552 colored August cheese; 7⅞c was offered for both; no sales.

British Markets.

A TORONTO LADY

Sends Wise Advice to her Suffering Sisters Everywhere.

It is: Use Dodd's Kidney Pills, and They Will Make You Well—Mrs. Henderson Speaks From her Own Experience.

TORONTO, SEPT. 9—Mrs. Webb, of Whitby, is not the *only* lady who has recently discovered the almost miraculous power of Dodd's Kidney Pills over "Female Weakness," and Kidney Disease.

The Toronto Ladies who use this wonderful medicine are numbered by hundreds. And we may be sure that they would not use it if they did not find it the best for their particular troubles.

Mrs. J. Henderson, living at No. 287 Sumach Street, has experienced the healing power of Dodd's Kidney Pills, and like all true women, she is anxious that her suffering sisters should share in the good things. Therefore she makes the following statement: "I have for eight years endured the tortures of 'Female Weakness,' Kidney Disease, without being able to find any relief from either doctors or medicines. Finally, however, I heard of several ladies being cured by Dodd's Kidney Pills. I bought and used two boxes, and am now thoroughly and completely cured."

Could any lady who suffers from any form of "Female Troubles" need a better "pointer" than this?

Dodd's Kidney Pills cure all "Female Troubles" by removing their cause.

They go further than this. They heal and strengthen the kidneys, ensuring a plentiful supply of pure, rich, cool blood, pure, clear complexion, and vigorous health.

To walk and suffering women, and young girls just budding into womanhood, the best advice possible is "Use Dodd's Kidney Pills."

Try a box. Dodd's Kidney Pills convince by curing you.

Early Whist.

Mrs. Hervey writes on Oct. 25, 1697, to her husband, that his "four sisters have been hear this afternoon, and as they never come unattended, brought with them Mr. Ga—, Mr. Down— and Mr. Bo—. Part of them staid and played at whish (sic) tel this moment, which is past 11 a'clock."

Twenty years later (March 18, 1717) Lord Hervey, as his title was then, writes to the Rev. Mr. Thomas Foulkes, the tutor of Mad Tom Hervey, at Oxford, about that son's gambling propensities. He is to follow the example of his "good grandfather Hervey, who, pray tell Tom, never played at any game but whist, and at that only in Christmas time for sixpence a corner."

Lady Bristol was at Bath in April, 1728, and was then in the center of the world of whist. "Poor Bishop Nevell," she writes, "can scarce be reckoned among the living, being (in my opinion) wors than dead. They say *he sitts* at Lindsey's with one to hold his cards and another to give him snuff. Palsey and gout have brought him to this missirable condition." On May 1 she cheerfully informs her husband that the diversion of the evening is the puppet show. "Betty is gone with Lady Torrington. The whiskers have promised me some diversion after 'tis over."—Notes and Queries.

The Cunning Fox.

The sagacity of the fox is most wonderful. It is related that he is tormented by fleas, and when the infliction becomes unbearable he gathers a mouthful of moss and slowly walks backward into the nearest stream until only the mouth is left above the surface of the water. The fleas meantime take refuge on the moss, and when the fox is satisfied that they have all embarked he opens his mouth, and the moss drifts away, while the wily fox regains the bank, happy in freedom from his tormentors.—Exchange.

MADE OF THE RIGHT STUFF.

Commander Powell Won the Admiration of His Captor.

Sand always commands respect and consideration from those who are themselves brave men. Captain Jones, who was in command of the Florida troops when they took the United States arsenal at Apalachicola, always delighted in telling this incident:

"Commander Powell was in charge of the arsenal," related the captain. "He had been in the service for 20 years and he made a gallant defense against overwhelming numbers. To be accurate, he did about all the fighting himself and gave us the impression that he had quite a respectable force back of him. When we entered, the grim old warrior turned and addressed us thus:

"'Five minutes ago I was commander of this arsenal; but, in consequence of the weakness of my command, I was obliged to surrender, an act which I have never hitherto had to do during my entire military career. If I had a force equal to or even half the strength of your own, I'll be d—d if you should have entered that gate until you walked over my dead body. You see, I have but three men. If they were soldiers instead of common laborers, we would be fighting yet. I now consider myself a prisoner of war. Take my sword, Captain Jones.'

"I did take it mechanically and under the spell of his outburst, but immediately returned it and told him he was too brave a man to disarm. Spontaneously the entire command gave three cheers for Powell and there was not one of us who did not feel proud that he was an American citizen."—Detroit Free Press.

RELIABLE AND PERFECT.

Diamond Dyes the Only Scientifically Prepared Dyestuffs for Home Use.

Expert color scientists have been asserted that the Diamond Dyes are the only perfectly pure home colors produced in the world. The popular Diamond Dyes have, long ago, banished from the homes of our country all madder fustic, logwood, cochineal and all other antiquated dyestuffs. Home dyeing as at present done with the Diamond Dyes, simple though the process is would quite astonish our grandmothers.

Dyes with the grand qualities and extended reputation of the Diamond Dyes soon commend themselves to all thoughtful and intelligent women. They are the brightest, strongest and fastest and the easiest dyes to use.

The Diamond Dyes like all other perfect preparations are very largely imitated in style of package. These imitations are in every case worthless and adulterated mixtures, ruinous to goods and positively dangerous to handle.

For your autumn dyeing work use the Diamond Dyes; refuse all other makes that your dealer may ask you to try.

ODD NUMBERS IN PRICES.

Fascination of the Bargain Counters. Nine Cent Goods Sell Better Than Eight.

In speaking of special sales the other day and of the figures that seem to attract the public the most, as well as the class of customers who frequent these sales, an old and successful merchant said:

"There is a fascination in odd numbers that always draws purchasers. Now, I will call your attention to some of the marked down articles that are being sold on our bargain counter. Notice those neckties that are marked at 87½ cents, three for $1. It is an actual fact that we sold twice as many of them at 87½ cents as we would sell at 35, and we sell as many again by allowing three for $1. When a man sees them selling at 87½ cents, he naturally imagines that they are 50 cent goods, and he reasons that he can get three cheaper than he can one, so he takes three. He really does get a bargain, but he would not take it at a less attractive figure.

"Speaking of odd numbers, it is a curious fact that some are much more attractive than others. Nine cents, for instance, is one of the most attractive figures and sells more goods than 8 cents would. Thirteen and 17 cents are by no means so good as 10 cents for running off an extra line, while 21 and 23 are comparatively poor sellers. Thirty-seven and a half cents is a great favorite and better than 39 by far. Forty-nine used to be much better than it is now. I attribute the fact that it is less popular to the number of jokes that have been made upon it.

"When you get above 50 cents, people commence to look more at the real value of a thing and less at the price charged. Seventy-nine cents is a great favorite, and 99 is one of the best figures still that we have to sell at, although not so good as it used to be. It will sell, however, 25 per cent more goods than will $1."—Washington Post.

STANDARD OF EXCELLENCE.

A Mountaineer Who Highly Appreciated Really Good Cooking.

As a rule the mountaineer of Kentucky is not a gastronomic connoisseur, and the visitor at his table is quite as likely to hear dried apples referred to as "fruit" as he is to find any other kind of fruit on the table. Occasionally, however, one of them is sufficiently fortunate to get away from his fastnesses, and living temporarily down in the blue grass has an opportunity to acquire some virtues not otherwise obtainable. It was such a one I caught up with one morning in June along the ridge of the Cumberlands.

"I'm looking for a place," I said after a few preliminaries, "where I can stop for a week or so while I look up some timber I have in this neighborhood. Do you know of any?"

"There ain't much uv that sort around here," he replied, "exceptin you go to Mount Pleasant, an I reckon that's too fer. But hol' on," he broke in with a sudden thought, "thar's the Widder Tackett. She axed me yistidy to see some uv you folks at the mill and tell 'em she had a place to sleep and eat two or three men ef they wuzn't too pertickler."

"Is it a pretty good place?" I inquired thoughtlessly.

The young man's face flushed.

"Well, I reckon," he said with some emphasis. "She's goin to be my mother-in-law come next September."

"Oh, I beg your pardon," I hastened to explain. "I only asked to know if she had good eating. Some of that we get in private houses even in the cities, you know, is not the best in the world."

"Cities be derned," he said with a fine feeling. "Yer ain't never tried the Widder Tackett's pie yet, mister, an yer want to keep still till yer do. Ain't nothin like it nowhere, no matter what kind uv a pie she sets afore yer. It's all ne plusibus unum, an no mistake. Why, I'm tellin you that I sot down to one uv her pies last week, dern ef I recomember what kind it wuz, ef I ever knowed, an I wuz eatin right into it like a hot shovel goin into a snow pile, an Bill Rogers across the table frum me called me a liar, an I never said a dern word to him tell I had plum e't my pie and got my teeth picked. Dern my buttons ef I did, colonel."

I did not like to inquire further into the mystery of what happened to Mr. Rogers after the last taste of the pie was safely housed by my informant, but I made a fair guess and went on to see the Widow Tackett concerning board and lodging for one man for one week.—Washington Star.

A REMARKABLE CASE

A Plattsville Lady Rescued by Dodd's Kidney Pills from Terrible Danger.

Plattsville, Ont., Aug. 29—The Echo, published here, report the remarkable cure of a well-known lady, Mrs. J. Barnett, who had two years suffered from Nervousness, Rheumatism, Back-ache, Sleeplessness, pains in the head and eyes and general weakness.

Dodd's Kidney Pills cured her.

To an Echo reporter Mrs Barnett said: "I had no appetite, I could not sleep, I was a physical wreck.

"I was treated by doctors, but their medicine gave me no relief.

"I started taking Dodd's Kidney Pills, and before I finished one box, I had improved noticeably. I have taken twelve boxes in all, and am now completely recovered. I ascribe my recovery to Dodd's Kidney Pills alone."

Dodd's Kidney Pills are a *positive* cure—the only cure,—for Kidney Diseases of all forms. They have never failed.

The Icelanders' Language.

How strange it would seem to us today if there existed, say in Newfoundland, a colony of Anglo-Saxons, sent there by King Alfred, and speaking still the pure old Saxon tongue of King Alfred's Wessex! Yet this would exactly parallel the case of Iceland. While Danes and Swedes have modernized the ancient Scandinavian of the Sagas into the Danish and Swedish of the present day the Icelanders still go on speaking the tongue of their forefathers pretty much as it was spoken by Rolf the Ganger and Harold Hardrada. They read the Sagas in the tongue of the old singers as easily as our children can read Shakespeare and the English Bible.—Grant Allen in Popular Science.

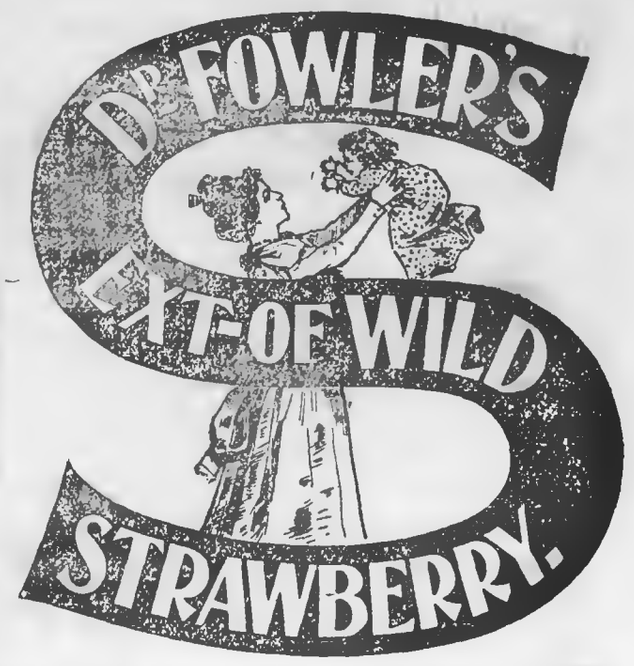
MOTHER, SAVE YOUR CHILD

Summer Complaint and Cholera Infantum blot out many a little life.

The only safe and reliable remedy that mothers can always depend upon is



An Ontario Mother saved her Baby 13 years ago.

KEEPS IT FOR HER BABY NOW

I wish to state that 13 years ago my little daughter Fanny was so very sick with summer complaint that I thought she was going to die. I hardly knew what to do for her when my sister-in-law Mrs. J. Kay, of Norland, told me to procure a bottle of Dr. Fowler's Extract of Wild Strawberry, as her husband always kept it in the house to use himself.

I got a bottle and started giving the medicine to my little girl. I have read of things being "worth their weight in gold" but never did I know of any medicine to which that expression could be truly applied but Dr. Fowler's Extract. It certainly worked wonders and I often tell people I don't believe Fanny would be alive to-day except for Dr. Fowler's Wild Strawberry and God's help.

I have a little baby, Hugh, five months old, and I always keep a bottle of the Strawberry in the house ready to give him if he should be taken ill with diarrhœa, as I don't consider we would be safe without it.

MRS. JOHN WARD,
Bolsover, Ont.

A Nova Scotia Mother Speaks.

During the past summer my little boy was dangerously ill with diarrhœa. He grew very weak so that he could hardly stand. I noticed Dr. Fowler's Extract of Wild Strawberry advertised so I concluded to try it. He mended immediately after taking it so that in a few days he was well as ever. I shall never be without it in my house as I consider it the most valuable medicine made.

MRS. DANIEL SMITH,
Lunenburg, N.S.

A Manitoba Mother's Opinion.

I think Dr. Fowler's Extract of Wild Strawberry is the best medicine that was ever made for diarrhœa, dysentery, and summer complaint. It is the best thing to give children when they are teething. I have always used it in our family and it has never failed.

MRS. CHAS. SMITH,
Shoal Lake, Man.

A Quebec Mother's Statement.

I have used Dr. Fowler's Extract of Wild Strawberry in our family for the past ten years with every satisfaction. In all cases of diarrhœa, dysentery, and summer complaint of children or adults it never failed to give instant relief and we would not care to be without it in the house, especially during the fruit season.

MRS. H. RITTER,
Mount Pleasant Village, Que.

For over 40 years now Dr. Fowler's Extract of Wild Strawberry has been recognized everywhere as the only safe and reliable remedy for the cure of Diarrhœa, Dysentery, Cholera, Cholera Morbus, Cramps, Colic and Summer Complaint of children or adults.

We would warn the public against accepting any substitute or imitation, many of these are positively dangerous. See that the full name "Dr. Fowler's Extract of Wild Strawberry" is on every package you buy. Sold everywhere at 35c. a bottle.

clerk be instructed to write to the Grand Trunk Railway Company and notify the company to fence on each side of their line passing through lot 11, south of Townsend and west of George streets.

3. Your committee instructed the town solicitor to take such steps as are necessary to protect the the town's interest in the island in the river Otonabee, crossed by the Canadian Pacific Railway, so that the railway company would not obtain the ownership by right of possession.

All of which is respectfully submitted.

J. B. McWILLIAMS, Chairman.

The report was adopted.

THE COMMITTEE OF THE WHOLE

reported as follows through Councillor J. M. White:

To the Mayor and Council of the Town of Peterborough:

Gentlemen,—Your committee of the Whole Council beg leave to report as follows:

1. That your committee, after having received offers from different firms and heard their representatives, ordered a rock crusher from the William Hamilton Manufacturing Company at $1,025. The crusher is to be a No. 5 Blake crusher, mounted, 21 feet elevators, with screens and everything complete, and to be tested before being accepted.

2. We also recommend that the Street and Bridge Committee be authorized to ask for tenders for bridges over the creek on Sherbrooke, Dalhousie, Donegal and Smith streets.

3. We further recommend that the sidewalk on the north side of Charlotte street from George to Aylmer street be the only granolithic pavement constructed this fall in addition to what is now under contract, and that the work of constructing it be given to Messrs. Doran & Sheehy, provided they can complete it early enough this fall, and if they cannot that it be left over until next year.

4. That the granolithic pavement on George street from King street to the Canadian Pacific Railway be made eight feet wide.

All of which is respectfully submitted.

J. M. WHITE, Chairman.

The report was adopted.

On motion of Councillors McWilliams and Dawson, the Town Engineer was instructed to prepare specifications for Concrete as well as wooden piers for the new bridges.

THE FIRE AND LIGHT COMMITTEE,

through Councillor J. M. White, reported as follows:—

To the Mayor and Council of the Town of Peterborough:

GENTLEMEN,—Your Fire, Water and Light Committee beg leave to report and recommend the following rules for the government of the fire hall:

1. James English is Chief stableman and in charge of the fire hall by order of the council. He will therefore be held responsible for all work being properly and promptly done, for the hose being in good order, and for the hall, engine, wagons and other appliances being kept clean and in good order.

2. The drivers are subject to the orders of the chief stableman while on duty at the hall. They are therefore required to carry out his instructions promptly and thoroughly, and any disregard of his instructions must be at once reported by him to the Chief Engineer or Assistant Chief.

3. The waggons must be cleaned immediately after returning from a fire, if in the day time, and if at night, they must be cleaned first thing in the morning.

4. The chief stableman must measure all feed for the horses immediately before being fed, and carry all keys used in connection with the hall.

5. The driver on duty in the hall must have the mangers filled with hay when the horses at work outside are brought in.

6. The stable and hall must be cleaned each morning before 9 o'clock.

7. The horses in the stable must be drilled each morning at 9 o'clock. The harness must be buckled on at each drill.

8. The chief stableman must attend each fire and attend to the hydrants, subject to the orders of the Chief Engineer or other officer in charge.

9. The chief stableman must be continuously on duty at the hall, unless he receives leave of absence from the chairman of the committee.

10. The chief stableman shall have charge of the fire engine and must keep it clean, inside and out, change the water in the boiler at least every two weeks, and keep it in first class order in all respects. Every two weeks he shall make a written report of the condition of the engine to the chairman of the committee.

11. The driver on duty at the hall in the morning shall go to dinner at 11.30 o'clock and return at 12.30. The chief stableman shall go to dinner at 12 30 o'clock, and the driver who was on outside duty in the morning shall go at 13 o'clock.

12. The front doors of the hall shall be kept open from 9 o'clock a. m. to 9 o'clock p. m. on each day from May 1st to October 1st.

13. After nine o'clock each day the chief stableman and driver on duty at the hall shall wear parade uniform.

14. The chief engineer shall have power to suspend the chief stableman or driver or drivers for any disregard of the rules or neglect of duty, and he shall have authority to fill temporarily the place or places so made vacant, and he shall report the suspension on the day it is made to the chairman of the Fire, Water and Light Committee. The chairman shall summon a meeting of the committee to receive and deal with the report.

15. The chief engineer shall make a written report to the chairman of the committee every two weeks as to the condition of the hall, stable and apparatus.

Your committee also recommend that these rules and the whistle signals and the places where the alarm boxes and keys are, shall be printed and placed up in the hall, and a map of the town showing where the hydrants are shall also be placed in the hall.

All of which is respectfully submitted.

J. M. WHITE, Chairman.

The report was adopted.

On motion of Councillors J. M. White and Allen the chairman of the Fire, Water and Light Committee was authorized to purchase the tools needed in the fire hall.

Councillor W. H. White, chairman of the Property Committee, reported verbally that the flooring of the fire stables had been replaced.

THE SEWERAGE COMMITTEE.

reported as appended, through Councillor Meldrum:

To the Mayor and Council of the Town of Peterborough:

Your Sewerage Committee beg leave to report as follows:

1. Your committee examined petitions for sewers on the following streets: Charlotte street, from Stewart to Park streets; Park street, from Charlotte to Hunter streets, and Hunter street, from Helmont avenue to Reid street; Charlotte street, from Stewart to Aylmer streets; Reid street, from Charlotte to Hunter streets; Rubidge street, from Charlotte to Simcoe streets; McDonel street, from Water to Dickson streets; and Helmont avenue, from Homewood avenue to Hunter street. We found these petitions sufficiently signed and recommend that they be granted.

We also instructed the Town Engineer to take the necessary levels and to prepare plans and specifications for the construction of these sewers.

All of which is respectfully submitted.

W. H. MELDRUM, Chairman pro tem.

The report was adopted.

Councillor McWilliams had communications from Toronto, Hamilton and London, setting forth the fact that these corporations, when letting contracts for work, stipulated the wages to be paid, the hours for work, etc. He thought that Peterborough could not go far astray in putting similar conditions in any new contracts which were let. At present the corporation labourers drew $1 25 for a day of nine hours work, and he understood that on the granolithic work the men only got $1 00 for a day of ten hours. He felt this was an injustice and had written to these cities to ascertain if conditions could be inserted in a contract governing these matters. Seconded by Councillor Denne he moved that a clause be inserted in future contracts placing the minimum wages at $1.25 for a day of nine hours.—The motion was seconded by Councillor Dawson, who had suggested the nine hours system and was carried.

The solicitor will be asked for a written opinion in the matter, as to whether the town has the power to insert these conditions.

The taxes on Robt. Redmond's property were remitted, on motion of Councillors Dawson and Denne.

BYLAWS.

Councillor Denne introduced a bylaw prohibiting the discharge of roof water on the streets. The bylaw received its several readings and was passed.

Councillor J. M. White introduced the bylaw providing for a grant of $200 00 to the West Peterborough Agricultural Society. It was passed, signed and sealed.

RESOLUTIONS.

On motion of Councillor Denne and Allen, a culvert will be placed on Charlotte street east of Water street to carry the water from the street into the river, diverting the water from running into the yard in the rear of Mr. Green's houses.

Councillor Dawson objected to the culvert being put in to drain Mr. Green's premises.

Councillor Denne thought Mr. Green had as much right to have his premises drained as Councillor Dawson had to put in a private sewer at the town's expense to drain his premises on Bonacord street.

The motion was carried.

Councillor McWilliams rose to explain the matter occasioning the controversy between Mr. J. H. Burnham and Mayor Davis. He stated that early last spring when a young man named Switzer got into the water through the ice at Bottle creek his brother had been drowned in trying to save him, and the young man was finally rescued by a party consisting of Mr. Wallace, Mr. Miller and Mr. Alexander. Mr. Burnham and the speaker had interested themselves in obtaining honour certificates for the men in recognition of their bravery, and it had been arranged that the presentation of the parchments should take place at the September meeting of the council. Mr. Burnham had come to his office a few days ago and stated that a disagreement had arisen between himself and the Mayor over the matter, and the Mayor had afterwards come in stating that there would be too much business on at the Tuesday meeting of the council to make the presentation and that it could be done at a meeting to be held the following Friday. The speaker pointed out to the mayor where he was making a mistake in this decision inasmuch as Mr. Wallace was working in the country and had been notified to come in to the first meeting which was on Tuesday. If he came in it would be only right that the presentation should be made. The Mayor on hearing of these circumstances agreed to make the presentation, but before Mr. Burnham could be seen he had met Mr. Wallace and had told him how the matter stood. Mr. Wallace had then refused to come to the council.

The mayor stated that the circumstances were exactly as related by Mr. McWilliams, and that when he heard the particulars of the matter he had prepared an address to read when the presentation was being made.

On motion of Councillors McWilliams and J. M. White, the presentation will take place at the October meeting.

Councillor Meldrum drew attention to the dangerous condition of the sidewalk on the east side of the river in the north ward, after which the council adjourned.

MOTHERS

Read What CUTICURA REMEDIES Have Done for Skin-Tortured Babies.

My little sister (Annie Matthews, La Plata, Charles County, Md.) had the cow-pox, when only seven years old. She suffered terribly, and everything we tried did no good. Every time her clothes were taken off, every bit of scab would come with them; she was raw all over. One box of CUTICURA (ointment) and a cake of CUTICURA SOAP, *cured her in three weeks.* Mrs. ELIZA ROYE, Feb. 23,'98. 1219 Fourth St., N. W. Wash. D. C.

My niece's little baby, two years old, was so badly afflicted with Eczema that he needed constant watching. His face was always full of large sores which he scratched constantly. Mornings, his clothes, face and hands were stained with blood. They had medical treatment, and tried everything. She commenced CUTICURA REMEDIES. The sores left his face *and he was entirely cured.* Mrs. L. J. ROOT, Feb. 16, 1898. New Scotland, N. Y.

Our little boy was four weeks old when he had Eczema, in the most horrible state. His face was full of scabs, and parts of the flesh were raw. We used CUTICURA SOAP and one box of CUTICURA (ointment), and *in one week* this boy was *as good as ever.* Mr. and Mrs. J. C. FREESE, Feb. 15, 1898. 360 So. First St., Brooklyn.

When my boy was three weeks old, I noticed a very red roughness on his face. We had several doctors, but they did no good. I was told to use CUTICURA REMEDIES, and after using one box and a half of CUTICURA (ointment) and CUTICURA SOAP, *he is entirely cured.* Mrs. W. G. LOVE, Feb. 26, '98. 1913 Wilder St., Phila., Pa.

Babies on fire, babies burning up, babies in agony from torturing and disfiguring, itching and burning, skin and scalp diseases. None but mothers realize how they suffer. To know that a warm bath with CUTICURA SOAP, and a single anointing with CUTICURA, purest of emollient skin cures, will afford instant relief, permit rest and sleep, and point to a speedy cure, and not to use them is to fail in your duty. Think *of the years of suffering* entailed by such neglect. Cures made in childhood are speedy, permanent, and economical.

NATURE'S ASSISTANT.

Such is the Name Given to Dodd's Dyspepsia Tablets.

Because they Ensure the Action that Nature intended—They cure Constipation and all its Evil Consequences.

Constipation is the curse of every community.

No one escapes it. Young and old suffer from its blighting power, and many suffer in silence, believing that their burden can never be removed.

But Nature has provided a cure for every ill, and there is a certain, positive and permanent cure for Constipation. That cure is Dodd's Dyspepsia Tablets.

In every box of this magic working remedy, is a supply of small brown Tablets which were compounded, after years of study, research, and experiment, for the care, positive and permanent, of Constipation.

And, during the time that Dodd's Dyspepsia Tablets have been before the people, there is not the record of one single case of Constipation, that these Tablets have failed to cure when they were used according to directions.

Their action on the bowels is immediate, if the dose be gauged correctly. They act gently, and never gripe.

By restoring regular action of the bowels, the Tablets ensure the carrying off, and expulsion from the system, of the poisonous waste products, that, in Constipation, remain in the system, fester and decompose there, poisoning the blood and causing the outbreak of many other serious ailments.

Nature intended the bowels to act at certain regular intervals. When, from any cause, this regular action is interrupted or stopped, the most serious, and dangerous consequences follow.

Dodd's Dyspepsia Tablets cause the bowels to act naturally, and so carry out the wise provisions of the Creator, ensuring health, strength and vigor to the whole frame.

From the CROWN of the Head To the SOLES of the Feet!

WE COVER ALL.

Men's Hats, Men's Shoes, Men's Clothing, Men's Underwear, Men's Furnishings, All Under One Roof!

The first calendar month of Autumn, 1898, will bring us up to the greatest business we have ever known. Measure it by bulk, weight, dollars or transactions, we get the same great result—BIGGER THAN EVER BEFORE.

What makes Gough Bros. so distinctly Gough Bros. is the SPIRIT that actuates their business—all the time striving to serve our customers better and better—shortening the road from producer to consumer, and saving to buyers every penny of cost.

We maintain our well earned title of "THE WONDERFUL CHEAP MEN"—our fixed aim has been and will continue to be, to sell a $20 suit for $15. The suit you paid $17.50 for we can duplicate for $12.50. You may think our prices are sometimes too low—too low for good clothing—but if special prices or unusual discounts are given us, we take them off to you to make larger sales.

First Instalment of Fall Goods.

66 CASES—14 Huge Cases of Clothing and Furnishings, 40 Cases of Boots and Shoes, 12 Cases Hats and Caps.

Clothing—everything is brand new, fresh and clean—the handsomest and best Tailored Ready-to-Wear Clothing ever shown in Peterborough—selected for Peterborough's best trade.

HATS and CAPS.

We're able to discount the trade, because of unusual buying power. We go direct to the makers and insure fine qualities by knowing what to buy and what to let alone. If you're a judge of quality, it won't take any talking from the salesmen.

—On the finest Fur Fedora Hats we take off 35c., and ask only $1.65.
—On the best Fur Felt Stiff Hats we take off 50c., and ask only $2.00.
—On Men's Knockabout Hats we take off 20c., and ask only 35c.
—On Men's Silk Hats, latest styles, we take off 50c. and 75c., and ask only $3.00 and $3.75.
—Youths and Boys in same proportion.

BOOTS and SHOES

Warranted not to crack, nor take in washing. Ours isn't the common kind of Boots and Shoes. If anybody can beat the quality, the style, the price, we'll quit the business.

—On the best $3 Men's Selected Shape Balmoral or Congress, we take off 40c, and ask only $2 60.
—On the best Men's Fine Hand-Made Balmorals we take off 35c., and ask only $1.65.
—On the best Fine Patent Leather Oxford Shoes, turn soles, we take off 45c., and ask only $1.40.
—On the best French Dongola Kid Button (common sense) we take off 30c., and ask only $1.60.
—Misses', Boys', and Children's in same proportion.

CORRECTING A MISTAKE—Who sells the cheapest goods — themerchant who is compelled to buy in one higgling market, and is tied down to one grasping manufacturer, or the merchant who has the freedom of all the competing markets and manufacturers of the world? Do men buy Hats cheaper where nothing but Hats are sold, or Boots cheaper where nothing but Boots are sold, or Clothing cheaper where nothing but Clothing is sold? Might as well expect a farmer to do as well for his family by raising nothing but Pumpkins as if he raised a mixed crop.
